# PREFACE.

THE articles dealing with the district of Fyzabad and its various subdivisions, towns and villages in the ald Gazetteer of the Province of Oudh, were taken almost wholly from the valuable and diffuse Settlement Report of Mr A F. Millett which embedied a large proportion of the remarkable notes and reports of Mr. Patrick Carnogy and the late Sir John Woodburn. These contained much that is now obsolcte and still more t a purely traditional and speculative character. compiling the present votame I have found this work of great assistance, but I am far more deeply indebted to Mr J. W. Hose, i C. S., for the unsparing labour he ias devoted to the collection of fresh reste isl and to his saluable corrections and criticisms, The aucient history at the district has been furnished by Mr. R. Burn, I. C.S. and the rest I have collated from the various r aileble scurees.

### CHAPTER I.

#### GENERAL FUATURES.

The Fyzahad district lies in the north-cast of the province of Road and helween the parallels 26° 9° and 26° 50° north latitude and area. Sig 41' and 83° 8' east longitude. In shape it is a fairly regular revallelogiam with an excrescence at the eastern corner. The northern boundary is formed throughout by the river Chagra, which is when the district for a distance of eighty-five miles and separates. - from the district of Goods in the Pyzabad division and from Usti in the Gookhpur division of the province of Agrae To the south and south-west his Sultanpar, the hour law is no partly artificial, but elsewhere natural and formed by the Majhoj river in the east and the Gamin in the south-west corner. The total Light of the Sultanpur border is sixty few miles, and the average treadth of this district from north to south is about twenty miles. The left of the western lemmdary is formed by the district of Back built, while so the case Evzahad marches with the Azunguh district of Gorakhpin. The total area in 1901 was 1,115,282 acres or 1759.5 square miles. this includes the rew detailed villages which lie beyond the contines of the district to the south-cust and is secrounded by Azamquili territory. The area is constantly bulk to charge owing to the creater action of the Ghager, which armually adds to this district large stretches of sends waste flong it's course or transfers them to those on the northern bank,

In its general aspect the district consists of a level plain of a Topog generally unitom character, the only variations in the flatness of the surface being caused by the various streams and desinage channels which run lengthways through the district from west to said the numerous small depressions in which the surface water collects and which have no adequate natural outlet. The only exception to this general description is afforded by the scat-

of the Ghagra. These expanses of shifting sand with occasional patches of arable loam are locally known as manihas, they are of the ordinary alluvial type and present no special features. The low lands are bounded by the old high bank of the river which in most places is very clearly defined. Beyond this lies a flat open country in which the wide expanse of cultivation is only relieved by thickly-dotted inhabited site, with their adjacent groves of mango and makua, by small lakes, and by numerous patches of thak jungle. In places, too, wide usar plains appear, resembling those which are so common in the south of Outh; such land is particularly to be found in the southern part of pargana Akharpin and to a less extent throughout the Akharpin and Tanda tabals. In the user tracts the villages are generally large and compact, while elsewhere they addinarily consist of a mere collection of scattered humlets. In the west of pargana Mangalsi, however, there is a remarkable number of large villages, although in this part of the district user is rate. The average elevation of the country above the level of the sea is not more than 300 feet

The rivers and streams of the district, indicating the general direction of the drainage, all flow in a direction roughly parallel to one another from west-north-west to east-south-east. They belong to three different drainage systems, all of which eventually lead into the tianges. To the no this the Ghagra, in the centre and south-east the Ton- and in the south-west the tiunti. All the others are an all affluents of these and, except as local drainage channels, are generally insignificant

The only great fiver is the Ghagia, which to not the northern boundary, first touching the district in the extreme north-west of pargana Mangalsi and having it in the most easterly point of Pithar. It drains a considerable part of these parganas and also of Hayeli Oudh, Amsin and Tanda; its effect is, however, but little felt beyond the high southern bank, which rises above the stream to a height of some 25 feet. During the rains the river attains an immonse size and volume, it is extraordinarily erratic in its action and frequently changes its channel from year to year, shifting from side to side of its wide sandy bod. In the cold weather and during the early summer months the river shrinks to comparatively small dimensions; it leaves on either side a broad

LĄ\*

ZT&

stretch of rich alluvial land, although in places there are wide expanses of sand covered with tamarisk jungle. The river is considered secred by the Hindus, and the portion between Gupta ghat in the Lyzabad cantonments and Bilhaighat below Ajodhya possesses acculiar sanctity. Here it a known as the Saga, a name which one t electof the river bears in the hills of Almora beforests junction with Te Kah or Suda at Rame-law u, and which is also applied to the sabeli in Kieri, which falls into the Kaunala or Ghagin. The G. agra is practically useless for infigation purposes, but at the same the there is no darger from flooding except in the lowlands. if mer days the Ghagra was the principal highway of the district and still bears a large traffic both of the country boats of the old patterns, and also of steamers which ascond and descend the river stween Ajothya and Patna in Bengal. The freights consist if all kirals of goods for the markets of Upper India, while large recalors of pilgrams are conveyed in this manner to and from the · Inrica gathering- at Ajodhya Since the great development of the plway systems, however, the amount of water-borne maffic has greatly diminished. The only bridge over the fiver is the temporary structure at Nayoghat near the Ajodaya glattrailway strition, which 's ephasist during the rains by a farry steamer. There are aumerour ferries, of which mention will be made late.

The Gragen receives no tributaties of any size or importance in the distinct. In the extreme west of pargana Mangalsi it is paired by a rarell -tream een Silona ferry, lot the me thy represome a backwap or old bed of the river. A small river known o the Threws pon- the Chagra near the team of The La . It has guirw " origin is some fluls in the centre of pargona Alasin and flows on inegaba course along the wath of the Tenda pargare, evenbully training math towards the Ghagra. To a great part of its souse its baids are covered with yough, which gives the stoom in a the que appearance. The river is used to some extent for erization, and for this purpose is frequently domined. Its fact is ier light, and consequently it is liable to special out in damaging finds ofter heavy run at its head.

Further east is another small stream called the Pikia, which Pikia cos area: Remdih Sarai aleas Garha in the south of pargana Bubar and thous eastwards from Tendua to the district boundary. After

separating Fyzabad from Azamgarh for a short distance it enters the latter district, but reappears in the eastern portion of Bichar, and after bending northwards falls into the Ghagra near Kamharia ferry. For a considerable distance in the beginning of its course the river traverses an user plain covered with scattered dhak jungle, and here collects a considerable quantity of drainage water. There is a permanent bridge on the road from Jalalpur to Ramnage, and its passage on three other roads lower down in its course is effected during the dry season by temporary pilo bridges. A short distance before its junction with the Chagia the Pikia is joined by the Sarju, frequently called the Gadaiya or the Chhoti Sarju for distriction a stream which has its origin in Azamgarh, and flows north to form the boundary between the two districts in the south-eastern corner of Birhar Another small tributary of the Ghagrais the Tunni, a stream which has its origin in a string of phile between Tanda and Paskhari. It flows in a south-casterly direction past Kichhauchha along the boundary of the Birhar and Surhupur pairting and thence into the Azamgach district where it joins the Ghagia. The river is extensively used for irrigation and is dammed in several places, so that it is frequently fordable. There are bridges on the roads from Jalahou and Akbarpur to Ba-khari and from Jalabur to Rumnagar; but only the last is permanent. The Tounii is of much importance as a drainage channel and needs improvement. The other terbutaries are quite insignificant. In the north-west of Bishas there is a chain of excepts, which develop into the Makrahi nala, and so reach the Chagin; while the case relact of the same pargana is also drained by the Ainwan and . At Apolliya a peter rivulet, called the Tilai or Trlang which coes in Mangalsi, joins the main stream, serving as a during time for the cast centre of Mangala and the west of Havel. Oudly, but being otherwise of no importance.

The second system is that of the Tons, the name given to the combined waters of the Marka and Bisui after their junction on the western berder of pargana Akharpur, some four or five miles west of the aheal Leadquarters. The Marka rise- in pargana Rudauli of Bara Banki and flows through the centre of the western half of the district, separating the Mangalsi, Havels Oudh and Amsin parganas on the north from Khandansa, Pachhimrath and Majharra

ĮΨ.

uri

ı,

ī

on the south. A short distance south of Goshainganj it enters the sust-mentioned pargana and proceeds in a direction generally southcurt to the Akbaipur boundary. Its course is throughout exceedtagly tortuous, but it acts as an efficient charrage channel in most seasons, although at times it is subject to sudden floods. In the cold weather the stream occasionally runs day. The Bisui, the southern feeder of the Tons, rises in the north of the Sultanpur de trict and enters I wahad in the south of Pachbimrath. It then flows estwards through this pargana and Majhama to join the Matha Both these streams are largely used for irrigation, and, like the other rivers of the interior of the district, mowell adapted for scientific storage. After their junction the waters of the two rivers, now known by the single name of Tons, flow south-castwards past the towns of Akharpus, Jalaipur and Nagpur, to leave the district in the extreme attacts of the Surburper pargana near the village of Ramgarh and the tabul of Ahamla. The over is navigable as all time - is as w Julalpur, and in the cases boars go up to Alchaeper, but the passage is rendered very long and difficult at all tapes by the name ricable bends of the river. The Tons is referred at Alcharpar, Sato terms and Altabla there are also temporary bridges during " As reason as the energy of function of the two component sceams, at Muzapur jub above Alchaipa, and at Jake pare, Theswhere ferries are to be found every few moles. The make of the Fous we as a rule well defined and in places the charget is deep; a canonally, however, a overflows in times of flood, as do the Matha and Bisai. This was notably the case of 1872, 489 and 490%

The chief affluent of the Tons a the Majlion, which generally. Majurome the conform boundary of the district from its on colorstvisites. Thisses in some philanear Kinawan some nates year of the and from Fyzapad to Alinhabed and thence flows east more, the and loss of the Pachlimenth, Majbacka, Albarpar and Suburpur arganas, combadly i iming the Lour in the Azamgark de tric the lover part of its course tholds water all the year found, but long frequently dammed for tengation perposes is generally fordable. There are permanent bridges at Chandauli, Patra Harlans, I Maharua, Dostpur and Suchulpur. The two last no fine old tideouty structures during from Nawabi days on the roads from Tands to Dostpur and Jampur.

nti,

Lastly, in the south-west corner is the Gamti, which after separating Bara Banki from Sultanpur forms for a few miles the boundary between the latter and pargana Khandansa of this district. It is fed by one or two small streams, one of which flows south along the boundary from Amaniganj, while another imperfectly drains the south-east of the pargana. The banks of the Gamti are, as usual, high and well-defined, scored with numerous ravines, and cowned by a belt of sandy soil of varying fertility. The river is too far below the level of the country to be of any use for irrigation. There are several unimportant ferries over the Gamti, all managed by the Sultanpar authorities.

es sad

١

These visces and their affluents carry off most of the drainage of the displict, but in years of neavy uninfall the channels of some of the streams, and in particular of the Torrand Tannoi, are not sufficiently wide or deep to despess of all the wat a that finds its war into them, the result being that the lowlying villages on their banks are Hable to inundation. In several tracts, too, the drainage is somewhat defective, the realt being the formation of julls and awamps whose overflow in abnormally wet years is liable to do considerable damage to the surrounding country. In all parts of the district isolated jhils occur, in some cases of considerable size, but occasionally collections or chains or juds are to be tound lying in the more depressed portions in which the natural slope of the surface is not sufficiently non-ked to result in the development of a regular stream. The more important jhils will be mentioned in the various pargana activies. The most as need ble series of swamps are those in the neighbourhood of Milk pur in the south-west; round about Data in in the Majhama pargana and near Brokhari in the cast of the district, where the Taunri Nadi takes in rise are in ordinary a reins of considerable value as providing means of scrigation for the land in their neighbourhood and it is only in certain cases and under overptional circumstances that they prove a some of danger. In a few localities waterlogging is likely to occur after a series of web seasons, and the deterioration is progressive. In the Fyzabad tabil the areas in which the drainage is most defective comprise the centre of pargana Haveli Oudh, the Thirws depression in Amsie, and the village of Kola and its vicioiry in Mangalsi. In tabsil Bikapur the north centre of Khandansa, the west centre, south-west, and the extreme southwast of Pichhimiath may be mentioned; in the Akba pur tahsil similar land is to be found in the north of Majhaura, the south centre of Akbarpur, and the north-east of Surhurpur. In the Tunda tabeil the drainage is better, or where the jhils have no natural cutlet, as in the south of Birhar, there is less likelihood of ever damage. The total area under water in 1904 was estimated at 95,236 acres of 8.5 per cent. of the whole district. This figure, he acver, includes the rivers as well as the jhils; the highest propartions are to be found in the Tanda, Haveli Oudh and Mangalsi omiganus, in each of which the lotal amounts to ever ten per cent., all ito the lowest is that of the Bikapur tabell, where the land under water is not much more than six per cent, of the whole,

These meas in which the drainage is defective constitute the Proca talk of the land which can in any way to classed as precarious, In addition, the alluvial manifes along the Chages is necessarily if this nature as, owing to its exposure to the annual floods, it conmains practically no settled cutrivation. In years of drought, on the other hand, when difficulty is easted by the absence rather than the superalamdance of water, the macis that suffer most are or depressions in which the soil is heavy and where the is the prevailing crop. The jinks then tait and the less is selious by them of the important place taken by sice at on, the kharif supples. It is probable, however, that in all years a sufficient a ca can be cultivated in the rain harvest to protect the detrict from perlong d famine; as although much of the land is ordinarily o igated from jhils increased use can be made, when this so are fails, of the existing wells while temporary wells can be made in most places. In the Tanda and Akbarpu parganes, as well as in parts of Amsin and Mangalsi, unprotected wells are almost imposwill to construct by reason of the sandy nature of the subsoil, and more mayonly wells are required to provide security in dry years.

The total area returned as barren or waste in 1901 amounted was to 134 837 acres of 166 per cent of the whole. Ters, however metaded the area covered with wa er and also that occupied by sites, roads, buildings and the like. The latter amounted to 43,119 spics, leaving only 40,462 acres of 3-52 per cent, of the district as setually unculturable land. At the same time an additional

land

amount of 183,266 acres or 164 per cent, was returned as culturable waste, although this included recent fallow to the extent of 20,793 acres. Omitting the latter, we obtain a total area of 202,935 acres, of uncultivated land in the district under the headings of banch and culturable waste and old fallow. Most of this can be treated as helonging to a single class, for in the present high state of development there is but little land in the district which is capable of profitable cultivation that has not been already brought under the plough. The dividing line between the differont classes is necessarily faint and ill-defined, and it is generally a matter of accident or conjecture under which head any such areas find an entry. At the time of the first regular settlement the land coming under these three heads covered a very much more extensive area than at present, amounting in all to 287,200 acres. During the following thi ty years it was reduced by 54,749 acres, and since the last scalences the diminution of the area has been constantly maintained. It is worthy of remark that the area formerly classed as barrer was found to have decreased at the last assessment by over 12,000 acres—a fact which of itself testifies to the inadequacy of the classification; the mea classed as culturable waste, too, had nearly doubled, while the amount by which the old fallow had been reduced was of itself equivalent to the total increase in cultivation

gios

i

A considerable proportion of the wasto area is occupied by serub jungle and expanses of open grass which have never been brought under the plough. None of the jungle tracts, nowover, are of any great size, and most of them consist of patches of dhak trees, the wood of which is cut periodically and sold for fuel. In the west of the distact there is very little jungle except in pargana Pachhamath's a small area is to be found in Khandansa where there is a wide open plain extending from the west centre to the south-case corner and containing some scattered patches of dhak trees and a few areas of grass waste in the nodas. In Pachhimiath the jungle, are somewhat numerous. There is a patch of fairly thick dhak and grass jungle north of Milkipur; a small but compact area under dhak just east of Shahganj; a similar patch in the open plain between Malethu and Sarai Khargi along the Bisui river; while the whole of the portion south of the road from

Milkipur to Palua Lohani, between the roads from Fyzabad to Rai Bandi and Isauli, is covered with stretches of thick dhat jungle, though it is much broken up with cultivation and contain- some big villages. Along the borders of Pachhimuath and Majhama there is much open land covered in places with light dhak jungle, to the scath of Haidargani, and also along the Bisai trem above Janua to some distance below Bhiti. In pargana Akbarper there is a large patch of thomy serub jungle in the villages of Yarki, Marthus and Bhartlupar, from which branches extend into Majlaana and Tanda. Along the Ton- from Akbarpur to Samanour is to be seen a fair amount of scattered babul jungle while the whole of the south of the pargana, below the mads from Akbarpin. o Mahama and from Akharpur to Saidapar, is an usar plain with cattered patches of dhak jurgle and villages at somewhat rare opticivals. Pargana Su ha pur contains a good deal of dhick in various places; to the cast of Asopor, around Gabindpa, and Newada i the south-east, and also acar Usiaha, the last being connected with the large Akbarpin, planete theire thewest. Let thy, the whole southern portron of western Biolan, extending from Buka to Malpar and theree north to Remnagar, is a wate open plan with a asignal patches of shield the the pungle, partied and the benefitbounhood of the vellages of Nasapar, Mirzapa, Goste Catto Ama, Mention should also be made of the recupied bads along the Glagra right, which are in places accord with deese place or omansk jungle. Trese pateles are always lable o demee, ou so the present time the largest expanses of the one than in Manjina Kulan in pargace Mangalsi ne a Pyzebad. Mac iba Mani 10 Amsia, and near Magrahi and Chahora in Bichar-

The frees of the district are given ally the sum as the entoned throughout eastern. Outly and call for no special relation. In the stores the mange and matheur are to be seen in great numbers, while elsewhere the paper, so not brilled and the thock are the nest conspicuous features in the landscape. Bambors, too, are very terminal and are to be seen in the neighborshood of almost extraviblage and bambet. The jungle postures, apendoon, tinde, are strengthed and refineres. The various kinds of grass are used for that string, for fuel in sugar

7. IL [2:5] refineries, and for door, screen, and various other purposes. The tamarisk is employed for thatching and basket work, while mention may also be made of the wild fruits, such as ber and aonia, which are used both for food and for the manufacture of drugs and dyes.

1 OF.

The artificial groves are very numerous and the area covered by them is large in almost all parts of the district. At the time of the first regular settlement groves covered 55,757 acres or 542 per cent. of the total erea. The proportion was highest in the Khandansa and Mangalsi pargapas in the west, and lowest in Akharpur and Surhupur. Since that time there has been a considerable decrease in the grove area, although possibly the records of the first settlement are to some extent unreliable. It is said that a number of groves were cut down for fuct when the Oudh and Robitkhand Railway was started, but 'his would hardly account for the decrease of 3,000 acres when was observed at the last assessment, especially as numbers of new groves have been planted throughout the district from one to time. Since the settlement there has been a further small decrease in the grove Linds, the total in 1904 being 51,246 acres or 1th per cent of the whole. The distribution is somewhat uneven, as in the Bikapa, tabul the area under groves is \$1 per cent, of the whole and in Fyzabad 5-2 per cent.; in Tanda, on the other hand, it is no more than I per cents, and in Akbarpur only 3.2 pm cent, of the land is covered by groves. The decrease is not contined to any particular portion of the district, but has been observed in all pargamas except Amsin, Akbarpur and Majhaura; it is most marked in Pachhim ath, Khandansa and Haveli Oudh, the last of which has lost over 800 acres of grove land since 1865.

, m

178,

sta la

As the geology of the district exposes nothing but the ordinary Gangene alluvium, the mineral products are merely the same as those which are to be found throughout Oudle. The most valuable is the kind of limestone universally known as kanker, which occars both in the nodula and back forms in almost all parts of the district, and especially in the neighbourhood of usur. It is found in layers at a depth of a few feet below the surface and is used for road metalling and building, as well as for the manufacture of lime. The cost of quarrying kankar is one raped per hundred cubic feet, but the most important factor in the price is the distance it has to

be carried from the quarry. The lime which is made from kankar is largely used in building and generally fetches from Rs. 20 to Rs. 25 per hundred cubic feet. Another mineral perhad is wick-carth, which is found all over the district and kilns on be generally seen in the neighbourhood of the larger towns. The lineks are made both after the ordinary English fashion and or the small native type, the price varying according to the quality. The former are made in these qualities, the price ranging from R4 4 to R8, 10 per musand. Native bricks of the kind known as parpathe cost about Rs. 3, and lakhore bricks Re 4 per thousand white son-dried bricks are much cheaper, the usual parces bear a me-third of shore amounts. Tiles for cooling are also manufactured in the terrief and are generally sold at Re. I per thousand tion of ordinary bouses the common timber of the country, such as manga and *mahar*, is gene ally employed, but logs of the superior peries have to be imported from Balaranghas and elsewhere Lenge bamboos are sold at Rs. 12-8-0 per hundred, and secretar or hatching-grass from Rs. 6 to Rs. 42 per hund ed bandles. The stail s of whar and sugareane are are employed for the same parpiec. The long grass known as pulse or Lasonic which grows in he naturibos, provides an excellent coategral for theading, and is sold at a rete varying from six to ten bun Hes fee he sugges.

The prevalent soils in Presided are much one some as those found throughous cone if Outly, being generally a least found in the level portions of the upland tract, with same on the Juglice ground this clay in the depression. The local nomene atmedische vever, different from that prevailing in the adjace it cans of Ouds. beam, elsewhere known as deposit is herocalled decise, a term that \* also applied to first class soil in J. a spec. Asome ach and western Clay is known as unad, as a decrease white sandy sal is called belong on the well-known bloom. The series user is also in common use, as applied to the burrow oil intected with the where efflorescences known as reh, while somewhat similar to this is ingle per hard unproductive soft mixed with fine gravel. The uplants are generally known as *upgrawe*, slepang ground as tikar, and ragged uneven soil as lahar. These terms all b bag to a natural dassification, but they are perhaps less commonly used than the states of conventional soils, the laster having been employed in

North

both the regular as essments. The terms locally employed are the same as in other Oudh districts: gound for the well manued and highly cultivated land surrounding the homestead; manifer for the middle zone, sometimes called migna, which comprises the bulk of the village lands and is regularly cultivated, receiving as much manuse as is available; and jule for the outlying fields, in which the cultivation is more or less casual and which receive practically no manure. For ental purposes these terms are replaced by james, qualitand farda respectively. The first properly signifies the land paving a high rent, the second that commanding a money tent according to gaid or agreement. and the third land which is merely recorded as cultivated, for which the root is often in kind only. Ordinarily, however, these names are merely used to denote the division of land into good, middling and bad. At the settlement the area of each village was demarked according to this classification; but owing to the absence or any well-marked boundary between the three zone-, no exact divisor was to be achieved. The returns show 26-98 per cent as janua, 33 47 per cent as quali, and 39 05 per cent. us fardy, from which it is clear that the classification was very different from that of other destricts in which the land was divided into good, manifer and pelo for settlement purposes. This is to the illastrated by the fact that at the first regular settlement, in which the same system was adopted, the respective proportions were 58, 31 and 11 per cent.

3 01

The wild in mals of the district are not remarkable for either then number it vacety. The ordinary species which eccui throughout Oud's to the south of the Chagra are to be found, out nowhere are they unusually abundant. The plack-back is practically extinct and at no time so ms to have been contain, although a few small heads used to be contin the west of the district. A few biggia are found along the Chagra and in patches of district, but are not numerous elsewhere. Jackals, toyes and hares almost complete the list. There is a large head of domestic cattle which have runwild in the lowlands near the Fy abad cantonment and do much damage to the crops; occasionally they have been succossfully hunted and captured. The birds of the district, too, are generally

the same as those which are found in the adjoining tracts. Of the resident species the peacock, black and grev partridges, and struca call to be seen, but are not common except the last. The inigratory birds, such as geese, duck, teal, widgeon and pochards, are all fairly common, but the snipe is comparatively scarce. The nittern i occasionally seen, as also is the grobe, but in small Kingfishers and paddy-birds used formerly to be hunted and killed for their plumage. Hawking is still a favourity pursuit with one or two of the taluquians, and there is a fair number of gun beenses issued in the district.

The rivers and tanks contain an abundance of fish of the Taker. dinary varieties found in the plains, her there are few professional fishermen who make then living solely in this manner. The consult report of 1901 shows 1,312 fishermen and fish-dealers with orch dependents in this district—a figure which is indeed considerably above the general average for Oudh, but for lower than in theada or Bamaich Besides these, however, nany of the lower ca tes resort to fishing as a subsidiary means of early yment, and and a ready sale for the fish caught in the markets or Frzahad in I the larger towns, the majority of the population indulging in this dot when available. The chief filling clases we Kahars, Mallah-, Guriyas and Ma-almans, and the restrum to complayed are the usual nets, lines and various forms of wherevened reed baskers

The domestic animals are generally of a most type, as least as Cattle reparts the indigenous breeds, for while good cuttle are frequently to be seen, they are almost invariably imported beasts from beyond the Chagra or from Kheri. There raised in the district are as a trle under-sized and week, although safficient for the light work expured of them. There is no attempt at scientific breeding and y actically no steps have been taken to being about any euprovement. On one or two occasions pulls have been imported from the west but the experiments have resulted in failure, the an mals prove ing too heavy for the small cows of the country. Plough-cuttle are sull proclassed from travelling dealers and are paid for by the wents in half-yearly instalments. The supply repears to be adequite, being proportionately greater than in the admining districts of Sultanpur and Bana Banki. In 1895, at the time of the last

settlement, the ascertained number of plough-cattle in the district was 277,901, giving an average of 2:06 animals per plough. A regular stock census was taken in August, 1899, and the returns show that there were 291,856 bulls and bullocks and 6,496 male buffaloe-, giving a total of 298,352 animals and an average proportion of 2.26 to each plough, as against a provincial average of 2:38. A second census was taken in January 1904, and it was then ascertained that the number of plough-unimals had very largely increased, the e being in the district 320,216 bulls and bullocks and 5,015 male buffaloes; the total was thus 325,331, but the number of ploughs being 147,475, the average number of animals per plough was found to have slightly decreased. These cattle are chiefly used for agricultural labour alone as carts are comparatively scarce in this district, the total number being returned as 1.011-1 very low figure, though greater than the totals recorded in Sultanpar and Fartabgath, The last census also showed that there were 140,015 cows, 66,119 cow buffaloes and 208,801 young stock of all descriptions. These figures present no points of peculiar interest in Frzabad, as it is not a great grazing district owing to the comparative absence of pasture, and in this respect it is very similar to all parts of Outh lying south of the Ghagra.

er uals

76

There is practically no attempt at borse-breeding in the disciet, and most of the animals are of the usual description, under sized under-fed and over-worked. There were altogether 9.675 ponies and hosses in 1904, and this is accually a smaller figure than that recorded in any other destrict of Ordh, although the numbers are very much less in the eastern districts of the Benar's diverging 1 Azampath. Donkey, too, we few, numbering 3,615 in all; while there were 265 camels—a very much lower figure than in Soltanpur and Partabouth, where there animals to some extent compensate for the absence of cuts. There are large numbers of sheep and goats in the district, but here again the totals are small in comparison with those of the adjoining tracts. Of the former there were 11,301—a number exceeded by every other district of Ordh except Bara Banki and Lucknow, while goats numbered 163,746, giving an equally low proportion.

Cuttle disease is always prevalent in the district to a greater or less extent. Its intensity varies with the nature of the season, for

le se

t has been observed that severe epidemic of rinderpost invariably ensue after a succession of wet seasons. The five years ending with 1895, in which the rainfall had been abnormal, was followed by a general outbreak of rinderpest, which carried off a la ge numto of cattle in this district. Foot-and-mouth disease is generally common, but the number of death, resulting from this cause annually is small. Anthuax also appears from time to time and the disease almost always (criminates totally. For the purpose of elecking abe spread of earth disease a vetermary assistant is employed by the district board, and a veterinary hospital is maintained in the city of Fyzabad.

The chmate of Fyzabad closely resembles that of the cest of Tambal activern Oudh and calls for no special comment. The cold weather 14sts somewhat longer than in Lacknow and the other districts to the south, and during the summer months the thermometer does not generally rise so high. The rainfall of the district is districtly hory, when compared with that or the United Provinces as a whole; but the average fall in Fyzabad is not much higher than I at recorded for the whole province of Oudle. The returns give a tions slightly in excess of the average for Bank Banks and on upue, but lower than that of Gonda and Rest, to the north, which lie closer to the hills. Rain-gauge we communical " the four tabil herelquarters and also at datalpas she list beging terr tarted in 1893. Records for Pszabad has a been presented time 1862, but to the about this balls the colors figures are those of The average fall for the velole district from 1570 to 1904 was 4245 inches an mally. At hyzalad, which is not relative no thousholy reporting station but also stands in the Chagra, the beautiful transfell is arounded, the arrange him, 1192 while at Branges she figure was only 1995 inches; at Panda and Albanere the averages were II I and Al II inche respectively, so that it appears that the distribution is generally even the achora the presin part of the district. As usual, the section for various years exhibs remarkante fluctuations. Imong the webbest years men tion now be made of 1871, a sense, of general foods, when the district received no less than (895 inches of usin, and over Si taches were recorded as Eyzabad also of 1931, in which the howiest fall on record occurred, no less than 78:50 inches being

registered for the district as a whole. On this occasion the fall was much greater in the eastern parganas than elsowhere, the returns for Tanda showing 895 and for Akbarpur 8865 inches. This season was the culminating point of a succession of wet years as the annual average from 1890 to 1897 was no less than 50.65 inches. Another remarkably wet year was 1903, when the general average was 627 inches, and over 77 inches fell at Fyzabad itself. On the other hand, the driest years known were 1876 and 1577 with 22-58 and 20-45 inches respectively—a deficiency which resulted in a famine of some intensity. In the last famine year of 1596 the rainfall was far more favourable in this district, the average being 28 inches. Less amounts than this were recorded in 1873, 1880 and 1882, but in no case did the deficiency result in any distress. The distribution of the mainfall is more important than the actual amount received. A premiume cossation of the mon-con will cause serious loss in those parts in which rice is the staple cup, while it also creates a danger of a fielder famine, especially in the southern parganas. Some rain asually falls in the winter menths, but a heavy or long-continued tall is undesirable, as the district lies in the rust area; prolonged damp weather in January and Feb unry inevitably rejures the wheat, while barloy will probably suffer to ome extent.

ar <sub>Mala</sub>lth

199

(18 :

The district is generally considered healthy, and that this is the case is apparent from an examination of the returns of births and deaths. The vital statistics since 1591 are shown in the appendix and compare favorably with those of the adjoining districts. The carly mortuary returns are manifestly in accurate; but from about 187's a great improvement in this respect seems to have set in, and the subsequent returns are probably sufficiently correct to afford a tail idea of the condition of the district. From 1871 to 1880 the average number of deaths recorded amounted to about 17,000 annually; this was obviously too small, as it gave an average death-rate of only 17 per mille. During the following ten years the rate was 30.53, and i our 1891 to 1900 the average corresponded closely to that of the previous decade, the annual rate being 32-29 per thousand of the population. This result may be compared with the rates of 35-63 and 33-03 in the adjoining

le ne

lish lets of Sultanpur and Bara Banki respectively for the same period. The figures for different years naturally vary considerable: the highest recorded rate was 45-08 per mille in 1894, an unoscally but season, and the lowest 21.07 m 1898 and 25.74 in 1896, the arer being a year of drought. In the town of Arodhyn the deathrais is to some extent increased by the face that many plignins and fagus come hisher from the surrounding country for the purpose of reding their days within the sacred precincts of the city of Ratia. The number of liths generally exceeds that of deaths to a marked extent. From 1891 to 1903 inclusive the average bi-thrice was 36-73, varying from 40-71 in the last year to 25.05 in On five occasions it fell should the number of deaths, and s defirst probably accounted to some extent to the absence of any ingrease in the population between 1891 and 1901,

I aming to the chief causes of death, it will be observed that, Porce as a and, the most total disease of the district is feed i ill times been responsible to by in the greatest rempler of the riled deaths, the proportion being by this head to do need from 1821 to 1900 being 75:10 per cent. A considerable number of the deaths is due to other cruses in which text, is only a s appetu, but even after allowing for neh passs the death-rate from fever, generally of a malarial type is a volub menality from this cares varues considerally in difference cears, but except in the case of violent epidemies of chelor and smallpix its relation to the total megality of the year is coverally this constant. On an average it will appear to a tever is respossible in about 27,000 deaths annually, in the respective 13 e ioss than 15,000 deaths been used ed to the execwhite lating or two years the mortality under this head in a Great exemplificable large. This was especially the case in 1871 open " In real rentall affected the health of the detaction and onely, , nearly 12 one in the from fever being rea decl, and in 1890, who to atelity from fever amounted to say 35,000 persons 1897 it to appear to have been a steady declease in the namber it cenths from this disease, but it cans as be yet let infined whether this esult is due merely to more fivourable scasors or warrent responsament in the spandard of living and confort among the proper classes. The former cause would seem to be the true one,

as the wet season of 1903 brought about a marked recrudescence of fever in this district.

holers.

Of the epidemic diseases cholera is responsible for the greatest number of deaths. It has never been absent from the district since the time when vital statistics were first recorded, and from 1881 onwards the lowest mortality from this cause in any year has been 219 in 1903 and 519 in 1895. On several occasions there have been epidemics of cholera of considerable intensity, early years the worst were those of 1877, 1878 and 1880; during the ensuing decade there were no very had outbreaks, but in both 1891 and 1892 over \$,000 deaths were recorded from this cause, and the mortality was also your high in 1894 and the next year. On an average chilera is responsible for about \$19 per cent, of the total recorded mortality. The origin of epidemics is very frequently ascribed to the religious gatherings at Ajodhya; but while the encerous assemblages that take place on the occasion of the great fairs undoubtedly allow of the rapid dissemination of contagious diseases, it would appear to be the case that cholera is more prevalent in the southern and eastern parts of the district than obsewhere, owing possibly to the greater height of the spring level in the wells in those tine &

mallpox

Small-nox in former days wrought havor in the district, but its tavages have for many years past been reduced to very small proportions. From 1871 to 1880 this disease was responsible for 8.26 per cent, of the recorded number of deaths, and there were had epidemics in 1873, 1878 and 1879. During the following ten years the ratio fell to 458 per cent, of the total mortality, and would have been much lower but for the exceptional authorak in 1884, when 6,531 persons were reported as having died from this carse, while again in 1890 the mortality was about 3,400 that time the discuse has almost disappeared. Some 1,300 deaths secured in 1897, when small-pox was prevalent everywhere, and there was an epidemic of less intensity in 1891; but during this decade the proportion of leaths from small-pox was only 59 per cent of the whole number. This result is undoubtedly due to the spread of vaccination, which during the past twenty years has made enormore strides in the district. Vaccination is compulsory in the municipalities, but everywhere it is unpopular among the people.

the opposition is in some cases attributed to religious objections, port the fear of rousing the anger of the special deity of the disease. mid in others to the discomfort which the children suffer from the ation. The most active opponents are the high caste Hindus and tack objections are strongest against the vaccination of very a ang children The people recognise to a certain extent the great him without of small-pox as the result of vaccination, but are still my fling to allow their children to undergo an operation causing remperary discomfort in order to avoid a disease which is not the a un consequence of its neglect. Vaccination operations are under the control of the Civil Surgeon, whose staff consists of one as a statemperintendent, 20 permanent vaccinators and five or more remporary vaccinators employed during the cold weather. The uns for of presons vaccinated during the ten years ending 1904 average 134,812 annually. Less than 19 per cent, of the population we protocoed against small-pox-a law proportion, but much the - care as in the other Oudh districts a vecto Sitapue and Haidel.

Dysentery and bowel complaints are very conduct in this Other district and are annually responsible for a considerable properthe the recorded mortality, they are generally a result of in darral fever. The returns under this read since 1890 will be first in the appendix.\* It should be noted, however, that the receptional figures for 1908 are largely unreal; for many death vere ascribed to the elegace, for fear of an inquity as to whether the fover was due to player—as was probable the case. Player he not make its appearance in this district till 1903, save tar-tagle imported case in the proceeding very. If hiskoost "I do mary in Ajodhya and then spread to Fyzebad 92 death buring in that month. To February there were all agether 1. I leath, the majority being within the meaningal her to of With I but it also spread to Akbarpur, Jana'per, Cheetersa 1 of Michailakganj Tocheck tho disease ego actory was recommetided and camps were provided by G vernment, while it inbefire, though unpopular, was to a very large extend carried out and a considerable number of persons were in a detect. There y as a large mercase in the mortality in March I, the in the city and district, but in April plague had almost died out in the

former, although it had spread in several of the country bazars. After the first half of May it had practically disappeared and the district cemained free till the end of October, when two imported cases occurred in Fyzabad. In the two following months there was a marked increase, but the city remained free and the parts chiefly affected were those adjoining Bara Banki. Plague continued to spread in the early part of 1904, reaching its highest point in March, when there were 1,904 deaths in the district including 137 in the municipality. It was very severe in Tanda and the town was almost described. The mortality declined rapidly in April and by the end of May had practically ceased, though it returned again with the advent of the cold weather.

ificula es

Statistics of infirmities have been prepared at each census since 1881. On the first occasion it was shown that there were 92 hundres, 453 teaf-mutes, 378 lepers, and 2,644 blind persons. In 1891 the number of bination had increased to 140, but it fell again at the last census to 121-a figure which is considerably lower than in any of the adjoining districts. Deaf-mutos also increased to \$20 in 1891, but foll to 606 ten years later; the total is high, but is largely exceeded in the districts beyond the Ghagra and in the mountainous tracts of Kumaun. This affliction is supposed to be intimately connected with goitro, a disease which is very prevalent all along the course of the Ghagra, and is considered by the people to result from drinking the water of that river. The nguies of 1891 showed a large increase in the number of bired persons, but at the last census these numbered 250, a lower propertion then in Bara Banks, but with this exception considerably in excess of the numbers in other parts of the Fyzabad dy ision. The prevalence of blindness is probably due in a large measure to small-pox, and with the disappearance of this discuso and the spread of vaccination a further decrease may be expected. Leprosy appears to be york common in this district as also in Bara Banki; there were 506 lepers at the last consus while the general average for Ondh was little over 200. The cause of the disease and its prevalence here is still unknown, and there is no apparent reason why it should be a much more common here than in the adjoining districts of which the climatic conditions are generally similar,

1

1

## CHAPTER II.

## AGRICULTURE AND COMMERCE.

Agriculture in Fyzabul attains to the same high standard of contracoellence as in the other districts of eastern Oudle although p chaps development has not been brought to so high a pitch as in the adjoining parganas of Bura Banki. The district is the sed with a generally good soil, an exceptionally deese population and io post parts with ample means of infigation. The callest staristies of contivation were those compiled as the first regular settlement It was then ascertained that 605,615 acres or 56 per cent, of the total area was under the plough. The proportion was higher in the 10 pargames of Amsin and Mangalsi, where it an outred to over 12 you cent, and lowest in Akhapan, in what and 12 year cent, was caltivated, the reason on doubt bear the existence in that and we large an area of borron warr the first available as arms of subsequent years are these of 1.35, when the sewn were shounted to 661,312 agre, showing an ingrease of nearly 55,000 tace to twenty yourself hime then there has been a mach enthic u vel-pment, for the amount sown in 1885 las been largely a seconded it all years except 1396 and the two fellowing when the farmou werd a considerable contraction of the order ated near the averwe cultivation by the pineteen y are ending in 1901 are 670,640 in as and this would be much higher were in rot to, the bad you 5 1337, when the cropped area arrounted to less than 6-1,000 areas. I' first rive years of this period tell in a second of geat popular 20 caltings the ever sive ram towards the end doll considerable I could The average cultivated area was nearly 675,000 to es-The following too years began badly with arough and ranne, but shee 1961 there has been an extraordina is rapid expansion of this thus, and in 1904 the measons was the instast on record, minuming to no less than 195,333 acres of 12,33 per cost, or the Where mea of the district. This is a very high figure considering

the amount of unculturable waste to be found in Fyzabad, and though less than in Bara Banki, is much higher than in the adjacent district of Sultanpur.

louble ropping.

71

M

er l

What is even more striking is the enormous extension of the The carliest returns are unreliable, as at double-cropped area the first settlement only 5,511 acres were shown as bearing a double crop-a figure which is obviously far too low. In 1885 the amount coming under this head was 191000 acres, but the average for the ten years ending 1895 was over 217,000 and for the following decade about 240,000 acres. As before, the highest point was reached in 1904, when no less than 293,945 acres or 42 per cent. of the cultivation bore two crops in the year—a remarkably high proportion, which is probably not exceeded in any other part of Oud a. The existence of this phenomenon is due to the presence of a large area of rice land in which formerly rice alone was grown; it has now become the custom to sow gram or peas in the nee fields in order to obtain a larger outturn from the soil. The figures show that owing to the increased pressure of the population on the land and possibly owing to the enhanced revenue the development of the district has proceeded apage. Progress has been most marked in a few well-defined directions One of these is the increase of doublecropping as already mentioned. The second is an increased cultivation of the more valuable staples, wheat being more generally grown alone instead of mixed with other crops. A third is the extension of cultivation to the poorer lands, which are only capable of producing a single crop of rice; and a fourth is to be seen the larger area under just, the most valuable of all the millets. Another feature in the history of cultivation since the first settlement is the introduction of indigo, a very valuable crop which has, however, suffered as every whore else from the depression in the market during recent year. That more remains in Fyzabad than in any other part of Oudh is due to the idiasyncrasies of one or two taluglars. No active measures have been taken in the way of effecting improvements in agriculture except the introduction of superior seeds through a seed depôt, but the results attained have been amall.

ricul-

1

The system of agriculture differs in no way from that of the surrounding districts and no detailed description is necessary.

The crops are sown in the customary rotation, and the produce is probably the same in value as that obtained in similar lands cleawhere. Returns have been rurnished by some of the leading Lindonners of the district showing the outlay and income in the ea a of various crops, most of which can be accepted as fairly religile. The profits or course vary with the state of the mark t; the turns are those for 1901, when prices were at a high level. They are of some value as showing roughly the prevailing state or affairs and the results will be mentioned in dealing with the samus crops. In all cases it appears that cultivation can be queried on at a considerable profit. In the Pirpur estate of Savid Abu Jafar, for instance, the net profit in 1,100 ages of Re and was Re, 300 in 1901. This was obtained from ordinary crops, with no poppy or tabacco; the land consisted of many and and plate, all filted with hired labour, and the not profit in the - unlett after deducting every conceivable charge, such as an c-timate for rent, feed and replacement of caude and stock, wages or carles and the like, in addition to the direct charges for refugling, seed, is rigation, weeding and other agreedy ral operaour,

Three are the usual harvests, called by the usual rames. The kharif or autumn horsest is the more important, in that it covers a much larger area than that sown in the rate. This loss in t appear to have been always the care, and it seems to be so stablished fact that the extension of cultivatude has been or cer of arned by adding to the kha it are, he no retined me to placed on the crop returns of the first settlement, as the of the area was practically excluded, resulting in the imposion are the kharif rotals of almost all fields found roacing a is a crop. At the time of the first regular settlement 342,652 war were sown in the rable and only 252,002 abres in the while. I mg before the furnitation of the settlement the · land position of the two harvests was shown to be very From **1389** to 1903 the averages were 131,500 ares Cilti ared in the rain, and \$71,500 acres in the khain harvest. ir. 1894, the settlement year, the difference was even more marked, and since the assessment the balance in tayour of the bharif has steadily increased. The returns for the five years

e,

ending 1901 show that on an average 434,097 acros were cultivated in the spring harvest, while 502,237 acres were occupied by autumn crops. Such a disproportion exists in all parts of the district, it is smallest in the Fyzabad taheil and greatest in Akbarpur, owing chiefly to the large areas of elfasti rice land in the latter subdivision. The figures for each tabsil in each year since 1869 will be found in the appendix.\* In addition to these two harvests there is, as usual, the small raid or intermediat harvest. This covers a somewhat insignificant area, the amount fluctuating according to the nature of the searon and the failure or otherwise of cutain rabi crops. In 1904 the total was 2,350 acros and in the preceding year only 1,752 acres. The products of the zaid harvest are chiefly melons, which are for the most part grown on the banks of the Chagra in the pargana- of the Fyzabac tabel; the early millet known as sanwan, and vegetables. There is very little zaid cultivation in the Akbarpur and Tanda tabils, and in most years about two-thirds of the whole is to be found in Fyrahad.

By tar the post important of all the kharif staples is more which recording to the figures of the last five years covers on an average some 5675 per cent, of the whole area sown in this baryest. The proportion is 'aghest in the Bikapur and Akharpur tahsils, in each of which it amounts to over 66 per cent.; and lowest in Fyzabad, where it is ander 51 per cent. In 1901 rice covered 269,315 acres, this was somewhat below the average, but novertheless represents an enormous increase on the amount shown at the first regular settlement, wher the recorded total was only 107,500 acres. The bolk of the feet of the early variety, but large quantities of jarlan or transplanted over me grown in the two casion tabsils and in pargana Parbhinnath. At the list settlement it was Observed that the jarthon crop occupied only about one-fifth of the total mea, while in the adjoining district of Azamgath the preportions were almost exactly the reverse. According to the figures supplied by different zamindars it would appear that jurhan is a two more profitable crop than early rice, the average receipts per ucle bring estimated at Rs. 32 and Rs. 25 respectively, while the outlay was Rs. 17 and Rs. 20. This is partly due to the fact

<sup>\*</sup> Appendix, Table VI

that the cent for jarhan land is lower as a cule than that for land " which dhan is grown. No inigation is as a rule required for either variety, but early rice needs both manure and weeding, which are omitted from the one lay in the case or jurham

The most valuable of all the kharit cops is sugarcase, which one, a large area and is more especially grown in the cast of the estrat. Its cultivation is slightly more general than formerly, as it the first regular settlement the area under this erea was 10, 600 agres, whereas of late years the amount has an eased by argely ten per cent. The returns to in 1899 to 1901 show that regardate on an agentife covers 5.9 pc, cent, of the whole klauff aren, the proportion being bridest in the Tanda tabsil and west or Excepted. The profits derived from sugarcase reconside able, But the entlay is large and the land on which it is shown is generany subjectional lighment. The recepts as given in the course valv from Rs. 47 o. Rs. 96 per acre, the latter figure being a far loser approximation to the eality, the outley ranges from 11s 46 to Rs.61, large amount 3 is one to be paid to the preparation Or ground, origation and weeling, while the cose or gathering the epiceopic for greater than is the call with this other stantes.

Is ligo is apollic, ye vivel rade cop, but to a sgain the ourlay today avolved is large and a cabivatora a couldy toroid on the estates it be wealthier rahighas. At the first carda is then into consmed for 552 areas, but during the ensuing the account of course or sessing 6,000 are. Properties a man total so cars esaffing in the closing of many factor's and of the time the last settlement only 1288 acres were in hearthly the tadistrict, But that time there has been a tent be very but the new will be all probabiles discuss will be set though almost every other district indigo for deals deal control up liv and me social places resorbly it on has all go becomes uspeared in 1963 the total and 505 conduction of tolerance as that ight fallen to 5,151 acres the bulk of this hope tu by Tanda and Akharps, tabelle, and operally and case com M. Aba Jafa of Pupur.

The other ener klains stuples are a har, jud , maize and and ontoting, and the small mitlets known as keet in and stars in a to largely grown along in this listrict especially in the castern

parganas, but it is also found to a considerable extent in combination with juar, hajra and other crops. Sown by it self and mixed, it occupies on an average 12-4 per cent, of the whole kharif harvest, the proportion being highest in the Tanda and Fyzabad tahsils. Juar is found almost enturely mixed with arhar, and in combination covers a larger area than any other kharif crop except rice. It is practically confined to the upland portion of the district and occupies the better lands. Bajia is seldom to be seen in Fyzabad except in the Buhar parguna Marze, on the other hand, has very largely grown in popularity since the first regular settlement, when it covered less than 5,000 acres. It now occupies about 21,000 acres annually, but its distribution is very uneven and more than half is to be found in the Fyzabad talisil and the bulk of the remain lor in Bikapur. The pulses known as urd and mang are largely grown in all parganas of the district and cover over five precent of the area sown in the kharif. The largest proportion is in the Asharpus talkil and the least in Frankel. Koden and sauwan, which are extensively consumed by the lower classes, occupy a considerable area in all parts of the district. No other kharif crops are of any importance, although mention may perhaps be made of mardua and moth, which are of a very similar character to those last mer pened. Cotton and oil-ceds are practically unknown in this district

In the whi harvest the principal crop is wheat, although gram and peas cover an actually larger area. Wheat is sown both alone and in combination with other crops, such as gram and barley. The area under pure wheat amounts on an average to 21501 per cent. If the table harvest, the proportion being highest in the thickness table and less stin Tanda. It is one of the most costay of the rabi stuples, the average outlay being estimated at hs. 33 per acro incoming rest, while the receipts are given as Rs. 51, although the depends on the sate of the market. The chief item in the cost is plongling, as in order to obtain a good cutturn the land has to be prepared very carefully. Manuse and in igution also add largely to the expense

Barley is chiefly grown in the lighter and inferior soils. Sown by itself and in combination with gram and wheat it covers on an average about 25 per cent, of the rabi area, but the

er na

THE

proportion varies greatly in different parts of the district. In the Bikapur tahsil, for instance, it is less than 9 per cent., while in Tanda over 38 per cent of the area is under this crop. The ive ago receipts for bailey are estimated at Rs. 34 per acre, and the cost including rent, averages Rs. 28 The seed and ploughing are rese expensive than is the care with wheat, while the cop generally loes not receive so much infigation, and it is possible that the prothe are considerably greater than those declared.

tuans and peas together cover over 47 per cent, of the land strains sown in the rubi. They are very largely cultivated in all parganas of the district and more especially in those of the Bikapur chall. The areas under these rops have expended encompasty since the first regular settlement, the increase being about 250 per cours, this is almost entirely due to the greater prevalence of the system of double-cropping, as towadays grain or per are almost e cal judy sow a after rice in fields which formerly bore but a single aco ne the year

The only other rabi stable which deserves mention a poppy, Pappy which covers a large and sapidly-increasing area. As the time of the first regular setticment to more than 513 according to this by relate the average for the six years ending to 1801 was 0,825 a res, the land under peoply being 1997 per cent, of the winderable is as Since that date poppy cultivation by glearly developed, and the average mea occupied here is starte has used to 2.75 per The proportion is very micro ligher in cut, of the rapidaryest ne Fyzobad tabsil than elsewhere, but in dig i games de coop has glos a in theore to a semarkable estent. In 1994 the find to det propy amounted to no less then 14011 acres-treeting act figure on could. Its popularity is largely due to the system of any mee has of the file cultivaters obtain each at a sacre of hit express oppore it. Its outlination we after it the most of the experienmoses of hishaultinen, and especially the Marios, which are in acc sentents. The outby is one equally longe, as the land regal esarelal a operation and consume watering at escalarated to an sanwill if per acre on an average, where the recents are put at something over Rs. 72.

Tobacco in another valuable crop, but it is a whose grown to look any large extent in this district, half of the hand so cultivated being corp

in the Haveli pargana and actually within the limits of the cities of Fyzabad and Ajodhya. Lanseed is also deserving of mention, but is mainly to be found in the eastern parganas. The other rabic crops are of very little importance, and include masur, potatoes and garden crops. They are to be found in all parganas of the district, but in no place hold a position of any prominence.

1g t-

Most parts of the district appear to be admirably supplied with means of irrelation, but security depends rather; on the nature of the sources from which water is obtained, and caunot be inferred from the amount neighted in any particular year Statistics of irrigation are at all times liable to misinterprotation. instance, at the last settlement the figures for those parganas in which new regards were made represented the irrigable areas, while to the rest of the district the entries were those of the nivas actually registed. Similarly, land auder kharif crops, and especially one, is not ordinardy treated as irrigated, although it will probatly receive event actificial waterings in a dry season. Returns showing the rumber of wells and tanks, too, are apt to be mi-leading, so that no abundle conclusion can be drawn from the statistic of a single year. Some idea, lowever, can be obtained from an exemination of the results afforded by taking the averages of a secretary ears. It was stated at the first regular settlement that 352,978 acres or over 57 per cent, of she cultivated a calwaining ded, and of this amount 191,528 acres were watered tion the tanks, 161:302 acres from wells and 148 acres from rivers Tree hence apparently represent the originals rithe than the mighted area, and as such they appear to be somewhat below the mark Annual statistics are extant from 1885 onwards, and from teest it would appear that for the nine years on ling 1894 the average actually irrigated was 1879 per cent, of the copped area, while for the following ten years the figure was 13.94 per cert, giving a general average of 46.36 per cent, for the past modern years. This is a very high figure, and means that in ordinary sessors, where the carriall is normal, practically all the land that requires water obtains irrigation. The resources of the district are more clearly illustrated in a season of drought, for then the tanks to a large extent tail and recourse has to be made almost entirely to wells. Such was the case in 1896-97, when the drought

07 I

ı

ţrē

171

resulted in a considerable contraction of the cultivated area, the t, it had ender the plough being 617,570 acres, and of this over 11 pc. cent, was irrigated. This shows that ever under very unfaveurable conditions the district possesses sufficient means of of Lation to ensure a fair rabi harvest, although in such a year the very important rice erop will moveably suffer severe damage, I'ms security does not, however, extend to the whole distinct, as in second pargames the construction of temporary of unprotected wells is, if not impossible, at any rate a matter of great difficulte, These teacts, to which inference has already been made in the pre-. The chapter, comprise the lighter-sorted villages along the builts of the rivers and all parts in which the subseil is whilly comand of sand. Such land is to be found in the Arisin pargina clong the Ghagra and Marka rivers and in the Third a depression, in almos the whole of pagana Tanda, in the east of Aktorium, une in parts of Pachlimenth, Khandansa and Majhaura

expression of the form of the total ordinated a capatite to the properties of land irrigated to the total ordinated a capatite to the unional watered from wells in comparison with their irricated from wells in comparison with their irricated from tacks, the ordinates of supplyindicates greaters emity. As a real above, the proportion of the tank-integred are at the first regular settlement on about 54 per cent, of the whole. Thury was slatered are still over 33 perfected, but the familie of 1800 estimated the superior its of wells owing to their greater retablity in times of disease, with the result that in the tollowing yours the inig tion of

An examination of secont entrance shows that a considerable

the 31 per cent, was intigated from tanks, the total was not less to normal, so that these figures clearly allustrate the rate at their reliables been constructed and their represent popularies. The will still continue no doubt to be largely used in versal subject trainfull; this was shown in 1901, when the tank-prighted are regain exceeded that watered from wells and arounded to ever to per cent, of the total irrigated. Suitisties of irrigation for each in guara in that year will be found in the appendix.

Wells in this district a c of the usual description, being either wholly or partly masonry or unprotected. True masonry wells are comparatively rare in this district, and in 1904 only 1,521 such wells were returned as available for irrigation, and of these 1,070 were in pargana Haveli Outh. The half masonry or kachcha-pakka wells, on the other hand, are exceptionally numerous and amounted in the same year to over 57,700. At the first regular settlement the total number of wells of all kinds than in existence was given as 18917. This had increased at the true of the last assessment to nearly 38,000, or more than double the preceding figure, and in the subsequent years the rate of increase has been steadily maintained. Earthen wells again are comparatively scarce, only 2,296 being in use in 1904. This fact is due to the friable nature of the subsoil and the difficulty of preventing the andy sides of such wolls from Frequently the shaft is lined with jloss or other brushfallmen wood but probably the tenantry have discovered that a masonry hing is cheaper in the long run. It thus results that though more wells are required in certain parts of the district, as in Tanda, Surimpur and Mangalsi, the use of masonry wells has been carried further in Fyzabart than in any other part of Oudh. The cost of construction depends on the nature of the wells as well as or the depth at which water is found and the character of the subsoil. In the number land along the Chagra a good supply can be of tained at a depth of 12 feet, while above the high bank wells heye to be sunk to 37 feet or more. The general average of the district is probably not more than 25 time. Masonly wells with a depth of 32 feet and a bleadth of seven feet cost from Rs. 200 to Rs. 250, the expenditure mereasing with the diameter at a much greater than with the depth. Wells built on the kachchapublic principle with bricks and no mortar, are very much cheaper and serion cost more than Rs 70, the average price being about Rs. To. Unprescreted wells depend salely on the depth of the water-level, their cost anging from Rs. 4 to Ls. 10.

ic da oyed.

Wells in this district are chiefly worked by human labour and not by bullocks. The system most commonly employed, and the most conomical, is that known as the charkha or pot and pulley. Usually masomy wells are made sufficiently broad to admit of the employment of two or more pulleys at once, each with its pair of

I i

carrien pots. Four men will then work the two pulleys in alternate range of two for an hour at a time, while a fifth is employed in distributing the flow in the fields. Under this system they can impate one local higher or about 1,150 square yards in a day at a , of ten armas or its equivalent in grain; but the amount varies neading to the dopth of the water. In an unprotected well, where only one charkly is in one, the daily amount neighbot is appliedly not more than six biguers and in many cases consideredly us than this. In places where the water is near the sanface the themals or pot and lever system is frequently to be seen; of this is not so offective in its working. The cost of irregation als depends on the number of waterings needed for each crop. 1 ese are generally two in the case of wheat and other rabe exops, from these to ax for sugarcane, and four or five for poppy and obtains these requiring the greatest amount of infigation ir sanwan and other crops go which the hot weather.

Tanks employed for irrigation are very numerous; they Tanks Day 1150 both the natural depressions to an which the water is down for the apply of the adjacout fields and also the artific aly'us itions made for the purpose. The latter are ex, emely na "nous in this district and are generally maintained in good order. Such uniks are known as taleas and her gaste distinct ton, in sequence political which is a tank due sololy for obugious improves and never used for irrigation. The water is i.e. defrem tones by mouns of duglas or swing-bask is, and frequently is to describe of lifts, is to be seen above the water is it a good death ole with exertise at the field-

would seem that several of these rivers are well adapted for scientific storage. Where such means are employed the water is raised and conveyed to the fields in the same manner as from the tanks.

n11409

The district is now fairly well protected against famines, by the improvements but in the sources of unigation and in the means of communication. It is, however, still hable to feel more or less acetely the influences of prolonged drought. With regard to the early famines that yield the country prior to the British annexation the eare but scanty records available; and this is the case with all the districts of On the There is no extant information with regard to the famine of 1769, and it appears that this did not extend to the northern districts although prices rose, it is said, to a very high figure by reason of the large expetations of grain from the districts along the Ghagra to the afflicted parts of Bergal. In the great timing of 1784 Fy abad suffered severely. Owing to the lateness of the auturn rains the kharit cops were a total failure, wink the rabi of 1785 was unigated from wells with group All tre shill ead tur day, and as the calamity was followed by execute rain in 1786 which rained the spring crops, a terrible famine ensued, the consequences of which were felt to: several succeeding year onling to the sensity of ginin for seed, The people are said to have subsisted on seeds, grasses, and the brok of thes, while many of the small estates were described Gram old at eight sees for the raped in Psyabad-an apprecedepost price is to collars. The next schools familie in Upper India was that of Issie, but he district in this case only suffered from the high per correction ing form an abnormal expect trade. It is and that have quentities of givin which hid here exported by traders to the taming-fricken districts of the Neeth-Western Provinces had to be existually brought back to Oudh, as the mai-Lets had been tally supplied from the eastern districts and Bergal Since amenation there have been several your of searcity,

CIT PA

out the early records are very measire. In 1860 there was a partial failure of the rains and the high prices that resulted were enhanced by the large immigration into Oudh from the adjoining district. The harvest in Fyzahad was fairly good, but owing to apprehation wheat reached the rate of ten sers to the

ψ

1

ķ.

rupee; for a considerable portion of the year fleets of boats rught be seen daily on the Ghagra carrying grain eastwards. A smaller state of things provailed in 1866, when Fyzahad and the adjoining districts made up a large preportion of the deficiency in Bengal. Again in 1874 there was some distress in these parts, although it was slight in comparison with the state of ahings in the Benares division. There was an ample stock of a nin in the district, but an insufficient demand for labour; there was no necessity, however, for any relief works in Fyzahad, with agh they had to be started in parts of Gonda.

Fairing of

The famine of 1877 was more serious in that it was more general, but at no time was the distress very severe in this distint. During the monsoon of 1877 from 16 to 20 inches of rang feel, and although much damage was done by the hot winds of Footember the vield of the kharif harvest was on the whole solerably good. The rabi which followed was a fair, though not an at indant, erep, and the high prices which prevailed readered even in indifferent harvest very profitable to the outlivators I returns, however, from the beginning of February 1878 some these among the prorest classes, which abated with the amening of the rabi, but did not wholly cease till the oady on lists of the kingrif come into the market. Relief works were opened than it Ist of February to the 5th of July, while pairhouses sore started at Fyzabad and Tanda for the benefit if there tempelole of working. Ten new roads were contracted in the ust be with a total length of 41 miles, whole 32 rades of cristing . Mrs were improved and 13 new tanks were excavated. The to der eleptrons relieved never rest to a very half figure id hygregate Riendance of talk overs on the several works was 75 047, of whom 25,675 were women and children. In addition " On 1 669 persons were relieved in the poorling at

Much charitanle work was also done by the candidars and these. The talugdars of Pupur, Deogaon, Me par-Dhaorna and Sibipm attrockied the thanks of Givernment at he Lackness under a 1878 for the generous traitment of their tenants and their assistance in carrying out the relief measures. In the city at typical the leading Muhammadan gentlement formed themselves into a committee and raised a subscription among themselves

ı

1

and their community for the help of indigent parda-nashin ladies of respectable family who felt a delicacy in asking for or receiving alms publicly. It was impossible to obtain statistics of the relief thus afforded, owing to the objection on the part of the recipients to its being generally known that they had received public charity; but the number of such persons in Fyzabad, as in Lucknow, was considerable. That there was no distress among the better classes and the cultivating village communities is shown by the fact that while the outstanding balance of the land-revenue at the end of 1877-78 amounted to Rs. 67,565, this was reduced to only Rs. 5,628 after the completion of the revision of sottlement then in progress, while in addition to this a large proportion of the arrears of previous years were paid off during the course of the fan me.

im ne of

In 1897 there was ne severe distress on the district, although there was and abtedly a marked searcity, especially in the south-eastern portion, comprising parts of the Tanda and Akbarpur tah-ib. The rainfall of 1896 was normal in Jane, but only half the average in July. In August it was nearly 50 por cent, above the asual fall, but the rain ended on the 30th of that month, and September and October were, as elsowhere, mactically dry. The harvest consequently suffered, and the outhers was no more than 30 or 40 per cent, of the normal. The yield of early rice was estimated at one-third, while marze gave a six-unna crop and other food-grains between seven and eagh; anna-. The lack of rain can-ol a contraction of the area sown in the following rabi, but the outturn was between 50 and 66 per cent, of the normal; it was of a poor character and less was obtained than might have been expected from the area sown. A very small number of persons were relieved on works in October, 1896 but in December the figures increased, and in the 6 Howing January the number went up at a bound to 9,000 daily. The total was much the same in February, but by the middle of March hardly any were left. Poorhouses were opened at each of the tab-il headquarter- and relief was given in this way to about 2,000 per-ons in January, 1897: the demand for help was greatest in Akbarpur and Tanda, and here relief was continued, although to a constantly-decreasing extent, till August. Further, about 2,000

ir Oy

presons received gratuitous relief from Jamuary to September. darring which period the variations in the number were very slight. For works were opened by the Public Works Department, under where management some 20 miles of road were constructed; two it in so were roan Fyzabad and the rost in the south-east of the district. There was also one district heard work, on which some Gro persons were employed, and 24 village works were undertaken in different places. The operations were conducted on the have rediate system through contractors, and the result was reported to have been worth the money spent. This amounted to Rs. 28,445 xi oded under the Public Works Department and Rs. 18, 94 under civil officers, the latter consisting for the most part of grituitcas effect, while the rest was devoted to assisting village works, Under the operations of the Chartable Relief Fund R., 60,271 were expended the greater part of the money being given to the entwas us for the purchase of cattle and seed grean, and the rest er the level of the various purposes, such as gife, of clothing, dolor to especiable poor persons and grants to a number of weavers in order to excele them to start their work. Of the money spect ander real, Rs. 4,132 were raised in the district, the rest name ontabiled by the Provincial Committee. Generally specking, there were but few signs of real dishess to be seen in the district. will the death rate throughout the famine was never largely in o the normal. It was however, reported that there was a considerable in sense in petry buiglasies and earlie the 1s, enough of Chimars with the object of obtaining tool 37 1397 the searcity came to an end; all telet measures were uspected and the raind recovery of the district showed that statetts had not been sufficient to leave any scalors at ults, tex conventionand to 1597 was suspended to a continuation if #2.029, and of this Rs. 1.00 215 were sub-equal to courte 1, de the rest was collected in the conse of the followingly car.

"I's question of prices and their history is very closely connected will their of famines. The changes and the nations that have occurindicated a fisheriet appear to be very similar to those which have been
does verifican time to fime in the adjacent tracts, and the general
distributions of food-grains that has taken place since annexation
to no way peculiar to Fyzabad. The rates prevailing at different

Prices

C

periods in the different bazars of the di-trict exhibit some variations; but markets are now very sensitive, and owing to the improvement in communications and other causes the general tendency is for such variations to become less and less marked, For practical purposes, it will be sufficient to take the prices as quoted at the headquarters of the district. Apart from the casual references to exceptional rates prevailing at various times of scarcity, there are no records of prices before the British occupation of Oudb. In a few cases, as in Handor for in tance, statistics are available to show that prior to 1856 the general rates in Oudh were far lower there at the present time, and this was also the case in the districts of the North-Western Provinces The figures for all years subsegment to 1860, on the other hand, have been collected and show tably clearly the general tendency towards an inclease in the price of food grains and the diminished purchasing power of the rupoc. This tendency may be sufficiently illustrated by taking a few staple grams of the district From 1861 to 1865 plices appear to have remained low, although somewhat in execss of those prevailing before the mutiny. When averaged 23°S sers, bailey 35°S9 sers, juar 30.6 sees, grain 29.2 sees and common rice 17.5 sees to the rupce. These figures were about the general average for Oudly, although, as in the smiles case of leach ton, they new probably inflaenced by the pre-coce of a large city and an important export trade, and were consequently higher than in the purely agricultural tracts such as Partabgath. During the following ten years, from 1866 to 1875, there was a distinct charge, due in part to several bad sensons and also to more general and external influences, -taples showed a marked rise, but there was a tendency to fall during the second halt of the decade. Wheat averaged 1842 sers, barley 25:16 ere jua 27.2 sere, gram 21:7 sere, and common rice 117 sees to the rupee. Prices remained much the same during the following ten years from 1576 to 1885, and apart from a few ter porary variations there were no marked indications of rise. From 1887 on vails, Lowever, a rapid increase in prices set in, and this cere red not only in Fyzabad, but throughout Oudh and the north of India generally. The phenomenon was not due to any particular local influence, but must be ascribed to more general causes, such as the fall in the value of silver and the increase of the export trade.

To to 1885 to 1895 wheat averaged no more than 14-9 sers, barley 21 30 sees, juar 19:47 sees, grain 21:8 sees, and common nee 14:45 will to the rupee. During the ensuing five years the average prices and even ligher, but this was due to the famine of 1896-97 and also to the enermous expects from the district during the next few can to the less fortunately situated parts of India where famine - the prevailed. Since 1900 prices have shown a tendency to regain to a ld level and in the case of all the above staples they fell crack till 1903, when they assumed a crark constant position, Take old level, however, is not that of the early years of British of that rather that of the seasons following on 1880, when the last marked change occurred, and there appears no reison to expect a one to the easy rates prevailing about the middle of the mretime consult. It has been estimated that during the currency of the first regular settlement prizes rose all found to the extent of 2643 per cent They have thus, oughts speaking, ke tipace sto the 1-2 in rents and method resemble demand but on the order hand, the increase in the population has been afour at per cent, 5 i in the cultivated area only about ten per cent

It is difficult to my whether wages have incorrect in the same Wages. to was miss, one te son being that agreatuate labor is still and a before in kind, and therefore it would be supposed that as exita of the produce has independ, to also has the amount of switheration. On the offer hand, there does it is appear to be marked rise in wages when paid in cast. The average tions by wago of an agricultural laborate in 1873 was hely and of pensito be the most that he receives as the present time, we is far from being mason, to according to the efficial is from 1895 to 1904 the average for the discret range over a -: 1-0 to Rs. 4 per mensera. It is generally high strin the may of Fyzahad juself, where the presence of the petato period the various Conveniment, works have a condenses to raise to price of lamer Practically, a man working at the well gets is samuas a day or 71 I aclaha servot grun, peas, maize or juar; Pros-kel view is seldom given, but payment is frequently made in halo the amount in this case commonly reaching to wave. For I have sattached to the farm the rates are lower, perhaps six series seam or the like. A general field labourer is not so well paid,

and the wages depend on local circumstances. There is usually a fair demand to agricultural labour owing to the presence of so large a number of Brehman and Rajput landholders and tenants who are usually debarred by the laws of their caste from handling the plough. The wages of artizans vary according to their skill; but the general rate of pay does not seem to have changed in any way since 1873, unless indeed it is fallon. The average for the ten years ending 1901 in the case of masms, carpointers or blacksmiths ranges from Rs. 5-10-0 to Rs. 7-8-0 per mensem, and even in the city of Fyrobad the common wage is said to be not more than four annals a day.

Weighte and measures.

K

٠,

In measuring areas the standard biglet of 3,025 square yards is generally recognised, but there are many local measures in various parts of the detries. The commonest of these kacheha bighas is equivalent to two-fifths of the standard measure, and is in general use in almost all parts. In the Richar pargana, however, only the Covernment bight is employed. In the villages of the Samanpar taluga and others lying in the Suchurpur pargana the bigha ordinarily adopted is equal to 16 standard biscour or 2,420 square yaids, while in so much of the Pupui estate as lies within the same pargana it is even larger, amounting to 18 business or 2722.5 Measures of weight are subject to still greater square yarda Besides the Government pakka see of 80 tolas, fluctuations. there are other large wers in different parts of the district, as well as the usual samety of small buckeless measures. Thus in the Akburper tansil the local a r is ordinarily equivalent to 120 standand tolars. In the town of Jalaham again there is a local ver of 1236 toles, and in Unida, Baskhari, Haswar and Kichhauchlin it corresponds in weight to 112 27 standard tolars. The small local servate and so trequently used as the pattern of five sers, and this 14, as in all other parts of Oadh, calculated as consisting of a corten number of garalis, the latter being each made up of four of he old coppe, comes known as maddasaha pice. These last are for practical purposes 270 grains in weight, so that the ganda is 5.080 grains. In the Fyzahad tah-it the kackeha ser is equal to 30 standard tolar, giving a pa were of 27,000 grains or 25 gandes. In the Khandansa pargana it is smaller, amounting to 28.17 tolus, the panser, in this case containing roughly 23.5 gundas; while in

l'a chimrath it has as many as 30 gandas, the ser in this pargana being equivalent to 35 65 Government toles. Other weight- are al , to be found in some of the less important bazars.

The current rate; of interest in the district are generally the Interest. same es in the adjoining parts of Oudh, for although Fyzahad Asth' is a commercial contre of some small importance and pos--everal banking establishments of repute, the general houseing of agriculturists is conducted, as usual, through the gency of the small money-lender. The latter is commonly the village Bania or, as very frequently happen-, the landowner himselt

The rates of interest charged vary according to the nature of the loan and the position of the borrower. On small loans for short periods the rate is one or two pice per super per month. The two pice rate is limited to small amounts ranging from Rs. 5 5 K- 25 lent in cases of necessity and repaid son afterwards. the only security in such toans is the supposed credit of the thre wor calculated on his status in life, his appare it means of paying, and his formor dealings with the leader. Under ordirary creates-tances the most common rate of insect-4 in such can is that known as envised or four abuse to the tuped per inn in Sometimes this is reduced to two per cont countrily or ye, loss needring to the circumstances. In the case of petty this made to fruit and pogetable sellers, market gardeness and the sthe interest is calculated at a cipies per rupes per morem. Scattings also when Rs 40 are lent the loan is repaid by menthly instalments of one rapes for a year. Where, however, the I were known to be a person of coder the rate is often as " is 12 per cent per annum. In selling bullocks no interest - "I nged nominally, but the sendors take a good care to all the one est to the real price at the time of selling, as well as sometray more for the expected Litigation. The money is usually waltzed in four instalments paid in Aghan and Bar-akh of each or a und at the time of selling only one inperior taken as earnestwereve punchle, i.e. holding the tail. The cistom, how-"... appears to be dying out owing to the dishonesty of the condors in bringing false suits. In the case of small loans with "urity, such as ornaments, the rate is commonly somewhat

for their skill and for the beauty and fineness of the fabrics they produced. In process of time a large trade in cloth sprung up and several European- became connected with it. A Mr John Scott is said to have had an immense establishment in the town, where all the cloth made in the bazar was brought to be washed and bleached. All the wishe men seem to have been in his pay, and for the security which they enjoyed a tax of eight annas a score was readily paid by the weavers of the place to Mr. Scott for permission to use his establishment. This gentleman appears to have left Tanda about the close of the righteenth century, and have been succeeded by other Europeans. One was Mr. James Orr, who is said to have been a paymaster in the British service, and who built a range house at Tanda, where he died at the age of 80 in 1832. His femb stands between Tanda and Mubarakpur, He introduced great retorms in the manufacture of cotton fabrics, importing patterns of table-coths, towels and other articles from Europe, be also improved the art of printing and introduced new designs of great beauty. Another was Mr. Johanny, who also was engaged in the trade for many yours. In 1862 there were 1,122 forms in Tanda, but a serious decline set in owing to the cotton tamme, and in 1871 the number had sunk to 875. Since then the trade has recovered considerably and there are now some 1,150 looms in the lown. At the present time about 30 per cent, of the inhabitants of Tanda are engaged in weaving, but only a few families produce the famous provided which is the speciality of the town. This fabric is a fine nuslin voyen with very fine counts of vari, 170 (r. 17) and sonatimes even 200, in pieces 31 yards long. The rength of a piece or there used to be 93 yards, but these are no longer woven ewing to the absence of purcha ci- As it is, the marker is very limited ewing to the high prices, and the weavers now make plane muslin in place of the flowered janulant in order to earn their livelihood. Ten different kinds of jamdans are manufactured in the town, yarving both in quality and in the design woven into the fabric. The most expensive is known as peach, the price being Rs. 50 per than, in this muslin there is an admixture of silk. Other costly kinds are called july and khara bet harik, which are embroidered with fruits and flowers, and each cost Rs. 35; while some of the cheaper kinds are khara bel, marga, and chand tura, deriving their names from the different patterns employed. The other industries of Tanda include dyeing, printing and glazing cloth well as the manufacture of the shuttles used in weaving and the blocks for printing, the latter have a castomary price, whether the work on chem is mach or hitle The ordinary cloth bave a variety of good patterns, while the printing do igns are also of a high character, though their effect is often spoilt by the dyes employed. Glazing is done with stones set in the end of clunes, swinging beams, travelling over smooth bounds. The process is known as ghoutar, and the instrument is called a molecut. The cloth woven locally is not dyed or printed, although most of the communication fabrics are woven with died yarn. All the material used in printing is imported.

The weaving done elsewhere in the district is of the ordinary description and low of the other manufactures odd for any special trues mention. That of had go was once a flour-thing husiness, and there is still a number of factories, all ander native in magement, in different parts of the district. The outlier in 1900 we some 1,185 mannels volued at Rs. 1,33,000, but the business has declined in prosperity very largely of late years and the amount produced has shrunk with the profits anoth of the fictions are closed, and many have been di-mantleds Sugar-boiling and retining is an industry of some importance, and there are many flourishing concerns, also carle native management. The portory of the distinct is of the usual description and pre- nest to few feetanes of retorest. It may be noted that the patters begreatly upply a Let talke glaze, both the sommen vellow or pley obtained from had and sine, and also a red glaze produced by the addition of small quantities of red oxide of mercury - - a practice which appears to be peculiar to this district. Others is made in several places by the tomiyas from the rele old med on use, land Too ich a council off the surface, collected in heaps and sationaded with wride of "I the about a foot high. It is then inixed with well water and at or standing for five or six days the pure relievings to the top by evaporation. When sufficient has been collected in this manner it is thrown into a kiln and heated for 21 hours until all moisture Jisappears. It is then taken out and mixed with the other

## CHAPTER III.

## THE PEOPLE.

THE first enumeration of the inhabitants of the district was Consus made in 1869, together with that of the rest of Oudh. Fyzabad had not then assumed its modern form, but according to the returns it appears that the population of the present area of the district was 1,024.652, giving an average density of 616 persons to the square mile. This was a nigher figure than in serv other part of Ondh except Bara Banki and Lucknow; the large average was partly due to the presence of the cities of Feralua and Ajodhya, the rate for pargana Haveli Outh being 1,011, but it was no less shan 800 in Mangalii, which adjoins Bara Banks, and re no pargand was it less than 518. Doubts have been cap excel as to be mouracy of this enumeration, the first of its kind to be attempted in Oudb, but at any rate there does not appear to have been here any over-statement of the total as was almost undoubtedly the "ate in several other districts.

The poxt consus tack place closen years later in 1881, and in Cenana the meantime the famines of 1874 and 1877 had occurred, and 1881 there lead been also several severe epidemies of tever and other diseases to retard the growth of the population. The utal was 1,081,119, showing an increase of 56,767 persons and giving a donsity of 640 persons to the square nale. The district thus surpassed Bara Banki in this respect, but was still second to Luckness in Only and was some distance behind Arangach and the Bensres division.

During the next ten years the population increased by leaps Consus and bounds. The past decade had been a period of unusual prosperity and every district of Oudh showed a remarkable rise, while In some save Gonda was it more rapid than in hyzabad

total number of inhabitants was 1,216,959, no less than 135,540 in excess of the previous figure. The density rose to 703.7 persons to the square mile, but the relative position of Fyzabad to the rest of the provinces remained unchanged.

ensus of Ol.

From 1891 to 1901 the rate of increase was not maintained. and the population remained stationary or even declined. cause lay partly in the famine of 1897 and the result may also to some extent be ascribed to epidemics and to emigration. The nominal total population in 1301 was 1 225,374, showing an excess of only 8415 over the former figure. Even this was fictitious, for allowing for the mela pilgrims mentioned below, there was really a decrease of about 12,000 persons. The density rose nominally to 717-8 to the -quare mile. Eyzabad still remained behind Lucknow of the Outh districts, but had out tripped Azamgarh; and the only partions of the United Provinces with a greater density were the Bahia, Benares and Jaunpur districts of the Bonarca dayision. If the city populations be excluded, the relative position changes concernate Bara Banki being substituted for Lucknow in Oudh, while Azamgach takes the place of Benares. The enumeration was made on the 1-t of March a day bolico a protended Gobrad Duedushi fair at Ajodica, and the concourse of pulgrims would have tended to give a false impression as to the to'al population of tine district had not claborate precautions been taken for commercing the visitors from other parts or their own districts. The result was very satisfactory, but still 26,728 persons, or perhaps one tenth of the total number of pilgrims, were found in Apodhya who had not already wen dealt with at their homes and had consequently to be included in the total of this districk. Nearly one-fitch of tre-o belonged to Allahatad, while the rest came from many other districts.

77**8**4 34 The resileble statistics do not show any marked result in the growth or other size of the population from migration. In 1901 it was accordanced that 90:12 per cent, of the tubalisants were natives of the district, 7:1 per cent, of contiguous districts, and 2.78 per cent, were born elsewhere. Thus there was altogether 9:88 per cent, of immigrants, a slightly lower proportion than in 1891. On the other hand, the number of emigrants from the district was but small, and failed to be:

itor yn

34

() all the persons enumerated in India as born in Fyzabad, only 323 per cent. were found in other districts. The result is probably, however, deceptive, for numbers of persons emigrate from Fyzahad to Burma, the West Indies and elsewhere, and the readiness of the people to embark ou foreign enterprise is greater than formerly. From 1886 to 1901 no less than 21 526 emigrants from this district were registered. Over half the number went to British Guiana and Trinidad, while the rest went to Natal Mauritrus Jamaica, Fiji and Surinam, and a few to Saint Lucia. In India large numbers go to Rangoon, the Bengal coal-muer and the tea districts of Assam.

At the census of 1869, the only towns with more than 5,000 usabitants were Fyzabad, Ajodhya, Tanda Jalahyur and Akhapur. ving-In 1884 the district contained 2,676 inhabited towns and villages. of which 2,506 had less than one thousand inhabitants and 136 others under 2,000, while abose with a population of eyes 5,000 were the sime as before with the addition of Radnald. At the next census out of a total of 2,6% I towns and villages 2,465 contained under 1,000 persons apiece, 150 offices indec 2,050 and five over 5,000. These has were no same a letter, for Ajodhya was now amalgamated with Lyzabad. In 1901 the to all number of rababited value es and owns was 2070, with an average population of 451 per ons. A many as 2 77 and under s thousand unhalmants. 17th his than two thousand, and Of lesthan five thousand. The larger towns who the same a bethe, save that R unabi had diopped out of the list. The uban popula-Concompages that of the managedities contours as and Ac XX town, while all the rest is classed a much, and a challage the small towns not administered and conv As a line tormer arrounded to 125 100 persons or about 12 per cent, or he whole-sa figure which is very high for Oudh. Or thes, however no ess than 6.055 represents the population of the more male; and cancerwent or Fyzabad, and these that " Tanda so that with he exception of these two places il cie is a dear where any size in the distint, which in almost all respects I are resembles be rost of the agricultural tract- of One's. The vallages are of the usual character, with a central site and numer us scattered hamlots; they are larger in the Mangalin pargana than elewis in,

and in the eastern half of the district they are generally more aggregations of small sites, except in the southern portion of pargana Akbarpur, where wear plains prevail. The houses are for the most part built of mud, with tiled roofs in preference to thatch, probably as being less exposed to the danger of fire. In the old Musalman quibas brick houses are generally to be seen. Most of the towns are in a flourishing condition and have largely grown since annexation.

une Wil

Of the whose population at the last census 619,403 were males and 605,971 females. Every enumeration has shown an excess of male-, but the disproportion between the sexes has apparently decreased to a large extent since the first census of 18:0. There were then only 91% females to every hundred males. but it was supposed that there had been a considerable concealment of women on that oreasion, and it was reported that many of the people left the district in order to avoid enumeration. In 1881 the proportion tose to 98, and in 1891 to 98-7. At the last census it was only 97 8, but possibly the result is misleading on account of the pilgrim- who attended the Ajodhya fair, the concourse including far more men than women. This sheary is supported by the fact that the excess of males was far greater in the Excebad tabul than elsewhere, although some allowance must be made for the presones of the gardson, while it was very small in Tanda and Akkapar, and in Bikapar women actually outnumbered the men by usarly 3,000. The constitution of he populatic a from this point of view is very similar to that of the adjoining districts Basti, Comba and Bara Banke, in all of which, how ever, the deficience is more marked. To the east and south the dispreparation vanishes, Sulfangur and Azangach showing a larger proportion of females then it males. Fyzal ad thus occupies a position made as be ween the eastern and western districts of the United Province; it the former female prependerate, while abroughout the latter make a second females in number, the difference becoming more marked as we proceed westwards. The phonomenon appear to be mainly due to natural causes, as it exists to an equal extent among Hindus and Musalmans alike, and cannot be a-cribed to infanticule, as although the crime was undoubtedly prevalent in the district before

åe IF©I

difference between the numerical position of the sexes is not sufficiently marked among the Rajputs and other castes addicted to the practice to warrant any such presumption at the present time.

Classified according to religions, the population in 1901 con- Religion sisted of 1,086,637 Hindus, 136,095 Musslmans, 1,502 Chrisfrans, 762 Sikhs, 297 Aryas, 63 Jains, eight Buddhists, five Persis and five Jews. Hindus thus amounted to 85 68 per cent. of the whole and Musalmans to 11:11 per cent. The number of the latter is small, being far less proportionately than in the adjoining districts save Sultanpur, where it is practically the same. This is somewhat remarkable in a district which contains me of the old centres of Muhammadan government and where a large proportion of the land is held by Musalmans, Another nonceable feature is that Evrapad is one of the very few districts in the United Provinces, and the only one in Oudh save Lucknow, in which the Musalmans do not exhibit a tendency to increase more rapidly than their Hindu neighbours. Generally it has been observed that the former are cither more long lived or to re prolific than the ratter whether on account of their more "beral diet or the fact that they do not as a rule well de among their numbers so la ge a proportion of the very poir as do the trinois, but here the reverse is the case possibly many to the flot thus, as in Leicknow, the Musalmans charly telling to the larger owns and that city lafe products deteriorated. In 1881 here were 1152 per cent, of Musalmans and \$\$3° per cent, of Hondon, and the relative predominance of the outer was steadily ir reased ever singe.

Of the other religions there is but have to say The Sikker were more appearance in Exchail than in any other part of Outh Pt the time of the consus, but this was accidental owing to the presence of a Sikh element in the cavality there in each our cons-The risk are mainly in the police and other service. The lows, Partis and Buddhists all belonged to bezabed use'f. Of the Jame 41 belonged to the Pyzahad taled and the rest to Tanda. 1 . Violly a there are several Jain temples, erected as different times by members of this faith. The founder of Jamism, Adenath. and four others of the tweety-four tirthicidaries or becarchs were born at Ajodhya. It would consequently amount that the

Is no an i ntharp

religion was very long ago established here, but none of the existing temples are of any great antiquity. In the days of Shuja-uddaula one Kesri Singh, a treasurer of the Nawab, built five shrines to mark the birth-places of the tirthankarus. All of there bear the date 1781 Sambat. The temple of Adinath is near the Swargaddwar in the Murao Tela, on the mound known as the tile of Shah Juran, a Musalman saint who, according to tradition, de-troved the ancient Jain temple here in the days of Shahab-ud-din. That of Ajitnath stands near the Itawa tank; that of Abhmandana Nath near the site of the old Nawabi Sarai; the temple of Ananta Natl is on the banks of the Golaghat nata, overlooking the Chagra, while that of Samant Nach is in Ramkot. The last has been replaced by a large new building erected by subscription between 1936 and 1941 Sambat. The idole have been removed to this temple, but the footprints of the avatar are kept in the old building. To the west is a dharamsala where all the Jan piles in who come to Ajodhya" reade. total ice see all in the charge of a Gaur Brahman and belong to the Digamban sect. There is a sixth temple also dedicated to Apt Nath in the Alangani muhallat, built in 1881 Sambat by Udas Cland O-wal of Japun. This belongs to the Sitambari sect, the difference being that the images in this case are clothed, whereas the o at the Digambari sheines we naked. also a Jain temple of some importance at Raunahi, described in the article on that place

Aivar

3

The Arya Samaj has as yet made but little progress in this district, although in 1891 the number of Aryas was only 55. With a very few exceptions they belong to the Fyzahad and Tanda tahsils and chiefly to the toyon of those names. There are three recognised lodges in the district, at Fyzahad, Tanda and Ajodhya. The member are drawn from many different castes, the Brahmans being the strongest with 116 representances at the last cersus. Next to them come Karmes, Kayastha, Banias, Rapputs, Khatui and Sonars, while six other castes had less than ten members apiece.

Christinuity. Of the Christian population 1,106 were Europeans, representing the official and military element, 55 were Europeans and 341 natives. The numbers of the last have increased, but to no

great extent of late years. In 1881 there were only 58 native Christians in the district, but ten years later the total had risen 223. Of the latest figure no less than 228 were females. The returns show that 141 belonged to the Church of England, 113 were Methodi-ts, two Roman Catholics, while in the case of the rest no denomination was specified. There is a Chaplern at Evzabad, who periodically visite the out-totions of Gonda and Bahraich. The fine Church in captonments dedicated to St. Andrew, was built by Government at a cost of R-, 42,000, it was opened in 1860 and consecuted by Bishop Cotton Missionary work in the district is carried on by the Church Missionary Society and by the Wesleyan Methodist Mission. The former first established a permanent musion in Fyzabad at the end of 1862, when an application was made for the ne of the tomb of Bane Khanam, a mazyl building which had after armevation been med first as the residence of the deputy commusioner's head eleck, then as the station coffee shop, and then as the house of an extra a sistant commissioner, and was at the time of the application surrounded by a public golden of the contained the public swimming bath. The building was in a dilagidated state, and the Society under cole to put and man aim to in good repair and to allow access to the temb itself to all persons considered by the dejucy commissioner to be so chetted. The Application was granted and the building was given an e-free or condition that the chamber containing the tember old corbo fused as a fixing room. Only put of the land was then given with the rough, but in 1867 the romain for war hand on eyes to the trustion at an annual represent and in 1890 a lease for 21 years it all the land as Rs. 40 per annum was granted to be Chur b Missioner Trust Association. The work of to meetin has suried greatly in extense at times it has been precedable time it po the min stration of decine service for a small community at jothers it has included the maintenance of an English school Her boys and small schools for girls, and, while there was permanent resident muscomery, considerable exampensace work was carried on both in Fyzabad and Arshiya, partieularly among the Muhammadan population. Of late years the brook seems to have declined and it appears to be doubtful whether a permanent missionary will be retained at the station.

The Weslevan Methodist Mission first commenced work in this district in 1876, but till 1880 this was confined to the English community. In the latter year vernacular mission work was started at Goshainganj and in 1883 the Reverend J. A. Elliott was appointed to Fyzalaid, a post which he has held ever since. At Fyrabad the mission possesses a substantial church, a mission house, a large boarding school for native girls and a zanana mi-sion house for English ladves working in the district. There are outstations at Amaniganj, Raunani, Bhadarsa, Darshannagar, Goshainganj, Akbarpur, Tanda, Iltifatganj, Bariawan, Ba-khari and Jalalpur as well as at Rudauli in Bara Banki. The work of the mission has been largely directed towards education and in addition to the boarding school the mission maintains two prodo-nashra schools in the city, while instruction R also privately given in the zananas. Soveral schools are maintained of the outstations and in 1897 an orphanage for girls was prected at Akbarpur. Since 1899 efforts have been made to secure industrial occupation for poor Manamuadan women of good family in Fyzabad-1 mossure which has been attended with considerable success. Evangelistic work is conducted both at Fyzabad, where open-air services are held in the Chank, and at the outstations. At the present same the mission employs 51 native agents and maintains eleven schools. The ir come raised locally in 1903, including Government grants, amounted to Rs. 7,231.

Hindu conts

Hinduism in this district is naturally influenced in a large degree by the presence of Apathya, the birthplace of Rama, so that it is only to be expected that the Varshnavite form should redominate. The census returns show, however, that the professed followers of Varshavism amount to only a small proportion of the Hindu population. No more than 77 per cent. were returned as Varshnavites and 5-5 per cent. as Ramanandis. In both cases the proportions are high, but still the great mass of the Hindus appear to belong to no particular sect, as is generally the case throughout Oudh.

Monastic orders, Among the numerous Faques whose home is at Ajodhya there are many Bairagic who are included in the V

These Bairagis belong to regularly constituted religious hodies and are divided among seven different akharas or orders. The duciples have to pass through a series of stages, which are identical in all cases. They are admitted while under the age of inteen, although the rule is relaxed in the case of Brahmans and Raiputs, who also onjoy other privileges, especially in the matter of exemption from menial service. The first stage is known as chhora and lasts for three years : the work of the novice consists of servile offices, such as cleaning the smaller utensile of the though and of the common mess, carrying wood, and performing mile math. The second stage is also for three years and is known as bundagular. The disciple new draws water from the woll, cleans the larger vessels, cooks the food, as well as doing muga. At the expiration of this period there follows a third tage of equal duration, known as hurdanga. In this the work consists in taking the faily food to the idels, distributing the daily rations given at midday to the brothren, doing pure and carrying the nishan or temple standard. In the tenth year the disciple enters on a fourth period of three years called maga. During this stage he leave- Ajodhya with his contemporaries and goes the round of all the taraths or sacrea places of India, ubsisting all the time on mendicancy. At he return he reaches the fifth and must stage called gith which continues till ms life's end. He now coases to work, except us the matter of spage path, and is provided with food and clothing

The seven orders have a regular system of precedence which wobserved in ceremonial processions and on similar occasions. to front come the Digambaris, followed by the Nir sanis on the right and the Nirmohis on the left. In the third rank behind he Nirbania march the Khakis on the right and the Niralambhia stile left; and after the Numbles come the Sanokhis and Mahaa touris in the same order. Between each body a once is left, with in front and or the flanks. The Digambaris or naked Digampretics are said to have been founded by one Balram Das, who one to Ajodh ya over two hurdred years ago and built a templa ers. The present head of the college is the eleventh mahant. The order is a small one, as the number of resident brothren is inited to fifteen; it is on the other hand possessed of considerable

Mi-boni-

Nirmohia

wealth, having several revenue-free holdings in Gorakhpur and two villages, Puraina in tahsil Fyzabad and Kalubur in Tanda, recently purchased in this district. The largest community is that of the Nirbanis, who live in the celebrated Hanuman Garbi temple. They are very numerous, but there are not more than 250 residen disciples who obtain daily rations. The Nirbanis are divided into four thoks or pattis, which go by the names of Hardwari, Basantia, Ujainia and Sagaria, each with its own mahant; but over all is a single pre-iding mahant, chosen by common consent, who occupies the gadds in the verandah in front of the temple. The N rhams are very wealthy: bosides owning revenue-free and in Fyzabad, Gonda, Besti, Partabgarh and Shahjahanpur, they curry on an extensive business as moneylenders and dealers in olophants, and have purchased several villages with the proceeds. Their revenue from the offerings made by pilgrims is also very large. The Numbhi sect claim spiritual descent from one Goband Des of Japur. They formerly held the Janamas han semple in Ramkot, the remains of which still belong to them; but on its destruction by the Musulmans they moved to Ramahat. Subsequently a quartel arose among them on a question of succession and a split occurred, a branch leaving Ramghat and settling at Guptarghat. The mahant of the Ramghat branch is the ninth in succession from the founder. The Numbris of Guptarghat have some revenue-free lands in Basti, Monkapur and Khurdabad, but the others are wholly dependent on the temple offerings. The name significa "void of affection," The Khaki or reliebe meared others was established in the days of Shup-of-dauly by one Days Ram from Chitrakot, who obtained four bighas of land in Ajodhya and built thereon a temple. The order numbers 180 per on-, of whom 50 are resident and the rest itinerant. The present head is eleventh in succession from the found . The Khakis own some land in Basti and hold the lease of one village in Gonda. The sect called Niralambhi, or provisionless, dates from the same period, having been founded by Bu and Das of Kotah, who came to Ajodhya and built a temple which was afterwards abundoned. One of his successors, Narsingh Das, erected a new temple near that of Darshan Singh. The fraternity is a small one and depends solely on the offerings

-Kbak ×

Nirelam bhis of pilgrims. The Santokhis or patient faqirs are a small and Sentopoor sect without any endowment. The akhara was founded in the time of Safdar Jang by Rati Ram of Jaipur, who built a temple in Ajodhya. This was subsequently abandoned and the site taken for another temple by Niddhi Singh, an influential Kalwar in the days of Waild Ali Shah. After this, one Khushal I'ms of the Santokhi sect returned to Ajodi va, and his successor. Ramkishan Das, built the present temple. In 1900 the malant d ed and for some time the akhara was deserted and no successor appointed. Lastly come the Mahanitbanis or dumb facirs, the Mahanirand implying worship without asking for favous either in this would or the next. The present mahant is the seventh in succession from the founder, one Paretam Day who came to Ajodhya from Kotah Bundi in the reign of Shuja-ud-davla, and built a temple. There are twenty-five breshren, the majority of whem are itinerant mendicants.

According to the consus roturns of 1901 the Hindu population. Cases, comprises representatives of an ususually large number of castes They amounted in all to musty six, while in the case of 2.581 persons no caste was specified. Many of these undeed are nun orically it little imperiance; in forty in-tone, - if ore were 'ess than and handred persons on morrated; eleven take a laid under 500 members, and of the rest an equal anmber under two thousand. On the other hand, no tower than 29 castes been with a strength excerding 10,000 persons a rece-a remarkably large number; while the remainder were found in numbers verying from two to nine thousand. It is only to be expected that an one so great a an acty and in a district and ensely populated are male actes smooth In found in numbers occeeding the general average for Oudh, but here see few which are eather prouling to My that, or which sre not to be found in some or all of we adjoining districts.

The Chambes are by far the strongest on to numerically in Chambes. the district, numbering 171,729 souls, or 158 per cent. of the total Hindu population. They are is more common in the and and Akharpur tahsuls than in the west of the district, and tewest in Bikapur. Most of them are engaged in agriculre, chiefly as labourers on the holdings of high caste tenants, though a considerable number occupy land in their own names.

None of them, however, hold proprietary rights in any village of the district.

Ni Brah-

Next come the Brahmans, who are again unusually numerous, having in all 164,759 representatives in 1901, or 15 16 per cent. of the Hindu population. Over 50,000 were found in the Bikapur tabail, but elsewhere they are very evenly distributed. They are more numerous in Fyzabad than in any other part of Oudh except Gonda, and almost all of them belong to the Serwaria subdivision, the rest being chiefly Sakaldipis and Kanaujias. Many of the Brahmans follow the religious profession, but the majority of them are engaged in agriculture. As tenants they hold land at favoured vates, generally about 25 per cent. less than that paid by low caste cultivators; but as they mainly rely on hired labour their profits are no greater than those of the less favoured castes. As proprietors they hold more land than any other casto except the Rejputs; but this is chiefly owing to the fact that a single Sakaldipi, the Maharaja of Ajodhya, own- the largest estate in the district. He is the only Brahman taluqdan; but at the last sottlement 49,834 acres were held by Brahman zamindars and pattidars in different parganas. They chiefly provail in the Bikapur tabil and in Mangalsi and Akbaipur. Of the various Brahman communities the most land 15 held by Tiwaris and Pandes, while Upaddhva- Misrs, Dubes and Shukuls own large numbers of small mahals. In former days the Brahman persessions were more extensive, as is evidenced by the fact that they still hold 64,190 acro- in subsettlement, their superior right having passed during the last contary to the taluquers, although much of their land was seized by other Brohmans in the persons of the Rajas of Mahelauna,

Nirm

Khakir

Ahirs.

Miralsa bhis The third place is taken by the Ahirs, who are exceptionally numerous in this district, amounting at the time of the last census to 148,571 souls or 13%7 per cent of the total number of Hindus. They are fairly evenly distributed throughout the four tabsils, but are most numerous in Bikapur. They are almost without exception engaged in agriculture and are cultivators of a high order. Their proprietary holdings are very small and are confined to six minute mahals in the Mangalsi, Khandansa and Birhar parganas, amounting at the time of the last

rettlement to only 63 acres; they, however, own 446 acres in subsettlement. The fourth place is occupied by Kurmis, who Kurmis numbered 74,191 persons or 6.82 per cont. of the Hindu-a figure which is small in comparison with the districts to the north and west, but which is far higher than in Sullaupur. The Kurnus stand in the foremost rank of the cultivators, and tenants of this caste are always in request, although they have to pay a high tent. They are the chief growers of suga canc and generally devote their attention to the more valuable staples. They own a small amount of land, 756 acres in all at the time of the last settlement, comprising 13 mahals, chally in the Landa, Haveli and Mangalsi parganas. Like most of the eastes they have forat the hands of the talandars, out retain 1,670 acres in subsettlement.

Rajputs, though they hold the fifth place in point of auni- Rajpute hers are the most important casto in the district. At the last e near they managered 67,522 persons or 621 per out, of the Hindu population. Their distribution is fairly even but they occur in greatest strength in the assertin purgenas of the district They are a parely agricultural and lando vious case, and as tenants hold they lands on ferms very sheetar to the e of the Joshnans. As proprieters they own mate land than any others, being in possession of an less than 5 da, 26 are to conclude half the entire district at the time of the last assessment. It addition to this, they held 126,065 across in splistfulement at house much if this is included in the properties of fallights of the same The Raiputs of Fyzabad belong to a give number of Those having the most representative, are the Buias compling to 17,500 persons in all and residuage biefly in the this pur tabul and pargana Mangelsi, Chambans pernequalty ) Bikupar, Bi-ens, who are mainly confined to the same talkel, there they will hold large colube, Strapener- Panware, estwars, Ragnulansis, Rathwars and Bachgote, the last in buding their kirsmen, it's Rajkamar- who have overflowed table this district from Sultanger. Some account of one principal lars will be given later in dealing with the serious taluous, while reference to the cinef colomes in different parts of the dis-

'act will be found in the pargains articles

Ther numerous astes

As many as eight other castes had over 20,000 representatives at the time of the last census. These are Kewats, Pasis, Muraos, Banias, Koeris, Kabars, Bhars and Kumhars, Hardly any of these call for any special mention. The Kowats, who numbered 10,151 persons, are far more common in Fyzabad than in any other part of Oudh; but they are to be found in larger numbers in the adjoining districts of Gorakhpur and Basti; they are an agricultural caste, do-ely allied to the Lodks and Kisans of other districts. Banias again are more numerous here than elsewhere in Oudh, but not to any remarkable extent and ain for more prevalent in the Gorakhpur division. They belong chiefly to the Kasaundhan, Kandu and Agrahari sul-divisions. Bhars, who numbered 24,538 souls and are said to represent the old owners of the soil, are again more common here than in ther district in Oudh, but are far more frequently to be found in the Bennes and Gorakhpur divisions to the east. Here they are almost velusively confined to the Akbarpur and Tanda tabile : which they take a high place among the low caste cultiva ms. Kumhars, of whom there were 21,722, stand in the same nor a real relation to the other Oldh districts as the Bhars and other castes of eady mentioned. Many of theer follow their ancestral colling as petters, but their handweaft i in no way remarkable, and the majority of them are engaged in hasbandry.

Other easts with more than 10,000 representatives apiece are, in numerical order, Dhobs, Nais, Gauaciya, Kayasths, Telis, Barbas Kalvars, Lohais Lamiva and Barais. There are all cound the agrent Oudh, and come of them easier in man rally large naturals except a large data, their total being only exceeded in a rate of the Oudh distance and Gorakhpur and Barti elsewhere a racy take the place of the Pambolis of other pares, their special execution being the cultivation of pan. There is every few I mosole in Francisco and admit the Barais predominate in take pare. Properly the distinction between the two is that the Berm grows pan and the Tamboli sells it, but this commonly disappears in practice. The Bharbhunjas or Bhurjis, Goriyas, Faqirs, Koris and Sonars have each more than 5,000 members. Of these the Goriyas alone call for special in the as being more

numerous than in any other district of the United Provinces; they are found in all tah-ils, but especially in the eastern parganas. They are a fishing and culcivating caste analogous to the Gonrhis : Bihar and are usually considered to be a subcaste of Mallaha. whom they generally resemble in their manners and customs. of the 68 other castes found in this district very few are of any intered on importance. Hardly any occur in greater numbers than in any other parts of Ondh, the preveigal exceptions being the Atits, Bhanreriyas and a few others who are more frequently met with in the eastern district. The Atits numbered 1,547 persons a figure which is quite insignificant as compared with these of the districts of Gorakhpur, Ba-ii and Ghazipur. They are fund both in the lands and Bikapur taheds abile many of form were enumorated in the adjoining district of Bara Barks. They cem closely to resemble the Samyasi Fagus, but several of then ouls vate some parenes of land, held rent-tree, which have been granted to them by the propriet as. The Bhameriyas are toud in equal numbers in Partabart and are astrologers overy similar to the Johns of other districts. In is perhaps worthy of note that there were 39 Gandle eps in the descript a caste weigh is only a und elsewhere in Benaies, Muzapia and Chazaout they are singers and dancers by profession, and a containery repulable character. There were also of Tai pates, it est adjob cally been my Eyabel. They I not appear, cases in to be pro-dy-eatitled to behald stinction as they we cally but a widow for if the Pasis and derive that name from their pode-son of extracting tree from the pulm- are

cent. of the Muhammadar population, which is probably a higher proportion than in any other district except Jaunpur.

Inlahas.

The Julahas are the most numerous caste, amounting at the last census to 28,548 persons or 2000 per cent. of the Musalman population. Half of them belonged to the Tanda tabsil and the bulk of the remainder to Akbarpur. In this district they are still very largely engaged in their peculiar occupation of weaving, the principal scats of this industry being Tanda, Akbarpur, Jalahur, Nagpan and Rufatganj. As clowhere, they have also largely betaken themsely to agriculture—a profession which they follow with some success. Closely akin to them are the Behnas of Dhimas whose occupation is cotton carding. They numbered 12,036 so a single SSI per cent. of the Musalmans and are more evenly instributed than the Julahas, although most of them belong to the castern pargamas.

thank!

Of the neber grades the Sharths are as usual the most unprecess, amounting to 20,189 souls of 148 per sent, of the Muha madan population. The bulk of them reside in the Excellent and Tanda talests. They conquese representatives of many sability soms, the strongest being the Siddiqis, as is almost eyers where the case, while next to them come Qarreshis, and then et a bong distance Paintys. Ansaris and Abbaes, the last being only found in "Vilaipie, while the Parages are practically coppered to Tenda. A tast mucher of Shrikhs hold land in the dition but their tormer posses ions were to a great extent absorbed by mile and talaquars. specially those of Samenpar, a Small estat which to now lebt by Savids. Pathons aumbered 1185 co. (048 in eco), or he Musalmans. More are to be Con the Carlot Contact taked than the whole though there is a comed the name of Tenda. И

1

to 787,183 persons or 64.2 per cent.; but although the occupations of the remainder are returned under other heads in a great number of instances the people so classified were engaged in agriculture as a subsidiary means of support. How far this is so, it is impossible to state, but very many of the weavers and others cultivate a small plot of land in addition to their regular calling. The inquitrial population was returned as 221,017 or 18 per cent. This was chiefly made up of some 77,500 persons employed in the preparation and supply of the articles of food and drink, and of 63,700 persons engaged in the manufacture of textile fabrics, chiefly the country cloth turned out in large quantities by the weavers of the Akbaipur and Tanda tahsils and elsowhere the other chief industries were those connected with glass and oursh aware, with 19,900 workers and dependants; motals and 15,600; wood and cane and the like with 13,500, and leather with 5,000 persons. The professional population—a very wide term extending from barnisters and physicians to singers and reogness mendicants—accounted for 17 per cent.; the commer ral population to enly 7 per cent.; while the remaining 154 per cent, came chiefly under the heads of personal and household services, Government employ and unskilled tabour.

nska'

The ordinary dialect of the people is the Awadhi form of eastern Hinds, gradually blending with the western Bhojpur form of Bilian, which is the common tongue of the eastern pargamas. In Frenhad and among the Musalmans generally the Utdu or Hindostani dialect of western Hindi is generally used. oensus returns show that 65.9 per cent, of the people speak Awadhi, '61 percent Bhopper and 18 per cort Hindostani, The other larguages are ammportant, and included English, Bengan and Panjata all of which were spoken by others than natives of the district. The only remarkable feature, therefore, is the presence of Bhaipin, which does not come elsewhere in Oudh, and here is mainly confined to the Brisas and Surhupur parganas, although there is no hard-and-fast linguistic boundary. The Bhojpuri forted in Fyzabad is not pure as in Gorakhpia, although the vocabulary is generally the same. Here it has not the varying forms and the recurring liquids of the Gorakhpuri speech, the diminutive adjectives are not so frequently heard, but the

resemblance grows closer as we proceed eastwards. At the same time the speech is sufficiently distinct to be recognised as a separate dialect and is almost unintelligible to those who only know the tongue of the western districts of the provinces

There is but hatk indigeno is literature, for, with the possible Litera-(xc.p ion of Ajodhya, no place in the district has ever been a sentire of learning or produced any one famous in the world of letter. Inia Das commenced the Ramayan at Apolhya in 1574, and in later days several well-known author came from to place, such as Ran Nath Purchan, who wrote the Rame ka's not and other books in the middle of the last century, Uninpan l'irbedi, a harned pandit who dod in 1874, and other . Malazapa Man Singh was an author of some repute and collect d rained him several poets of local fame. There are no regular newspapers now published in the distingthatic whave appeared from must be time, but the last expired in 1891. This was the Shanesa Ourly, started in 1884, and issued by the Naratin pre 1, which still wists. Others were the Khankhwah-r-Oal's started in food and entimed for five years and cold Baradard profished in 1890 for one year only by the Nasic arcs, and first tulion colouging to Sharich Sanisar. Alterthetics is dit at extituee. The trimfing presses now merely execute fiber 3, the chart are taken of E. Gosham & Co., dating from 1896, and of the Mahmaja of Ajodhjan. There are one a contract of case of ances result date, but less importance. The Firshill Greeker, an official on help on an Person and Perry, issued in the discourboard, how a forting hely encolation of ancies 1,5 to copies of the among village headment if emtains other direction or a news, s wide a regiment les or coment conces. The Museum is a good specimen of a local custitution of this nature. It was started about 1867, and the present

) !! B

building, which stands near the district courts, was erected three years later.

Proprie-

The lands of Fyzabad are divided among a few large and an immense number of small proprietors. The taluquari system is very prominent, and nearly three-fourths of the whole aren is owned by a small body of taligdars; in this way the district re embles the rest of Oudh, but at the same time it presents many distinctive features of its own. An unusual proportion. of the tahiqdar, land is held in sub-set lement or by under propriefors, while side by side with the taluquari system is to be found a state of things which closely resembles that of the eastern districts of Azamgarh and Jaunpur, in which much of the land is owned ir pattidir or other connectary tenure and generally in a state or extreme abdivision. One of the most remarkable reatures of the district is the extraordinary number of mahals into which the village are divided. This is especially the case in the eastern and western pargames, and is due to the fact that forme ty groups of villages rather than single villages were treated as an estate, so that at subsequent divisions of the property each sharer found hymself in presession of, not one or two single villages but separate shares in a much larger number. This in 1905 the district contained or all 2,848 rovems, villages devided into n 1 - than 10,187 nathers, but the word michal is at a employed a denoting the whole area or which a single engager ent as taken and which coase quartly may extend over a large number of villages. The total reanley if diese estates was only 2,051, and as an illustration it may be noted that the vist property of the Maharato of Ajodova consists of enry eleven such Ag to the ishandansa paggina contems 128 villages divided int. 1,577 reshably but the conscitute and separate estates, At the other and of the secomes America is 194 villages and 542 mahals r blay obere person or bodies. The second most notices it spirit is the exent to which subordinate tenures have neen granted, the continuable being probably greater than of the rest of Oudh pressing these sacts render the work of the revenue administration and assissment for more intricate and taborious than elsewhere, and whatever evils or benefits may be supposed to flew from the accumulation of such multiplicity of

apportmposed interests in the soil, are doubtless to be found in this district.

Of the total number of mahals, 6,333 were in 1905 held in Tenures talagdar tonure, but of those no fewer than 2,121, rope senting 28 per cent, of the area, were held in subsettlement. The single zannudari mahals numbered 1,369, and those classed as joint zamin (ari 1,059. Of the 1,983 pattidati mahals, 837 were held in the perfect, and the test in the imperfect, form of this tenure That known as bharyachara is comparatively rate and is found i only 41 mahab, thirtly in the Majhama and Surhupar pargame. In addition, 555 mahals wented by samuridars or copaccenary podios were in the hands of subsetdemen helders. Of the remainder, 120 malals were revenue-free, tou were easily property and eight owned by Government. Out of the whole area 71:1 per cent. is caling lari, 7.5 per cent. zamendari, 18 per corn owned by coparcenary bedres 18 per cent vicible of Governmone proporty and 13 per cent revenue-free

The largest proportion of the land is held to Rapputs of various clairs, this being generally the case this agricuit Oudb. At the beginning of 1905 the district of famed 2001, eparate states and of the CALLO were sword by Rapput 1566 by Backmans, 286 - Masalmar-, 87 by Kayards, 31 by Khette - 17 by Bantas, 17 by Pague, Coshans and Banages, 17 by Kawa 13 by Kariats and the remaining 2.2 to 12 a s. K. v.a. Mars, Teles and others. These estates vary greely in silling the agree are therefore schowlar misleading . A marging is cause view is maired from a sortlement up its at 1955. A than time, of the whole tabiques and an time is in all to 700 cost error \$2.000 per cont. was held by Rajjus. 2007 per cont. to Mustimans 12553 per eighter tha meter and 17 per ent 1) Kayasehs. The non-templar area one need of a \$746 a es unto consolidad per cent was held a freque to 38 per come by Masabian , 13 66 per cent by Bradians, 6 8 percent by beyasths and 1042 per cent by others. There comains the Person a creation of the first again to be handed: I this was bel-By Musalmans, and the greater part of bott manner by Bullme's, Barrages and Cosbains. The land worner Capputs belong to many different clans. The most important of these are the

Palwars in the east, the Bachgotis, Rajkumars and Gargbansis in the south and centre, and the Bais, Bisens and Chauhaus in the western parganas. Mention may also be made of the Surajbansis, who have a certain number of villages in all the parganas of the Fyzabad and Akharpur tahsils except Mangalsi; Chandels in Majhaura and Tanda; Bhalo Sultans in Khandansa and Mangalsi; Barwar; chicity in Haveh Oudh, and Panwars in Akharpur and Tanda. Of the Musalmans Saigids hold by tar the largest share, mainly by reason of the fact that to them belong the large properties of Piepur Samanpur and Bhadarsa. Shaikhs bave many small estates in Mangalsi, Haveli Oudh, Khandansa and elsewhere; the Pathan and Mughal proporties are chicity in Tanda and Mangalsi; and those of the Khanzadas in Khandansa, Puchhimrath and Majhaura.

l'aluqda 🛌

A list of all the falugdars holding land in Fyzabad showing their easte and clan, the number of villages held by each, the parganas in which their estate is situated, and the revenue paid by each takapa will be found in the appendix. These proportion are 20 in number, although some of them have been further subdivided, the being e-pocially the case with the Palwars. Many of the tatuquars are non-resident, and frequently the bulk of their estates hes in other districts, especially in Sultanpur. Of the whole number, 15 are held by Rappuls, including six properties owned by Palwars, tour by Bachgott, four by Rajkumars and one by a Gugbansi, one, the largest estate in the district, by a Brahman, one, Rasulpur, by a Kayasth and nine by Musalin in The last include for Saiyid estatos, one held by Shrikhs, three by Musabaca. Basigotis and one ty a Musalman Bhale Soltan. As a count of each of these talungs, showing its history and extent, will now be shortly given. There has been a slight decrease in the talequarrance ince the first regular settlement, chiefly owing to the sale of the Baragaon estate formerly keld by Rajkumars.

Lj siliya.

By far the targe-t landowner in the district is the Maharaja of Ajodhya, a member of a family of Sakaldipi Brahmans who rose to great power and influence during the first half of the niueteenth century. Their history is intimately connected with that of this district and of all the eastern Oudh, but the rise of

the family may be here briefly traced. According to their records one Sadasukh Pathak held the office of Chaudhu in Bhojpur, and after the defeat of Shuja-ud-daula his on, Gopal Rum, left his home and settled in the village of Nandnagar in pargana Amorha in Basti about the end of the eighteenth century This man's son, Purandar Ram Pathak, crossed the river and muriod into the family of Sadhai Ram, a Mist Brahmon and manualar of Palia in this district. He bac five sons, Bathtawar Singh, Sheodin Singh, Inchha Singh, Dur han Singh and Debi Parshad Singh, all of whom became mon of you iderable note. The oldest commenced life as a trooper in the Bengal Cavaley and when serving at Luckneys attracted the notice of Saidat Ali Khan, under whom he became a risaldar in the Oudh service. Subsequently, by the favour of Ghazi-ud-din Haidar, he acquired the title of Raja, which was afterwards made hereditary by M. d. ammad Aji Shah. He established himself in Middauna, were he acquired 54 villages termedy held by the Bas of Sonwal and Rucu. Bakhtayar Singh in 1821 a amore I has vonagor brother, Darshan Singh, a court, and the latter soon received the command of a regimen. In 1822 Parsian Singh was appointed chakladar of Salon and Persona, and he years I to be became nazim of Sul anpur and Pyzabit. In 1812 ho obtained charge of Gonda and Bahrarin, has has enduce there in manaction with his pursuit of h. Raja at Balcauper of to Negal, ien to his dismis al and imprisonment, and to the co-emption in direct management of Mandama. Day an Single we were seen, however, seleased from confinement and the Natilauna estate 1988 restored to Raja Bakhtawar Singh. So teafer; in 1844, the tuice and at Ajodhya, leaving three son. Righthat Dayal Stoch, Ramadin Singh and Harman at Singh, are wards known as Man Singh. The last was appointed nector of a cyabad Redault in 1816 and obtained the fithe or Raja Bahrlin for Suptaring the robel Paja of Surappin in Bara Banki. In 1847 he subdued Harpai Singh, the Gargbansi of Khap, addh and to 1855 he eppenhended the notorious bands. Lagannath Chaptasi. In The same year Raja Bakhtawar Smgh died, seaving a will in fav ar of his nephew and adopted son, Man Singh. The family property had by this time been very largely increased. The Kaja

of Mahdauna had swallowed up the estates of the Surajbansis in parganas Havels and Ancin; in 1816 the Gargbansi estate in l'achhimrath had been absorbed in a similar tashion; in 1825 forty villages belonging to the Upaddhya Brahmans of the same pargana bad been also included in the taluqu; and in 1843 he acquired the property of the Bisons in Mangalsi and Pachhimrath. In May, 1857, Man Singh, who had been deprived of the bulk of his estates at the first settlement, was accested at Fyzakad for default of payment of revenue, but he was released in June, that he might protect the European women and c'uldren from the rebels. He received into his fort at Shahgani 29 fugitives and escorted them in safety to the Ghagra, but sub-equently he wavered between allegiance to the Bartish and adoption of the rebel cause. After the final capture of Lucknew his conduct drew the attention of the 1 bels, who best god fam in Shahganj until he was relieved by Sir Hope Grant visually, 1858. From that tend he zealously exerted himself in the restoration of order, and for this and his other services he was as we did with the title of Maharaja, a remession of all the reversio balances due on las estates which were restored to him in 1858, and the grant of the large conferenced taluquof the Besch Raja of Gonda. In after years he acted as the representative of the Ondh collectors and took a prominent part in the administration of the province, being chiefly distinguished for the part he played to the "Outh compromise." It 1869 be was reated a Knight Commander of the Star of India. He died as the age of fifty in 1870, a year which saw the decease of both of his brothers. He left his property by well we his widow, Maharani Sabhac Kunwar, for her use until such time at the should clear a successor from among the member of the family. The estate was taken under direct management in der the l'aluquars' Relief Act and so remained until 1800. In 1875 the Maharani recognised as heir Lal Teleki Nath South the son of Raghidar Payal; but the sicceon was desputed and after protracted litigation was decided in as our of the present Raje Partal-Natam Singh, the grandson of Man Singh by his daughter, who married Norsingh Narain Singh J Ajodhya. The title of Maharaja Bahadia had been granted as a personal distinction so Raja Man Singh in 1859, that of Maharaja was conferred on the present Ruja in 1887.

The name of the estate was changed from Mahdauna to Ajodhya in 1890, and in 1895 the Maharaja was made a Knight Commander of the Indian Empire. The taluqu was made over to the Maharaja at his succession in 1880 free of debt, but since that time it has not been well managed and owing to this and to hirther litigation is now very heavily encumbered. It comprises an namer-s number of villages both on this district and elsewhere. In Conda the Maharaja hells the Bishambarpor and Talsipur tates, consisting of 23? villages and portions of 49 eteers. In Sattanpur he owns 13 vellages and three pattis, known as the Bue thipm estate, in Bara Banki 13 villages and two patter and in Lucknow two villages. The property in this district comprises no loss than 360 whole villages and parts of 65 other these 150 villages and 26 pattrs form the Mabdauer estate in parzona Pachhimrath; 70 villages and 23 partis known as the Tao lach property, are in Amsm., 62 villages, known is Rainur. are in Mangaist; 68 villages and 14 patrix in Haveli Orda these constituting the Baretha estate, sevou villages, usefuling Pakauli, belong to Khandress, and three villages and we pattis he in Maghaura. The whot the anciental at R. 4,51 54%

and Chakarsen Singh, the ancestor of the powerful house of Patti Bilkhar in Partabgarh.

Nanomau

Eighth in descent from Ishri Singh came one Bijni Chand. whose eldest son was Harkaran Deo; one of his descendants, Kirat Sah, crossed the Gamti and established a colony of Rajkumars at Nanemau on the river bank, in paggana Aldemai. Here his family increased and multiplied and the numbers of shareholders in the estate have greatly swelled, resulting in minute enbelivesion, small perfits and heavy encumbrances. The Naneman talique is in reality a copareen try property. The sand was conferred on Babu Sitla Bakh-las head of the family she engaged at the summary set length for 73 villages, but much of this was sold in consequence of debt, and for a time the estate was taken under direct management. He was succeeded by his son, Baba Ambika Bakhsh, the present taluqdar. The property in Sultanpur comprises 14 villages and 21 patter of pargamy Aldonian. and in this district 13 whole villages and parts of three others in Mashawa, known as the Natharpar estate, and the Ahcta property of an villages and an pattis in Akbaiput, the whole is as essed at Rs. 9,166 in Fezabad and Rs. 10,820 in Sultanpur. The tabeglar resides at Narharpur.

Meopur.

The second son of Bijai Chand was Jit Rai, and from his enter son, Math kan Sih, como the teluquar el Mocpuz, a villogo also on the Gumti in Aldeman. Five generations later came D.d Singh, who flourished about 17(0) and held a proporty of 65 villages. His elder son was Zalun Singh, who occupied a prominent position in local mistary and ruled Meopur for many He had five son and dering his bittime asade a distribution of his property between them. In 1809 he and his kinamen fought with the Raja of Derv and the Palwars of Bishur for the possession of Ma orn in the Burbar pargana; the Dera Rajkumars win the day and Zalim Singh and his three older cons, Sangram Singh, Subhan Singh and Pahlwan Singh, were killed. The conflict was renewed soven months later, and then Sarabdayan Singh, the son of Sangram Singh, achieved success and for a time retained the village. The subsequent history of the taluqu is mainly a record of quarrels between the various sharers. Sangram Singh had another son, Ranjit Singh, whose son was

Sudisha Narain Singh. Subhan Singh's descendants lost their nose sions and have now only subordinate rights in a few villages. Pahlwan Singh left three sons, whose descendants own Meopur Dal's. Zorawar Singh, the fourth son died without issue; and the descendants of Sagritwan Single, the young st sou of Zalim Start, have now no land, their villages having been absorbed by Mapur Dahla. When Zorawar Singh died, Sarabdawan and Salish Narain quarrelled with the sons of Pahla in Single about 1 - share; they agreed to decide the matter by a bitration, and a the meeting Fitch Babidur, the second of the three brothers, madered the rival claiman san oud blood. The came occurred in British territory, and consequently the three brothers were outla ved. Shorraj Stugh, the eldest, was hunted down and slain at Anola in Buhar; Easch Bahadar died in jail at Jampar; and ! Raghubar Dayal remained a fagitive till his death a few years who · \*

Meopur Dhaurus, the latter being a village now in Akharpur, and the passed to be sone, Utile-h Singh and Chandresh Singh. The former was succeeded by Indrasen Singh, and Marasen Singh as sone, Ugarson Singh, Chitrasen Singh and Marasen Singh thursen Bingh has since been succeeded by his sen Semoshwar Lushad Singh, a renor. The share of Chandresh Singh has long and reho managements of the Court of Wards areo November 1901. The whole property is a large and valuation estate, combiting, in addition to 25 villages and 41 patts in Alderian of Sultangur, 62 villages and parts of 60 other in this article, a cood at Rei 38,300. Of the latter, 32 villages and 22 parts is in paramer Akharpur; 13 villages and 21 patts. I nown as the Chita-partic state, or Majharer, 41 oillages and 13 partic of Tando; two villages and four patts in Surhapar, and the refle village of Chirkitaha in Ansin. In addition to those

Husain Ali. He then abdicated his property in favour of Umresh Singh and betock biaself to Fyzahad, where he lived in receipt of an allowance of Rs. 4,000 a year from the estate. The property originally consisted of 38 villages in Surhurpur, all acquired since the beginning of the nunetcenth century. It disappeared, however, soon after the first regular settlement, for the whole estate, which had become hopelessly embarrassed by reason of mismanagement and extravagance, was sold by a decree of the civil court in 1875. The villages con tituting this talnua at the time of sate lay to Akbarpur, Majhadra and Surhurpur, the village of Baragaon from which it derived its name being in the last-mentioned pare ma. It consisted in all of 21 villages and three pattis in this district, and was sold village by village, the principal purchasers being Khartus.

Meopus Dabla

Of the three sons of Pahlwan Singh, two left issue | Shoora; Singh had a son Ishre Singh, who again had two son a Ramdeo Single and Chandratali Singh. Futch Bahadur had two sons, Lallu Sah and Abbar Dat. Their estate is known generally by the name of Meophi Dahia and a joint sanad was given to Ishraj Singh and Lalln Sah; the two branches, however, had frequent disputes and a private paratition was effected. Both properties are heavily enemabered, that of Ishiai Singh being in the worse plight. The burk of the estate has in part and Aldonian of Sultanpur, but the trludges hold a few villages in the district, Laffu Sin owns the Coppur and Baramadpur proporties of three villages and two pattis in Akharpar a sessed at its, 2,875. Bahar V. geshwar Paki, h Singh, the successor of Randee Stage, held the Yarki estate of one wante village and parts of man of ters in Akbusput, paying Rs 3,965 in revenue till 1904, when the i mperty was ald by any ion muco a degree of the civil court.

Мe

From Jie Naram the third son of Rajar Chand, the Rajkumur tabuqdars of Dera are descended. Then his city and the account of their constant fights with the house of Meopur are told in the Suttanpur volume and need no recapitulation. The famous Raja Rustam Sah obtained the sound for the estate, which passed at his death to 1877 to his nephew, Raja Rudra Partab Sah, the present tabuqdar. The bulk of the property lies in pargana

Aldeman of Sultanpur, but the Raja owns a large number of cillages in this district also. In roturn for his loyal conduct during the mutiny Rustam Sah obtained the confi-cated estate of Man Jadabanspur in pargana Haveli, which formorly belonged to Rap Jai Lal Singh, the son of Darshan Sough, the Kurmi, who was hanged at Lacknow in 1859 for having taken a prominent part in the rebellion and in the murder of the Sitapur fugitives Another estate in this district, known as Amangabad, in the migenas of Amsin and Tanda, belongs to the Raja of Deal. naving been acquired from the Barwars in 1813 after a severe fight at Rajapur, in which Madho Singh of Dera was victations. Altogether the Raja owns 69 villages and part of 121 others in this district. In pargana Haveli Oudh his estate of Mag Jaduban-pur consists of 24 villages and 15 pattis, in Akharpur to words the Atdih property of 19 villages and 11 pattis, in Surhugnor afric villages and 38 parts, known as Burnau; or Tanda tour villages; in Majhaura for: willness and 50 pattis, under the agree f Runniger Dora and Mangapetti, and in Aresin the Ankaper estate of mine villages and one patte. The whole is assessed Rs 53 752. The Raja resides at De a on the Guenti in Sultan-

Rocketti. As already mentioned, they trace their descent to Pup Single, the second son of Raj Single. This term had two ands mis, far Chand and Puthipat Single. consisting at the present time of two whole villages and a portion of one other, paying a revenue of Rs. 1,530.

Na Maniarpur,

The history of Maniarpur is closely connected with that of Hasanpur. The saluque was founded by Darya Khan, nephew of Bahadur Khan of Hasanpur. At his death about 1743 the property was divided among his sons and brothers; but most of the separate estates were resunited by his elder son, Roshan Zaman Khan, who died in 1818 in possession of a vast property. His prother, Basawan Khan, succeeded mm and in 1821 left the property to his widow; till 1866 Manuarpur was nominally held by women, although as recorded by Sir William Sleeman, it was generally in the hands of the resonne officials of the day.\* In 1866 Balm alkbar Ali Khan obtained the property by will from Bis. Sughra, but he died three years later, and was followed by his widow. Belo Halo Khanam, who held the taluga till her death in 1886. Long litigation ensued between Bibi Amt-ul-Fatime the chief daughter of Akhar Mr Khan, and Ghulam Husard, his nephew and on-in-law. The former via successful, but a fresh sort has been instituted by the Raja of Hasanbur and is still pending. The portion of the estate lying in this district comprises the Parema projectly of three villages and one path in Pachhimrath, assesed at Rs. 3,450.

From Pirthipat Singh, the younger grandson of Rup Singh, comes the family of Kurwar and its branches. The history of Kurwar also belongs to the Sultanpur district; but the Raja has

a large property in Fyzabad. The sanad for the estate was conferred on Raja Madho Partab Singh, the son of Ishri Singh, but he deed without issue and left his widow, Rani Kishan Nath Kennar, in possession. She adopted the present Raja, Partab Baindur Singh, the son of the zamindar of Walipur, who is breende I from Babu Drugpal Singh, a younger brother of Ishri Singh, and letchim the estate at her death in 1885. The property was for a long time under direct management, baving been all or over as an encumbered estate in 1871 and being aftersards managed by the Court of Wards during the min city of the present Raja till its release in October 1897. Although eriginally nuch indebted, it was handed over in a flourishing condown. The Raja new owns 61 villages and their patter in the Myanpar and Barannsa parganas of Saltanpur, while has pos-es-- n on this district comprise the Hatheren e tate of twenty whote virlages and parts of eight others in the pargama of Pacalimenth; Morapora in Wigham i, consisting of connecent ofare and seven paths, and the make property of thee allages on Other parties in America. The Pyzabad process of the congre massessed at Rs 26 577.

Kursan had originally belonged to an ellier beauth of the Tim the family, but the had died out. A sourger brotolic tounded by Mar Singh, much in descent from Pir hope Singh, and strabbshed itself it Bhite in bargant, Magiaure, he portain s a younger son consisting of 27 small , lags known as Rmigue-Blan. This descended to bes son, Nan Bahada , and to a rward to the latter's con. Sho kar Stren . If a removed the they if white two died without issue. The close macrong one Solding Single is said to have a the max with the fire and as-\* Homer Singh, he seet Report Karry a rad his or John Bakhsh, was elected Rija by "o climsma, raple of a nather, 4 (a steel against his come. Barrag bringh, he thinks a fit Strucker Singh, reserved Blutt is his him and as ug nightn ee in of the nazing Raja Darshan Singh to the opportunity of increasing his power and pessessions. He required a property then paying a revenue of Rs. 50 000 and retuned this estate cli (825. In the following year he lost the whole of this, ewing te default of payment, at the bands of the nazim, William Ali

Two year later the Khajurahat estate of 26 villages was restored, while the rest was held under direct management. This state of things continued till 1836 when Mirza Abdulla Beg made over the entire properties of Bhiti and Khajurahat to Bahn Harpal Singh, the Garghan-t edicitain of Khapradih. Barisa Single then fled to the British territorics, where he soon after-In 1838 Darshan Singh restored the estate to Jai Datt Sough and Abbut Datt Smob, the sons of Baziar Singh, and large additions were subsequently made to them, including the Bhualpur property in Fands which had formerly belonged to B ahman zamendars and was handed over to the Bachgotis in See a years preyonsly Jai Datt Singh acquired Tema and other village- in An in after a great fight at Tejapur with Resat Restant Salt of Deric. In 1852 the two brothers divided the property, the ellips receiving Blutt and the counger Khajurahat. Jan Dott singa received the second for Plate and managed the e rate a me ably tall his diath, when it passed to his son, Babu Para Datt Singh. The latte has been succeeded by his young son, Udabher Partab Singh, the present owner. The Bachgotis of Blutch mode prominently in the history of the district during the first half of the nunetcenth century. On one occasion Barun Stagh ethicked and defeated the Gazgban-is, slaving their notorwas close Nihai Stught a another occasion to alked himself with Bib : I'dresh Shagh of Me quir-Dhaicha and defected Raja Rustant Sale of Dera mee fight along the village of Hechupur. in addition comprises the Reona estate of eleven whole villages and part of one other in pargana Pachhimrath assessed at Rs. 11,765. The owner resides at Walipur in the Sultanpur district.

arie-Arie-

The Gargbansis are one of the oldest Rajput class in the They claim descent from one Garag Muni, a holy man who is said to have been summoned to Apothya by Vikramaditya or, according to another account by Rapa Dasiath. His descondants settled in pargama Haveli, where they acquired four estates, known as Halwars Kusmaha, Firozpur and Sarethi These were retained by the family till 1816, when their lands were absorbed into the Mahdama taluga. A branch of the family, however, acquired large estates observious At the beginning of the nineteenth continy one Paroti Singh was the owner of the two villages of Schipur and Khapradch in Pachhamath, his property yickhaga ient-roll of about Rs. 1,500. He lad two sons, Ganga Presid, who obtained as his share Khap adth, and Athal Singh, who hold the other half of the estate. The laster was in 1821 appointed manager of the large taluga of Manuarpur which was then held by Bibi Sughia, the daughter of Basawan Khan, and from that time we began to increase the number of his followers from his own clair and in time onsted his nustices and look possession of the estate. In so doing he incurred the displeasure of Roja Dar-han Siegh, who in 1832 held the contract for the district, the latter in-nigated Rabin Bariar Singh of Bhiti to muck Nihal Singh, with the realt that the Graghansi leader Thereupon he struggle was taken up by the Was killed descerdance of Canga Prasad, whose son, Shen Sewak, had three son , She ambar Singh, Hobdar Singh and Harpal Singh, The last applied for aid to Lucknow and a considerable force was sent to his assistance; but as Bariar Singh had been secretly errforced by the naxim, the troops retired from the contest. In the meantime, however, the Gargbarsis had largely increased their property at the otherse of Maninipur, and in 1834, when Dar-han Sough was suppreded in the contract by another nazim. Harpal Singh recovered possession of the whole estate, though it was still nominally hold in the name of Bibi Sughra. In 1838 Darshan Singh returned to the district and Harnal Singh was

You

ļ

ś

forced to retire. The property was taken under direct management until 1845, when Man Singh succeeded to the contract and wain placed Maniarpur under his juri-diction. The next year, after having collected the greater part of the revenue, he made over the estate to Harpal and Sheoambar Singh, but put Bibi Sughre into confinement and plundored her remaining possessions. The Garghansis then extended their raids into pargana Aldeman, and there they came into contact with the Kajkumars. A hight ensued in which Shooambar Singh and Hobder Singh were killed, and Harpal Sirgh floo to Khapradih. Bitu Sughra e-caped to Lucknow, and obtained an order re-toging her to her property, while the military authorities received orders to seize or destroy Harpal Singh. The troops were under the direction of Mon Singh, who proceeded against the Garghanse stronggold. To de are two conflicting statements as to what then happened, out both agree in saving that Harpal Singh via then seriously The one version parrates that Harpal Single cas killed in the defence of his fort, while according to one other; is was inveigled into a conference under promise of orders and was nurrered in cold blood by the attendance of the nazine. At all tyeets the first was sorzed and phindered and the estate taken under droct management. them come many taluqdars and zamindars. Little is known of the early history of the Palwars either of Birhar or of Surhurpur. Mr. Carnegy in the roport of the first regular settlement gives the pedigree of the Bantarias showing their subdivisions, but practically no other information exists save that the members of both families were constantly at we with one another.

Tradition relates that about 500 years ago one Gohraj Deo, the aneal descendant of Bharat Dos, migrated westwards from Azamgarh into pergana Bishar and in the course of time this man and his off-pany are said to have acquired from the Bhars a large estate in this pagana consisting in all of 302 villages, Some 201 year later, in the eleventh generation from Gohraj Des, two nothers named Bah Ram and Manc Ram, divided the ancestral estate, the former f unding the village of Buliampur, which was afterwards known as Sultairon, while the younger established numerly in Gajapur. The descendants of the latter in after years lost most of their property, which was absorbed by the older branch, and now they possess a very small estate, though they holf under-proprietary rights in several villages. Bab Ram vas succeeded by his son, Hotal Singh, who had four son, Am Singh, Lashkai Singh Jagan Singh and Harbans Singh. these mon about the beginning of the eightoenth century made an equal division of the anecstral property and separate l ewo last obtained the estates of Raipin and Deorin respectively, and their descendants still hold zamindali rights in syond village of Bichai.

The descendence is Are Singh held their property andivided for even new extreme, but the history of the family is mainly a round of mactine quarrels and violent deaths. His grandson, Ragtuniah Singh, obtained the somet for the whole pargana of Chand pur Batho and was kelled in trying co-undens his konsman, Ladji Singh. His son, Salabdawan bingh, was killed in Azaragana, before it was ceded, in a light with his relative Pahlwan Singh, who had engaged for the pargana. He was succeeded by Pirthipul Singh, who was also killed with his brother, Bhora Singh, in a quarrel with a zamindar in Azamganh prior to cession. Pinchipal was followed by Munna Singh, his son, who was killed fighting with Sheodatt

Singh, a descendant of Lashkar Singh, in a dispute about the revenue ongagement for the pargana. Muuna Singh leit two sons, Madho Parshad Singh and Kishan Parshad Singh, who in 1854 divided the property. The forceor resided at Chahora, and shortly after the mutiny was succeeded by his son, Hardat Singh, who obtain at the sanad for the taluque of Chahoru un Haswu. He died in 1892 and his property passed to hisson, Nurerica Richadia Singh, the present taluque. This property consists of the Haswar es ate to 12 villages and 200 pactes in Bishar, 25 patter of the Banara estate in Surhurpai, and three patter in Tanda, the whole being a see ed at Rs. 19,38%. The taluquar reside at Haswar.

Baba Gaya Din Singh, a grand-on of Daljit Singh, the third son of Khakhandu Singh. He still holds the taluqa, which consists of 15 villages and seven pattis in pargana Surhurpur, assessed to a revenue of Rs. 9,921.

Tights

The Tighta e-tate passed in 1790 to Sarabjit Singh, sixth in descent from Tulsi Ram - II is property consisted of 46 villages paying a revenue of R. 9501. Heleft two was, Gobind Bakhsh and Gobind Dayal of whom the former succeeded to Tighra in 1816 but the estate Ind by their time been somewhat reduced in size. In 1828 the brothers murdered one Mohan Lal, qanungo of Surhupur and as ie but property in Azangarh his relatives sought redress of the British Governments. The two Palwars were outlived on managed to exade capture for some time. 1832 the connect broken was entered as joint proprietor of the state; but in 1839 Golond Bakhsh was eight, sent to Azamgarh and there ! Imeknow, where he died long afterwards in prison. Gobard Dayal remained at large till 1852, when, being a revenue defaulter and a fugure from the Oudh officials, to betook him--off to Allahabad, where he hope I to die He was there, however, apprehended and died in the jail at Azamearh before his trial. The two brothers were notorious freehooters, and for years in-pried terror along the Azameurh Logice. Goland Dayat was succeeded by bi- - n. Parthipal Singh, who made nimself troublesome doorng the muting this fort at Tighta was be segred and destroyed by a tyree from Azamearle but he submitted in time and obtained a samid for his talogy. At his death in 1891 his property passed to his two case Jan Datt Single and Andhosh Par-bal Saich the present owners of Tighta. The estate sonsists 114 villas - and 17 patter in Surburger, paying a revenue of Rs. 10 942

The one the Him's talaplan estate is that of Rasulpur, the property of a Kaya-th family. This talapt is of very recent origin, as up to the matrix it was included in the possession of Raja Abbas Ali of Tanda, whose property was confiscated for persistent rebellion. A portion of it was bestowed on Lala Anant Ram, a loyal Kaya-th, who obtained a taluplari samuel. The estate designded to his son, Diwan Mewa Ram, and them to the latter's son, Sri Ram, who in 1893 obtained the title of

Rai Bahadur. He has served on the councils of the Governor-. General and the Lieutenant-Governor. He is a pleader by profession and resides in Lucknow, he has acquired some landed possessions in that district, as well as one village in Unac. His property in Fyzabad comprises nine villages and four pactis of the Tanda pargana, a-se-sed at Rs. 2505 Eight villages of this estate, including Rasulpur, were brought inder the provisions of the Oudh Settled Estates Act in May, 1904

There are four talinges owned by Musalmans or this distinct. in addition to those of Hasanpur, Maniarpur, Georgia and Deas are zaon, which belong to Muhammadan representatives of Range clans and which have been already month and. There were ore or two others before the miding, but these were a researed on account of the rebellion of their owner. Two or the election gic by ned by Saryids and two by Sharkhs

The large to the great Salvid property of Pupus. The Popu nistory of the family is extremely empley and survehau obscure, owing to the fact that in several accessors the property descended through the female line. The family shared to have been founded by one Saryid Suleman, a 5h concrete on of Nu-Japur in Kladasan, who came to Oudh in 1493 and attend in the village of Atraura. Here he mainted into one cold they all tames for and nomined much property which he lett to I - two - ar-, Rule and Ariant, from the former of whom came the taleglars of Piepla and Kation, while the latter was the lace the of the over- of the Ra ulper and several other evers. Solved Shakar, the son of Raje, had three sons, Annad, McJamed to a Daud, Comeach it whom sprang a numerous progens. In the days it What the desiredants of Sulcount were applicate executates Chandiers of the pargana of Akbai par and at a set sector of period to estates which the family had created accordingly a monthly portions which were afterwards amalginated into terminables. About 1560 be find of he family of Perpur and Sanampur was Chandles Muhammad Hanz, eighth in des ein Lone Aletaau and his property was known as the Sandayan taking a formed by Saivid Basawan, who had obtained a new graff on Amangreb in 1671. Muhammad Hafiz left no male reac and he lands passed to Khwaja Badar Ali of Tajpur, who had married his only daughter,

Я

r f

Pirbandi Bibi. This man was killed in 1786 in a fight with the Palmars, and left : son, Qasim Ali, who was then only four years The loy was adopted by Wirza Muhammad Ali Beg, an officer in the service of Miras Jamshed Beg, who commanded a regiment of cavality at Akharpur in the reign of Shuja-ud-daula. This Muhammad Ali Beg is said to have been an immigrant from Khorasan and to have acquired through the influence of the Khanzada Rapa of Hasanpur the estate of Aurangnagar in Akbarpur, then consisting of 57 villages. This he nominally held on behalf of Jun hed Beg, but after the latter's death he carried on the farm for several years. In the meantime he purchased the ", illigo of Pupur from the Mankzadas and made it his headquarters; shortly afterwards he obtained Auranghagar in his can name mater the designation of taluga l'upur. While in poset son, Maharamad Mi Peg increased his estates rapidly. In 1809 he served half the property of the Bais of Mahawan in Panda and in the same year he gained muc villages fermerly held by the Sorvids of Alanpin, and to the o he added twelve other neighbouring villages. In 1816 the 38 villages of Khaspur were also meladed in the Pirpur taluque. At his death in 1819 his property constact of no less than \$45 villages, and this he left to his adopted son, Qesim Ali. The latter was in 1822 displaced by Ghalib Jang who had obtained the form of the property by core influence, but Qasim Ah sought the aid of the British Government and two years later he was restored to possession langh the representations of the Resident at Lucknow, He Card in 1526, laying added 31 villages to his large property. Qasire Ab has two so s, Hashim Ali and Ali Muhammad, and two daughters. The former were not allowed to secretd, and in 1827 the nashin, Taj-ud-die Hussan Khan, took the property under direct managene u . To the following year Raja Darshan Singh came into diec and for even years held Pripur directly, 1633 Hashim Ali diene; and when a vent late. Darshan Singh wes succeeded by Menthu Khan, the second sin Mir Ali Muhumanad was restored to his father's property. He only held it for a year, however, and possession passed to the widow of Qasim Ali, who was assisted in the management by her own brother, Mir Muhammad Ajmal, till his death in 1840; and

then till 1842 by her agent, Bihari Lal. During these seven years the property was diminished to the extent of 99 villages seized by the Rajkumars and others. One of the daughters of Qasan Als had been married to Mir Ghazantar Husain, the son of Muhammad Hayat of Safipur in Unao. The other was married to Mir Kalb Hussin of Janupur, a direct descendent of Faton Muhammad, the grandson of Mahmud, the second son of Sasyul Shakur. In 1842 Kalb Husain joined Qasim Alr's wide v in the management of the property, and ax years later recovered 20 of the last villages through the support of the nazum, Wajid Ali Khan. He continued in the management till his death in 1853 and the proporty was then entered in the joint names of Mu Bagar Hasain, the son of Kalb Husein, and Mir Ghazantai Thisain, previously mentioned. These two men obtained a joint stack for the estate. The latter died in 1891 and was succeeded by his brothor. Mr. Muhammad Askari, although Bager Hasara claimed the whole property and the lispute resulted in long and early brigation Muhammad Askan dowl in 1897 and I to share passed to his son, Mr. Rahat Husain, who helds the talega jointly with Saryid Abu Jasar, the son of Bagar Husan, who died in 1894 Sayid Abu datar continued the largation asteroid by his lather, but eventually in 1896 a compromise was out; sed through the influence of the late Sir I she Woodbaten, we con Muhammad Askari received one-third or the taluga together with the large sam of R. 3.6" ,000. The remainder was at a need by Alia Jafar, who thus became heavily indebted, but he closed off his encombrances in 1902. At the present time Say of Abu Jaffer bolds a very large talage of 77 villages and parts of 70 others in this di trict. Of these 26 village and 26 patris less pare ma Akbarpur; 25 villages and 25 pattis, composing the baselepar and Januager properties, in Majhaura, to valences and twelve pattle of the Ismarlor estate in Surhuppur, and 8 village and The whole is asses that it's \$1.558. Min the pattis in Tanda Rahat Hasana owns 53 villages and CS pastis, paying a revolute of Rs 45,160. Of those, 27 villages and six orbits he in Ak-· Jurpur; three villages and eleven pattis of the Ismarlpur estate in Surhurpur; seven villages and portions of sev others in Amsiu; 14 villages and 12 pattis belonging to the Birchimpur Kusuasia

estate in Tanda; two villages in Majhaura, and three pattis in Birhar.

Kataria

The small taluga of Kataria is held by a branch of the Pirpur family. It was founded by one Qalandar Bakhsh, tenth in de-cent from Saiyid Saleman through the latter's grandson, Shakur, and Darwo-h, the eldest son of Fatch Muhammad. This man held the single village of Kataria, which had been assigned to his forefathers in maintenance. Ho made several additions to the property between 1778 and 1788, and left his estate to his son, Imam Ali, who left a son, Nabi Bakhsh, and two daughters. their motter being a descendant of Aizani, the jounger son of Sayid Suleman. Nabi Bakhsh died during the mutany: he had illegitmate one, who obtained their father's villages in Azamgarh, but the taluque passed to his sister's son. Mir Karamat Husain, who recoved the sanad. The latter was succeeded by Mir Ashinf Husain, the present taluqdar, His property, which meludes the Kataria estate in parguna Akbarpur and Firozpur in Tanda, consists of six villages and one patti in the former, one village and five pattis in the latter, and the small village of Mahwal to Surharpur; the whole being assessed to a revenue of Rs. 6,488. The property is hopelessly incambered.

Samenpur

į,

'n

4

The chief Shakh estate is the large taluga of Samanpur, which is held by the representatives of another ancient family. It is said to have been founded by one Sharkh Ahmad Qittal, a Shia who came from Persia with the temons Makadum Ashraf Jahangir of Kichhanchha and sottled in Jeapur Palhan in pargana Akkarpur. His descendants increased and multiplied, and at one time there were eleven distinct branches of the family: but their possessions have been absorbed into the two talugas of Pirpur and Samanpur. The hereditary property of the latter family originally consisted of three villages, including Lorpur. Between 1759 and 1763 Malik Nur-ullah rose to influence and obtained engagements for 50 villages, and also hold in turm some of the villages of Iftikhar-ud-daula, the brother-inlaw of Nawah Shuja-ud-daula. He was followed by Ruh-ullah and Najaf, and then by Malik Kamzan Bakhsh, who in 1790 added eleven villages which were formerly the revenue-free holding of Hikmat Husain Khan and had been resumed by

Asat-ud-daula. His property then consisted of 61 villages, the evenue of which was paid to Iftikhur-ud-daula, the brother of the Bahu Begam. In 1795 the jagur was resumed and the revenue arrangements were placed in charge of Mian Almas Ali Khan, who entrusted the direct management of the whole estate h Ramzar. Baklish. The latter retained the management of all Je villages till 1805, when he was formally allowed to engage in 308 villages under the name of taluga Samanpur. that year and 1813 some 21 more villages were acquired from the Akbarpur Chaudhrin and others, and between 1815 and 1825 Ramzan Bakk-h gained possession of the Reon e-tate in Amsin, previously hold by the Raikware. He died in 1824 and was succeeded by his son, Tufazzul Husain, who made further additions to the tabiga, including Asopui in Tanda, till their h to by Hashim Ab, aephew of Ghazanfar Ali of Rasulpur. this was done the eight he favour of the nazim, by whose action Tatazzal Hasain acquired the full proprietary right, though he diencide allowed the representatives of Hasan Ali to recain then lands in subsettlement. Tafazzu! Husain, theach a persistm, robel during the mutiny, obtained the mered fer the taluga added shortly afterwards. Having no so a he was succeeded I has younger brother, Malik Hiday at Husair. The latter held the taluga for many years, but was a very had manager and bocana hosvily indobted. After his death, possessor passed to As a late Parima, his widow, but the portion of the estate known A Ashrafpur came into the hands of the Azing irle backing firm now honded by Babo Mori Chand as mintgage o, and oldy one-- The Leta, dredin then of the property remained to the walow 1801 and her estate passed to hor two danshtors, Abbas Bandt and De m Bandi. The first of these ladies is a wide, while it e read is the wife of Saivid Twakkul He ain or Lorpe, the ther of Mir Rahat Husain of Pirpur, who manage the estate in the ladies. The property is entered in the job it names of the troom reraind comprises in all too villages and part is lethers; " is assed at R., 1,05,284. It compares the Somanpur estate \* proper of 13 villages and six pathis in Akhaipur, and 21 villages 4 d two pattis in Tanda; the Ashrafpur estate of 65 villages and is pattis in Akharpur and 20 villages and three pattis in

Mari

Surhurpur; the Jalalpur property of twelve villages and one pattiin the last-mentioned pargana; the Mungri estate of nine villages and one patti-in Albarpur; the Reori estate of 13 villages and two patti-in Amsin, and the four villages of the Fatchpur estate in Majhama The owners reside at Lorpur.

Baras.

The last remaining taluquari estate is that belonging to the Shaikh family of Earai in pargana Rudauli of Bara Banki. Then history will be found in the volume on that district.\* The taluquahas been divided into five shares and is very heavily encumbered, owing to the constant quarrels and litigation that have ansen between the various members of the family. Their property in this district is known as the Aghiari estate in pargana Khandansa and consists of four whole villages and parts of four oth rs. Chaudhii Khahl-m-Ruhmaa, the head of the family, owns the village of Aghiaii and the Chandaiia property of two villages and three pattis, assessed at Rs. 4,085; and his relative, Chaudhii Inavat-m-Ruhman, owns the village of Chiroli and one path, paving a revenue of Rs. 1,375.

Zamindars and other

aman-Ur Besides the talagetal estates there are but few proporties of any size or importance. The largest are held by coparenary bodies, the profits in most cases being divided among a great number of sharers. Mention will be made of the chief of these in the various pargana articles. Among the more prominent are the Saryid of Bhudar and Pachhimrath and Havels-Oudh, and the Muphats of Alampur in Tanda, the various Bais colonies in Pachhimrath and Mungalsi; the Bais and Biseus in Pachhimrath and Krandansa, the Baiswars in Haveli-Oudh and Amsin; the Khattus in Akharpur, and the various Kayasth families, descended in most instances from the pargana quantigos.

Revenue free land The revenue-free lands are partly so hold absolutely and in perpecuty, partly under certain conditions, and partly for the life of the holders only. Of the 120 revenue-free mahals, 80 come under the first, 29 under the second, and obeyon under the third category. The last, which will in the course of time disappear, comprise six in pargana Haveli-Oudh, two in Mangalai and one each in Surhurpur, Bircar and Pachhimrath; they,

dependents. Of the conditional muses mahals, 13, of which seven are in Haveli-Oudh, two each in Amsin and Pachhimrath and one each in Tanda and Mangalsi, are for the expenses of temples, chiefly those at Ajodhya; one in Haveli-Oudn is for the upkeep if a dharanisala for travellers; one in Am-in and one in Akharpar to enable students to proscente their studies; and tour, comprising two in Amsin and one each in Surharpur and Pachhim ath, are for the maintenance of Fagus S me of the Mysalman religious buildings have obtained similar provision, for fem mahale or Haveli-Oudh, two in Khandan-a and one each to Akbe pur and Mangalai have been granted for their opkeep. One radial in Havsti-Oudh is revenue-free so long as anythreat matter suc of the giantee exist. The majority of the unconditional months were granted for maintenance, the chief estate of this cature long show of the Survide of Blanda - 1 and of the law Hakem Sout senddaula of Fyrabad. These are altogether 50 he childled compresing 46 in Pachbimeath, 19 in Haveh, see in Akbarpur, three in Mangalsi, and two in Amsin One maha' in Suchurpur and one in Tanda were assigned for the man denance of Missalman shones, two in Hayeli and three in Pachhamiatt for the support of Faque, while the remaining two, in pargina Haveli-Ordh were givened to the Maharapa of Jaipur by the Dolth so eneign on hacitable purpeses.

Of the various subordinate proprietor the situatilement sales Dollers or grekhta ber, are by far the most imposing In the district they occupy a quite exceptional position, as the tenancial for more common than in any other part of Onlin. These e prewat the old village proposition, who were onsted by the villagians during the first half of the proteenth ceaters, and who detacked recognition of those rights by decreas of the south next courts at the time of the first regular assessment. That the old propercy or described consideration is evident from the history of the tilluja-; but at the time it was recognised as a remarkable fact that more than mo-third of the whole talugdan area contained in the preprietary management of the original owners. The subsectlement holders, who are practically the proprietors, pavery only a malikand to the talugdar, held at the time of the last settlement 222,039

liquents

nta-1.

whole amounting to 21.4 per cent. of the entire district. It should be noted, too, that here some of the subsettled mahal- are further subsettled with a second grade of pukhtadars, and a few of these again with a third grade of pukhtudars, resulting in an extraordinary complexity of tenures not infrequently enhanced by the presence of mi cellaneou- under-proprietary right-in specific plots. The publicative, like many of the coparcenary bodies, suffer from minute subdivision of their holdings. At rettlement there were 715 anninders and 35,582 pattiders in subsettled villages; the estimated income was Rs. 7,26,956, out of which they paid R-, 2.94,403 as reveaue, Rs. 1.11.361 as malekana and Rs. 38.272 as coses, exclusive of the patwari rate. This means an average net income of less than Rs. 8 apiece, or only one-third of the amount estimated thirty years proviously. The proportion paid n- malike are varie- con-iderably: on an average it was 37.83 per cent. or the revenue, but taking the actual ascots, 41:18 per cent. was retained by the publiculars, 10:36 per cent. was paid as revenue, and 15:16 per cent, went to the superior proprietors. The amount of land held in subsettlement in the different talugas also exhibits great variation. In the larger estates it ranges from 16-11 per cent. in Kaiwar, 11-09 per ceut, in the Birbar taluque, 38-24 per cent in Dora and 28-16 per cent, in Aj dhya to 15-0 per cent. in Khajurahat and only 11-81 per cent, in the Pirpur property. The tenure is miknown in the Deckton and Barai talugas, and there is very little land so held in Samrathpur. Of the various castes holding pulcelador a rights, Ruppus come first. with 53-06 per cont. If the whole. Next come Beatmans with 25.85 per cent., Mie dmans with 11.01 per cent. Kayasths with 49 per cent, and others with 5.18 per cent

111**1111**23-

UnderproprietorsOther subordinate rights, known generically as matchatdars or dispriders, are exceptionally numerous. These are of many varieties and were mainly conferred by decree of the courts at the first regular settlement though they are still being constantly created by contract or agreement. They comprise the tenures known as sir, nankar, didders, birt and chankalp; but these designations are often used indiscriminately. They may represent former preprietary interests; or they may have originated in gifts to Brahmans and others; or they may have

been granted in place of a regular transfer of the preprietary ught; or again they may have been created by absolute transfers or even by mortgages with possession; or they may have been established by clearing and other leases. In many instances co-sharers have surrendered their proprietary rights to their brothren on condition of being recorded as under-proprietors in their ser land. So, too, the members of a community will stipulate for uch rights on the sale of their village. In some cases only the amount of the revenue is payable as rent, but as a rule the under-proprietors pay in addition a percentage on the revenue as malikana. The number of persons thus holding specific plots is pass counting. At the settlement 79,860 acres were held on rent by underproprietors; of the assets, 58 per cont, computing 365 per cent. as revenue and 21.5 per cent. as madikana, was paid to the proprictors and 12 per cent, was retained. There were in addition 9.185 seres held rent-free. The particular torm call for no special mention, as they occar in most other parts of Oudh. That known as numbur is a service torate, derived it im a grant made in maintenance to a dependent; deleter is estandar grant made in perpetuity to the celler of property, e. her by assisting a share or a specific plot, this is known as backets where a low quit ront was subsequently assessed, dehday to ing usually remetree. The forms called birt and showkelp are greats to 15 dimans and there generally for religious purposes, at a n vileged term, Under-proprietary so is either of the description a ready mencloned, whose the ex-prepriet is an left in piner ged possession of the land tilled by them-eives, or where land his non-congred in maintenance to the configer branches of a fundry. There are also numerous cases of rights in graves, both the cowhich belong to ex-proprietors and these held by bothers a shart alphies, in such case the right extends to the land as well as to the free-The value of these under-proprietary rights may be intered from the fact that the average rentar of land so held, where rent was paid, was at the last settlement only Rs. 303 per acre; the and r-proprietor having a very great, advantage over even the high custe tonant.

The greater portion of the land is a the cub vation of ordinary tenants paying each ronts. This is generally the east throughout

ţ

Į

Outh and especially in the eastern districts. The proportion so held amounted at the time of the last settlement to 63.64 per cent, of the whole, a figure which is lower than in the adjoining districts of Sultanput and Bara Bankt There are marked local variations, depending on the nature of the proprietary tenures, the caste and status of the cultivators, and several other factors. In Khandansa, where talagdars hold but a small fraction of the land and much cultivation is done by the proprietors themselves, the proportion was only 51.81 per cont., and but slightly higher roult- were obtained in Pachhimvath and Amsin, with their extensive under-preprietary cultivation, and Majhaura. On the other hand, no less than 80.71 per cent, of Akbaipin was so hold, and the average was over 72 per cent, in both Surhupur and Tanda. Cash conts are almost invariably paid where rents are paid at all, and only 181 per cent was held on grain routs; such rents are due to special circumstances, and are morely paid for land watch would be similarly mosted everywhere. The proportion was highest, 645 per cent., in pargana Tanda, while next came Akbarpur and Majhaara, and lowest in Haveli Oudh with only 29 per cent so held, while in Pachhimrath, Khandansa and Mangals: the percentage was less than one. A very large proportion of the land is cultivated by under-proprietors, as is only to be expected, the average for the district was 14.61 per cent., the amount varying from 2193 per cent, in Pachhimrath, and year similar figures in Amain, Haveli Cudh, and Khandansa, to only 3 37 per cent. in Landa and 5-55 per cent. in Ak barper. Occupancy tenants, too, are rather more numerous in Fyzalad than elses need in Ondh, the anount held by tenants of this class being 201 per cent for the whole district; the proportion was found to be highest in Mangalst, Pachhimrath and Haveli Outh, and lowest in Surhurper and Khandansa area held reat-free or on favoured tenures was 2 49 per cent. at the last schlemont. Here again Pachhimrath comes first with 7.53 per cent., followed by Haveli Oudh and Amsin, and Tanda last, with only 101 per cent. Proprietary cultivation either in the form of gir or khielkash! accounts for the remaining 14:45 per cent., the former amounting to 7.54, and the latter to 6.91 per cent. The highest proportion of sur is in the Majhaura,

Surhupur and Bithar parganas, and the lowest in Akbarpur and Haveli Oudh: khudhusht is commonest in Khandansa, where it amounted to as much as 16 82 per cent, while other parganas in which this tenure largely provails are Birhar. Majhama and Tanda; the smallest amount is in Haveli Oudh and Amsin, the proportion in each being under tour per cent. Further details will be found in the articles on the various parganas.

with which the settlement officer had to deal was unusually large, being no ross than 3636 per cent of the whole assessable

mea. This fact naturally had a great effect on the correge rest rate for the district. The recorded rental in cach-paying landwas on an average Rs. 525 per ac conoughout the district, while the valuation of the rest gave an average of only R., 384 per acre, the general average for the whole or Eventual being Rs. 461. Phat the rate is lower than in the adjuming districts of Bara Banki and Subanpin is due, not a much to any inferiority of the soil or lack of natural adoptions as to the large remption area in which rents are necessarly law, and also to tho greator prevalence of high caste tens ' who live sisting hold then lands at a privileged rate. While the lowest terrolivators paid on an average Rs. 5550 per acre, the rental to the so of high caste, chiefly Reiputs and Brahmans, was but h 123 per and; she average advintage of the latter being 21 by per cent, or monthly four annes in the rupes. These squires we for the district as a whole; but there are very consideral leds that creations both in the amount of rent paid and the execut to what caste pervilige is recognised. The topper depends on a wholle in the Inality and the natire of the soil. In the big its retinue I lands in the neighborhood of Pazalad or in the last seas

per acro. These are of course exception if the low caste once for the Havel. Onda pargara is a whole is but little more data the destrict average, and reach less than in Majhadra where, it am unused to Rs 662 per and his delate pargana the average is high, not so much by teas in or unusual excellence of soil, as because of the presence of a large preportion of superior cultivators. Elsewhere the averages correspond fairly closely.

From these figures it will be seen that the as comption area. Rents

the lowest figure was Rs. 5-23 in Amsin, which is admittedly the worst pargana of the district.

Priventura leged rates.

The extent to which the privilege of caste is recognised varies to a supri-ing extent. In Haveli Oudh, where high caste tenants are exceptionally strong, the difference between their average rate and that of the low caste cultivators is no less than 35.96 per cent. It is over 30 per cent, also in Pachhimrath and Amsin. In the east of the disriet, however, possibly by reason of the greater density of the population and the consequent competition for land, the advantage is much smaller. In Tanda and Akbaipur it is less than 14 per cent, and in Surburpur and Bithar it is but little higher. The assumption area, which on the whole is to no means inferior in quality to that held by ordinary temants, was valued at Rs. 119 per acre. On an avorage, occupaney tenants, paying two annas in the inpec less than the full high caste rate, paid Rs. 3:99; and under-proprietors Rs. 4:29. The grain-rented area is very insignificant. All the land which could be cash-rented is held by eash-paying tenants, and only inferior and presarious plots are leased on produce rentals. The amount paul is either one-half or one-third of the produce. according to errenn-tances and ensteme there is no formal recognition of easte in this case, but the matter adjusts itself, as the high caste tenant seldon makes more than three-fourths as much out of the farming of his land as is made under the careful husbandry of the low casto cultivator.

1712. F**103911**\*

> 80 37i 2012

The above statistics are those or the scattement, and are based on the enturns of 1895. Since that date there can be no doubt that rents have distinctly risen throughout the district, an unevital is result of an enhanced to enact demand together with a succession of prosperous casons. It is, however, unpossible to make any accurate estimate of the extent to which this rise has taken place. Prior to the settlement rents had risen very rapidly, as also had proces. The figures of the first regular settlement are far from rehable, as senetimes the alleged rents and sometimes standard rentals were entered while elsewhere the columns were left blank. The estimated rental of the each-paving area gave an average of Rs. 3-95 pc. sore, which implies a rise of 32-91 per cent, during the ensuing thirty years. This is probably

excessive, but Mr. House calculated the increase as between 25 and 30 per cent.\*

Such an enhancement appears to have been effected without Condiany deterioration in the general condition of the people, but rather the reverse. In 1874 the account given by the settlement officer was far from massuring. It was then considered that the tenant and small zamindar class had broken down, mortgages and sales of property were universal; extensive sales of groves, fields, and cattle were going on, and the evidences of poverty were everywhere apparent in the runs d wells, the absence of ornaments, and the backwardness of education. If this description or mac than it certainly does not apply to the district as it is now, after a period of thirty years. The price of grain has very largely asen and consequently be profits of agriculture have increased, while an extensive aport trade in grain has spaining up, as the result of unproved communes were enables, the people to dispose of their sarplus produce at a position It is probably true to say that the general condition of the people is no werse clear in the other districes of central and eastern Ordh. On the chie hand the density of the population is exceedingly given, and the holdings of both landfords and tenants in trajuents deced as a mist minute extent. In 1899 We House grove, - ab out a uplat To the district, moduling moultivated a aspector on tree millions. or very nearly three plots to an agree and the average men of acul-'is ated field may be put at one-lifth or an act. With a populalow pressing on the wal to this extent the Asstrace of with poverty and the general absince of material prospects angle by thierred, and it is unfortunitely the case that that are proportion of the population does little more than here you band mouth. The tenancry, however, if they drive be decreased as of riving and prosperous are soldern diseasen on and in many parts are more than a match for their handler by week at the to the wostern half of the district, where the high eastern men is particularly strong and defiant if authority. Farring to the other end of the social scale, the leading talinglife is almost hopelessly in debt, and it is searedly possible to imme any other taluquer who is not in debt at present though it is only tau to

 $brub_{\downarrow}$ 

ainris 1

state that in many cases the indebtedness is not extensive and probably only temporary. The single zamindars are, as a whole, not doing at all badly, and, of the petty under-proprietors, the Brahmans are, I believe, holding their own, though the Chhattris are, as a rule, in difficulties; but the sub-settlement holders and the swarming, blundering village zamindars are in a state of indebtedness, which it is inclancholy to contemplate, and which doubtless would have led to their being extruded from the ownership of the soil in more cases than it has already done were it not for the fact that, from their number and their lawless spirit, they would be apt to render a purchaser's life a burden to him, and the possession of their inheritance is less to him rather than a gain."\*

## CHAPTER IV.

## ADMINISTRATION AND REVENUE.

THE district forms part of the Fyzabad commissionership Distr and is in the charge of a deputy commissioner. The sanctioned magisterial staff consists of four full-powered assistant or deputy magistrates, a cantonment magistrate, a treasury officer, and four tabsildars. This has remained unaltered since 1870, but in practice has always been recognised as insufficient; the usual ctaff of assistants at heralquarters consisting of one covenanted justice of the peace, one civilian understraining, a can enternt magistrate, and three or four deputy magistrate-In Frankal there is a bench of mue honorary magistrates, invested individually with 3rd class powers, y hile outside the municipality there are two honorary magistrates with similar powers. These are Saiyid Abu Jafar of Pirpar, whose ju. -diction extends over the police circles of Akharpur, Tanda, Al radio and Julalpur, and Babu Indra Datt Singh who deals with the Bik iper and Haiderganj circles. The sessions juage of Fyzabad ha des purisdiction over the Sultanpm district. The regular civil and we those of the district judge, the subordinate judge and the munity of Fyzthad and Akharpur. The former munsifican-holes the Al barpur and Bikapar tabsils with the exception of pargar a Ansan, which with the rest of the district constitutes the muchik of Aktorpus There are at present two r norm v mutesits, Bala Maheada Date Singh of Khajurahat, for the pargames of Pubbimitach Majhatra and Amsin, and Mir Raha', Musain of Piepur for Akberpot and Surhurpur. The district judge has also jury lection in Bus Bank, bus not in Sultangue.

The Village Courts Act of 1892 was cooling to Fyzabad in May, 1903, when the whole of the district was divided into 229 circles and a munsif appointed to each. There was a considerable delay in supplying the munsife with the necessary copies or

SIRI IA

the Act and with the rule- and forms for their use, so that hardly any could begin work during the first year. Even by the end of 1904 no cases had been justituted in some of the circles, while in others thirty or forty had been brought to court, and in a few instances even more. The system already seems to be highly appreciated in the busy parts of the district, and to be less required in certain tracts where monov-business is very small or non-existent. Complaints against the munsify have been very rare, and no serious faults have been substantiated.

The remaining district staff comprises the superintendent of police, the civil surgeon and two assistants, in charge of the dispensaries at headquarters and at Ajodhya, the superintendent of post-offices, the sub-deputy opium agent and his assistants, the divisional engineer, the district engineer, the assistant superintendent of telegraph, the chaplain, and the head-ma-ter of the high school.

SPTISON

Fyzalad was selected as a cantonment at the annexation of Oadh. Up to the mutiny only native troops were stationed here, but soon after the re-toration of cider, barracks were built for a regiment of British infantry and a battery of field artillery. The normal garrison also includes a regiment of native cavalry and one of native infantry. The cantonments, which lie to the west of the city of Fyzahad, between the civil station and the Ghagra, are managed by the usual cantonment committee.

amen. MP

> 200 B IN of e dinct.

At the annexation of Oudh, Fyzahad was selected as the headquarters of a district, but the area contained within its limits was very different from that which is new known as Fyzabad. The old district was much up of four tabells and thirteen parganas with an aggregate area of 2,332 quare miles. The boundaries on the west and north were the same as at present, but the southern coundary throughout was the river Gunti The headquarters tabeil of Fyzabad was composed of the four parganas of Haveli Oudh, Mangalsi, Amsin and Pachhimrath. The eastern tabeil of Akbarpur consisted of the parganas of Akbarpur, Tanda and Birhar. The south-castern talisil was that of Dostpur and included the Majhaura, Surhurpur and Aldemau parganas; and the south-western tahsil was that of Bharthipur, which contained the three pargangs of Isauli, Sultanpur-Baraunsa and JagdispurKhandansa. The arrangement was open to many objections, the chief heing the distance to be traversed by the inhabitants of Dottour and Bharthipur in order to reach Fyzabad; while many of them actually lived within sight of Sultanpur, the headquarters of another district. Accordingly in 1869 some 646 square miles comprising the parganas of Isauli, Aldeman, and Sultanpur-Barauusa were taken from Fyzabad and added to the Sultanpur district; two new tab-ils were established at Tanda and Bikapur, while the parganas were also rearranged to a considerable extent.

The result of this scheme was that while four tab-ils remained subjectively as before, there were only ten parganas. In tale-il Eyzabad week Haveli Oudh, Mangalsi and Amsin; in the Akbaruar tabul Akbarpur and Majhauru; in the Tanda tah-il the Tanda, Bichar and Surhurpur pargana-; and in Bikapur those of Pachlemeath and Khandan-a. The arrangement was far superior to the old one so far as compactness and the general convenience was concerned; but in 1904 an important modification was made, the Surhurpur pargana borng transferred to the Akbarpur taled-a much-needed step on account of the great distance of the southern

portion of the pargana from the obi headquarters at Tunda

More is known of the early fiscal aistory of Fyzabad chanof any other distinct in Oulh. By a for made remove the records of the first sammary settlement have meaned the late which befold those clsewhere during the mutiny and have been preserved in the shape of 3,000 or so separate this and thirty large volumes of assessment registers as well as a number of papers to the It appears that on the outbreak of the mutiny vernacular office the robels as usual proceeded to the cutcherry and destroyed or coattered the papers, but all that could be found were collected by the orders of Maharaja Man Singh and carried to his feet a Shahganj, whence they were afterward- returned in the autumn of 1868. Several entries in the registers bear the mituals of Cob nel P. Goldney, the first Commissioner of Fx abad, and the settlement was carried out, under his capervision, ov Mr. W. A. Forbee, the first deputy commissioner, and his assistants and successors, Captain J. Reid and Mr. E O. Bradford. The settlement was based on the returns of the old day and office for 1263 Fasli, which had been sent in March, 1856, by the Financial

eiaria

Commissioner with orders to collect the revenue according to these returns, and to give pattas and take kabuliats. The demand was generally calculated as half the recorded assets, but the rule was modified according to circumstances. The papers were often untrustworthy and in several instances were known to have been purposely falsified; but as the settlement was ostentibly a makeshift, nothing further was attempted at the time with a view to ensuring accuracy. The area assessed was very different from that of the present district, and as several parganas undorwent subsequent alterations it would be impossible to obtain the exact revenue of the present district without a careful examination of the existing papers.

inmery etilenert.

April 160

<u>470£11-</u> 115

he sgular rma-stilem of ent. e disct. The second summary settlement made in 1859 was a comparatively easy task owing to the preservation of the old papers. Directions had been given that the former revenue should be again imposed, and though the was impossible elsewhere it was carried out with ease in Fyzabad. Mr. Fotbes and Mr. Bradford, snecessively deputy commissioners, did the work, and the total revenue for the district as at present constituted was fixed at Rs. 8,70,188.\* As the work was necessarily done in great haste no attempts at correction were made, nor was the demarcation of the villages undertaken, this being deformed, together with the preparation of accurate records, to the approaching regular assessment.

Operations in connection with the regular settlement began in 1860 and continued for an unusually long period as the work was not finally completed till October, 1878. The first proceeding was the demarcation of villages, which terminated in 1861, except in pargana Khandansa, which remained for the following year. Next came the surveys, conducted both by the survey department and the settlement officials. The revenue survey began in 1861 and was finished in 1865, the settlement or khasra survey commenced at the beginning of October 1802 and was not completed till 1868. In 1863 the settlement proper was commenced by Mr P. Carnogy and the new assessments were declared and introduced at various times between April, 1865 and November, 1870. Several other officers were employed both in the original assessment and in the work of the revision; the

officiating settlement officers from time to time were Captain F. G. Clark, Captain G. E. Erskine, Mr. J. Woodburn, Mr. M. L. Ferrar, Mr. H. H. Butts and Mr. A. F. Mullett, who wrote the final report published in 1880. All those officers worked as assistant settlement officers at various times, as well as second others who were posted to the district for short periods. The bulk of the work, however, was carried out in the first instance by Mr. Carnegy and latterly by Messis. Ferral and Mülett, under the close supervision of Mr. Capper, the Commissioner of Freehald.

Mr. Millett's report. Briefly stated, the plan adopted we that of amending the recorded statistics of the settlement

survey and applying to their various tests deduced from data obtained on the spot, and finally of comparing the revenue rate of each village with those prevailing in adjucent lands. The parganas were formed into circles selected topographicatly, on account of the supposed similarly of the soil, the distance of the water from the surface, and other natural trategies. In deternating the assets the rettlement officer set bransest or discover the true rental or each village, and are to decide up in its capaliffice, both present and prespective. Incide afternor was paid to the recorded cental, and in its place as wage pardice estimates were framed, showing the yield from antierent escriptions of soil, irrigated and unimpated, the prices adopted being the averages of the passe five years. From these of Greenes he obtained his cent-rates, and from the latter the green assetresults were checked by four tests. These carried, to tay, the estimated rent-roll according to the number of plought, after Incovering the average among their till it would place

Mr. Carnogy's system of assessment is fully explained in Mr.

and the average yield obtained in tach class of soil escendible estimated rent-roll recording to the nomina of activators in each village; thirdly, the application treach class of soil of rent-rates supplied by a committee of college and camendate and listly by deducing the assets of cash village after a ciding on its classification according to its facilities for cotanning manure, irrigation and the like. In the case of virte, old allow

at half that amount; but this rule was extensively modified according to the circumstances. The result of his assessment was a revenue at half access of Rs. 12,35,802 for the district as it is now constituted. This gave an incidence of Rs. 2-0-8 per sere of cultivation, the rate varying from Rs. 2-2-8 up pargana Haveli to Re 1-12-0 m Tanda. The total figures for each pargana will be found in the appendix.\*

Working of the settlement.

ē

From an early date there was considerable apprehension as to the result of the new assessment. The demand was introduced in full from the first and no progressive enhancements were allowed. An enormous number of cases remained to be this priced of in the settlement courts—a matter which was of great importance in this district by reason of the unusual prevalence of subordinate right; for many of these cases were for the determination of the position of the subordinate helders and the amount to be paid by them to the superier proprietors. latter were thus unable to collect rent- preportionate to the enhanced revenue and were consequently compelled to borrow. Insufficient attention also had been given to the existence of so large a proportion of high caste tenants, who held in fact at privileged rates, though their holdings had been fully valued in calculating the as ets; even where new rents had been fixed by decree, the enhancement often remained metely nominal. Further, far too much waste land had been assessed, in a mistaken applicipation of its early reclamation. Lastly, there were bad sortons in 1870 and 1871, the disastrous floods of the latter year causing much distress, especially along the Gunti; in consequence of the poor have-to ene-fourth of the arrears were remitted by the Government of India, apart from any question of essement. In 1867 the previous direct dress attention to the necessity of watching several districts, of which Fyzabad was one. In 1868 the rate of under-proprietary rights in four villages occasioned adverse comment on the assessment. In 1872 the Commissioner remated that the state of things in Fyzabad was unsaturactory. and inquiry elicited the opinion that though there had not been any general over-assessment, the new demand had been introduced tee precipitately. Matters came to a head at the end of

1572, when the sale of two villages was proposed and the cases were sent by the Commissioner to the settlement officer for report. In the ensuing months petitions rapidly increased in numbers, in consequence of a number that the assessments were to be revised. The sottlement officer, Mr. Ferrar, had then to lay aside his judicial work and to devote his whole time to an examination of the petitions which continued to pour in throughout 1874. There petitions numbered over 4,800 in the present district alone, and were most numerous in the case of the Pachhimrath and Birhar parganas. It was consequently found necessary to order a estematic revision of the settlement, and Mr. Capper drew up a scheme of principles and instructions for the settlement officer, which received the sanction of Government in January, 1875.

The orders laid down that the original data might be as a rate The accepted as correct, but that where the accuracy of the estimated gross rentals was doubted a close examination should be made of the recorded routals of recent years, together with a careful lecal investigation by the assessing officer Further allowances were to be made for special cases, as for instance in villages where cultivation was found to be the teating, or where high caste cultivators provailed, or where the assumption area was large. Waste was to be released from as comment, except where there were actual realizable profits or special reasons for anticipating its reclamation. Lastly the distribution of the revenue was to be made afterh where necessary, the demand was to be progressive when the increase was langue and retro-positive effect was to be given to the revised james in case, where the proprietors had obviously suffered from over-a cosment. Generally speaking the revision consisted in the obserted on of recorded facts for deduced statistics and the abjudenment to a loge extent of prospective assets. The result was a reduction of six per cent, of the original assessment of the entere district, about eight per cent, in that portion of it which carac under revision, and about 14 per cent in task portion in which reductions were granted. The total demand for the present district was thus , reduced to Rs. 11,68.462, the reduction being greatest in the pargamus of the Fyzahad tahsil.\* The incidence on the cultivated

of 1875.

<sup>\*</sup> Appendix, Table 1A.

area thus fell to Re. 1-14-8 per acre, which corresponded more naturally to the results obtained in the adjoining districts. The new demand was imposed by easy gradations, the ultimate figure being reached as late as 1885. The settlement was sanctioned for a period of thirty years from the declaration of the original demand in the various parganas.

Judicial work,

One of the most noticeable features of the regular settlement was the judicial work that arose in connection with the preparation of the record-of-rights. As in other districts, the Settlement Officers meroungested with the powers of the civil enacts to decide questions arising as to the possession of land and subordinate right-thereis. The courts were opened for different parganas Judicial work began in Majhaqia in September, 1863. while in Pacithinant, no cases were heard till November, 1867. The entered Con jurisdiction till the end of September 1875. The amount of higgsten in the district was enormous. In all, 71,725 sure were decided, a number that was vastly in excess of the humes conded in any other district of Outh, the next highes total was that of Incknew, where is amounted it. 27,139. This result was due, partly to the prolanged period for which the court remained open, purely to the density of the population and its general propensity to tragition, but root as to the intrieste natures of the tenures. And it reason is the multiplication of suits was then, no ording to the en ection give to the revenue others, where a n tuffered two contains village a note was made in the records of cuch. addition to those comprehended in their sangels, but in the majormy of instances the dispute; arose from the concurrent possession of the two or more parties under native rule. No less than 953 claims for sub-settlement were decreed-a much higher figure than in any other district; but an even larger number of suits of this description were decided out of court. Claims for submidinate right chiefly concerned lands hold as ser, dehdars and the lake; but there are in this district an una nally large number of the tenur - known a. birt and shankalp. The minor rights asserted, which were to e most numerous of all, were concerned with lands held in occupance by ex-moprietors and such privileges as sugar and marred.

the settlement will fall in a year later. The cost of the settlement worked out at the rate of Rs. 128.75 to the square mile—a figure that would have been very much lower but for the preparation of fresh records-of-rights in the eastern parganas; in the rest of the district the average was not more than Rs. 86.

Method of assessment.

The work commenced with the preparation of new records, and this was completed in the parganas of Tanda, Surhurpur, Birkar and Majhaura, but early in 1894 the orders regarding this point were in part withdrawn, and the remaining pargansa of the district were assessed on the papers of 1301 Fash. A fresh survey was found necessary in only 13 villages, while in the rest the existing maps were merely corrected. Simultaneonsly with this the village papers were corrected and attrested, most of the disputes being settled on the spot. The system of asses-ment was entirely different from that followed on the previous occasion, as the existing rent-rolls were now taken as the basis of the assessment, except where the true rents were concealed or where the recorded rents were unreasonably high Out of a total of 8,532 jumuhandis only 242 were rejected for conecalment of rents and 911 others on account of the unduly swollen rentals which they exhibited. Many of the latter, too. were defective, not on account of wilful fal-ideation, but rather by reason of their faulty compiluion. After completing a minute scrutiny of the rent-roll, the settlement officer procooled to form assessment circles, containing groups of villages having the -ame general characteristics with a corresponding general similarity in rental incidences, the whole district being thus divided into fifty block. The next proceeding was the extraction of standard tates for the different areas demarcated under the various classic of soils in each circle. Such rates were only found to exist in parts of the Akharpur pargana, while elsewhere they were a-certained by the personal inspection of the cettlement officer. For lands hold by high casto tenants an allowance of 25 per cent. was made in the valuation. Other deductions were made for short collections, and also for extraordinary items coming under the head of sivui. The small grain-rented area was also taken into consideration, but its influence in this district was very slight. The total area assessed

was 712,445 acres, showing an increase of ten per cent. on that dealt with at the former settlement. The total accepted assets amounted to Rr. 33,23,187, including Rs. 16,676 added for sawar. Small deductions, amounting to Ru 1,355, were made for sir laids, and Rs. 25,342 were allowed for improvements.

The net assets were therefore Rs. 32,96,490, and the gross revenue sanctioned was Rs. 14,61,922, representing 44.35 per cont. of the assets. It fell with an incidence of Rs. 2:16 per acre of cultivation, and gave an enhancement of 2525 per cont. on the expiring domand. The proportion of the assets taken varied "rom 45:07 per cent. in zamindari holdings to 41:59 in taluqdari and 43.21 in coparcenary village. Whose necessary, progressive tops were allowed, limiting the enhancement for the first five cears to Rs. 1988 per cent, and for the second five years to Excluding the pominal demand of Rs. 26.258 23:34 ner cent. on revenue-free land, as well as the revenue assessed for a short period on the alluvial mahals, the samplioned total revenue for the first period was Rs. 13,40,613, rising to Rs. 13,86,950 for the second four years, and to Rs. 14,08,913 in the eleventh year. The igures of the net realizable demand for web pargana will be sound in the appendix.\*

The assessment was designedly medicate as the character Its of the propriotary lody in this district called for special consideration. The sub-ettled e-tates were leviently treated while partimar moderation was also shown towards the coping mary villages containing a large number of sharers. The new revenue would in the ordinary course have been imposed in the four eastern parganas in 1897, but as the district had suffered somewhat severely from the effects of floods, followed by drought, in the preceding years, the introduction of the new demand was postponed for a year. Since that time the assessment has worked smoothly and the revenue has been collected without difficulty, although some fromble is necessarily caused by the vercrowded pattidari matals and by the pecumiary emiarrassment of several of the taluplars

Many small reductions have taken place in the demand Nomin since it was sanctioned, by reason of the construction of the

Allahabad-Fyzabad Railway and other appropriations of land of less importance. These have also affected the nominal revenue, which has been reduced from Rs. 26,256 to Rs. 25,896, the gross total being Rs. 11,34,809, exclusive of the allowial mahals. Of this nominal demand by far the greater portion is assessed on revenue-free lands in the parganas of Haveli and Pachhimrath, where it amounts to Rs. 12,107 and Rs. 9,257 respectively. In these parganas lie the muaric estates of the Bhadarsa Salyids and some lands beld free of revenue by temples at Ajodhya. Elsewhere the preportes are very small: in Majharra there are none, and in all parganas save Mangalsi and Amsin the amount of she nominal relemon equite insignificant. Altogether 15,777 acres were held revenue-free at the last settlement.

Alluvial mahals

The alluvial villages along the Ghagra are treated under the ordinary rules and were assessed for a period of five years in 1890 and the following years. At the first regular settlement many of these mahals were assessed for the full term, but the system was not viewed with favour by the proprietors, and at the last settlement the owners of very few engaged conditionally for There are altogether 158 alluvial mahak in the distuct, paying in 1904 a revenue of R4 27,528. Many of them are very -mall and a large member are uncultivated and pay a merely nominal revenue of Re. 1 cash. Others are large and valuable, three of them, Manjira Kalan in Mangalsi, Jamthara within municipal limits, and Tiliara in Haveli-Oudh being assessed at over Rs. 2,000 apiece. In Mangal-1 there are 42 mulcal-, last settled in 1904, at a revenue of Rs. 6,550. In Haveli-Oudle there are 71, assessed at the same time at Rs. 12,084. In Amen 14 mainle were settled in 1902 and 1904 at Rs. 1,540, while in two, Bharipur and Sarwa, the ottlement was made conditionally for the full term at Rs. 100 and Rs. 290 respectively. The rest are in the Tanda tabal: 11 in pargana Tanda were assessed in Ser. at Rs. 3,592 for five years, and one, Mahripur, for the factor cam of the settlement at Rs. 40; and the Mahripur, for the form of the settlement at Rs. 40; and the 14 in Berhar were se. a mingreanially in 1895 and 1897, eight of them coming up to ingion in 1902, when the total revenue . was sanctioned at  $\mathbf{R}_{\gamma}$ .

The coses paid in addition to the land revenue are the same Coses. as the c in force throughout Oudh. They amount in all to 16 per cent, of the gross tevenue demand and the total sum paid in each pargana in 1904 is shown in the appendix." This is made up of several distinct rates. The consolidated local rate of seven not cent, data from 1894, when the former cosses were amalgamated; the latter compared the original real, echool, disto et dak and marginal coses of 23 per cent, on the revenue intro-Jucod at the first regular settlement, the Leal rate of 24 per cent. of 1871, and the two per cent. famine rate of 1878 to The chankidari or rural police rate of six per cent, which had already been gradually applied, was introduced over the whole district at the "9st assessment; and the three per contopaty or rate in 1889.

stations,

For the purposes of police administration the district is at Police. present divided into 16 circles, of which three, the Preshad Koowali, the contemment, and Ajolhya are much write and theother ever only to square unles. In the eas the circles vary in size from 177 square miles in the case of Jakalpur to the Amona sircle of 35 square males, the average being nearly 130 space miles. The population of each cooler at the last census will be found in the appendix. Truge is the cir is are, there has been a great improvement in this decesion surg. 1870, for at the time there were touls closed polici-ties of the district, comprising three at Fazahad, there at the four tan d headquarters, and at Roomain, Milkipur, Jalanen, Raeme gar and Maharaiganj. Varion- additions have been made to be time! trial and there are now in the headquarters with I in addition to the Jove urban circles, stations at Pura Qulardin Acros a, Ramain and Maharaggang . In the Bikapur tabul there or ponce-state us of Bikapar Milkyae and Hadaiganj, in Akbarpu, at Akbarpur, Jakalpar and Ahrasii; and in Tassla as Parola Baskhari and Ranmagar. Of those, Baskhari, Amen's and Haidare inj were established in 1895, and Abrault a year later. The Pura Oslandar thana was hard on 1890 inche carele was known as the sadr and was administered from Progress as early is 1865. The cantonment station dates from 1861. It no case do these citcles coincide with the talkal or pargana boundaries, a system

<sup>\*</sup> Ibid, Table X. [ +Abolished in 1905. ] #Appendix, Table II.

that gives rise to some administrative inconvenience. A slight improvement was effected in 1903, when 47 villages of Tanda—an unusually heavy circle—were transforred to Baskhari, 26 from Bikapur to Haidarganj, and 13 from Akbarpur to Ahrauli. Further details as to the demarcation of each circle are here unnecessary as a scheme for reallocation has been mooted and the existing arrangements are described in the various tabiliarticles.

orce.

A table in the appendix shows the total police force employed in the district in 1904, exclusive of the superior officers.\* The latter comprise the district superintendent, the reserve and court inspectors and one circle inspector.

The regular police force in 1904 comprised 59 sub-inspectors, 61 head constables and 430 men; but these figures include the civil reserve and the aimed police, as well as the fixed guards at tabsils and elsewhere. The municipal police, numbering 152 men of all grades and located at Fyzabad, Ajodhya and Tanda, are under the present scheme to be abolished and their place taken by the regular civil police. The Act XX towns maintain their own watch and ward, the force amounting in all to 56 men.

haukı-

In addition to the above there are the village and road chankidars numbering 2,189 and 40 men respectively. The latter patrol the provincial roads from fyzahad to Lucknow and Allahabad, and also the local roads from Tanda to Akba-pur and from Fyrnbad to Rai Barch; they are distributed along these reates in carposts, for which the nearest thanas serve as reporting stations. The vellage chaukidars are now the paid servants of Government and the cost of maintenance is home from the Oudh cural police rate. Originally the chaukulars were the servants of the landlords and were for the most part remunerated by small jugges or rent-free grants of land. Obcasionally the burden of maintaining them had been hid upon the superior proprietors and subsettlement-holders had been exempted; in such virlages they received a cash wage. The system was unsatisfactory chiefly by reason of its unevenue-s; frequent complaints arose as to the condition of the chankidars in individual villages; the jayers varied in size and value, and the cash wages were not

only uneven, but generally in arrears. Even before the general introduction of the present cess of six per cent. on the laud revenue the majority of the jugars and cash payments had been discontinued and the doputy commissioner had levied the rate from individual estates.

Two tables given in the appendix . how the statistics of Crime. criminal justice and eegnizable crime for each year since 1896.\* The crime of the district is of the usual type that is generally met with among an agricultural population. The crummal trabe-are sparsely represented, and on the whole it may be said that the people are peaceful and law-abiding. Though the cruminal work of the courts is not exceptionally light, yet the percentage of the more serious cases is low, and Fyzabad can attend to challenge comparison in this respect with many other districts of Oudh fination has perhaps to be made between the tural and urban Fyzahad and Ajodhy care not distinctly criminal cities; they contain the ordinary classes of gambles, and robbers, but they are not remarkable for their numbers or villacus names are sometimes thrown at the Apolhya temples, but they are probably undeserved. A great fair at Apolloya always attracts swindlers, pick-pockets, nose-ring-statchers and bundle litters, the place being a favourite resort of the Barwars of Gonda. All roand the boly place, at a distance canging from five to us no les, is a ring of villages whose inhabitants take tell from all pelyrims coming and going, those having the worst name are Non. Satar Rasi, benethe and Kurks. Keshoper on the east. Using an ma, Blurapur and Maidanna on the south; and Raipur, Banbirpur and colsepur on the west. In the rotal areas pery thet's and butglaries constitute the emof forms of crime. Rad sensors and pore harvests may be fairly said to coincide with an increase in the number of police reports, and in every year the namy season orings in a full crop reports of astempts to break into houses, many of which should be properly ascribed to the clements. On the wher hand, there is a frequent case alment of loss from wal house-breaking when the property stolen is not of much value. Cattle theft is not common and does not appear to be organized in any part of the district, while the cattle poisoning by Chamars

١

Appendir, Tables VII and VIII.

on the Azamgarh side which formerly gave a bad name to the eastern parganas, has died out of fashion. Dacoity is rare and is seldom of a professional type, being generally attempted or carried out without the use of fire-arms. Agrarian disputes are common. They are mainly caused by the action of lesses and their subordinates, but occasionally by friction between the old owner and the auction-purchasor. They frequently develop intoriots and in this way lives are sometimes lost. Mention may also be made of the plactice of kidnapping children for marriage to Rajputs and Brahmans, of which cases periodically come to hight. There are no especially had police circles, the worst localities being Ghatampur in the Milkiput thana, where there is a strong Pasi of ment, the villages to the north of Akbarpur on the Tanda road, and Surhupur and its neighbourhoid.

afantide.

0)

Prior to annex then the higher castes in the district boro an evil want to the practice of infanticide. This is said to have been e-jecially prevalent among the Palwars of Birhar and the eastern pargamas, very few of whose daughters were allowed to live. At no time, however, were any repressive measures undertaken in the district. In 1868 special investigation was made by the police in 60 Rajput villages; but it was then found that over 11 per cent. of the Rejput population were female-a proportion that was too high to ar use suspicion. This impression was confirmed at the census of the following year, when a further inquiry was made into the state of affairs it the few villages having at a nently unsatistant recently. If is fairly safe to assume that at the present true the clime has practically died out. At the last cen-us there were 978 females to every hundred males in the district of all castes and religious, while for the Rajpuss the figure was SS, the disproportion boing most marked in the case of the Bais who have never been notorious for infanticide in Fyzabad, while among the Palwars females were actually more numerous than the male -.

rj**g**e

Prost cannexation trene was no regular excise administration. The right to distill and sell liquor was granted to the Kalwars by the zamindar-, who exacted monthly fees ranging from Rs. 2 to Rs. 8 according to the locality. There were certain rules regarding the strength of liquor, but they were very vague and the

methods of distillation exceedingly primitive. The only regulations enforced were these regarding the closing of ships during the Muhamam and the ment's of Rumazan and the probaction of shops on main roads. At annexation the right of manufacture and sale was leased to a single farmer for Rs. 8,000. There were four shops at Apolhy a, four at Fyzabad, and about one hundred in the whole district. After the mutiny the eme man engaged for Rs. 22,099 and in 1859 he paid twice that amount, but on this seasion it was stipulated that no shop should be opened within six miles of the Dilkusha, then used is the deputy commissioner's office. This condition was broken, the lease perfeited, and Government took excise under direct control. Each Kalwar was offered a salary of Rs. 7-3-0 per mensum and was allowed a servant and a enaprasi: b) next was paid for the shops, which numbered 22 in all. At the same time a distillery was built in muhalla Rath Haveli with some twenty salls and a strekowe. This was an lor a darogha, who supervised the Kalwars, it ellator being paid servants of Covernment. The method of dist flation was improved; but up strength was pro-cribed; all higher school in the shops was obtained from the distillery. After two years this system was modified: the pay and allowances of the Kaiwa-wet stopped, and in their place they were allowed a commission of or comma in the repre, the price being fixed it is a made a lettle there were some 69 or 70 shops in all, applied as before from the distillect. One shop was allowed at Ajodhya, but none in Psizidled, on account of Accantonment. This management tailed to work, and in 1862 the than veter was abolished. The distiller vas removed the present mo, the Huar Rada in Pahang injured the swere going at Akbarpur, Dostpur and Pahtipur, but were elected say years lifer The number of shops was cared a above 150 and decay ters word fixed ranging from Re. 1 to Rs. 15 per use is my relating to the licelity. Each distiller pand Rs 24 with right did stillscon and a still load duty was more duced. In 180 to decilled time of that pierper gallon distribed was task therein maint man est the stoff and guard; but this was dropped after two years presentions were taken against the aloof legal ran cantonments; all spirit supplied by shops within a redused two inde- had to be drunk on the premises, except under a special pass costing

three pies per bottle; and this was not given to any servant in cantonments. Other small changes were introduced from time to time, such as the substitution of a naib-tahsildar for the darogha in 1891, the institution of a gauged godown in the same year, and of a bonded warehouse in 1898.

١

The liquor generally consumed is the ordinary kind made from a mixture of maken and shira and known as sadi. Other descriptions are occasionally made, such as kandi from pure molasses only, and different names are given when the liquor is flavoured or coloured with various substances. The method of distillation presents as peculiar features as the old native stills have been replaced by the copper Lucknow pattern. The amount of liquor consumed in the district, the income derived therefrom and the number of shops for each year since 1891, will be found in the appendix \* The fluctuations are mainly due to the nature of the baryests in each year, but the average is now far larger than that of the earlier periods of British rule. This result is due partly to the removal of Mu-alman re-trictions on the liquer trade, partly to the greater pre-perity of the lower classes, partly to improve I excise administration and the better quality of liquor now supplied, and partly to other causes of less importance, such as the plague, which is said to have caused an increased consumption. The receipts, too, have been largely swelled by the increase in the s ill-head duty. In 1863 this was only Re. 1 for proof liquor, while in 1903 it was as much as Rs. 8-8-0 per gallon; the rise was gradual and was effected in 1891, 1895, 1899, 1902 and the following year.

Fl.

5

In liquor obtained from the tar and the jur palms is consumed to a large extent in this district, and the yearly income so obtained is considerable.\* Prior to annexation to revenue was derived from these sources save by the zamindars, who let their trees to Tarmalis, either for a fixed sum or in roturn for a proportion of the produce. After annexation, owing to the organization of the liquor trade, the consumption of tari by all classes rapidly increased, but it was not till 1856 that Government took any steps in this connection. In that year the tari contract for the district was farmed for some Iss. 500, and was included in the

drug contract; but though the value of the contract rose stoudily. little attention was paid to this branch of excise administration. After 1876, licenses were given, but until 1901 the farm was ald for the whole district; in that year each shop was sold enarately to Tarmahs, and this system continued till 1904, when the contract was farmed by tabsils. The scason for tari lasts from October to Fohruary, and t'est for mendhi, the product of the b) diew palm, from April to June; the consumption is create t at the time of the fostival of Saivid Salar in April. The trees motapped by Bhars from Azamgarh, who imprace to all the oughbouring districts. Each man will work twelve tree-daily and obtains Rs. 8 per mensem, as well as eight sers of tires and JIU anna daily for expenses. The Tarmalia have to rent the rees from the zamindars, who charge our supec per tar and eight somes for each khajur; but the relations between the the ramindar and the contractor are frequently strained, as the former often efuses to lease his trees of to person new palms to be planted.

The vaccous kinds of hearp drugs, known as gaput, chares and thoug, form one of the most important items of excise revenue. In Nawabi days the hemp plant was freely cultivated and the go were need to propare draps for their own con-amption, though charas had, as now, to be imported from the Paragle - I or he sale if Irags in Fyzabao there were some half a dozen shops, owned by the sayarday, who hold the contract for all sayar dens, including drugs and opinio. After annexation the deal contract was sarpied to the same person, Shee Daval, who hall the contract for liquor, tari and openm: he sable the mather act of set of send to shopkeepers, and his servan's collected the heap which grew speutaneously; but there was no sheek on albeit modulet an and consumption. In 1876 the contract was repped and be used were 3" on for each drug shop separately. The narrow of it is point the first year was 55, and this rose to 197 or 1052. The receipts hereased rapidly, partly owing to competition and partly to enterected duties. The shop-to-shop system was found and in 1900, and contract for three years made for the whole district, the annual moome being Rs. 22.203. The last sale was that of 1903, when the annual price obtained was Rs. 35,000. The contractors give licenses to the retail vendors, who obtain a

egară egară commission of one or two annas in the tupee, less the cost of collection. Drugs are consumed by all classes of Hindus in one form or another; the practice is also growing in favour with Musalmans, but many of the latter abstain from indulging in these drugs publicly. As in their parts of Oudh, the consumption of charas is far greater than that of ganja, but the latter appears to be more popular here than in most districts.

is iq t

d.

Opium.

Opium is not very extensively used in Fyzabad, in spite of the large Musalman population. Prior to annexation there were no restrictions on its production or sale, save in Fyzabad itself, where the right of yeard was vested in the superdar. After 1856 the sale of opium was tarmed in the same manner as liquor and drugs, while at the same time the production of open became a Government monopoly. In 1860 the contract coased and an opium ageney was established at Fyzabad. Two years later an increase in the rates paid to growers led to a great expansion of poppy cultivation, though the simultaneous cubincement of the retail price appears also to have caused an increase of smuggling The exerce receipts from opium were very small and as late as 1875 only 5 85 maunds were sold in the district, as district from the amount purchased by thougens and experted; and this was colely ascribed to the dilicit introduction of opiam into Pyzahad by the cultivators. In 1876 shop house were instituted, but no one could for a long time be found to take them up in this district, and the system was dropped in 1875. Two years later the attempt was repowed, but without succes, and in 1883 one or two fies houses were granted. In 1888 the cultivation of poppy within municipal finite was prohibited, and a marked improvoment The last important change occurred in 1901, when the official yend of opinin was topped, and all excise opinia was gold by the contractor, through their retail libenses; the result in this district being a great merease in the meeme from licenst fees and a marked enhancement of the retail page. The nonsumption of opium is, however, smaller in l'yzabrel than in any other part of the United Province-, except perhap-Gorakhpur and the Kummun Division.\* The preparations known as chandu and maduk were largely used by optum-smokers in Fyzabad till the closing of the

Appendx Table XI.

shop in Fyzabad in 1892. They are still made by private individuals, though the practice in dying out, at any rate in the case of module. The sale of these drugs was farmed in the same way appium and liquor. In 1876 there were 19 licensed chandus shops, yielding Rs. 1,575, all in Fyzabad city; but the number decreased, and when the prohibition came into force only two remained.

Stamps

A table will be found in the appendix showing the annual prepare and expenditure under the head of stamps for each year since 1800.\* The average income from all source- from that year to 1904 was Rs. 1,53,510, the total fluctuating from year to pair owing to various causes, such as the ettlement and the transfer of large estates involving the sale of stamps of high value. The inceme from stamps in Evzabad is always large, owing in ereal measure to the amount of litigation. Mention has been raide of the judical work that was incurred at the tire organia settlement, and again at the last revision an abnormal number of cases were brought into court, the could being over 50,000. This meanuts for the fact that the highest recorded meens from strongto any year was that of 1893-94, when the extrement mentions were commenced. Excluding that year, longerer as world appear that there has been a gradual increase in the state present during lite years, and 1903 showed a far higher total dentirious year such the assessment. On an average one hiper coat of the or one is derived from the sale of addicial stants, including liese for copies, a higher propertion than that it see and to the " Dining districts of Bara Banki and Sultar par

The registers of the district is the judge of head of the trebenched the district of Barr Banks—an irresponds which he been in force since 1891, when the Oadh judge hips were first is tablished. Prior to that date the office of a gisting was held by an assistant commissioner, and registration durie were also recised by the tabsilders. In 1891 there were cleven a gistration offices in the district, but the number has been subscitually reduced. The last to be closed was then at the hangaring in 1901. There are now only six offices, they a marise that of the registrar, those of the sub-registrars at Evenhal, Trada, Akbarpur and Bikapur, and that of the joint sub-registrar at Jalahum. The

Registra.

heaviest work is done at Fyzabad and Tanda. The average receipts for the five years ending 1900 were Rs. 8,528 and the expenditure Rs. 5,091, giving a net annual income of Rs. 3,434. The figures under this head are for some reason or other much lower than those of the adjoining districts of Sultanpur and Bara Banki, although the number of transfers of landed property in those districts has been much smaller during the same period.

Income-

As this is the wealthiest district in Outh except Lucknew. meome tax occupies as mowhat important position in the genoral revenue. It was first imposed under the Income Tax Act of 1872, but this was repealed four years later in favour of a liconse tax and the collection of income tax was not reintroduced all 1886. Formerly it was of a very different character, as the bulk of the receipts consisted of payments by landed proprietors who are now exempt. The total in 1873 was Rs. 13.724 paid by 198 assesses, of whom 64 were landed proprietors and 47 bankers and money-lenders. Under the present Act the receipts are very much larger. The figures for the whole district for each year since 1891 will be found in the appendix, as well as separate statements for the city of Fyzalad-Ajodhya and the four taball, as far as Part IV of the Act is concurred.\* It will be soon that the average income derival from this source from 1891 to 1903 wa- Rs. 39,377 annually. There was a considerable increase from Rs. 33,506 in the first year to Rs. 46,710 in 1902, the highest figure ever recorded, The amendment of 1903 exempting incomes under its. 1,000 from tax caused a great reduction in the receipts, the total for 1904 being Rs. 33,648, the amount paid by those assessed at four pier dropping from Rs. 19.100 in the previous year to Rs 9,746. Of those coming under Part IV only 113 were assessed at over Rs. 2,000 and no less than 58 of those belonged to the Fyzabad municipality. Of the various tabsil, Tanda pays the most, with 33 persons assessed at Rs. 2,000 most of whom resided in the town of Tanda, and Bikapur the loast, having only two persons asse-sed in this class. There are ten in Akbarpur, some of whom are persons of considerable wealth and eight in the Fysahad tabal outside municipal limits. The majority of the persons

) brs

rì.

paying income tax are lankers and traders, but the numberinclude many well-to-do pleaders and a few manufacturers.

In 1865 there was one imperial office at Fyzabad and six that. cual offices at Akbarpur, Tanda, Jalalpur, Jahangirganj, Dhemua and Tandauli, as well as two at Dostpur and Kadipur in the present Sultaupur district | Dhemua has since been hansferred to Runahi and Tandanli to Goshainganj As a result of the orders of 1864, 15 new offices were opened between 1865 and 1871, these including all the remaining police-stations and the more important .illage- or road-junctions, such as Pura, Doorhi, Shahgaaj, Haringtonganj, Maharna and Iltriatganj. In some cases the bridings were orected by Government, but generally houses were rented for the purpose. No further additions were made nti 1380, when Baragaon was added, while since that date 16 nore offices have been opened. At the pro-ent time there are to offices in the district including the head office at Fyzabal. A list of all these by parganas and tabals will be found in the appendix. There are clover sub-offices from which the mails are distributed to 26 branch offices. The untils are carried it far as possible by rail, but in many cases the letter there to g in road. There are 13 imperial dak had served by to runners, and 14 district dak lines with 21 runners. This case of the latter t met from local rate.

The history of the post-office in this district dates from the Postal suppossion of the mutury. As early as 1555 arrangements on a coast Somewhat limited scale u are established for the purpose of convex  $\cdot$ 's the mark to and from the outlying tabuil- and policefutions. This was known as the district dal and was entucly separate from the general post, being worked solely by the I cal rait.

In 1859 the Fyzahid district dak consisted of on melarti and 35 rangers maintained at a total co t of R . 150 a month, by whom communication was kept up along 150 mile of road Within the limindaries of the present district there were seven lak lines connecting Fyrahad with the taleils and thanas. The etters were distributed by the unlitary police through the village chaukidars, a fee of one pice being allowed for each letter delivered. In order to bring the district dak in touch

łp

with the general part an arrangement was made by which the former could be conveyed free from Fyzabad to any thana or tabil lying on the imperial lines, which then ran from Fyzabad to Sultanpur, Lucknow and Gonda, to Tanda and Azamgarh, and to Basti and Gorakhpur. The district dak was still entirely devoted to official purposes, and in 1859 the dak line from Tandauli to Tanda and Jahanguganj was abolished on the ground that the Tanda tab-il had been closed. In 1864, however, an important change was made by extending the district dak to meet the needs of private and busines correspondence. police were relieved a far as possible of postal duties and a system of independent rural offices was established in order to assure the delivery of letters in villages. The charges were definited by managements with the leading inhabitants. December 1861, Apodhy i was taken over by the general postother, as well as Akbarpar, Dostpur and Bharthapur-a measure which greatly diminished the work of the district dak. place of the rural police, two postmen were appointed to each police-station with the right, as before, to levy one pice on each letter delivered. This scheme remained in force till 1871, when the abole district establishment was handed over to the control of the chief inspector of pist-offices in Oadh. The change was, however effected gradually and some five district offices still remain at the present day. Another important change occurred in 1878, when the no-tal system of Ordh was amalgamated with that of the North-Western Proxinces.

ri. Telegraph

Inns of telegraph are maintained along the railways and along the local road from Akberpur to Tanda. Besides the head office at Pyzahad there are four combined postal and telegraph offices at Ajothya, Bikapur, Tanda and Akbarpur. There are also railway offices at the various stations in the district

Municipalities There are two managed towns in the destrict, Fyzabad, which for this purpose is united with Ajodhya to form a single area, and Tanda. The Fyzabad municipality was first constituted on the 27th of April, 1869, while that of Tanda followed on the 24th of March, 1870. Details of their administrations will be found in

s chiefly derived from an octroi tax on imports, while large ums are also derived from reads of land and buildings, from the outputs for the collection of dues at the Ajodhya fairs, and from ale proceeds of manuro. In the case of Tanda there is no octroi, age its place is taken by a special say on circumstances and reporty, while the bulk of the remaining meome is derived remember vancy, rent- and pounds. The details of meems and spenditure under the main heads for each year since 1991 will ,9 foud in the appendix. \*

There are several towns in the district administered under Act XX Ver XX of 1850. This was applied in June, 1572, to Akbapta and in the following March to Go haingang. In February, 1994. Backhari and Kichhauchha were brought under the Act, while in but 1855, Bhadar-a followed, and then Jakilper and Nagpur in August of the same your. The last town to be so constituted was Darshaunagar, to which the operations of the A t were ex ended in April, 1902. Fix a short period Ramah, and Balsuppa were also administered under the Act, but we concluded the a few years, the former in 1900 and he later a year ateris these towns will be separately described and details of the wene and expenditure will be found to the coon exceles. The eccipts me, as usual, almost wholly derived from the erdinary longer tax and the bulk of the charges come notice the back of police conservancy and miner local magneyear at .

I'll district board was instituted in 1581 when, he the bar duction of Act XIV of that year at the efficiency of the 'I district committee. The bound consists of 17 in indees, " who a five, comprising the deputy manuference and the sub-divisional magistrates, fold their seas to vir in all is the fice, and twolve are clusted, one being retacted an or fily 1 . I period of tyree years from each of the tabell of the ed-" to stock of the district board is of the conditionarity on and That under a number of different heads, it is alose important of such are education, the maintenance of the dispensaces and the reduced and veterinary arrangements, the upkeep or the local I als and ferries, and cattle pounds. The details of the recorpos in Capenditure for each year lines 1891 will be found in the

appendix.\* The former are exclusive of the grants from provincial funds, which is a large item of income, and only represent those sums which are derived locally.

Education

ń

ď.

The history of education in this district is very much the same as that of the other parts of Oudh. The sila school was the first Government institution to be started and was founded in 1859; it was supported by a Government grant and voluntary enberiptions. Anglo-vornacular tabsili schools were started about 1863 at Akbarpur and Tanda, and were continued till 1880, when they were converted into vernacular middle schools. The-e institutions were maintained partly from imperial revennes and partly from local funds, the latter comprising the educational ce- of one per cent, on the land revenue, subscriptions and fees. There was a good angle-yernacular school supported by Maharaja Su Man Singh, and a few aided schools maintained by grants from importal revenues. The village schools were started in 1867 and were managed by local committees. In 1984 the district and local Loands came into existence and the control and management of Government schools and also of those in receipt of grants-mand were transferred to these bodies. The district was for long one of the most backward in Oadh in respect of primary education. School- were few and the attendance was small, while until April 1901 he sel olars paid no fees. In 1872 there were only 102 schools of all kinds in the district in addition to some 60 indigenous mattale. The number continged small till about 1899, when a great improvement became visible. Statistics showing the number of schools both menudary and primary and the scholars attending them for each year sines 1597 will be found in the appendix of It will be seen that the number of primary schools rose from 107 with 5,263 scholars in the first year to 192 with 10 056 scholars in 1904. The chief difficulties with which the authorities have had to contend have lam in the difficulty of obtaining teachers possessed of suitable qualifications, their frequent absence from their charge, and their dishruest habits in the matter of records of attendance. The school buildings of themselves are generally of good pattern and provide sufficient accommodation. The great development of aided

Appendix, Table XV. | † Appendix, Table XVIII.

primary schools is a most promising sign, and there can be little doubt that on these lines alone the hopes of establishing a school in each village will be realized. The village headman or lamhardar has an interest in the school as being personally responstide for the teacher and a feeling of pride in the school-ideas which prevail in nobody with regard to Government institutions. These sided schools have greatly increased in numbers. In 1808 there were only 39, in 1002 the total had risen to 70, while m 1904 there were no less than 97 aided primary schools in the district.

A list of all the schools with their average attendance in schools 1904 will be found in the appendix. They are shown separately for the municipality of Fyzabad and for the rest of the district. In the former those were five secondary schools including the high school and it drauch at Mianganj. The high school has a cost building in the Rikabganj autabu, with a fairly commeman-play-ground. It has a strong staff of teachers and is well tounded in tuitional appliances. The warding-leaders in the cayal lanes at some little distance from the school and close by is a good ricket and football ground. The Mianging nauch is located in a good building to the town. For such time college classes for the first two years of the surveys to come vere attached to the high school, but they never prospered and , we neen discommunical. The other secondary who within connected limits are the vermentar middle schools it Handarganj and Ajodhya, the Forles school, a large private institution aded by the armicipality in Reidganj, and the girl bouding had belonging to the Wesleyan M. slon. The primate schools " tude the district boatil's institutions in Salabganj, Head E bra and Rampalt, the gath' school in the clask and the a corn schools for girls at Rikabganj and the Augure Eagh. Piece is also a large I-lamin school for the reaching of Archiv, nausged by a local committee and maint in ed from the Wasika inds and a number of protate Arthu, Sanskit and Heidi schools in Fyzabad and Ajodhya. In the district on side musi-'Pal limits there are middle schools at Akicipir, Tanda, falalpur, Khajurahat and Sultanpur. There is much need of schools of this type, particularly in the western half of the

district. Those in existence are generally well housed; that at Akbarpur has a very good boarding-house, named after Colonel Anson, some time deputy commissioner of the district, while other good boarding-houses are being elected at Tanda and Jalalpur. The other schools are of the ordinary upper or lower primary type and are established in all the larger villages. There is an aided guils' school at Doorhi Hindu Singh and a mission school for girls at Akbarpur

Literacy

Some idea of the progress of education may be obtained from the statistics of literacy compiled at the successive enumerations of the population. These were first obtained at the census of 1881, when it was found that 3:9 per cent, of the males and 67 per cent. of the temales were able to read and write This was a very low proportion and worse results were found in but few districts of Outh, the rural parts of Fyzabad being probably the most backward portion of the wie to province. In 1891 a marked improvement was observed, as the number of literate males had rison to 449 per cent, and of females to 12 per cent, the former figure being only exceeded in Luckney, Rai Barel, and Unao of all the Oudh districts. At the last census of 1901 the progress achieved was found to be even more marked, as many as 6:27 per cent. of the males were recorded as literate and 417 per cont. of the femalesfigures which were only surpassed in Lacknow and which were considerably in excess of the general average of the United Provines. The returns for the same census showed that Incracy is proportionately more common among the Muhammaden than with the Hrida population, the percentages being 7:18 and 5:95 of the males respectively, while for females the figures were 31 and 42. The reason for this is, no doubt, that a larger proportion of the Musalmans reside in the towns, and also that they do not reclude among themselves so many of the very poor as do the Hindus. The various castes of Hudus exhibit strikingly different proportions. Of the Kayasib males, for in tamee, over 51 per cout. were litorate, whele of the Chanar , the most numerous of all the easter in this district, less than eight persons in 10,000 were able to read and write. The progress of English education, too, has been considerable, the proportion of males literate in English having 01 : 1001 at -07 at also land assume

ri.

Disponsarics.

The hospitals and dispensaries under the management of the district board comprise the two first-class dispensaries at Fyzabad and Ajodhya, and four of the second-class, located at Tanda, Akbarpur, Haidaiganj and Shahganj. The Sii Ram ho-pital at Ajodhya is the most recent of these, having been opened in 1961. They all contain accommodation for in-door patients, but the work done in this direction is small, the attendance amounting to little more than one-ninth of the total number treated. This is 1903 reached a figure exceeding 59,000. The Fyzabad dispensivy was started soon after the nature, in a building given by the haja i bursu, while the branches at Shabgari, Tunda and arbarpur were opened in 1871, and that at Hadargany some supplater. In addition to these there is a cant rement general besined at Evzabad, a Si de-aided Daffern hospital, the usual peace-ho-man as icadqua et-, the Zan ma Medical Mission or peasary at Ajodhya, and a vulgay nespital at Evzaled. the only other public charitable ristration is the proxbose at Eyzabad, this come into existence at 1829 and is a annumed by subscriptions and a consultation from aumicipal

The management of the earth-points ilse fall to tag lot of the district board, with the exception of the three managail gennet in Evzilbad, Ajollas cand Tanela, and the autoniment retaid. The pounds in the rural area acre in several cases critical an early determine we employ the connecticut of the Court magistrate of 1900. The 1884 there was outlined fit works in the district, of Akbarpur, Jalahur, Buschard Rein-1920 Maharajgerij, Raenala, Belegen, and Melkeper. Sansedeathy two others were added at Hard remy and Solvanian. the tip till 1901 the number was insufficient to all the distribu-"much In that year, however much new pounds vere one od, told r thorn buildings of our improved repeat choing gradually one traded. The total number is ton 22, but in some parts nero we still required. These new pareds were established at no two remaining thanas of America and Mazuli, and at itilatganj, Jalahaddinragai, Maharai, Dhaeria, Khandensa, and at the two villages of Koncha and Nansa in pargama Pachhimrath. The income from these pounds is considerable and

actlewurde. the total receipts for successive years will be found in the appendix.\*

imernnent states.

The Government properties in this district are unusually Those administered as nazul by the large and important. deputy commissioner include the whole of the revenue mausas of Fyzabad and Ajodhya, Ramkot, Bagh Bijest, and that part of Manjha Jamthara which lies within municipal limits, as well as small portions of the Raiganj bazar and Katra Yakut Khan, and a few detached plots. All these lie within the houndaries of the nunicipality except part of Bagh Bijesi. Beyond those limits nazul land- under the same management include the old forts at Akbarpur and Raunahi, the income from the former having been since 1903 credited to the Act XX town fund of that place. Mercover, the whole revenue mause of Tanda is nasul, the management and income being made over to the municipal is and. The estates under the control of the Board of Revenue include the rest of Manjhe Jamthara, small plots at Shahzadpur, Ibrahimpur, Deoli, and Darabganj, a grove at Aurangabal and the old fort at Bandipur. These were managed as naced till October 1900. From 1872 up to the same date four alluvial vellages in the Gonda district on the north of the Ghagra were managed conjointly with the Fyzabad nazud, but were then handed back to the Gooda district. The village of Ibrahimpur Churaman near Tanda was deerced to Government in 1869 and has always been managed as an estate under the Board of Reverue, and a share in Asapur near Apolliva railway station, which in 1902 was derived to Government on failure of hoirs, has been held in the same way. A number of other properties have from time to time been owned by Government, but have been abenuted. The estates administered by the Board of Beyonne are managed in the usual method and the scattered naced plets outside the nunicipalities are of no importance.

sabad #1 tory.

ť.

It is otherwise with the nazul at Frezhad and Tanda Ajodhya has been Crown property ever since the establishment of a Ma alman governor. Fyzalad was treated in the same manner by Shuja-ud-daula, who enclosed in his outer fortifications the lands of eighteen villages. With the decay of the city the unoccupied

lands were resettled with zamindars, and at the death of the Bahu Begam all that remained nazul was Ajodhya, Fyzabad city and the Januthura Manjba. At unnoxation the old nacel office was continued and the only important change wa- that of imposing annual rents instead of taking initial dues on lands newly occupied or reoccupied forbuilding purposes. At the summary settlement bittle attention was paid to nazul property, and portions were settled with persons who had been merely farmers; but at the regular as-o-smout the question was fully examined, and at the survey Eyzabad and Ajodbya were demarcated as two manager. he cantonment also was separately defined, and villages acade tre city and cantonment were excluded from the city natul area. Numerous suits were brought forward at the settlement with regard to property in the cities; but no complete registers of agoal property were proposed for a long time, in space of orders in 1860 and the following year. The neces to for such registers was is reased by a number of alterations of portions that were undo from time to time, and also by the anscine of complete revente coards for most of the property. Ran con and hage Buest had cere formally deposed to be Government projectly, and to so vilrigor with Jamohara had been as essed to reveate, our surplus in Mitshong intained as with a complet out this had not been done ractio case of Fyzabad and Apothya and consequences the full soldement records of these villages were not propared, in spite t the fact that they pontained most empty, tenures and a ling chous 100 spendie holding. In ander-peoprietary right and more that a dozen master. The result has been in almost enaless size of anis and decrees, thinles in also exists as to the tenation of the manierpatity to the property. From 1859 to 1875 oth municipal and well work was in the saids of a consisten, shock at first was called the "local fund committee" and afterwords, for one purpose, will a numerical ename ee? and for the "not "the local agency." The accounts had not neen to prise per acc and examine settlement officer and other aschoraties reterred to the manacrality as if it wore the owne of the nazer preperty. In 1873 this mistake was pointed out, but the separation of funds was not earned out till April, 1875. The manacip hty attempted to obtain control of the nazad property in 1878, 1882 and again in 1886, but without success; in 1900 the board was given, as a final settlement of its claims, the management of two cart paraos and of shops in the Sarai, Terhi bazar and Mianganj, as

well as a permanent annual contribution of one-third of the net The general confusion that had existed with regard to nuzul management was made clear at the last settlement. It was found that 553 bighas of cultivated land were held free of rent without any right, and similar tre-pass had occurred with regard to hou-e-property; fenute were wrongly recorded, and the administration was generally lax. A report on the subject and the 1-- we of the anged rules of 1899 resulted in a reorganizafrom of the staff and the undertaking of a detailed survey with the preparation of a complete regard-of-rights. In 1901 all persons claiming propretary rights were called up in to present their claims. 3,757 persons obeyed the summons, 83 applications referring to 1 of pure and simple, and the rest to land occupied by houses. The decision of these claims and the preparation of the record, wa not completed tril April 1905, when a complete recordof-rights was for the first time framed for the 2,136 acres of Fyzabad and 755 acres of Ajodhya, rashiding 1,988 and 723 acres of nazul Jami respectavely The task was one of great difficulty, especially with regard to right- in house sites, for owing to ill-informed views, want of proper records and the pressure of claimants without sife, the real nature of the tenure had been obscured. It was necessary to indicate the Government awayship of all land, oth shap that decreed or deposit of to others, and at the same time to safegued the enterests of old house owners who had long coupled cent-time. The final settlement with regard to old house sites was to the effect that the land was assigned to the occupier on condition that it should revert to Concennent when the owner of the building died heirless or when the building fell

down and was not repair dor replaced within three years by the coner or his assigns: that no rent should be paid; and that transfer of the right of occupation, but not of the right in land,

-hould be legal. An entry was made to this effect in 9,320 several house plots in the two cities; but there are also considerable numbers held on tent, most of them being on regular leases obtained

pi

•

from the angul office.

In 1899, before the new rules came into force, the income Income. from nazul was Rs. 29,097, of which Rs. 24,019 was derived from property within the municipality. In 1904 the latter produced Rs 31,537, the rest having been either taken over by the Board of Revenue, or by the municipalities, or by the Gonda district. Of this sum Rs. 4,160 came from houses and buildings, Rs. 21,342 tron lands, Rs. 1,588 from gardens, and the remainder from ru-cellanecus item«

The chief nazul buildings in Fyzibad comprise the Gulabhari Property s th its approache- and the Reidgani bazar, the Tripudia and Ekdara in the Chank, the mosque of Hasan Raza Kiria, the turns of the same name, the vegetable marker, the ment of 'tak-al, the Museum, and the old building- in the Guptar Park Besides these, there are many other buildings which have been meeted through different agencies since annexation and are numericated through the net of office. The landed property 14diendy been mentioned.

The town of Tanda via-made nggy about the vest 1800 by Tanda. Sandar Ali Khan, who rook bonds from the neighbouring to medars to this effect and southlished an office for no management. People were abwed to build a rebailt haves under Government points, to occupy abandone I haden under the same another, and to soll the materials my of cher, houses, it is to the land. The erights layed to the Brech Gercament at ameration ; and though they were easted in a cal parsons 's vorument obtained in 1866 a decree for he whose text completes the beam of Nanagang built by the ancilors do no nachbran Paisad in Has but her on the site of an old grove the nazul prepenty consists at 300 leafins of land and a narrises de whole manner of l'andrescept a few protes d'aitivat reported as the property of neighbouring zanandac. The win le · 6 demarcated afrom in 1903, when a complete server was made. In early days the same faults of management, occurred h Tunda as in Fernhad, and from time to time sales or small Note were effected, and it was not collars last sottle nent that the hect of the whole village being na id properly was thereighly grasped. The land entered upon the old nazul registers had been made over to the charge of the municipal board in 1575

and 1878, but this amounted to only fourteen bighas. In December, 1900, the entire property was transferred to the board, which was required to pay one-fourth of the receipts to the Fyzabad nazul office. The income has improved considerably, but the full amount due is not yet realized, as a large part of the land has been misappropriated and now forms the subject of a suit for recovery. In 1899 the total receipts by the nazul office amounted to Rs. 287, while in 1,904 the municipal board realized Rs. 1,224 from the property.

Vanika

рı

Some mention may also be made of the institution known as the Fyzabad Wasika, which deals with four buildings and an endowment. The former comprise the great runnsoloum of the Bahu Begam in the Jawahir Bagh; hor residence in the city called the Moti Mahal, the adjoining mosque built by the same lady; and the imambara of Jawahir Ali Khan, one of the Bogam's cannels. The endowment was constituted by a deed of deposit, dated the 25th of July 1813, whereby the devised three lakhs of supers to Darab Ali Khan to build her tomb and directed the allotment of certain villages in Pachhimiath with an annual reverge of Rs. 10,000 for the maintenance of the tomb and those residing within its products. This deed was accepted by the Governor General and the Nawah Wazir made the grant of the villages \* In 1846 the assignment of villages was carrelled and in its place King (thazi-ud-din Haidar gave Rs 160,866 to the Company, who agreed to pay 6 per cent, interest on it; the rate was reduced in 1851 to 1 per cent, and the next year to 34 per cent. In 1350 it was raised to 4 per cent again, but was once more reduced to 24 per cent, to 1895. Consequently the annual endowment income is now Rs. 5,833. The other buildings are not endowed, but certain moneys are obtained from the rents of lands cound the tomb, acorque, and Moti Mahal, and of houses in them and the Imambara; as well as from the sale of garden produce and various miscellaneous items. The management of the temb and endowment was first entrusted to Darab Ali Khan, then to Panah Ali Beg, and then to Lutf-un-nissa Bogam, the adopted laughter of the Bahn Regam. In 1839 it passed to the Resident at Lucknow, and after annexation to the Wasika

**:1.** 

Office at Lucknow. In 1859 the Chief Commissioner fixed the amounts to be paid for repairs and to pen-ioners and guards, the balance being made over for religious purposes to a darogha, the allest male descendant of the Begam. Four years later a trust was created, the trustees being the darogha and another member of the family, but in 1867 the deputy commissioner was put in thereof and in 1885 all the accounts were transferred from the Lucknow Wasika to the Commissioner of Fyzabad. Since 1887 the entire management has been in the hands of an agent under the deputy commissioner. The charges meaned comprise the epairs to the temb and other buildings, the cost of religious deremonies, and the salaries paid to serven(s and dependents, while since the beginning of 1901 funds have been found for the tablishment of a free Muhammadan school

i pi r,

#### CHAPTER V.

#### HISTORY.

To the Hindu the hely city of Ajodhya is especially dear Indition tr mits connection with Rama and Sita, the types of perfect men The great epic, called after its here the Ramayana, has gained immensely in popularity by the production of a revision in the vernacular, and Tulsi Das' poem is read and known all our Northern India. According to the Ramavant, Dasaratha, of the Surajbans or Solar race, was king of Kosala in the third age or Treta Yag of the Hindu cosmogory. He had four sous, t whom Rama was the oldest. Sita was daughter of Raja Jana's d Mithila, and Rama won his bride by breaking the bow which no one else could even bend. Owing to the jealousy of queen Karkeyi, Dasaratha was induced to send Rama with Signand his beather Lakshman into exile. Sita was entired away by Ravana, long of Ceylon, but was recovered after much higher agree with the help of Ham man and his monkeys. It is not yet possible to say whather may of this sorty is really historical, and not even an copulationate date can be assigned to it. That a kingdom of Kosale with it expited at Apolliva, existed some time before the orth of Christ, is, however, certain. Apollova was also namportentrity in Jain Interature, and Admatha of Vrishabha, Ajita rules, Abhair and anath a. Sumail matha and A and matha, to first, " nd, Curch, fifth and I fish Pitthankness a could blave con but there.

The evidence of coins of types form to de at Aporten and Coins. to the neighbourhood, shows that a devicty to ed there about the second and first centuries below Carred. No references to the · 475, whose names appear on the coms, have been discovered in inscriptions or in books, and but little can be state? about them from the coins. Their date is roughly certain from the tyle of the alphabes used. The coins are divided into two classes. One

r

class includes square coins which were obviously cast, and the devices u-nally include the Bodhi tree and the combined Buddhist symbols of the Tri-rathna and Dharma-chakra. The kings whose coins bear these types are Mula Deva, Vaya Deva, Visakha Deva, Dhana Deva and Shiva Datta. The other series includes a set of tound coins struck from dies u-nally bearing the device of a bull facing an upright standard or sacrificial post on one side and a cock and toddy palm on the other. The kings known are Setya Mitta, Sarva Mitra, Sangha Mitra, Vijaya Mitra and Kumuda Sera. The two last kings replace the cock and palm tree by the Buddhi t symbol of the earlier series, and there is some reason to third that Kumuda Sera came before the others.\*

A period of several hundred years clapses before anything further can be stated about the history of the district. It seems probable that in the fifth and sixth centuries A.D. Ajodhya fell into the bands of the Guptas, and this is expressly stated in the Puranas, where Ajodhya is referred to under the name of Sakot, a name which is also applied to it in the Ramayana.

The Chinese prigress.

5

t

There has been much controversy overthe identification of the sites mentioned by the Chinese pilgrims, and the question whether they visited or refer to Ajodhya is still debated. The Buddhist records of Ceylon state that Buddha lived for 16 years at Saket, and his teaching was undoubtedly followed in the whole of Oudh. General Cumingham identified the capital of the great kingdom of Sha chi mentioned by Fa Hian with the capital of Visakha (Pi-so-kia) inferred to by Hwen Things, and considered that both the enames referred to Saket, or Ajodhya.; Both of these identifications are que tioned by Mr. V. A. Smith,; and the whole question i still uncertain. There are mounds to the east of the modern town of Ajodhya, which may possibly be stupas, but they have not been excavated; and it is a remarkable fact that Ajodhya itself is distinctly wanting in remains which can be assigned with containty to the Buddhist period. When Hwen

<sup>+</sup> Ancient Geography of India, p 401, et seq.

<sup>1</sup> J. R. A S , 1808, p. 520

<sup>§</sup> Another identification of Ajodhya is with the 'O yu-to of Hwen Thisang

Th-iang travelled through Oudh in the seventh century the whole of it probably owed allegiance to the mighty Harsha Vardhana of Kanauj. At his death the mists again gather over the history of Northern India, and are not lifted till the twelith century, when the Rathershad raised another great kingdom ruled from Kanauj, which fell towards the end of the century before the victorious armies of Islam.

It may be regarded as probable that the sway of the later kings of Kanauj only nominally extended so far north. Local radition states that for centuries Ajodhya was a wilderness, and this is borne out by the frequent references in the Musaiman hat times to the hunting to be obtained in its vicinity. Univerar tradition, too, assigns the whole district to the Bhars, a myster ion race who owned the greater part of Oudh and were considerel as natural enemies by both Hindus and Musalmans alike They dwelt in brick-built vittages, traces of which are to be cand in the shape of deserted mounds all over the di frict. There is no legend regarding any particular capital of the Bhara, and it may be suggeted that the country was under the sweet of the is a chieftain who resided at Kushhawanpur. Kusapura, the old hame of Sultanpur ? The Bhais were obviously not of Asyan the cost, and it would seem that there were then no Hindus in the land, unless possibly the stery of the Raghabansis four lelon fact, the race stating that they are descended from the solar kings of Apolliva and that they remained in the neighbourhood of their foregreeping throughout the period of depression. There are "ill Ragbubensos in Pyzabad, and those of Bara Banki and the parts of Sitapur along the trhagea tell the same tale. What hap-It would seem that they were , and to the Bhars no one knowdriven eastwards by the Rapput colonists who were approprial from their beines in the west by the Musalman invadors from beyond be tadus. Many Bhars still remain in the east of Fyrabad, and there are many more in the districts of the Benaics and Gorakhpor divisions. In other parts of Oudh they were either externi--1101 or else brought into complete subjection by the Aryan newc more or else mingled with the invadors. The common story of Rapput taking service with a Bhar chief and then ousting his master is frequent in Fyzahad as elsewhere. Its very frequency

The Bitare.

١,

is suspicious, and it has been more than once suggested that many of the modern Rajput claus of eastern Oudh are none other than the descendants of the Bhars themselves, their forefathers at some early date having been received within the pale of Hindu society, while it was still in a liquid state and had not crystallized into its present form. The Bhars remained here and there till the days of the Jaunpur kingdom and then vanished, apparently becoming either Hindus or proselytes to Islam—for the stories of the Musalman colonists are no less wonderful than those of their Rajput neighbours.

There is nothing but the barest tradition to show at what period the various Rajput tribes settled in the district. In the western purgana, colonies were formed by Chauhans from Mainpuri, whence all the Oudh members of this clan claim to have sprang, Breen- from Majhauli in Gorakhpur, the original home of the great families of Gonda and Partabgarl; and Bais from Baiswara. The last are almost certainly spurious Bais; they are disowned by the Tulokchandi ruce, and they state that their arrival in Fyzabad occurred at a time when there were very few Bais even in Daundia Khera, and every member of the clan was required to maintain then po-sessions in that quarter, Bachgotis in the south and centre of the district are said to have been originally Chanhans: this is at least possible, as the traditions with regard to Bariar Singh, the bounder of the clan, are so numerous and consistent that it may be assumed that he was a historical personage The Euraphansis of Hayeli Oudh and Amsia appear to have come at a somewhat recent date and their story may be true, as the reputed founder of the family was a Sprajbansi of Kumaan in very humble circumstances and made no pretence of having come either armed with a royal cominission or of being a refigee prince. The Gargbansis of Haveli Oudh and Pachhirmath claim an antiquity as great as that of the Raghubanes; they are at least hinest enough to profess an autorhthonous origin. The Palways in the cast of the district state that they were originally Sombansis from Pali, but whether they are a branch of the Partabgarh family or of that of Pali in Hardon is uncertain. Generally speaking, it may be asserted

doubtful and requires strong proof of its genuineness; the lunar clans are often of true Rajput stock, such as the Janwars of Gonda and Bahraich, who e authenticity appears to be beyond unestion. The occurrence in the family history of certain stories causes immediate suspicion. Such are the common traditions to the effect that a certain man was on a pilgrimage to Ajodhys; or was accompanying a marriage procession to that place; that on the way be was molested by Bhare, and afterwards returning with a force to punish the aggressors seized their lands for homself. Or again, that a cadet of some princely house, being leven eastwards by the Musalman invaders, took service with the Bhars and having ri-on to power by force of his uperior breeling, turned upon his master and low him, generally was drank Such tales prevail throughout Oadh and are common in this district, even with the Bacagotis. They are abyiously inventions of later years, when a clau had become firmly established and required an account of the fundly history to serve as evulence of the illustrion descent of the reigning chieffain. It is doubtless going too far to as cet that all these Reports are Blue in proved out of preognizion, let it may be mirly suggested that the colonists, on ing a a rime whon the Hundu casto system had not yet erystallized mangied feedly with the aboriginal pepulation. Possibly, too, the conduct of the bhars was not effected by a few r-olated groups, but rather by the scrains of the Doble severeigns, in warso rules were many of the warlike tribes of Hindu-; and it is quite concer, d to that the latter settled in the neighbourhood of Ajodhya and r the protecor a of its Musalman garrison. It is a least signoisers that the traditions of this district refer to nany Muhammulan colourets it a data long antecedent to that claimed by mest if the Rajpues.

The first Musalman invasion of Outh was, according to the The The Mirat-i- Mussl. popular tradition, that of Sayad Salar Ma and. Masawii states that the youthful awader west from Maltan to Alothys, where, after taking the city without a struggle, he romained hunting for some time and then set out for Deuli in 1030 A.D.\* The route taken is remarkable and the story must

į

be confused in some manner. There is no mention of his passing through Ajodhya on his march from Satrikh to Bahraich, where he met his death; but popular legend steps in to fill the gap. All along the old Lucknow road are numerous tombs which the Muhammadaus declare to be of the followers of Saiyid Salar. Near Raunahi is an ancient mosque and the tombs of two martyrs, Aulia and Makan Shahid, ascribed to this period. The men of Rannahi will not pass this way after nightfall; for the road is thronged with troops of headless hoisemen, the silent host of Sawid Salar, presumably on their way back from the disastrous field of Bahraich. If the expedition passed through the district, as seems hardly probable, it at all events left no mark. It is said that an expedition came to Oudh in the reign of Sultan Ibrahim in 1080 If so, the tradition apparently refers to Hajib Taghatigin, who crossed the Ganges and advanced further into Hindusian than any army since the trac of Mahmud \* In 1194 Mairz-ud-dur Muhammad bin Sam, commonly known as Shahab-ud-din Ghori, is said to have conquered Oudh after taking Kanauj, and it is supposed that either he houself or one of his bentenants accupied Ajodhya. It was during this reign that Shah Juran Ghori lived at the capital, where his toral is still shown.

The roverne m of Ondi

r

It is not quite clear when Ajodhya, or Oudh as it is called by the historians, became the headquarters of a Musalman province in the kingdom of Dehli. The country was apparently subdued in the reign of Quib-ud-din Aibak. One of his lieutemants was Malik Hisam-ud-din Ughlalak, who was appointed to command in Kotl in 1193, and was afterwards transferred to the newly-acquired province of Oudh.† He was joined there by Muhammad Bakhtiyar Khilji, who was sent from Budaun, and with his aid extended the Musalman dominions into Bihar and Bengal. These were united to Oudh, the capital of the new province being Lakhmauti in Bengal, and were placed under the rule of the Khilji nobles.‡ These soon set up for themselves an independent state, but Oudh remained under the sway of Dehli, for we hear that Quith-ud-din sent his officer, one Kaimaz Rumi, from Ajodhya to Bengal to receive the submission of the refractory chiefs, against

whom he had to take the field.\* Soon after, however, Ali Mardan founded the Bengal kingdom under the name of Ale-ud-din, and Onth became a separate proximes. It was under the sway of Scainsnd-din Altamsh, who made his eldest son, Nasir-ud-din Mahand, governor in 1226.† The latter died in 1229, after having made a great mame in the province. He cru-hed the Bhar-, who had rison in robellion and had put to death, it is said, 120,000 Musalmans, He was apparently succeeded by his brother, Malik Ghra--ud-drn Muhanimad, who raised a robeltion o Ondh against his elder prother, Rikn-ud-die, the successor of Altam-h.§ During the reign of Rizia, however, the governor was Name-ud-din Tabashi Muizzi, who brought his forces to Dohli to ad his sovereign against her rebellious nobles. In 12:2 the a expise was in the charge of Qamai-ud-due Kuran, one of the narrons of Minhaj-us Saraj, the author of the Labakat-r-Nascreff The duration of his rule is make syn, out in 1255 Oudh was given to the king's mother. Malika-r-Jahan, and her hu-band, Katlagh Khan, and on this appointment Taj-ud-din Six then was transfored to Bahraich. \*\* Katlagh Khau was di liked by the king it a was soon ordered to Bahrich; he refused to oney, and on the arrival of the royal army under But an refrest on to Kalinjar. The opportunition at Ajodhya then passed to Arthu Khaa, who in 1279 meditated resolt, but his design it ere again frustrated v Ballian, who promised he pardonaty. He was, howe concerned to Karia, and his speedsor was Mahk Anni. Khi i Altagon, who hold Orally for typonics of the area of 1270 he was sent agreed the n el Tagiral of Laklmantoff. He was defoaced, and for his between was insight over the gate of Ajodhy in Ralbar, th n unwhed to Oudh in person and collected there an inner se write the b frees of leasts on the Changa for the expedition to Bengal Balban died in 1286 and left his son, Bughra Khao, in possession of Bengal, while bolds was held by the late its see, Karpele L It was at Ajallya that the tamber persons a suited between lather and son, which led to a reem that on and a partition

of the country between the two rulers. After this, Oudh was given to Khan Jahan who remained there for two years. In 1289, when Jalal-ud-din ascended the throne, Malik Ali, a dependant of Balban, was governor of Oudh, and not unnaturally espoused the cause of Chhaju, Balban's nophew, who assumed the royal title in Karra. The Khiljis, however, prevailed and Ali was captured, but released by the clomency of Jalal-ud-din. Oudh was given shortly afterwards to Ala-ud-din, who requited his uncle's kindness by murdering him as Karra. When established at Dehli he gave Oudh with Kaira to Malik Ala-ul-Mulk, the uncle of the historian, Zia-ud-din Barni.\* This man did not hold office for long, it would seem, as soon afterwards he was ketwal of Dehli.

he ighlaq /aasty.

١

١,

For some years nothing is heard of Oudh or Ajodhya, but the province was considered of much importance by the sovereigns of the Tughlag dynasty. In 1321 Malik Tigin was ruler of Oudh, and was murdered by the Hindus, after having joined in the revolt against Ghias-ud-din Tughlad, † He was succeeded by Ain-ul-Mulk, who ruled the province wisely for many years together with Zaiaiabad to the cust. I About 1343 he was transferred to Daulatabad, and thereupon raised a revolt against Muhammad Tarillag. He was defeated near Bangarman in Unao, and was taken prosper, but was forgiven and 16-tored. Firoz Shah, the next sovereign, is said to have visited Oadh in the course of his expeditions to Bengal, his itinerary in the first of these is deattful but he certainly staved here during the second, and it was on this occasion that he founded Jaunpur. It is not known who was governor of Oudh at this time, for Atu-ul-Mulk was transferred to the Panjab and his successor in Oudh is not men-It was during this prosperous reign that the tomb of Qazi Saryid Taj was full at Lorpur near Akharpur, in 782H.. a description of which will be found in the article on that village.

In 1376 the province of Oudh was placed in the charge of Malik Hisam-ul-Mulk and Hisam-ud-din Nawa; but not long afterward, during the confusion that ensued upon the death of Firoz, the Afghan nobles endeavoured to establish independent

Scom.

principalities. About 1394 Khwaja-i-Jahan, the Wazir, took possession of Oudh and all the country between Bihar and hadanj, and assumed the royal state in Jampur. Here he troughened himself during the civil wars at Dohli, and in this way be established a separate kingdom which endured for many years Outh declined in importance, being quite overshadowed by lampur, and few references are made either to the province or to its capital. The Jaunpur kingdom was overthroug by Bahlol Lodi, who gave Onth to the colebrated Kala Pahar Formula. This man hold the province till his death in the rogn of Ibranim Lods, and left his estates to his daughter, latch Malika, who was married to one Sherkh Mustaia, during where lifetime the province passed under the sway of the Atylan, Shar Shah. Kala Pahar held Oudh under the soyoguign of Deali, but was subjected to the governor of Janupur while that place was held by Barbak. The latter was constantly in trouble with his rebellions subjects, and on one occasion Sultan Standar Loth carre to Janupur to assist his mother, and then went a month hunting in the vicinity of Ajodhya.†

After the defeas of Ibrahim at Panipat, the Afghan nobles wempled at Jampur and thirner Bibar sent Kamran with taur Quli Beg in pursuit. The Atghans retired belief ohim to Pates, and thus Ond's fell into the hands of the Mughal cavaders. I was not for long, however, as in 1827 Budal fled from his got at January Lefore the Aigh in Suitan Mahammad I Viether force was sent eastwards and Jampar again was organized and given in charge to Muza Juned. The courtey was retained by Babia and Hamayus all the dulest of the latter by Sher Shah and his Alghans In 1528 Pa air built the mosque a Alodhya on the traditional spot where Rama was born. Sace Shah and his successor, Islam Shab, held all Hindostra, including Outh, but Corning the commission and civil war that tollowed Islam Shith's death she province was apparently under the control of Muhamiread Ad.1 Shah, while Sikandar was culer of the west, and thrahim was contending ineffectually with both. There are, however, no references to Chilli during this period.

Akbar's reign.

ı

rı.

1

After the reconquest of Dehli by Humayun. Oadh and Jaunpur still remained in the hands of the Afghan nobles, and it was not till 1559 that Akbar sent Ali Quli Khan, Khan Zaman, cast-The expedition was successful; Jacupur and Benares were occupied, and thus Ajodhya again came under the Mughal dominion.\* It was in the charge of Khan Zaman, whose head-In 1565 Oudh is mentioned a the quarters were at Janupur jagir of Sikandar Khan, Khan-i-Alam, while Ibrahim Khan Sharbani, uncle of Khan Zamau, held Surhuspur. † The-e two men rebelled in concert with Khan Zaman, and the rising was subdued by Akbar in person. Khan Zaman was replaced by Minim Khan, Khan-i-Khanan, who built the town of Akbarpur and the bridge of Janupur. In 1566, however, Khan Zaman was paidoned and re-tored, but in the next year he again rebelled against he master. Ajodhya was held on his behalf by Sikandar Khan, who was there besieged in the fort by Muhammad Quli Khan Ihrla-, Raja Toda: Mal, and others of the imperial army. He field by over to Gotakhpur and in 1568 Outh was given to Birlas, while Munim Khan returned to Jaunput 1 It is not knewn for how long the former remained here, but a few years later he served in the campaign in Surit, though he seems to have returned before his death in 1575 § The next year Qari Nizani Ghazi Khan Badakh-hi was given Ajodhya as tugut, and there he died in 1535. He does not seem, however, to have been governor, for in 1580 Warn Khan of Herat is mentioned as being in charge of Oudh, and after him came Masum Khan Farankhadi in 15:1, after his transfer from Jaumpurg This man recelled soon afterwards, and was joined by Arab Banadur. Nighat Khan and other nobles. Shahbaz Khan, governor of Bihar, was cut to reduce him and a fight occurred at Sultanpur. Shahbaz being forced to retin on Jaunpur. There he turned and pursued Masum to within seven miles of Ajothya, where he routed the memgents, whose leader fled to Bahraich The next reference occurs in 1586, when joint go emors, Qasim Alt Khan and Fatch Khan Tughlaq, were appointed to Oudh: the

<sup>•</sup> E. H. I., V, 260 † :bid, V, 296 † shad W 294

arrangement did not last long, as the former left in 1501, and katch Khan remained in single possession,

The appointment seems to have been one of considerable in patance in the early part of the reign, owing, no doubt, to its proximity to the chief scat of Afghan disaffection; but as Akhar's power 'scame consolidated, the references to Oudh bee mo fewer and no mention of the town or province occurs in the histories of the last few reads of his reign. Apodhya nas a ment town, as also was Akharper-Tanda, the latter mane appearting on dame of several years.

In the days of Akbar the present district of Fyzabad formed Asbar's pair of two subtiles or provinces and two sackages a divisions. Fre arstern hulf lay in the subah and sacker of Oudh, the headquerters of which were as Ajouhva, and the test in the savkar of launpar in the province of Allahubad. Of the twenty-one middle which composed the strker of Outh the whole of six and park of one other lay within the confiner of the present district, which also includes within its limits for of the farr-one mahals if isampur. It should be constantly borne in mand, however, that all the pargamas have been since considerably changed, especially in 1869.

The city of Oudh, with its submittal districts, known as Sockar Onds to Haveli, formed two malab generally concernding to the present pergana of Haveli Oudh. It had a criticated area or 35,650 highest assessed at 2,008,303 range and field by Right couside and Kormas. The military contingent was mail, conside og et five hersepon and 300 infantes. Partheorations. bloom by its present same, and was then as now a surre soubal, with 289,085 biglion of cultivation and a revenie of 4,247,464 time. The fandowner- were Bachgoti, and Carblets, and they jog tek han wood estit badeneral Mangal-, also and brown by its modern appellation, but appear to have been somewhat 14 ger than the existing pargans, as it possibly included a small boti n of Khandansa, of which same is no mention in the der-i-Akbars, the rest having been comprised in Rudauli of the Hara Banki district. The mahat of Mangaba paid a reveaue of 1,560,753 dams, assessed on :16,101 nighus of cultivation. It was owned by Sombansis, and the local levies consisted of

twenty horse and 1.000 infantry. The pargana of Amein was known as Sarwa Pali, a name which was retained till 1743, when the Raja of Hasanpur built the fort at Amen and moved the headquarters thither. It was held by Bachgotis, as for long afterwards, and they supplied 1,000 infantry; the rovenue was 1,210,335 dams and the cultivated area 58,170 highes. Lastly. there was the small and obscure mahal of Naipur, which is said to be the old name of Iltifatgauj. If this is correct, it comprised the north-west corner of Tanda. The total cultivation was only 5,997 bighas, the revenue 308,788 dams, and the military force 500 infantry. Unfortunately the zamindars are described as of "various castes," a term which affords no clue for the identification of the name. Iltifatganj gave its name to a pargana at annexation, and as we are told that Khwaja Iltifat Ali Khan, the founder of the place, was given the pargana in jagir by Safdar Jang, it may be tairly assumed that the tract in question was the old Naipur mahal of Akbar's day.

inskar. auu pur.

Į

١

J

The reconstruction of the surkar of Jaunpur is a matter of little difficulty, at any rate so far as the mahals in this district are concerned. The rest of pargana Tanda was known as Khaspur Tanda, a name which was preserved till aunexation. It had a cultivated area of 17,365 highes, paying a revenue of 986,953 dams and was held by Kaya-th-, who supplied ten horse and 300 infant y. Akbaipur was then called Sinjhanli, the present capital having been only founded in the time of Akbar; the cultivated area was 16,815 bighus, the revenue 2,988,209 dams, the military contingent tifty hoise and a hundred foot. and the zamindars Sayids, Rajputs and Brahmaus. Majhaura has undergone to change in name, though the area has been largely; altered. It had then only 6,417 bighas of cultivation, with a revenue of 120,164 dams; it was owned by Bachgotis and Brahmans, who contributed 200 infantry. Suchurpur is roughly the same as in Akbar's day, save that in the middle of the eighteenth century a small portion was taken by the Saiyids and included in the new pargana of Mahul. It had in Akbar's day 18,851 bighas of cultivation, paying 1,164,095 dams; it was owned by Rajputs, who contributed ten horsemon and twenty (probably two hundred) infantry. Pargana Birhar was then

styled Chandipur Birhar, and was hold by Musalmans and Brahmans, although the former did not long retain their supremacy against the Palwars. The revenue was 1,467,205 dams, assessed on 22,826 highes of cultivation, and the local levies numbered twenty horse and 400 foot.

It is not very easy to establish a comparison between the The present condition of the district and that of Akbar's day by reason of the changes in the fiscal sub-divisions. Ocutting Khandansa, however, and including the lost portion of Surhurpur it appears that roughly 387,860 acres were under cuttivation, et about 55 per cant, of the present area under tillage, while the reveaue was Rs. 4,02,800, excluding Rs. 22,212 assigned as surprograd for religious and other purposes. This gives an average meidence of Re. 109 per acre of cultivation, or slightly more than half the present rate, where is it is probable that the purchasing power of the rupes was then about five times as great as now, judging from the recorded values of the various food grains at that period The revenue demand was consequently far in excess of that at present imposed, while the returns show that the district was then in a comparatively low stage of development

The later Mughals.

ievenge,

It is somewhat significant that there is practically no exterence to Apolly to or the district in the die nicles of Akbur's successors. The old arrangements were munitared and Apothy's remainted to be the neulquarters of the province, although lacknow was rapidly rising in importance; but the e-minund had ceased to play a prominent part in the unpered administratrue owing no doubt to the complete pacification of Bihar Apparently there was no large garrison at the capital, and this test would seem to account for a decided change to the hist ry of the district. With the wanting power of the central authority the local chieftains rose to a position to which they had never attained before, and at any rate from the death of Aurang-20b, if not earlier, the various heads of the great class began to ·ularge their estate, absorbing those of their weaker neighbours, and to establish a number of well-defined principalities.

No such estates were likely to come the being in the The loc immediate vicinity of the capital, for the local governors would not tolerate the existence of powerful neighbours; but in the

more remote tracts there was no such restraining influence, and there the same thing happened as in other parts of Oudh. Among the first to follow the new movement were the Bachgotis and their kinsmen, the Rajkumars: their estates lay chiefly to the south, in what is now Sultanpur. Foremost among them was the Musalman Raja of Hasanpur, long recognised as the premier nobleman in Oudh; while the chieftains of Kurwar, Dera, and Meopur soon followed his example. In the west the Bhale Sultans were rapidly becoming a powerful force, and in the east the Palwars of Birhar were the undisputed masters of a large tract of country. The Saiyids of Pirpur and clsowhere and the Sharkhs of Samanpur also were gradually attaining a position which enabled them in the course of time to unitate successfully the example set by their Hindu neighbours.

andat hau, This process went on unchecked till the days of Sandat Khan, the Nawab Wazir, who founded the Oudh dynasty. He found himself face to face with a body of already powerful chiefthins, to whose repression he at once devoted himself; but his time was chiefly taken up with wars in other parts of the empire, and in Oudh he had but little opportunity of dealing with any but the most prominent and refractory, such as the Bais of Baiswara, the Kanhpanias of Tilm, and the Sombanias of Partabgarh. With the appointment of Sandat Khan to Oudh, the capital of Ajodhya assumed a position of fiesh importance as the sent of a new dynasty. He built the Qila Mubarak at Lachhmanghat, but the headquarters of government were afterwards transferred to the new city of Fyzabad, which had its origin in the impretentions bungalover shorting-box of Sandat Khan.

nedsa.

Ī

The history of Fyzabad from the days of Saadat Khan to the death of the Bahu Begam is fully told in the Farah Bakhsh of Muhammad Faiz Bakhsh, translated under the name of "Memoirs of Fyzabad" by Dr. Hoey.\* A brief abstract of this narrative is given in the separate article on Fyzabad city, and requires no repetition. The history of the city forms but a small part of the history of the district, and the latter is mainly the story of the great taluquar louses, already told in dealing with the various estates in Chapter III. Fyzabad itself was a royal

<sup>•</sup> Memoirs of Delh: and Fairabad, Vol. II, by W. Hosy, Allahabed, 1889.

durain, and therefore under direct management. The local authorities had nothing to do with the rest of the district, at any rate after the time of Asaf-ud-daula, who substituted for the old arrangements of Akbar's day a new system, where by the province was divided into nicamals and chakles, corresponding in some degree to the divisions and districts of the present time.

It was shortly after the defeat of the Barha Saiyids by Muhammad Shah in 1720 that Saadat Khan acquired the province: Outly in addition to Agra. He was succeeded by Abar Mansur Khan, his nephow, better known as Safdar Jung, who built the city of Fyzabad and died in 1754. His son, Shuju-ud-diula, was more intimately connected with Fyzabad than any other of his race, as he made the place his permanent healquarters after his defeat at Buxar in 1764. At his death, in 1775, the city was at its zenith of prosperity. The next Nawab Walir, Asai-ud-daula, left it in Lucknow, and Fyzabad remained in charge of the Bahn Begam till her death in 1815; then reforward the place declared, assuming a position of secondary importance during the reign of Saadat Ali Khan and his royal successors.

From the institution of the administrative rete as of Asafnd-daula, the history of the district cent es on the nazions of Altenpur, whose jurisd-ction embraced all the present district with the exception of the royal juggers of Fyzabad and Tanda, The first nazim of Sultan ar was Mirea Satur Beg in 1793, but he only ruled for a few months and was succeeded by Raja Sital Parshad Tirbedi, whose stern boud in this district and offerwards in Khairabad rendered on one of the most bated of Sudh officials. In 1801 Raja Navaz Sah -moved of to the post: sut ofter a year he gave place to Mirza Jeni, who ruled from 1808 to 1805, and was followed by Raja Jugal Kishore. In 1808 Niwaz Sah recorned to the district and stave the two Years, and then came Fazl Ali Khan and Mir Khuda Bakhsh for one year apiece. In 1812 the charge of Sultanpur was entrusted to Mir Ghulam Husain who remained tell 1823, save for an interval of two years from 1815, when Ikram Muhammad From 1824 to 1824 Taj-va-dan Husam Khan Khan was nazim held the district, and then came the famous Raja Dar-han Singh, who laid the foundations of the vast Ajodhya e-tate during his six

The Numbs.

The Nazims o Sultans pur years tenure of office. In 1835 Mahdi Khan, and in the next year Mirza Alklullah Beg, were nazuma; they were followed in 1837 by Quth-ud-din Husain Khan, and in 1838 by Darshau Singh again for a single year. Between 1840 and 1845 there were no fewer than eight nazims, including Taj-ud-dia and Quth-ud-din, who returned for brief periods, and Inchha Singh, another of the Sakaldipis, who held Sultanpur from 1848 to 1815. At the end of the latter year came Man Singh, the most conspicuous figure in the recent bistory of Fyzabad; he was only in power here for two years, but he employed his time to advantage. In 1819 he was succeeded by Wajid Ali Khan, and lastly, in 1850, came Agha Ali Khan, who held office till annexu-Many of these persons occupy a position of prominence in the history of Fyzabad, more especially in relation to the formation of the talugas and the absorption of the independent communities, either on behalf of thouselves or of the local chieftains.

d hakla-

ı bı

ł

The number of chakladars and the extent of their juri-diction varied according to circum-tances. Ordinarily there was one chakladar of Aldomau, which included Akharpur, Eirhar, Tands and Surhurpur, and one of Pachhimrath, whose charge comprised most of the rest of the district. Each pargana was hold by a faujdar, associated with whom were a diwan, qanungo, and other subordinate officials

That the exponents of this system did no better in Fyzabad than elsewhere in Oudh is evident from the account of the manner in which the talugas were formed, from the narrative of Sir William Sleeman, and from the state of the district at annexation. The total absence of justice or scentity is illustrated by the extraordinary number of forts in the district and by the accounts of contemperaneous writers. Suddat Ali Khan, indeed, held the zamindars responsible for misdeeds occurring within the limits of their estates, but from his death onwards the government officials paid attention to nothing but finance.

Nothing is said about a number or robbery and consequently crime of all kinds has become more frequent, especially in the smaller towns and villages. Gang robbery of both houses and travellers, by bands of 200 and 300 men, has become very

talugas.

common. In most parts of Oudh disputes about land, and murders thence originating, are of very frequent occurrence: feuds are thus kept up, and all opportunities of vengeance laid hold of. No traveller goes unarmed."\* Dr. Butter goes on to relate individual instances of unpunished crime, notably the raid on Tanda in 1834 by the Rajkumar chieftain, Fatch Bahadur, who exerthrow the garrison, carried off the principal inhabitants, and extented from them a large ransom.

General Sleeman in his journal deals chiefly with the talundars and the manner in which they put together their He travelled in company with Raja Bakhtawar Singh, of the Sakaldipi family, but this did not conecal from his view the behaviour of Darshan Singh, Man Singh, and other relatives of the Raja. The nazim, Agha Ali Khau, was then almost noworles; his authority was despised by the talued us, many of y hom paid no revenue, defied the government, and had recourse topiunder in order to maintain thour levies. † He tells the story it the Maniarpur, Khaprachh and Schipur estates, and also of Man Singh and his prodecessor, and gives several instances of sho manner in which the smaller estates were forcibly seized by the calumplars. Had be visited the aist of the district, be would actalloss have had much to say concerning the Pilwars, who at all times were second to none in their lawles-ness and brigandage. things were no botter in the west, owing to the reconstruction of the many Bahrelia cobbest from Surappur on Bara Backs, and the (X) buts of the actorious chaptasi, Jugarenth, G. Khandansa, and of the equally troublesome Mesalmans of Dicka not

Some idea as to the state of the district may be obtained from a open written in September 1858, on the number of forts in bazzonel. Every putty zamindar had his own entreached stronged, generally surrounded by a ditch and fence of barabos, in de to enable him to resist the articles of his avarieous neighbours and the Covernment officials. Without a fort no one considered as life or property in the least secure. Mr. Forkes writes. When I structhat there are registered 190 forts in Fyzabad, and

The gencial insecurity.

that I believe that will be found to be under the mark, some idea may be formed of the matter. Slightly sprinkle the map with a pepper-castor, and their positions may be said to be marked." The chief strongholds he enumerates were Shahganj, Ghatampur, Khapradih, Sultanpur, Makrahi, Sultangarh near Akbarpur, and Madangarh between Akbarpur and Majhaura. Most of Oudh was in the same state of chronic warfare; but Fyzabad appears to have been in almost as bad a condition as any district. Man Singh indeed kept his own vast property quiet, but even he was encroaching on his neighbours, swallowing up the small proprietors and intriguing against the latter, especially the ewners of Khapradih and Dera. In the cast the Palwars were noterious for their lawlessness, constantly raiding each other and then neighbours, and always resisting the revenue authorities, while the Rajkumars and Bachgotis were little better.

Annexation In February, 1856 Outh was annexed by the British Government and Fyzabad was made the headquarters of a district and division, the former extending as far south as the Gunti and including the Baraunsa and Aldereau parganas now in Sultanpur. The first Commissioner was Colonel P. Goldney, under whom were Mr. W. A. Forbes as deputy commissioner, with Captain J. Reid and Mr. E. O. Bradford is assistants. Tabuland police—nations were established, the few existing roads were improved and new lines on veyed, and the summary settlement of the land revenue, of which the records still exist, was undertaken by the district officers under the superintendence of the Commissioner.

The mutiny.

The work of organization was for a type suspended on account of the metary, the history of which, so far as this district is concerned, is of considerable interest and may be briefly narrated. The garrison of Fyzabad at the end of May, 1857, consisted of a large force of native troops, comprising the 22nd Bongal Infantry under Colonel Leunov; the 6th Oudh Irregular Infantry, commanded by Lieutenant-Colonel O'Brien, a squadrou of the 15th Oregular Cavalry; a battery of hoise artillery under Major Mills, and a company of the 7th Bengal Artillery. The European officers were under no delusions as to the probability of the outbreak, and preparations were made in May to organize a

scheme of defence by collecting stores and fortifying the house of Captain Thurburn, the assistant commissioner. It was expected that the zamindar and pen-ioners would lend their assistance, and this belief was encouraged by the offers of an asylum on the part of Raja Man Singh, Thakurain Raghunath Runwar, Mir Bagar Husain, and Nadar Shah, all of whom spoke of the matiny as a cortainty A similar offer was made by the Mahants of the Hanuman Garbi, who from the first exerted themselves to keep the troops steady. But it was soon found that the assistance of the zamindars was not to be relied upon, for they were quite unfit, bowever well disposed, to resist disciplined troops with guns. The idee of a defence was consequently abandened and in view of the obviously pertiahed spi . among the soldiers Colonel Goldney, the Commissioner proposed on the oth of June to send the women and children to Lucku w This, too, proved impossible owing to the disturbed state of the Day ahad district. Recomse was then had to Raja Man Singh, who was actually to confinement at birechad for agrees at evenue. He had at first regreed to shallon the family of Captain Alexander, and was then induced by the interior occave all the women and children. He was released, and arrangements were made to send the civil officers' families to Shahgani This was done on the 7th of June; but the waves of the regimental officers refused to loave the station, and only districting Man length but considering that their deporture would characters. given arrang the traps. The wives of the stiff of earts and her families however, follower, to Shabe on on he 5th

The district was now full of outliners from Armean's tampur and Bonares, whose emissaries reached the lines at and-larger the 3th of June, the result being that troops be she at out-of-commuting that evening. Their efficers were protected by the better disposed, who gave them mener and proceed them four costs in which they set off down the Ghag a. Thele mites down at Beganganj, the togetives were fined on by men of the 17th degment from Aramgarh, and shortly afterwards they were stacked by armed men in boats. Some attempted to escape across country, but were all pursued and eventually killed in the Basti district with the exception of Sergeant Busher of the

Outbreas in I yesArtillery, who reached Captainganj. One boat, however, containing Colonel O'Brien and four officers, was more fortunate. They stopped at Ajodhya, where they hired a larger boat and native rowers, and in this manner passed by unsuspected and eventually arrived at Dinapur. Thus of the twenty-two persons who originally tried to escape by river only six reached their destination in safety. Colonel Lennox with his wife and daughter had remained behind and dud not start till some hours later. On meeting some of the 17th they abandoned their boat and made their way across country to Captainganj and thence to Gorakhpur. A sixth boat with three officers and two ladies of the 22nd was also eventually brought in safety to Gopalpur; they had undergone great hardships and privations, and had been plundered and maltreated on their way down the river.

The civil

There now remained only Cuptain Roid and the other civil officers in Fyzabad, and these could do nothing but fly. The mutineers had plundored the treasury to the extent of some Rs. 2,20,000, and then had opened the jail, one of the prisoners released being the famous Sikandar Shah, berter known as the Fyzabad Maulvi. They then marched down upon the city and the officers role away ostensibly to Shahganj. When out of eight they turned off to Gaura, where they took refuge with some friendly zamindars. and thence on the 10th of June to Shangauj. Man Singh declined to be responsible for the afety of the party, and the next day the whole of the refugees, thirty-eight persons in all, set off for a ghat on the river some eight miles below Fyzahad. One carriage containing nine persons broke down, and the occupants were compelled to return to the fat. The othersafter many narrow exapes reached Gopulour on the 21st of Jone, and were sheltered by the loys) Raja of that place and altimately sent on to Dinapar. These left at Shahgani were afterwards convoyed by Man Singh to Gorukhpur, as also wa Mis. Mills with her two children, who had attempted at first to conceal herself in Fyzabad, and then had gone on foot across the Chagra into the Basti district, where she was rescued by Man Singh.

Man! . Singh, All authority seared with the outbreak of the mutiny, and while the rebel troops held sway in the city, the local chieftains and aluquars found themselves in a state of practical independence.

This was especially the case with Man Singh, who forthwith recovered his lost possessions and resumed his former position of importance. His attitude was somewhat doubtful and his role that of a trimmer; he kept in communication with both sides, constantly remanding the British of his valuable services rendered, while at the same time, when no hope appeared of the arrival of a British force along the Chagra, he sent a battery and other troops to aid in the stoge of Luckness. His abstract of the robel suse was, as he pointed out, necessary for his own preservation; but though making this profession to the British, he actively took measures to ensure his position in case the robels should be ultimately victorious. It must be admitted, however, that his initial and ultimate adhesion to the Government resulted, in the first case, in the saving of many lives, and latterly in the rapid restoration of order.

The other talugdars, though primarity concerned with their own interests, almost without exception esponsed the cause of the rebels. This was notably the case with the Palwacs of Birbar, the Bachgotis of Hasinpur and elsewhere, Rum Samp of Khapradih, Tafazzul Bu-am of Samanpon, and the Plant Sultan-The only exception was Raja Rustam Same to Rajkumar chieftain of Dera, who throughout the mining exhibited the most courageous loyalty. The neu-taked or communities generally joined actively in the rebellion; notably the Charlians, whose stronghold was the tort of Gharampar near Baraga in. The old Nawahi arrangements were restored, Feza'nd was placed under a Mu-alman governor, and Maldi. Ali Khan was made name of Sultanpur. The Palwars returned to their old I thur of plunder and aggression from the first. At Naurahm the hyzabad fug tives were stopped and rollied by Bal ellide Naram Sough, the eldest son of Mahip Namin of Chaudipur, for which he atterwards was punished with impresonment. Further down the river at Chahorn they were again stopped by Madho Parshad Saigh of Haswar; but here they tured better, as he catertained them with some show of hospitality for three lays and then de-patched them under an e-cort provided by Man Singh Soon afterwards, however, Madho Parshad took up arms against the British and in July marched against Azamgarh. He was met at Barauli by

The other

of the Gumti under a heavy fire. Fyzabad was still held by our troops, and on the 11th of October Sir Hope Grant, acting on the report of Mr. Forbe regarding the forts of the district, marched thither from Lucknow and proceeded towards Tanda, in order to beat up several large parties of rebels who were endeavouring to break out to the south. One detachment under Colonel Kelly was co-operating with him from Azamgarh, and a small column had also been sent from Sultanpur to Jalalpur under Major Raikes. The latter came upon some 4,000 rebels in the act of crossing the Ton-, and after driving them back into a jungle nearly succeeded in surrounding them, when they broke and fled, leaving two elephants and two guns. Their chief, Faizul Ali, narrowly escaped capture. Grant returned on the 23rd of October to Saltanpur, and was operating in that district till the combined move on Baiswara, which opened Lord Clyde's winter campaign. Colonel Kelly was left in charge of Fyzahad and was made responsible for the district between Tanda and Sultanpur.

124] 614-17.6,

١

After Beni Madho's e-cape from his fortress of Shankarpur, his troops were driven northwards through the west of this district over the Ghagra. Sir Hope Grant followed in pursuit and reached Fyzabad, whore 4,300 men were collected under Colonel Taylor. The enemy were in force beyond the Ghagra and the crossing was effected by a bridge constructed under long-range fire by Captain Nicholson, R.E. On the 27th of November the force made the passage of the river and dreve the rebels headlong into Gonda. With the advent of Lord Clyde and his march to Colonelgani and Bahraich, the campaign in this district closed and the rebellion came to an end. Civil administration was rapidly restored, and nothing further occurred to disturb the peace of the district. Attempts were made to replace confusion by some show of order at a very early date, as there is an extant order of Mr. Forbes, the deputy commissioner, written from Dera, where he was with the loyal Raja, Rustam Sah, on the Sta of June, 1858. By the end of August all the officials were reinstated in Fyzabad. The landowners all submitted quietly. and no extensive confiscations of property were here made in striking contrast to the districts beyond the Ghagra. Palwars held out to the last moment; but the only one to incur

punishment was Udit Namin Singh, as mentioned above. The importance of Fyzahad as a station was increased by the location there of a strong European garrison, which was at an early date reduced to its present constitution of a brigade of all arms.

Since the mutiny the lustery of Fyzahad has been generally proventful. The district has occasionally suffered from scarcity history. and floods, while the only other occurrences deserving mention are the settlements of the land revenue, the spread of education, the development of communications and tride, and other matters connected with the general administration, to which reference has already been made in the preceding chapters.

### AHRAULI, Pargana Mashaura, Tahail Akbarpur.

A small village lying in latitude 26° 31' north and longitude 32° 35' east, on the west side of the read from Fyzabad to Akharpur and Jaunpur, at a distance of about two miles west of the Katahri station on the Oudh and Rohilkhand loop line, five nules south-east of Goshaiuganj, and some nine nules north-west from Akkarpur. To the south of the village runs the Marha river. The place is merely of importance as containing a police-station, a cattle-pound, and a small bazar in which markets are held twice a week. The population at the last census numbered but 233 inhabitants, the majority of whom were Brahmans. Ahrauli has a total area of 182 acros and is assessed to a revenue of Rs. 75. The village lands are divided into three portions, two of which are held by the Saryid taluquars of Propur and the third by a resident Rajput.

## AJODHYA, Pargunu Havels Oude, Tuhesl Fyradad.

The ancient city of Ajodhya stands on the right bank of the Chagra, or Sarju as it is called within the sacred precincts, in latitude 26° 48' north and longitude 80° 13' easi, at a distance of some four miles north-east from the city of Fyrabad, with which it is connected by a metalled road. Parallel to the latter runs the branch line of railway to Ajodhya ghat; on the river bank, leaving the main line at Ranupali. The Ajodhya station lies about a mile and a half to the south of the town, to which it has access by a metalled road. A similar road runs south from the centre of the town to join the Jaunpur road at Dar-haungar. Besides these there are several other branch and cross roads giving access to all parts of the place. The river is crossed by a bridge of boats at Ajodhyaghat, leased to the Bengal and North-Western Railway; in the rains its place is taken by a ferry steamer.

Ajodhya is united with Fyzabad to form a single manisipality, and the details of its administration will be found in the article on the district headquarters. The first enumeration of its inhabitants took place at the Oudh census of 1869, and it then contained a population of 9,949 souls. Since that time the place has rapidly increased in size. By 1881 the total had risen to 11,643, but has since almost doubled. There are no figures extant to show the number of inhabitants in 1891, as the town was already merged in the Fyzabad municipality; but at the last census of 1901 it contained 21,584 souls, exclusive of the large number of visitors from the district and elsewhere who had come to attend the great fair on the 2nd of March. They lived in 6,471 houses, of which 2,920 were of brick or of manonry. Watch and ward is maintained by a force of 40 municipal police. located in four chankie. There is also a regular police-station, a post and telegraph office, a cattle-pound, and a number of school-These include a vernacular middle school under the district beard, and ten Sanskrit patshalas under private management, several of them maintained by the temple foundations. There is also a first class hospital given to the town by Rai Sri Ram Bahadur of Rasulpur and called by his name.

A jodhy a is undoubtedly a place of immenso antiquity, but its early history is very obscure. The city is intimately connected with the mass of legend referring to Ram Chandra and the Solar race, and was certainly the capital of several reigning dynastics. What is known for certain of its history in ancient times has already been recorded in the opening pages of Chapter V. From the seventh century A D. for a long period the place appears to have been almost deserted, though it rose again in importance under the Musulmans, who made it the seat of government for a large province. That it was still regarded as a holy spot by the Hindus is clear from the fact of its desceration by Babar and Aurangreb, but it would appear that the pre-ence of a Muham. madan governor and his court kept the Hindu shrines continually in the background. Ajodhya was a mint-town of Akbar and also of Muhammad Shah, some dams of the latter being inscribed "Akhtarnagar Awadh." It is not olear when Ajodhya first began to assume its present proportions: the change

presumably occurred when the capital was removed to the new city of Fyzabad and the Qila Muharak or fort of Saadat Khan near Lachhmanghat was abandoned for his country residence at the "Bangla." With the departure of the court the Hendus were left to themselves, and numerous temples and in masteries splang into existence. Probably the nise in importance was in some degree due to the growing populatity of the Ramavan of Tulii Das. The progress has been even more rapid fine annexation; hat before the middle of the nine conta o attary Ajed's a was regarded as a great and even dangerous s rough id a lim loism. as the constant fights between the rivil creeds and the alarm they occasioned in court circles bear withers. This development was not due to any particular person. The great family of Sakaidipi Brahmans, whose representative bears the recent title of Maharaja A Ajodhys, had but httle to do with the place, and the fire palace of the Maharana in the east of the city and its adjoining temples pre of very recent rigin.

Ajodhya is pre-eminently a city of temples, and apart from the othere are but few points of interest in the place. Not all of these places of worship are connected with the Hurdu religion. There are six Jain brines which have been attendy mentioned in Chapter III in connection with Jameson in this de cret, and there are also the Musatman prosque and tomis. I is locally offirmed that at the time of the Musalmen conques there were three important Hindu shrin - at Applify a and looked e. These were the Japaneasthan temple, the Swarz addwar, and to Trata-ka-Phaker, and each was successively made the object of a tention of different Musalman, rule s. The Janamashan was in Rankot. and marked the nirthplace of Rama. In 1528 A D. Babar same to Ajodhya and balted here for a week. He co-trived the sprient temple and on its ate buil a mosque will know a as Babar's mosque. The materials of the of gue a o nea la gely suployed, and many of the columns are in gen pre cite in: they are of close-grouned black at no called by the unives instante, and curved with various days e- Then high a from so on to eight feet, and the shape square at the base, centre and 'apital, the rest being round or octagenal. I've mosque has two inscriptions, one on the outside and the other on the pulpit; both are in Persian and hear the date 935 Hijri. Of the authenticity of the inscriptions there can be no doubt, but no record of the visit to Ajodhya is to be found in the Musalman historians. It must have occurred about the time of his expedition to Bihar.\*

This desceration of the most sacred spot in the city caused great bitterness between Hindus and Musalmans. On many occasion, the feeling led to bloodshed, and in 1855 an open figh. occurred, the Musalmans occupying the Janamusthan in force and thence making a desperate as-ault on the Hanuman Garli They charged up the steps of the temple, but were driven hack with considerable loss. The Hindus then made a counter-attack and stormed the Janamasthan, at the gate of which seventy-five Musalmans were buried, the spot being known as the Gan, Shahirian or the martyrs' re-ting-place. Several of the king' regiments were present, but their orders were not to interfere Shortly afterwards Maulyi Amir Ali of Amothi in Luckney organized a regular expedition with the object of destroying h Hanuman Garbig but he and his forces were stopped in the Bana Banki district. It is said that up to this time both Hindus and Musalmans used to worship in the same building but since the mutiny an outer enclosure has been put up n front of the mosque and the Hindus, who are forbidden access to the inner yard, make their offerings on a platform which they have raised in the outer one.

The other mosques were built by Aurangzeb and are now in ruins. That on the Swargaddwar replaced an ancientemple which has never been castered. The Treta-ka-Thakm marked the place where Rama performed a great sacrifice and set up images of himself and Sita. This was reproduced by the Raja of Kulu in the Punjab more than two centuries ago; two improved by Ahalya Bai, the widow of Jaswant Rai Holka of Indoro in 1784, and the same poison built the adjoining gloss As the temple could not commemorate her name, set built another called after herself and gave an annual assignment of Rs. 231 to it, the sum being still paid by the ruler of Indore The ancient images were said to have been recovered from the river where they had been thrown by Aurangzeb, and ware

<sup>\*</sup> E, H, I., IV, 283. ] † Gazetteer of Burn Bankı, jp. 168.

placed in the new Treta-ka-Mandir. This temple is always doed during the day and is only opened at night on the 11th of the dark and light halves of each mouth, and for two or three nights on the occasion of the Ramnaumi and Kutki fairs. The temple is endowed with two or three villages in Basti, purchased from the offerings made at the shrine.

Near the Mani Parbat are two tembs which are venerated as those of the patriarche Seth and Toh. They are mentioned in the Ann-i-Akbari as being of six and seven yards in length respect-They are again spoken of in the Araish-i-Mahfil these Colonel Wilford adds that of Neah, which is still shown near the police-station. † The story goes that they fell here fighting the Hindus and thus acquired the cank of matters; possibly there is some truth in the story, as it may be that cortain Musalmans bearing these names were kalled in one of the frequent religious condicts some four centuries ago, the date which C donel Wilford assigns to the erections. Other shi nes held sacred in Masaimans include that of Shah Jaran Ghora, who is and to have come with Shahal-ud din and descroyed the Jam temple of Admath in the Murao Tola near the Swargaddwar, giving his name to the mound on which his tomb stands; the hime of Naurahui Khurd Makka, one of the earliest Musalman immigrants and encowned saint, said to have been named Mir Alimad and have derived . He cognemen from Naurahus whence he came said from the muhalla of Ajodhys in which his timb, stand-, that of Khwaja Hathi, a tollower of Bubar, whose cushoned tomb in the Kubir Tils one of the criter bastions of Ramker, is till revered; and that of Makhdum Shaikh Bhikha, a we tera lev new who flourished some 200 years ago and was burned on the last of the The shrines of Shah Samer Figurel-ras and of Shah Chup are other relies of Muhammadan antiquity of which all traditions are lost.

The only remaining institutions of Musalman argin are the Hayat Bakhsh and the Farhat Bakhsh termerly for all gardens which have now passed into Hindu hands. The termer was savigued to Paudit Uma Datt by the British Government, and the latter is partly owned by the Raja of Jaipur and partly by the

<sup>4</sup> Austral Researches, 1799, VI, 12

Digambari faqirs to whom it was made over in part compensation for the Guptar Park in cantonments.

The Hindu temples are all intimately connected with the history of Ajodhya. Most of them are of comparatively recent origin, as it would appear that almost all the ancient shrines were destroyed by Aurangzeb and other Musalman zealots. The sacred places of Ajodhya are exceedingly numerous. The spot according to Hindu mythology represents the forehead of Vishnu and is the seat of learning and the chief of the seven tiraths. It is undoubtedly the most unportant centre of Vishau worship in Oudh, if not in the whole of Upper India, and claims precedence over Muttra and Hardwar. It is only natural, therefore, that the sacred places connected with Vishnu in his various incarnation, and especially that of Ram Chandra, the best known of all, should be many in number and should extend beyond the immediate precincts of the city, even as far as Bhadarsa and Bilharghat In 1902 a local committee was formed with the object of commemorating the coronation of His Imperial Majesty King Edward VII, and a sum of over Rs. 1,000 was collected and expended on the erection of stone pillars marking the sacred spots in Ajodhya and its neighbourhood. This work has been carried out and no fewer than 145 such stones have been erected; their ostensible purpose being to pre-rive the memory of the various holv spots and to serve as a guide to pilgrinis and others interested in the place. A complete enumeration would be weless without some descriptive and historical account of each, and only the more important need be here mentioned.

The chief place of worship in Ajodhya is the ancient citadel of Ramkot which stood on elevated ground in the western portion of the city. The old ramparts have long disappeared, but the mound remains, and on it stand a number of large temple. Foremost among these is the Hamman Garhi, a massive structure in the shape of a four-sided fort with circular bastions at east angle. Above this on the hill to the west stood the Janamasthan or birthplace of Ruma, and close by are the Kanak Bhawan, a very fine building creeted by the Rani of Tikamgarh or Orchka, the Sita Rasoi or Sita's kitchen; the Bara Asthan, the head-quarters of a fraternity called the Bara Akhara; the Ratan

Singhasan marking the place where Rama was installed after his return from exile; the Rang Mahal, Anaud Bhawan, Kaushalia Bhawan or Janam Bhumi, and the temple of Amar Das, as well as many smaller temples and shrines.

From the Hanuman Gaths the main soad leads north to the river, passing, the Bhur and Shi-ha Mahal temples on the left, and on the right those of Kri-hna, Uma Datt, and Tulei Das. Along the river to the west of the road are the bathing ghats and shive them a number of temples, the most important places long the Swargaddwar, the Janki Tirath, the ancient Nage-hwarnath temple of Mahadeo, the Chandra Hari, Lachhmanghat or Sahaeradhara, and the Lachhman Qila, on the site of the old Nawabi fort known as the Qila Maharak East of the road along the river bank are many more temples and hely places extending as far as Ramghat, near which is a cluster of shrines of more or less importance. Mention may be made of the Sugriva kund, the Dham Hari, the temple built by the Bubu or Sur-ur in Muzaffarpm, the Mani Ram Chhaoni and the Maharaja's marble temple a little north of the katwalla.

Beyond the Maharaja's palace and the Ram Bazu to the wouth, in the direction of Dar-hannager, is the reculiar mound an wn as the Mani Parbat. This stands some sixty-five feet high and is undoubtedly of artificial origin, possibly representing the remains of a Buddhist stops. One legently loweren-tace that when Hanuman was sont back from Ceyion to the Himalayas to bring thence a healing herb for Lucidman' wourd, he brought with him a whole mountain in order to make certain of his erand, and a portion of this broke off and fell in Ajosthya. A second account, which is the locally accepted tradition, states that the mound was made by Ruma's labor rer- who when returning home in the evening, cleaned their backets at this spot hence the name Orajhar or basket shakings. To the south-east of Ramkot are two smaller mounds, one of which is known as the Sugriva Parbat; and those, too, were suppose i by General Cuthingham to be of Buddhist origin.\*

Of the 145 sacred places only 83 are within the limits of the town of Ajodhya, the rest being for the most part in its immediate

<sup>4. 8.</sup> N 1, 1, 298 417,

neighbourhood to the south. The westernmost is the Guptahari temple in the Guptat Park in the Fyzabad cantonments. Others of some importance are the Bharatkund near Bhadarsa, Billuhari or Bilharghat near Jalaluddinnagar, and several tanks or river pools, such as the Surajkund, Ramkund, Biblikhankund and Nirmalikund. All these places are objects of pilgrimage, and the whole number is included in the parikrama or circumambulation of Ajodhya.

Many of the Ajodhya temples have endowments in the shape of much and other lands, in some cases of considerable value. Some of these have been mentioned in Chapter III in connection with the religious orders, while others are the Bara Asthan, with lands in this district and elsewhere; the temple of Mahant Bhagwan Das Achari, which owns some revenue-free villages in Basti; the Jankighat temple, which owns several villages, either manufi or acquired by purchase; and the Maharaja of Balrampun's temple, which is endowed by that taluqdar.

The chief fairs and religious gatherings that take place at Ajodhya have been already mentioned in Chapter 11. The three chief are the Ramnaumi, the Jhula or swinging fair in Sanwar, and the Kartiki Puraumashi. Besides these there are many small regular fairs and the occasional Gobind Duadashi. Every Tuesday considerable numbers of pilgrims visit the Hanumas Garhi. Much still remains to be done at Ajodhya in the way of opening out broad pilgrim routes through the town, completing the river front with proper ghats and passage way, and removing useless ruins of petty buildings. The creation of a public parktoo, would be a great improvement.

One of the most recent works carried out in Ajodhya is the memorial to Her late Imperial Majosty the Queen-Empress Victoria. This stands in the heart of the town, alongside he main road. It consists of a statue creeted on a marble platform and covered by a canopy of the same material: it is surrounded by a small garden.

The history of the city of Ajodhya and of the sacred place, within its limits is narrated in the Ajodhya Mahatma, an ancient work which has been recently translated into English.\* The

lands of Ajodhya are mainly nasul property and are included in the villages of Awadh, Ramkot and Bagh Bijesi; a number of plots are held in under-proprietary right, and three small aceahave been decreed to ramindars on the strength of old Nawabi gills. There are no mazul buildings in the place. The nasul office has always taken the meening from the lathing fairs, derived from dues paid by booth-keepers, barbors, and owners of bathing attors or charkis. Those charkes on the mas my ghat belonging to the Gaegaputras have never been taxed, nor have those assigned to the Gaegaputras of Gaptarghat in 1806, when may were moved from the cantonment to Ajodhya. All other haukes, as well as sites for booths, ite now put up to auction—a system instituted in 1865. The money of derived is made over by the nazul office to the municipal board.

#### AKBARPUR, Paryana and Talesd AKBARPUR

The capital of the purgana and tab-il is a considerable town long in latitude 26° 26' north and longitude 82° 32' east, at a distance of 36 miles by read from hyzabad and twelve intes from Tanda. The loop line of the Oudh and Robalkband Railway passes close to the town on the rorth and else, the station billy a short detarce from the main site. Akbarpar is built on the left bank of the Tons, which is mosted or an eld masoner leader and, a male further down in the carlesar. For augh the own cars the main read from Excaled and compar, trans which a metalled branch teads past the station to I incla, two comerabled Finds take off from the latter, one can sing to illust a gauge call the tuu to Beskhari, Ranmagar and Kuchhan bha i m the town runs croud to Amen and Cauban and To the south twind the river less Shahzadpur, which is separately to uticated. heads run from this place to Julaijur, Mahama, and Despecia the Bullarepur district

Akbarpur was founded in he day-of Akbar by Wahramase Mohsin, who was in charge of the old pargana if Simphul. He built a fortion the high left bank of the fine, aking and for the purpose from the neighbouring villages. It is said that in former days the place was covered with jungle and that one Saivid Kamal, a holy man, resided there, was killed by robber- and

buried within the precincts of the present fort, in which his touch is still to be seen. Muhammad Mohsin Khan also built a moscue and the bridge over the Tons. The former stands in the fort, where the tabal buildings are now located. It bears a Persian inserition, stating that this officer constructed it during the reign of Akbar, when Munim Khan, Khan-i-Khanan, was governor of Outh in the year 976 Hijri. The bridge in its original form was entirely of masoury and beyond it on the right bank is a large embankment partly of masonry, which extends for some hundred of feet eastwards. Of late years some of the piers have been removed and the arches replaced by girders. The great strength and clidity of the structure may be judged from the age and condition of the remaining original portions. On the north face in a stone slab containing a Persian inscription in five lines bearing the name of the builder and the date, the latter being identical with that of the firt. These buildings are said to have been erected under the direction of the Emperor himself, when he passed through the place on his return from Jaunpur to Agra. The place was a mint town under the name of Akbarpur-Tanda. Shahjahanpur and Shahradpur on the opposite bank of the rise are also called after the name and tatle of the Emperor's grandson. Since that time Akbarpur has been the capital of the parguos and its history is chiefly connected with that of the Saiyid house of Pirpur.

Besides the tahal, Akbarpur contains a police-station, muncifi, a post-office, a second-class dispensity, an inspection bungalou, and a middle vernacular school, with a boarding-hous, attached, which is named after Colonel Anson, some time Depuis Commissioner and Commissioner of Fyzabad. A small guld school, aided by the district board, is maintained by the Wesievan mission, which has an orphanage just outside the town. There is a large Imambara and a number of mosques, the fluest of which lies across the river in Shahzadpur. The bazar is of considerable importance and a large business is carried on here, the chain expert trade being in grain and hides. The fairs held annually are shown in the list given in the appendix. Akbarpur administered under Act XX of 1856, the operations of which were extended to the place in June, 1882. The area brought under the

Aut is 621 acres and includes the whole of Shahadpur and part of Sinjhauli on the south side of the river. The lands of Akbarpur itself cover only 361 acres, assessed at Rs. 500, and owned by the Saiyid taluquars of Pirpur.

The population of the town at the first Oudh consus of 1869 numbered 3,100 persons. In 1881 the total had increased to 6,396, but this included the population of Shahzadpur. In 1891 it amounted to 7,143, but since that time has somewhat declined, as at the last consus the place contained 7,110 inhabitants, of whom 3,597 were males and 3,519 females. Classified according to religious, there were 4,010 Hindu, 3,057 Musalmans, and 19 Christians and others

In 1964 the area comprising the chankedare town contained 2.007 houses, of which 1.147 were assessed to taxation. The moome from the house-tax was Rs. 1,800, giving an incidence of Rc. 1-9-6 per assessed house and Rc. 0-1-0 per head of population. The total receipts amounted to Rs. 2,069, unlading the opening balance and misc flane are means of in some. The expenditure is chiefly devoted to the maintenance of the tiwn points force at 13 men at a cost of Rs. 900, conservance, Rs. 630; the cost of collection Rs. 120; and small local improvements and their charges.

## AKBARPUR Parpane, Lobel Akbareva.

This pargana forms the control point in of the south-eastern tahul, lying between Majhama on the west and Surhurper on the east. To the north lie Amen and Tunda, and to the south the Sultanpur district, the boundary is may form of three ghout by the Majhoi river. The Thirma forms the northern boundary for a short distance, but it drains a comparatively small acces the main drainage channel is the Toric, which if we through the centre of the pargana from the junition of its charper out streams, the Marka and Bisni, to the Surhurper boundary of the east. The river is navigable for part of the year as the a Akhar, ar, and time traffic is carried on between the place and the markets were down in grain, hides and dried fish. On associally this river does much damage by overflowing its banks, especially in the lawlying lands near Akharpur, this was notably the case in 1871 and in 1894, when the floods were exceptionally heavy, and again

in 1903. Generally speaking, however, the pargens is well drained by these streams and their tributaries, but there are several jhils and depressions, especially in the middle of the upper and lower halves of the tract. The principal are those known as Auraiya, Sahela, Lohraiva and Chortaha, three or four miles south of Akbarpur; those near Gausarpur in the south-west; those in the neighbourhood of Bangaon in the north-east; and a string of tale stretching from Lorpur to Saidpur Umian. Except in these parts and the neighbourhood of the streams the land is level, but the soil exhibits great variations. There are numerous user plains and many outlying tracts of inferior land, but there is generally an unbroken belt of good cultivation round the villages. The usar is chiefly to be found in the portion south of the Tons, but along the Majhor there is a belt of very fertile country and a similar good stretch of land is to be found between Akbar. pur itself and the Surhurpur boundary. North of the Tons a good deal of land hies low and is often swampy, the outlying fields consisting mainly of single-cropped rice land. In the west of the pargana on either side of the Tons the level is higher and the soil is occasionally sandy. There are no jungles of any -ire in the pargana except a large patch of thorny scrub in the villages of Yarki, Marthua and Bharthupui in the north-cast plains in the south contained scattered patches of dhak trees while along the Tons from Akharpur to Samanpur there are several stretches of waste land with scattered bebut trees.

The total area of the pargana is 168,385 acres or 263 square miles. At the first regular settlement \$2,712 acres or 49 per cent, were cultivated, but at the last settlement a very marked increase was observed, the area under the plough being 98,649 acres or over 58 per cent. The development of the pargana babeen well maintained in subsequent years, and in 1904 no less than 100,581 acres or nearly 60 per cent, were cultivated. The double-cropped area has increased even more rapidly and in the last year amounted to over 40 per cent, of the cultivation. Of the remaining area, 33,566 acres were classed as culturable; this includes 5,048 acres of groves, while the rest consists chiefly of old fallow and waste that has never occurred amounted. The barren area was 34,238 acres, but half of this was either covered with

water or else occupied by sites, roads and buildings; the remainder is chiefly user, which is far more prevalent in this pargana than in any other part of the district. Means of irrigation are abundant, and in ordinary years more than half the land receives artificial watering. Tanks form the chief source of supply; but there is a large number of wells, which has greatly increased in recent years, though more are probably needed to make the pargana safe in a season of drought. The chief kharif staple is see, followed by arhar, keden and par, while there is a large proportion of sugarcane and indige, which cover some 6,000 and 2,500 acres respectively. In the sabi, wheat takes the lead, followed by peas, gram and barley. The more valuable crops such a tobacco are very little grown, and opium is only produced to a small extent.

Cultivation is generally of a high standard, and this is horne our by the ronts, which at the last settlement averaged Rs. 5:28 per acre. The prevailing castes of cultivates are Kurmis Brabmans, Rajputs, Chamars, Ahus and Bhace The first and the two last are the best, and paid a higher rate than the high casto tenants, the average cental being Rs 551 per acre for low caste caltivators and Rs. 474 for others. The advantage obtained by the latter was very small, amounting to 15:98 per cent., as compared with the district average of 25 per cent. The great bulk of the pargana, amounting to 80.71 per cease, was at the time of actilement held by ordinary tenants at each races; while of the rest \$35 por cent, we held as sir or khudkasht: 411 ver cent, hi under-proprietors and occupancy to name, 2.14 and-free and 3-19 per cent rented in kind. The gravatiented area is certy poor and pressions as is generally the case throughout the dracts. The sub-rented area is larger proportionately that in any other pargana, and compares remarkable with the accoming tructs of Majhavra and Amsiu

The revenue of Akharpur at the summers efficient was Rs. 1,18,227; but the area assessed differed greatly from that of the present pargana. The regular assessment was made by Captain Erskine and Mr. Carnegs, and the demand was raised to Rs. 1,74,970. This was reduced at the subsequent reveron to Rs. 1,66,026. At the last assessment the unreal demand was

sanctioned at Rs. 2,08,865, rising in the eleventh year to a final revenue of Rs. 2,23,739, and giving an enhancement of 34-21 per cent. and an average incidence of Rs. 2-27 per acre of cultivation.

The population of the pargana at the first Oudi census of 1869 numbered 142,882 souls. In 1881 a considerable decline was observed, mainly due to alterations in the area, the total being 137,159; but at the following census an increase of 23,278 was recorded. In 1901 the enumeration again showed a decrease, the total being 158,726 persons, with a density of 608 to the square mile. Classified according to religious, there were 138,677 Hindus, 19,921 Musalmans, and 125 Jains, Christians and others. The pargana contains 401 villages, but few of these are of any size. Akbarpur itself, which is combined with Shahzadpur for chankidari purposes, is the only town; Lorpur, a large agricultural village, has a considerable population and has been separately mentioned; but of the rest only about a dozen contain ever 1,000 inhabitants. The bazars, fairs and schools of the pargana will be found in the appendix.

The pargana is well provided with means of communication It is traversed from north-west to south-east by the loop line of the Oudh and Robilkhand Railway, on which there are stations at Malipur and Akbarpur, from both of which a large export trade is carried on. Parallel to this rate the road from Fyzalad to Jampur, an excellent second-class road metalled for two miles, where it pasks through the town of Akbarpuc. From it a metalled branch runs north-cast to Tanda, while other unmetalled roads lead to Sultanpur, Dostpur, Jalalpur, Ramnagar, Iltifat-ganj and Amsin. The eastern half is traversed from north to south by the road from Tanda to Suihurpur.

The 401 villages of the pargana are divided into no less than 1,337 mahals. Of the latter 958, including 37 hold in subsettlement and amounting to 85.5 per cent. of the area, are owned by taluquare; 161 mahals or 5.5 per cent. by samindars; and 91 mahals or 8.4 per cent. by copare many bodies whose property is as a rule very minutely subdivided; but the percentages in the two last instances include 74 subsettled mahals. The remaining 6 per cent. covering 1,008 acres, is either revenue-free, 12 mahals being so held, or Government property. The largest

landowners are the Salyid talugdars of Pirpur, of whom Mir Abu Jafar owns 26 villages and parts of 26 others, while Mir Rahat Husain owns 27 villages and 6 pattis. Next to them come the owners of the Sumanpur e-tute, who jointly own 92 villages and 26 pattis. A considerable proportion is also held by the Sultanpur Rajkumars, of whom the Raja of Dera possesses 19 villages and 11 pattis, the talugdars of Meopur Dhaurua hold 22 villages and 22 pattis, those of Mecour Dahla four villages and 11 pattis, and the taluquar of Nanemau six villages and parts of six others. The other talanders include the Saivid owner of Rataria, a branch of Pirpur, who holds six villages and one patti: Thakurain Chandra Bhal Kunwar of Makrah, one of the Palmar estates of Birhar, who owns six villages and two pattis; and Thakmain Sci Ram Kunwar, the owner of Klauradih, who possesses a single village. The history of all these families and an account of their estates has been already given in Chapter III. The chief rammaduri family is that of the Khateris of Shahradpur, while Brahmans Kayasths and Pathans also have small habbres

The history of the pargana is cheely connected with that of the talugdari houses and also that with the cover of Akharpur, Prior to the days of Akbar the tract was kie win as Singlaudi and originally consisted of the soven tappes of Sikandarper, Nahvi-Sarara, Sisani, Karmaul, Kameu and Haveli; but the Akharpur of sunexation was very different from the Akharper of the completed settlement. The division into tappas we shandoned in the days of Sandat Ah Khan. The trace was tormula held by the Bhars, but these people were ousted by the Mussimus, if a hom twelve families are said to live settled in this largeria. There Isuds were afterwards absorbed by the Parpar and Samanpur talea-Jar. Several ledies of Hindu-al-relaim to have a delim the expulsum of the Bhara; they were chiefly Rajputa belinging to the Bais. Chaulen, Gautamand other clans but their descendants a wordy held subordinate rights. Besides Alchapur there we but few places of any historical or archeological interest in the purgar a. An arount of the tornh of Saiyid Taj will be found to the article on Lorpur. Another well-known I mit is that of Shah Najm-ud-din Ispahani, otherwise known as Shah Ramzan, who accompanied Makhdum Ashraf of Resulpur into Oudh and was buried at the

village still known as Dargah Shah Ramzan. An annual fair is held in his honour during the month of Ramzan and is attended by some 3,000 persons.

The pre-ent pargana did not assume its present form till 1869. Up to that date the southern portion was included in Aldeman, while on the north it extended to the Ghagra, the boundary being formed by the Thinwa stream as far as its confluence with the former river. The eastern boundary ran from Phulpm to the Taunri above Kichhauchha and thence along that river nearly to the Azangarh border; thence to Jalalpur, and for some distance along the Tous, thus including all the north of the present Surharpur. On the west the Bism and Marha formed the boundary as far as Ahranli, whomee it ran north-east to the Thirwa.

#### AKBARPUR Tahad.

This tabul forms the conth-eastern sub-division of the distriet, extending from the Pachhimreth pargant of Bikspur on the west to the Azamgarh boundary on the cast. To the north lies pargana Amsin of tahsil Fyzabad, and Birhar and Tanda or the Tanda tahal, while to the south are the Baraunsa and Aldeman pargonas of Sultanpur and Mahul of Azamgarh, from all of which the tahvil is coparated by the Majhoi river. Akbarpur is made up of three parganas, Majhaura on the west, Akbar pur in the centre and Surlairpur on the cast; the last was formerly included in Tanda, but has been united with Akburpur since 1904. All of these pargames have been separately described. The tabsil bas a total area of 346,250 acres or 541 square miles, and contains 915 villages; it forms a compact area with a length varying from 37 to 44 miles from east to west, and a breadth of 12 to 17 miles from north to south. It is desired '5 several rivers. The Majhoi flows along the southern border in a well-defined hed and falls into the Tons beyond the tains? boundary in the Aramgarh district. The Marka enters the tabell at the north-west corner of Majhaura, and the Bisui in the centre of its western side. After traversing Majhaura the two unite on the Akharpur boundary and the combined stream, now known as the Tone, flows through Akharpur and Surhurpur. It , payigable for boats of fair size as far as Jalahpur in the dry season and Akbarpur in the lain. The little river Thirwa forms the northern boundary of the tabsil for a short distance, and forther east the Taunri flows along the borders of Surburpur and Birhar. The tract between the Thirwa and Maria is full of large thits with unsufficient outlets which overflow through a and deal of broken jungle land lying to the south. The south of Majhaura is also full of big thele. The central postion consists of good land with wattered patches of jungle along the two streams. Similar land extends some distance eastwards in Akbarpur, and with the exception of a sandy patch sowards the eastern border, all the rest of this pargan an ath of the Tons is of the same type. But the bulk of Akbarpur, south of the Tong, is very different; it is one large year plan with much dhak jungle. in the midst of which the villages and cultivated land appear as more island. This tract contains many large jude, but most of them are of no great depth, and in a year of poor tainfall they we sown with crops. Surherpur is a to h pargana with a limited Lou of swamp and poor land in its eastern edge

There are no forests in the tabel. A large patch of lairly thick them jungle extends round the depression called the Long shout six miles north west of Akbarpur itself; some dlack jungle has along the Marba and Bisai is fore their perestions a small area of similar land is to be found in the south-west of Surhurpur between Jahalpur and the pargama capitar, and more along the source of the hair-dozen, maller notice that rise in the user land and drain into the Majhor and Ten. This constitutes the whole woodland area in the tehal had a still unreclaimed. The Ions street is generally clem of jungle, but it has in one or two places on its banks stretches of open lowlying land which are fleeded during the rains.

The tabil is administered as a sub-try-line in the charge of a full powered magistrate on the district stiff. The tabildar, who reades at Akharpar, is assisted by a nanh-tabildar and the usual establishment. There are sex supervisor quanages and 335 patwars. For the purpose of pelice administration there are stations at Ahrauli, Jalalpur and Akharpur, but the circles by no means coincied with the boundaries of the tabil. All Majhaura

south of the Breni belong to the Haidarganj thana in Bikapur. Part of Akbarpur belongs to the Tanda circle, and a portion of Surharpur is included in that of Baskhari. This arrangement is most inconvenient and gives trouble to both the police and the courts. In order to reach some of the villages in the Jalalpur circle the sub-inspector has to go by train through the districts of Fyzabad Sultanpur, and Jampur, and then by road through Jaunpur and Azamgarh. The three towns of Akbarpur, Jalalpur and Nagpur have their own watch and ward, while over the rest of the tabil there are village watchmen paid by Government from the rural police rate. On the whole, there is very little crime in the tanvil and the police work is light; but the villages on the road from Tunda to Akharpur powers an unenviable renutation for their, while the read from Akbarpur to Malipur, where it passes through dhak jungle, is sometimes frequented by footpade who can hardly be dignified by the name of highwayrobbers. The south-eastern corner of the Akharpur pargapa, being situated on the borders of the three other districts. Sultanpur, Azamgaih and Jaunpur, forma a harbourage for a few men of bad charaster.

The total revenue of the tabil amounts to Rs. 4,64,794. Nearly three-tourths of the whole area is held by taluquers, who are for the most part in fairly prosperous circumstances, and there is no great difficulty in collections. There are a number of pattidari villages in Majhauca and some very minute mahals in Akbarpus and Surhurpus, which give the most trouble to the revenue officials. Nearly three-tenths of Majhauca pargana is held in subsettlement and the pukhtadars are generally defaulters. Surhurpus is also largely subsettled. The principal taluquers are those of Pirpus, Samaupus, Meopus-Dhauca, Dera, Bhits, Mundehra and Tighta.

The tabil is fairly well provided with means of communication. It has the benefit of the loop line of the Oudh and Robil-khand Railway, which traverses the tabell diagonally from Goshaingani, just outside the north-west corner, to Malipur in the south-east, with stations at Katahri, Albarpur and Malipur. Parallel to this runs the main road from Fyzabad to Jaupur, crossing to the north side of the milipur close to the Malipur

station. This is a second-class road, but is metalled for a short distance on either side of Akbarpur. The only metalled roads in the tabail are those leading from Akbarpur to Tanda, and from Mahpur station to Jalalpur. Of the unmetalled roads the most important are those from Tanda to Jaunpur, joining the kyzabad-Jaunpur road at Surhupur and passing through the east centre of the tabad; the road from Akbarpur to Maharua and Sultanpur, from Akbarpur to Dostpur and Kadipur in the Bultanpur district; and those leading from Jalalpur to Baskhari, Chahora and Tighra. There are many other minor reads in the tabad, for which reference must be made to the list given in the appendix and to the map. Most of these roads are in fair conditions, but those from Akbarpur to Dostpur and Malipur are very difficult to keep in order.

The most important bridges in the tabiliare these at Akbarpur and Samanpur on the Tons, and at Postpur, Bairagal and Surburpur over the Majhoi. There is also a good girder bridge at Ukra on the road from Akbarpur to fitifutganj over the Thirwa; this has a high embankment but is occasionally submerged during the rains. There are temporary bridges during the cold weather only on the roads crossing the Marha and Bisni and over the Tons at Jalalpur; at the latter place a remanent bridge is much needed. A bridge is shortly to be built over the Marha near Coshainginj on the road to Blati; it place is all present taken by a public ferry, as is also the case at Jalalpur, at Basohri on the road from Goshainganj to Mahanua, and at Majhaura on the road from Bhadarsa to Tiwarip ir. Besides time, there are numerous private ferries over the Tons and other moves. There is a road inspection bungalog at Akbarpur

The population of the tabul was in the enumerated at the art. Onde consus of 1369. It then numbered 272,011 send, but the figures are not now of any use, as alterations were subsequely made in the pargana areas. In 1851 the population of the present tabull had risen to 301,731 per us, and at the following course a still more rapid increase was recorded the total being 347,796. The last enumeration was that of 1901, when a singuit decrease was observed, the total number of inhabitants atmenting to 344,859. Classified according to religious, there

were 809,174 Hindus, 35,549 Musalmans, and 136 Jains, Christians and Aryas. The population is almost wholly agricultural in character, the only manufacture deserving mention being that of cotton cloth, which is still carried on to a large extent by the Julahas of Jalalpur, Nagpur, Akbarpur, and other places. The figures given in the appendix are those for the tahsil as constituted at the time of the census, prior to the addition of the Surhurpur paygana.\*

## AMANIGANJ, Pargana KRANDANSA, Tahsil BIKAPUR.

Amaniganj is the name given to a bazar lying within the limits of the large village of Muhammadpur. It is situated on the western borders of the district, in latitude 26° 40' north and longitude 81° 46' east, at a distance of 27 miles from Fyzabed and 25 miles from the tab-il headquarters. It lies on the road from Rudauli to Haliapur in the Sultanpur district. Branch roads run to Shwal on the north-ast and on to Milkipur and Khajurahat on the south-east. It contained at the last consum a population of 2,497 inhabitants, of whom 410 wore Musainans; many of the Hindus are of the Bania caste. Markets are hold here twice a week, and a considerable trade is carried on in grain, cotton cloth and other articles. There is a large upper primary school, but nothing else of any interest. Small faire occur here on the occasion of the Ramlila and the Ram-ka-Bish in the months of Kuar and Aghan; but these assemblages are of purely heal interest. The place is said to derive its name of Muhammadpur from one Sharkh Muhammad, who drove out the Bhars, but nothing else is recorded of its history till the time of The village lands cover Asaf-ud-daula, who founded the bazar 1.334 acres and are assessed at Rs. 1.630. They are held partly by the Bhale Sultan Khanzadas of Deogaon, and partly by a very namerous body of Breens, the descendants of one Dec Rai of Majhauli. who is said to have driven the Bhars from this neighbourhood.

AMONA, Pargana Haveli Oudh, Tahsil Fyzabad.

This village has in the extreme western corner of the pargans, in latitude 26° 42' north and longitude 82° 4' cast, on

<sup>·</sup> Appendiz, Table I

the south side of the road from Fyzabad to Rai Bareh and at a distance of 84 miles from the district headquarters. A short distance from the main site and on the road is a police-station with a cattle-pound opposite. There was formerly an aided school on the village, but it came to an untimely end for want of support. Amona is a small place and at the last census contained 646 ababitants, of whom 79 were Musalmans. Many of the Hindustre Pasis and the village has a bad reputation for their criminal propensities. The total area is 551 acres and the revenue Rs. 850; the proprietor is the Maharaja of Ajodhya

### AMSIN, Pargana Ambin. Tahsu Fyzabad.

This village, which gives its name to the castern pargana of the tabsil, lies in latitude 26° 31' north and longitude 82° 26' set, on the eastern borders of the parguna, about three miles from Ooshaingan railway station. Through the village run the road from Akbarpur to Cambanian, where it puns that leading from Goshainganj to Sarwa on the Ghagia Acri in hos an area of 1 208 acres, assessed at Rs. 1,750, and is the property of Mir Rahat Husain of Pirpur. The village is of no importance; the population in 1901 numbered 616 souls, of show 151 were Hindus and 465 Musulmans. There is a small becar here, in which trackets are held twice a week, and an upper primary school. Amein has been the capital of the pargana since amout 1763, when Ram Roshan Ali Khan of Hasampur require to large portion of the old pargana of Sarva and made his local heat-quirters at A sain, where he built a fart. The latter, bring the treage t and best fortified place in the neighbourhood, vas atterwards we'l by the revenue officials of the native government. Answe st one time gave its name to a small estate hold by a to meh of the great Barwar colony in this purguing, but it paised into the is ads of the Purpur Saivids between 1823 and 1832

## AMSIN Pargana, Tabul FYZABAD.

This pargana forms the costern portion of the tabul, lying slong the right bank of the Ghagra between Haveli Oudhou the west and pargana Tanda on the cast. To the south the boundary is formed by the river Marha, which separates it from Pachhimrath

and Majhaura. These two rivers drain the whole of the pargame with the exception of the eastern half, where there is a chain of small jhils which form the course of the Thirws, a tributary of the Ghagra. The chief jhale are those at Bhadauli, Durgapur, Khanpur, Kadipur and Gauhanian; but none of these are very large. Like all the pargana, along the river, the tract is divided into two portions, one consisting of the lowlying riparian lands which are assessed on a short-term settlement, and the other of the uplands which extend inland as far as the Marha. The alluvial villages obsoly resemble those in other parts of the district; there are sixteen mahals in all, but several of these contain no quitivation and only a few are of any value. The upland portion is perhaps the poorest part of the district. Along the high bank of the Ghagra in the north there is much inferior bhur soil. The centre of the parguna contains a stretch of heavy clay soil with scattered user plans and patches of dhak jungle. former days the latter covered a much larger area, but it has now almost disappeared; the only considerable expanse of waste land being in the neighbourhood of Hards. The best portion of the parganais a stretch of light loam in the south-east, continuing through Majhaura into Akbarpur.

The total area of the pargana is 67 910 acres or 106 square miles. At the first regular settlement 63 per cent, was under cultivation, and at the lat assessment there was an increase at 2.540 acres or 631 per cent, this was partly due to alluvial accretions of very inferior quality. There has been some expansion of cultivation since the settlement, the total rose to 44,519 were in 1903 and it the following year it stood at 44,567 acres or 65% per cent. of the whole, while the double-cropped area in the same year was 18,603 acres or over 45 per cent. of the cultivation Of the remaining aros, 12,892 acres, including 3,032 acres under groves, we e classe I as culturable, nearly half of this consisting of waste land that had never been reclaimed; the barren area we 10,451 neros, more than half of which was under water, while the bulk of the remainder was occupied by sites and roads, only 1.50-1 scres being clas-ed as absolutely unculturable. In ordinary years the pargena possesses sufficient means of irrigation, about 45 per cent, of the cultivated land being watered. Jhile form the chief source of supply, and consequently the tract cannot be considered secure. On the other hand, there has been a very large increase in the number of wells during recent years, but they do not as a rule contain a good supply of water and need improvement both in quality and number. The kharif harvest covers the larger area, rice being the chief staple; next in importance come gram and poss, while wheat occupies only about one-half the area covered by rice. Urd and mung are also largely grown; there is a considerable amount of land under sugarcane, and poppy cultivation has increased in popularity of late years, over 1,000 acres being annually sown with this crop.

Reute are not so high as in some of the adjoining tracts. At the last settlement the average rate for the whole pargana was Rs. 476 per sere. Nearly 40 per cent. if t'e tenant area is in the hands of cultivators of high caste, who paid on an average He 3.61, while the low-caste rate was R. 5.23. The difference observed was 30.84 per cont. which is considerally more than average caste privilege of the distinct. Only 53.28 per cent. of the land was held by ordinary cash-paying tomants proprietors held no less than 23-37 per cent,, and occupancy tenants \$7 per cent., while 10-52 per cent. was cultivated by proprietors do sir or khudkusht. Six per cent, was a thee rent-free or held at favoured rates; and 1 53 per cust, mostly poor and pressions land, was grain-round. The mest numerous cultivating castes are Brahman-, Rapputs and Mu-almus while after them come Kurmis, Ahirs, Lumas, Muraos and Chamars. The Rurnis and Muraos are the best cultivators and pay the highest rents. The rovenne demand at the summary settlement ancounted to Ra 50,448. This was raised to R . 78,048 in the regular assessment, but the latter was reduced to R. 13,003 at the sun-\*ment revision. At the last regular settlement the final demand was fixed at Rs. 35,280, including Rs. 1521 non-marky assessed er rovenue-free lands. This gave an enhancement of 1611 per "ent, on the expiring revenue and an inculence of R. 204 per acre of cultivation. In addition to this, the alluvial mahala pay Rs. 1,830. They were demarcated and assessed at the time of the fastlement, and two of them, Bhairipur and Sarwa, were settled conditionally for the full term at Rs. 100 and Rs. 290 respectively. The others came up for revision in 1903.\*

The population of the pargana in 1869 was 63,085 souls, but this feil to 59,378 at the following census of 1881, though the decline scene to have been mainly due to changes in the area. Ten years later, however, it again rose to 67,229, while at the last census a decrease was again observed, the pargana containing 66,093 inhabitants, which gave a density of nearly 660 persons to the square mile. Amsin possesses 194 villages, but few of these are of any size or importance. The small town of Geshainganj has a large market, while the only other places deserving of mention are Maharajganj, where there is a police-station; Tandauli which possesses a radway station; Amsin, the pargana capital, and the market of Dilasiganj or Begamganj. In the village of Dalpatpur there is a pillar of the Great Trigonometrical Survey.

The pargana is well provided with means of communication. is introversed from north-west to couth-east by the loop line of the Oudh and Robilkhand Railway, with stations at Tandaoli and Goshaingaul. The roads are all unmetalled. The most important is that leading from Fyzabad to Akharpur and Jaunpur, which tollow- the line of railway, cro-sing to the south side at the Tandauli station. It is in very good order and is now being metalled where it passes through the town of Goshaingeni. At Maharajganj a branch road takes off to Tanda, following the course of the Ghagra. This dates from Nawabi times and bus along its sides an almost unbroken avenue of mango trees, said to have been planted by one Sitla Bibi of Tanda, in memory of her husband, a banker of Benare-, in 1816. From Maharajgan or Maya another read leads south to Bhiti in Majhaura. From Dilasiganj on the Tanda road branches run to Tandauli and Goshanganj; through the latter runs the road from Bhiti to Sarwaghat on the Ghagra, with a branch taking off at Gauhanian and running through America Akbarpur. In the south-wester corner is the road from Haidarganj to Fyzabad, throwing off a branch to Bilharghas station.

In early days the pargana was held by the Bhars who have now disappeared, though rains of their buildings are to be found in Alapur, Marna, and several other villages. The old headquarters were at Pali, now in Pechhimrath, and the pargana was tirst known by this name; subsequently it was called Sarwa Palt, probably owing to the inclusion in it of some villages on the banks of the Ghagra near Sarwa. About 1763, when Raja Roshan Ali Khan of Hasanpur acquired a large portion of the pargans he established his local headquarters at Amsin, where he built a fort, which afterwards became the residence of the evenue officials and in course of time gave its name to the pargana. The chief landed proprietors in former days were Rajouts of the Barwar, Raikwai and Surajbansi clans. The Barwars claim to be Bais and to be descended from one Chintar Sen of Daundia Khera in Unao. This man's on was Bariar Singh, from whom the family derive- its name, he soutled in Chitawan Karia, six miles south of Dilasiganj, and after seizing the Bhars' stronghold of Tikria\* established himself in the rargana, where his descendants in the course of time acquired 159 villages. They were notorious for the peactive of infantieide, but two daughters of the chief family were in recent times suffered to live, and one was married to the last Raja of Tkauna in Bahraich, and the other to the Raikwar Raja of Karluagar in Bura Banki. From the Loguining of the mantenata entury their po-sessions rapidly diminished. In 1813 Raja Madho Sugh of Dera claimed possession in the ground of purchase of the talaga of Ankaripa,, and a severe fight engand at Rajapar, the Barwars being led by Fatch Singh. The Raphumar Raja gained the day, and his family have "eld the taluga ever since. Between 1823 and 1832 the whole of the Burgars extres were sersed and incorporated in the talagas of Pirpur, Deca, Kurwar and Mahdauna. There are still sorrial members of the clan to be found in the pargana, especially in Tandaub, Saloni Low apur, Rhadauli and other villages, but then landed possessions are very small.

The Raikwars are said to have come from Rammagar in Bara Banki about 350 years ago under Gaipat Ramand Ghina Ram One of them married a Bais lady and received as dower the village of Bilwari. Gaipat Rai subsequently acquired Sarwa

Both now in Pachhimreth.

ţ

į

from the Musalman zamindar. In 1786 the Raikwars of Sarwa added ten villages to their estates, and from that time till 1822 they retained possession of 14 villages. In the following year the chakladar, Mir Ghulam Husain, gave all these villages to the Barwars, but the Raikwars still retain under-proprietary rights. The descendants of Ghina Rai acquired the Reori estate of 34 villages in 1812, but a few years later the whole of this passed into the possession of the talugdars of Samanpur. Raikwars are still to be found in Sarwa and Gauhanian, Reori, Uniar and Bithaura; but it cannot be said to which branch any of them belong as the two names now seem to be unknown among them.

The Surajbansis are connected with those of Haveli Oudh They formerly held 40 villages in this pargana, but they lost 21 of these between 1778 and 1547, while the remainder all passed from them to the Mahdauna Raja before aunexation. The only other old family is that of the Kayasth qanungos, who at one time held considerable estates in Amsin.

Prior to 1869 the purgana was slightly larger than at present, as it included within its limits a small block of land on the south-eastern border at present belonging to Aklarpur. The 194 villages of the pargana are now divided into 542 mahals, and of these no tower than 478 are held by taluquars; while of the rest 50 are owned in single and three in joint zamindan, two in pattidari, and two in bhaiyachara tenuro, while the remaining seven are revenue-free. A very large area is held in sub-ettlement, no less than Sol of the taluquari mahals being in the hands of mikhtadars. The large-t landowner is the Muharaja of A jodhya, who owns the Tandauli estate of 70 villages and parts of 23 others. The Thakurain of Khapradih-Sihipur holas 43 villages and three pattis, known as the Dalippur and Jagdispu properties; 13 villages and two pattis forming the Reori estate belong to the taluquar of Samanpur; nine villages and one patti, known as Ankaripur, to the Raja of Dera; and the Amein estate of seven villages and six pattie is held by Mir Rahat Husan, one of the Saiyid taluquars of Pirpur. Smaller properties are Sarwa, belonging to the Raja of Kurwar, who owns three village and three pattis; the Dewapur estate, owned by the taluqdar of

Bhiti, who has three villages and one patti; one village and two pattis known as Bhairipur belong to the taluqdar of Khajurahat; while one village, Chirkitaha, is held by the Rajkumars of Mecpur Dhaurus. Altogether taluqdars hold over 90 per cent. of the pargans. The other other proprietors are very small and deserve no special mention, they are chiefly Brahmaus, Rajputs, Kayasthe and Banias.

### BALRAMPUR, vide SULTANPUR.

## RARAGAON, "Ide MUSTAFABAD.

### BASKHARI, Pargana BIBHAR, Taksil TANDA.

A small town lying in latitude 26° 27' north and longitude 32° 47' east, at the junction of the road- leading from Akbarpur to Ramnagar and from Tande to Azamgath. Other roads run couth to Kiehhanchhe and Jalutpur and north to Bacht. The place contains a police-station, cuttle-pound, post-office, an upper primary school and a road bungalou. Markets are held here twice a week. The lands cover 711 acres and are assessed at Rt. 1,100; the proprietors are Musalmans and claim descent from to famous saint, Makhdum Ashiaf. The population at the last census amounted to 2,077 persons, if whom 60°9 were Musalmans. There has been a considerable do roase of lare years for in 1891 the total was 2,723. The Hindus are mostly Brahmans, Kurmis and Bamas. The inhabitants are mainly one igod in agriculture, and there are a few well-to-do money-kinders. Some of them are at Government service, but the majority are periodic partels are.

The place is said to have been founded by a more ber of the family of Makhana A-braf, named Shah Ah Mel hdem. The real legend relates that this man established homself is the reighbourhood, and that on one operation when thust he drew water from a well and having drunk the ref was nevel to tomark that khari," which is being interpreted a linear, it is brackish;" and from that date the name of the found has been Baskbari. The place was held by his descendant in every many for many concrations, but the grant was resumed by Saadat Ali Khan, and the Saiyids have now lost the greater part of their estates.

Baskhari is administered under Act XX of 1856, which was introduced in 1864. The operations of the Act extend to an area of 67 acres. The town in 1904 contained 505 houses, of which only 172 were assessed to taxation. The proceeds of the house tax were Rs. 364, representing an incidence of Rs. 2-1-10 per assessed house and Re. 0-2-9 per head of population. The total receipts were Rs. 474. The expenditure was Rs. 471. of which Rs. 220 went to the upkeep of the town police, Rs. 90 to conservancy, Rs. 100 to local improvements, and the rest to the cost of collection and other small charges.

#### BHADARSA, Pargana HAVELI OUDH, Tahail FYZABAD.

A small town on the southern borders of the pargana, lying in latitude 16° 38' north and longitude 32° 7' east, at a short distance west of the main road from Fyzahad to Sultanpur, and ten miles south of the district headquarters. Between the town and the road runs the railway from Allahabad to Fyzabad, on which is a station known by the name of Bharatkund connected with the main road by a metalled approach. The name Bharatkund is given to a fine tank on the main road which is said to have been the scene of Bharat's wellusion during Rama's absence from Ajodhya. It is visited by pilgrims on their way to the great festival, at the latter place, and a small fair is held here on each Somwari Amawas. Bhadarsa is a thriving place, though the houses are mostly built of mud. It possesses a large upper primary school, a branch post-office, and a bazar in which markets are held twice a week. There are eight mesonry mosques in the town, as well as a shrine of a Musalman saint named Miran Zaina, which is still visited by considerable crowds on the 26th of the Muhammadan month of Rabi-ul-Awal. According to the local belief the saint still exercises miraculous powers thieves are detected by sending suspected persons to bring away flowers from within the tomb; on their exit they are asked how many graves they saw, and the guilty invariably give a wrong answer. The population of Bhadarsa at the last census numbered 4,669 souls, of whom 2,738 were Hindus and 1,931 Musalment There has been a slight decline of late years, as in 1881 the total was 4,785, and ten years later had risen to 4,868. The lands of Bhadarsa cover 1,159 acres and are nominally assessed at Rs. 3,000. The present proprietor is a female, the representative of a family of Saiyida who belong to the Shia sect and hold Bhadarsa in revenue-free tenure. This family was founded by Miran Zaina, the saint already mentioned. His full name was Saiyid Zain-ul-Abdin, and he came from Naishapur in Persia some 300 years ago and acttled in Dib Katawan near Bhadarsa. He displaced the Bhars in the possession of naneteen villages, and in 1736 the property hold by his descendants was declared revenue-free by Nawab Saidat Khan, and the assignment has been continued in perpetuity by the British Government.

Bhalarsa is administered under Act XX of 1856, which was extended to the town in July 1885; but before that date an octroi tax used to be collected in Bhadarsa which was one of the small Oudh municipalities. The area coming under the operations of the Act comprises only 275 acros. This contained 1,136 houses in 1904, of which 401 were assessed, the income from the house tax being Rs. 986, which represented an incidence of Re. 0-8-4 per head of population and Rs. 2-7-1 per assessed house, the latter being a higher rate than in any other town of the district. The total receipts from all sources were Rs. 1,066. The expenditure was chiefly devoted to the up-keep of the town police force Rs. 550, conservancy Rs. 300, and other items such as the cost of collection and small local improvements.

# BIKAPUR, Pargama Pachhimbath Toksil Bikatur

The place which gives its name to the tabil is merely a small village, in latitude 26° 35' north longitude, 82° 8' east, on the main read from Fyzabad to Sultanpur and Allahabad, at a distance of 13 miles south of the district headquavters. A short distance to the west runs the railway, but the nearest station is Rharatkund, three miles to the north. Eastwards from the village runs a branch road through Toron to Rampur Bhagan on the road from Bhadarsa to Akharpur. A second header road leaves the first at Darabganj in the village of Toron and runs south-east to Janan. The tabil buildings are actually situated in the village of Tendua, which adjoins Bikapur on the north. Close to them are the police-station, sarai, cattle-pound, post and

telegraph offices, military encamping-ground and a road inspection bungalow. There is an upper primary school here and a small bazar. Bikapur at the last census had a population of 462 persons, including 74 Musalmans and a large proportion of Ahira. The village has an area of 326 acres assessed at Rs. 505, and the proprietary right is divided between a Saiyid zamındar and Babu Abul Qasim Khan, a Musalman Rajput of the old Meepur Baragaon family.

#### BIKAPUR Takeil.

This tabsil forms the south-western subdivision of the district, being made up of the two parganas of Khandansa and Pachhimrath, each of which will be separately described. The tabsil is a compact area lying between the Marka on the north, which separates it from parganas of tabsil Fyzabad, and the Sultanpur boundary on the south. To the east is pargana Majhaura of Akburpur, and to the west Rudauli and Mawai of Bara Banki and the Musatirkhana tabsil of Sultanpur. Bikapur has a total area of 299,193 acres or 467.5 square miles. It contains 631 villages, divided at the present time into 2,713 mahals.

The tabul is a fertile plain of fairly homogeneous character, with a general slope from north to south and from west to east. The Gunti touches it only at the south-western corner and the land in the neighbourhood is undulating, with small occasional ravines and a few notes that run through sparse jungle in open waste land. The rest of the western half contains a good deal of scattered chak and grass jungle and is full of jhile all the waters of which have a tendency to flow to the south-east. The drainage line runs roughly past Raipatti, Sarsan la, Parsawan, Dili Girdhar, Nimri, Achhora and Malethu, eventually uniting with waters couing from Hardoia and others from the Sultanpm district to form the Bisui. North of this is a smaller but similar line draining to a nala round the south and east of Shahgani, and so leading to the Marha; to the east again are two other lines, one from near Bikapur, and the other passing through Pura tharib Shah, both of which fall into the Bisui at Takminganj. In Pachhimrath, each of the Allahabad road, there is less grass jungle than in the rest of the tahsil and the dhak patches are principally to be found along the Bisui and Marha rivers. The jungles of the tahsil are

of no great size or extent, consisting for the most part of open waste land fringed and dotted with patches of dhak and containing a few trees of the better kinds. One extends from Bhakhauli on the west towards Bawan on the cast and Pithla on the south; others are to be found near Hardoia, between Malethu Buzurg and Sarai Khargi, to the east of Shahganj, and a few other places; but only the first of these covers a considerable area.

The tabil is administered as a sublivision in the charge of a full-powered magistrate on the district staff, while there is also a tabeildar a-sisted by a maib-tabeildar and the usual establishment, with headquarters at Bikapur. There are six supervisor ganungus and 230 patwaris. For the purposes of police adminis. tration there are stations at Bikapur, Hanlarganj and Milkipur; a small part of Khandansa and a considerable portion of the north of Pachhimrath belong to the Amona circle, while the north eastern part of the latter pargana is included in the jurisdiction of Maharajgan j. The police areas consequently do not a ducide with the revenue sub-divisions, and the pre-out arrangement is most meen venions, the more so as it could easily be avoided. There are no Act XX towns in the tabsil and few places of any size; the largest bazars are Amaniganj in Khand, usa, and Shahganj, Osisbganj and Haidarganj in Pachhimiath. For all these village watchmen suffice; they are now paid by Government from the On the rural poher rate. There is nothing a marketale on the crime of the tabell, and very few villages have really but names for lawleseness; the Wilkipus and Among sireles giv pechaps the most trouble.

The revenue of the tabsil is Rs. 3,62,312, if which Rs. 2.69,548 is assessed on Pachhimenth and Rs. 92,764 in Kneadansa. Of the former pargana as much as 76 per cent. is held by taluqdars, chiefly those of Ajodhya and Khapradih-Schipm. In Liberdansa has then one-quarter is taluqdari, and any mormous aumber of petty sharers in most of the villages makes the collection of the revenue a most tedious task. High cast terrings are very numerous and give much trouble to the counts; ejements, suits for arrears and attachments of subsettled a that occurring very frequently. The great bulk of the revenue case work is furnished by the mutations in the khewat, which average about 3,750 annually.

Statistics of agriculture, crops and irrigation will be found in the pargana articles. Lists given in the appendix show the schools, bazars, fairs, post-offices and forries in the tahsil. Means of communication are fair, and have been much improved since the construction of the railway from Allahabad to Fyzabad. There is, however, only one station in the tahsil, at Khajurahat. but that at Bharatkund lies close to the northern border. Parallel to this line runs the main road from Fyzabad to Sultaneur. crossing the Marha by a bridge near Bhadarsa, and the Bisni by a similar bridge of masonry; there is a military encamping-ground and an inspection hungalow at Bikapur. Of the unmetalled roads the most important is that from Pyzabad to Rai Bareli, which runs for a distance of sixteen miles through the western half of the tahail. There are encamping-grounds at Barun or Deoria, a distance of ten miles from Fyzabad, and at Milkipur, where there is also a small road bungalow. A branch from this road runs through Shahganj and Haringtonganj to Isauli in Sultanpur, and another runs past Khandansa and Amaniganj to Rudauli. From Amaniganja road runs north-east to Sohwal station. These roads are connected by two cross roads, one running from Gaddeput in Khandansa to Kuchera and Jalalpur near Bikapur; the other leads from Amaniganj to Milkipur, Haringtonganj and Khajurahet In the east of the tabsil several roads unite at Heidargani, leading to Bhiti, Bilharghat, Bikapur, Sultanpur and Kurebhar. The various minor roads are shown in the map. There are some small ferries over the Gumti managed by the Sultanpur district board

The population of the tabell at the first Oudh census of 1869 numbered 242,197 persons; this rose to 266,015 in 1881 and to 288,890 in 1891. At the last census the total was 296,776, of whom 146,363 were males and 150,413 females. Classified according to religious, there were 277,202 Hindus. 19,446 Musalmans. 124 Sikhs, two Jams and two Aryss. Among the Hindus, Brahmans predominate, numbering 50,069; after these come Ahirs with 43,708 and Chamars with 22,563. Rajputs, Pasis, Koris, Kewats, Muraos and Kurmis all had over 10,000 representatives, while other castes occurring in large numbers are Banias, Kahars, Gadariyas, Barhais and Barais. The Rajputs belong to many different class; about one-half of them are Bais, while the rest are mainly

Chauhans, Bisens, Bachgotis and Bhele Sultans. Of the Muhammadan population Behnas and Julahas are the most numerous, while next come converted Rajputs, Hajjams, Darzis, Pathans and Shaikhs.

The tahsil is almost wholly agricultural in character, and the various trades and industries are loss strongly represented here than in any other part of the district. Apart from agriculture, the only business which is at all extensively followed is that of weaving, which is carried on by the Julahas of Amaniganj and a few other places. According to the census figures over 77 per cent. of the population was directly dependent on the land for means of subsistence, and the bulk of the remainder was closely connected with agriculture or its produce, or resorted to tillage as a subsidiary form of support.

### BLHARGHAT, Pargina Haveli Oudh, Tahad FYZABAD.

This is the name given to a station on the loop-line of the Oudh and Robilkhand Railway, lying in latitude 26° 11' north and longitude 82° 18' east, on the confines of the parganas of Haveli Oudh and Amein. The station is reached from the main January road by a road which branches off at Jalaladdinnagar and rous on to join the rowl from Fyzabad to Hardarganj at Rasulabad. The station lies within the limits of the virlage of Ners, and derives it name from a ghat on the Ghagra about a mile and a half to the north-north-cast in Jalahaddinnagar. should be properly called Billuharighat, and marks the eastern hunts of the sacred waters of the Sarju, just as the western boundary is marked by the Gupta Hari or Guptargl at in the Fyzalad esconnent. A small bathing fair takes place here in Baisakh. have for the presence of the station, from which a considerable diport trade is carried on, the village is of no importance massets of a number of hamlets with a population of about 1,000 versons, many of whom are Surajbansi Rajputs connected with the proprietors of Jaleluddinnagar.

BIRHAR, Pargana BIRHAR, Tahsil TANDA.

This is a small and unimportant village on the banks of the Chagra, in latitude 26° 39' north and longitude 82° 58' east, on

a small branch read leading from Haswar and Chahora to Mansurganj, some two miles to the east, whence a road runs south to Jahangirganj. Save for the fact that it gives its name to a pargana, the place is quite in significant. At the last census it contained but 970 persons, of whom 62 were Musalmans, while most of the Hindus were Chamars. The total area of the village is 310 acres and the revenue Rs. 500. It is divided into four mahals hold by the Palwar taluqdars; one is in the possession of Babu Narendra Bahadur Singh of Haswar, one is held by the owner of Makrahi, and the other two by Bhola Singh and Sarju Narain Singh of the Lakhaupur branch. The village contains a small aided school and a market, in which bazars are held twist a week.

### BIRHAR Pargana, Tahsil TANDA.

This is the castorumost pargana of the district, extending along the banks of the Ghagra from Tanda on the west to Azaugarh territory on the east. To the south lies the Surhurpur pargana and the Azamgath district. The latter almost dividethe pargana into two halves, and a small block belonging to Azamgarh lie- actually within the confine of Birhar. The total area in 1904 was 146,834 acros or 229 square miles, but by reset of the action of the Ghagra this amount is hable to change from year to year, accretion- of over 4,000 acres having occurred since 1896. Beside, the Ghagra, which washes the northern boundary for a distance of 35 miles, there are three minor streams. The Tanuri skirts the southern portion of the western half of the pargana, separating it from Surhurpur, and runs into the Assaugarh district. The Pikia rises in a jhil near Garhain the western portion, and after flowing through part of Azaugarh enter-the castern half of Bithar, where it flows eastwards for eight or rine miles and then turns abruptly north to full into a side channel of the Ghagra The Sarin or Gadaiya winds round the south-east-ra corner of the pargana, forming the district boundary for some miles, and then joins the same stream as the Pikia.

These rivers carry off most of the drainage. In the northwest, however, there is a chain of swamps which develops into the Makrahi nala, whereby their waters reach the Ghagra. The nothern portion of the eastern half is drained by the Amwan rada. The south-western tract lies low and is full of jhils; there are a good many also in the north-west, but none in the eastern half, except in one or two villages on the Azamgarh boundary. In its general aspects the pargana is perhaps the best and most fertile in the district, being well cultivated and admirably provided with groves which add greatly to the picturesqueness of the seenery. The south is the poorest part as there is a good deal of pair and dhak jungle. In the north the soil is for the most part olsy and loam, of great fertility in the north-west, but having some sand in the extreme on-t. Below the high bank of the Ghagra there is a small stretch of alluvial manjha, in which the villages are held on a short-term exthenent.

At the first regular settlement 55 per cent, of the land was under cultivation, but since that time there has been a considerable increase. In 1904 the area under the plough was 95,627 mores or over 65 per cent, of the whole, while 31,131 acres bore a double crop. The culturable area covered 25,678 scres, but this included 5.397 series under groves, the bulk of the remainder consisting of old fallow and waste, much of which is of a very near description. Of the barren area, which amounted in all to \$5.529 sores, more than half was under water and ru ch of the rest was occupied by sites and roads, the actually circulturable er-a being 6,107 acres—a semenhal high proport on for this district. Means of irrigation in ordinary years are abundant, bere than half the cultivated area receiving water. In addition to the numerous tanks, which are extensively employed for this purpose, there are large numbers of wells in the purguna, though gostbly mero are needed to render the tract sentre in a season of drought. The areas cultivated in the two harvest are approxmately equal; in the kharif, rice largely predominates, the "'re chief staples being achar, kodon and sugarcane, which is In wa to a very large extent in the rabi wheat, gram peas and he bey occupy nearly the whole cultivated area, and there is but 1 small proportion under poppy

Fully one-third of the pargana is outlivated by proprietors, under-proprietors and occupancy tenants, and at the last settlement only 68-54 per cent. was in the hands of ordinary tenants at

cash rates. As much as 28.89 per cent, was held as sir or khudkasht, a remarkably high proportion; 7.9 per cent. by under-proprictors and 1.26 per cent. by occupancy tenants. ' A small amount of inferior land, 1-03 per cent, in all, was grain rented, and 2:38 per cent. rent-free or held at favoured rates. The average recorded rental worked out at Rs. 5:18 per acre, varying from Rs. 444 paid by high caste to Rs. 549 in the case of low caste tenants, and giving an average advantage to the former of 1913 per cent. The chief cultivating classes are Kurmis, Ahirs, Brah. mans, Murao-, Rajputs, Pasis, and Musalmans. The revenue as the summary settlement was Rs. 93,552. At the regular assessment a very large enhancement was taken by Mr. Carnegy, the doman't amounting to Rs. 1,49,466, which was subsequently reduced a Rs. 1,44,453. The present final demand stands at Rs. 1,92 774 including a nominal sum of R- 175 assessed on revenue-free holdings. This is exclusive of Rs. 3,432 at present paid on the 14 allovial mahals, of which the most important are Kami'ara and Arazi Diwars. These mahals were denarcated and assessed in 1895, the last revision occurring in 1903.

The population of the pargana at the first Oudh census 1 1869 mmbered 118,589 souls. This tose to 138.741 in 1881, and ten years later a further considerable increase was recorded. Me total being 164,435. At the last census of 1901 ii marked decline was observed, the pargana containing 153,475 inhabitants, which still gave the high average density of 687 to the square mile Musalmans numbered 17,661. The total is that of the pargana is it stood at the time of the census; it then included the outlying villages of Ord and Ramopur, which have since been transferred to Surhurpur. The pargana contains the three small towns of Kichhauchha, Baskhari and Balrampur, and the villages of Hasson and Chahora are of some importance. The markets, fairs and schools are shown in the lists given in the appendix

Birbar is fairly supplied with means of communication although it lies off the rulway and contains as you no motelled roads. The chief roads are those running from Tanda to Baskhar and Azamgarh; from Tanda to Haswar, Ramnagar and Balrain-pur; and from Akbarpur to Baskhari, Ramnagar and the Gorakhpur district, crossing the Ghagra by the Kamharia ferry

These are connected by several small cross roads, such as those from Jalalpur to Kichhauchha, Baskhari and Barhi; from Jalalpur to Ramnagar and Chahora; from Haswar to Chahora and Mansurganj, and from Mansurganj to Jahangirganj. Some of these roads are inferior, and bridges are needed in many places. The various ferries over the Ghagra are shown in the list given in the appendix.

In early days the pargana was held by the Bhars, whose remains are to be found in the . hape of ruined forts at Chandipur, Sundih and several other places. Six miles cast of Birhar village is Chandipur, where a Bhaz chieftain is said to have built his fort in a jungle on the banks of the Ghagra and to have creeted a temple to Chandika Debi. The place for a long time gave its name, together with Birbar, to the pargana, but is now of little importance. The Bhars were followed by a number of : amigrants of different castes. Among these was the famous saint, Makhdum Ashraf, whose story is told in the article on hamipur. His descendants obtained possession of a considerable amount of land; but their holdings are now very small and are practically confined to portions of the three villages of Kichhauchia, Baskhuri and Rasulpur. Another old family of Saiyids is tom of Nasirahad, said to have been founded by one Nasir-ud-din the days of Timur. His descendants held mue villages revenueir win the days of Akbar, but seven of these were absorbed title the great talings at the end of the eighteenth contury, while of the remaining two the Saivids will hold Bhaunra, and in Nestrabad they posees under-proprietary rights. Misalman colony was that of the Pathan Chaudhris of Chahora. The was founded by a Chanhan Rajput from Sambhal, who is and to have changed his religion in the days of Timm. His isseendants acquired a large property in the pargana, and it is ed that one, named Alam Khan, held the Chahora tappa of 51 ullages; another, Mangah Khan, had the Hisamuddinpur tappa of 20 villages; and the third, Bhoj Khan, held the Ainwan estate of 33 villages. Their property has since disappeared, the last village passing from them as early as 1800 A.D., when the Palwars seized all that was then left to the Chaudhris. Their issendants are still to be found in Chahora, Hisamuddinpur,

Ainwan and other villages. Another family of so-called Pathans was founded by a Tomar Rajput named Jait Rai, who changed his religion about the same date and established himself in Baragaon. He acquired an estate of 29 villages, but this was absorbed into the Palwar taluques and his representatives now hold but under-proprietary rights in the villages of Udechandpur. To the same period belong the Malika of Kaurahi, a family founded by two emigrants from Luristan in Persia, named Nurnd-din and Mahmud. They acquired the Kaurahi taluqu of 32 villages and the Bhidund estate of seven villages, holding the latter free of revenue in the days of Akhar. Kaurahi was absorbed into the Palwar estates at the beginning of the nineteenth century, and Bhidund followed in 1815. The Malika are still a be found in Bhidund, where they hold subordinate rights and a small rent-free plot of 73 bighas.

Besides there, three families of Shaikhs came to the pargana at an early period. One of these was founded by a man known as Shaikh Ajmeri, who came from Ajmer and gained possession of the Neori estate of 27 villages. His descendants lost their lands about 1740, when they were seized by the Palwars, and they now hold only under-proprietary rights in Neori Rustampur and Bhojpur. The second colony was that of Haswar, founded by Shaikh Mahmud, who settled in the village of Bhigon in pargana Sarhurpur. He assumed charge of the Haswar tapps of 53 villages, but this passed into possession of one Sadullah Khan a Robilla, who obtained the land in jagir about 1660 and catallished himself in Muinuddinpur and Naurshni. The jagir was subsequently resumed and the Robilla was driven out by the inhabitants with the aid of the Polwars, who afterwards sensed the estate themselves. The Sharkba now hold two small areas of sir land, but most of them have been reduced to the position. of tenants. The third Shaikh colony was founded by two men named Barai and Ladh, who came from the west and dispusses the Bhars from the talugas of Baniani and Jallapur, which consisted of 24 villages. Eleven of these were afterwards senged by the Kachhwahas of Sabikpur; they were subsequently taken by the Palwars, but the Kachhwahas still retain subordinate rights in six villages. The remaining thirteen villages were lost by

the Shaighs at the beginning of the eighteenth century and most of the old owners migrated to Gorakhpur. One family remained, but their only rights in the soil consist of ten bighas of grove land free of rent.

Mention may also be made of the Bais of Kalyanpur and other villages, who, like the other Bais of this district and probably with equal reason, claim to have come from Baiswara in Urao and to have established themselves in the a part, after everthrowing the Bhars. Their property, which amounted to 61 villages, was divided into four estates known as Kalyanpur, Hardaspur, Kharwanwan and Rammagar Manwar. Those properties were all absorbed into the Birhar taleques at different times, the last two being the first to go. The Bais still possess under-proprietary rights in sixteen villages.

At the present time the only great I adowning family is that of the Palwars, whose history is already given in Chapter Itl, while their exploits during the mutiny are narrated in the hetery of the district.

The pargana has remained almost unchanged since anuexaten, although prior to 1869 it included within its limits a few villages south of the Taunri and now in Surho, pur. At present ne mains 521 villages, divided into 1.323 mahs! () the latter. 1.259 are owned by talugdar, 45 in single and seven in joint zamindari tenure, while seven belong to pattidati communities, one is bhaiyachara, and one revenue free for a single life only. The Palwar talundars own no fower than 208 whole ciliages and portious of 670 others, the latter frequently representing different shares in the same village. At the present time Bana Narendra Baradur Singh of Haswar owns 42 villages and 206 pattis; Thakorain Chandra Bhal Kunwar of Mokrahi has 46 villages and 189 pattis, each of these representing one-courth of the "Agand estate. The third shere, known as Saltanpur Gasha and zeld by Baba Bhairon Bakhsh Singh, comprises 72 village, and '(8, pattis; and the fourth share, known originally as Lukhaapur, " now Ilvided into five parts. Musepur, held by Randhir Singh, consists of ten villages and 22 pattis, Lakhanpur Khas, owned by Bhola Singh and Sarju Narain Singh, comprises five villages and 59 pattie; Chandipur represented by Amer Singh, 12 villages

'n

and 33 pattis; while Bindeshwari Bakhsh Singh holds ten villages and 29 pattis, and Kalka Bakhsh Singh's share is eleven villages and 27 pattis, although this latter property has been sold to the Rajkumars of Meopur Dhaurua. The other taluqdari holdings in this pargana are quite in significant; Babu Abdur Rahman Khan, the Khanzada Bachgoti of Gangeo in Sultanpur, holds one village and one mahal, and Mir Rahat Husain of Pirpur holds three small mahals. The zamindars are chiefly Saiyids, Brahmans and Kayastha, while small properties are held by Bairagis, Baqquis and Kurmis. The subsettled area is very large, comprising no fewer than 930 or the taluqdari mahals and one other, the property of a zamindar

DARSHANNAGAR, Pargana Haveli Oudh, Tahsil Fyzabad This is the name of a bazar built by Raja Darshan Singh of Mahdanna within the confines of the village of Kurha Keshopur It lies in latitude 26° 45' north and longitude 82° 13' cast, at the junction of the roads leading from Fyzahad and Ajodhya to the east of the district, at a distance of four miles from the district headquarters. The bazar is in the form of a regulasquare and is enclosed by high masonry walls pierced with gates in the centre of each side. It is still in good condition and is form is probably unique. Markets are held here twice a week and a considerable export trade is carried on from the railway station, which lies close to the bazar. From the latter branch roads lead to Bhadarsa and Hardarganj. Outside the bazar is a large masonry tank known as the Surajkund, with a temple of the sun close by. There is also a fine temple of Debi near the read to Fyzabad. A very large fair takes place at the Smajkand in the month of Bhadon and is attended by some 50,000 persons. Darshannagar also contains a large upper primary school and a branch just-The lands of Kurha Keshopur cover 677 acres, including 100 acros occupied by the bazar; they are assessed at Rs. 1,219 and are owned by the Maharaja of Ajodhya. The bazar was for many years included within the municipal limits of Fysabad, but from April 1902 Darshannagar was constituted as a separate town admnistered under Act XX of 1856. In 1904 it contained 393 houses, of which 159 were assessed to taxation. The income from the house

tax was Rs. 289, giving an incidence of Re. 1-13-9 per assessed house and Re. 0-3-6 per head of population. The total receipts were Rs. 341, and the expenditure Rs. 317. The chief items were the upkerp of the town police Rs. 125, conservancy Rs. 108 and local improvements Rs. 50. The population of Kurha Keshopur at the last census was 1,442, while that of the chankidari area was 1,802.

# DEORAKOT, Pargana MANOALSI, Tohsil FYZABAD.

This large village lie- in the western half of pargana, in letitude 26° 45' north and longitude 81° 53' east, at a distance t some 19 miles west of Fyzabad. The village is long and narrow, covering 1,455 acres and extending from the south of the railway, close to which is the main site, to the old Nawabi road to Lucknow on which stands the bazar of Mubarakganj. The slace is chiefly noticeable for the number of its population, as is the case with several other of the large villages of Mangala contained in 1901 as many as 2,59/ inhabitants, of whom 2,448 wore Hindu: and 149 Musalmana There is a large upper primary school in Mubarakganj, but nothing else of any interest, except a temple and a brick-strewn mound representing the site it as amount vellage in Deorakot. This is said to have been one of the strongholds of the Bhars who, according to the local traditor, were driven out by the Ba's under Dulan Falc. One of the latter's descendants, named Sadi Sah, is said to have built a fort here, but nothing else is known of him or of the history of the value His descondants have managed to remin their proprietary ght and own all the lands of Decrakot, with the exception of two small patters held by Kavasths and one the property of Inversiment. The village is greatly subdivided, and in 1904 there were some 20 sharers. The revenue is Rs. 3,000.

## DHAURAHRA, Pargana Mangaisi, Pahil Fyzaran.

A large and scattered village in the north-west of he pargana adjoining the Bara Banki boundary, in latitude 26° 47' north and longitude 81° 50' east, on the high bank of the Ghagra, about a mile north of the road from Fyzabad to Lucknow and 20 miles from the district headquarters. It is chiefly deserving

of mention on account of its size. The population in 1901 amounted to 3,134 persons, of whom 3,080 were Hindus and 54 Musalmans. The village lands cover 2,170 acres and are assessed at Re. 1,600. The bazar is known as Muhammadpur and lies partly in Dhaurahra and partly in Maholi on the old Nawabi road to Daryabad and Lucknow in the south of the village. There is an upper primary school here, but nothing else of any interest. Tradition relates that the village was originally hold by Gautams, and that one Nag Mal, a Chauhan of Mainpuri. obtained the place in downy on his marriage with a Gantam lady of Mangalsi. His descendants held Maholi, Dhaurahra and several other villages. Dhaurahra fell to the share of Mahma Sah, one of the graudson- of Nag Mal, and these Chanhaus retained their possession to within recent times. They now number some 800 souls, but have only ex-proprietary rights, the present owner of the village being Pandit Pem Naraiu, a Kashmiri Brahman.

### FYZABAD, Pargana Haveli Oudh, Tahsil Fyzabad.

The city of Fyzabad lies in latitude 26° 47' north and longitude 82° 10' east, on the right bank of the Ghagra, at a distance of 78 miles east of Lucknow, 92 miles north of Allahabad and 70 miles south of the nearest point of the Himalayas, which are frequently visible, especially towards the end of the rains. The ancient city of Ajodhya lies some four miles off to the east.

Railway communication is afforded by the loop line of the Oudh and Rohilkhand Railway from Benares and Jaunpur to Lucknow, which passes through the south of the city, the station being to the west in the civil lines. A branch line takes off at Ranupali and leads to Ajodhy aghat, and another goes due south from Fyzabad to Sultanpur and Allahabad. Metalled roads run from Fyzabad to Lucknow and Allahabad, and others, some ci which are metalled for short distances, to Rai Bareli, Tando. Akbarpur and Haidarganj. In addition to these, there is a net work of good metalled roads within the municipal limits and in the military cantonments.

Fyzabad is after Lucknow the largest city in Oudh. There is no information extant to show the size of its population in

former days, but at the first Oudh census of 1869 it contained 37,804 inhabitants, and this rose at the following enumeration of 1881 to 43,927, including 5,099 resident in cantonments. In 1891 there was a further increase, but the figures for Fyzabad and Ajodhya are not shown separately, the combined total being 78,921. The last census was that of 1901, when the joint municipality contained 68,988 persons, while 6,097 others resided in cantonments. The population of Fyzabad proper, excluding Apodhya, was 47,404.

The city is of no great antiquity. In former days the seat of government was at Ajodhya, or Oadh as it was called by the Musalman historians, and the site of Fyzabad was a jungle covered with the scensed keered or screwpine. The first Nawab Wazir of Oudh, Saadat Khan, built the Qila Mubarak at Lachhmarghat in Ajodhya and this was his official residence; but in I rzabad he built a shooting-box or bringle (bungalow), a namo which the place still retains. This building still stands on he high bank of the river, adjoining the Moti Mahal on the north in the compound of the residence of the Sub-Deputy Optum Agent. He then began the Dilkusha palace, portions of which remain in the same compound, but the building was not comntered by the time of his death in 1739. His successor was Abul Mansur Khan, better known as Satdar Jang. He tounded the city of Fyzabad and made it he residence and nalitary headmarters; but most of his time was spont at Dohlt and alsowhere. and it was not till shortly before his death that he carne to reside prinamently in Ondb. But few buildings of this reign remain Sudar Jang's palace was the house used by his producesor, to which be made some additions. His deputy, Newal Rai, built a flue house in Ajodnya, which still stands on the rive front. Poveral Mugnal nobles laid out gardons, which has some van-" out, though the name is traceable in the Mughalpura muhalla. The sons of Diwan Atma Ram laid out a long because to the Aest 1 Sadat Khan's enclosure, near the Dealt Darwaya, Risaldar Ismail Khan built the market known as I-mailgan; and several other houses were built by trade-people and dependents of the court.

Safdar Jang was succeeded by Shuja-ud-daula, who only usited Fysabad occasionally till his defeat by the British at

Buxar in 1764. He then retired to Fyzabad and made it his capital; he built the now dismantled fort, known as Chhota Calcutta: beyond this were the outer defences known as the safil. or more properly fast, which enclosed a large area, embracing nineteen villages with a ditch extending for some two miles to the east, south and west of the fort. Within this space building. rapidly sprang up. The Nawab hunself completed or renewed the Dilkusha house (the present opium bungalow) and the Mon Mahal to the south of it. In 1765 be built the Chank and the great Tirpaulia or three-arched gateway in it. He subsequently land out the Anguri Bagh within the fort; the Moti Bagu to the south of, and adjoining, the Chank; the Asaf Bagh and Baland Bagh on the west of the city; and the Lal Bagh which once was surrounded by a high wall and contained many fine buildings, but is now empty and uneuclosed, serving tre purpose of a cart paras. Other buildings of the period included the Khurd Mahal, which has now long disappeared; the palace of Salar Jang, the Nawab's father-in-law, which has shared the same fate, though his name is pre-cryed in the Bazar Salar Jang. and the mosque of Mansu Ali Khan's Begun, generally know as the Nawab Begam. This was for years used as a pail, but was made over by the British Government to Saivid Mzal Ali Rizw Hakim Slafa-ad-dada, the physician of the ex-king, on condtion of its being kept in good repair as a place of public worship, the same man obtained the Moti Bagh in perpetaity. Hasai Ram Khan destroyed the old house of Sharif Beg, a Mughal and built on its lite the mosque in the Chank, the gatoways on either side of the Chank, and the Sarai which stands outside the northern gate. This mosque is now used by the Shias of the dig and their peshnamus or chief priest is in poses sion of the manin the upper part of the building, for the maintenance of the services of the mosque; the shops below the mosque are not "" property.

Two of the principal remaining works of the era of Shuand-daula in Fysibad were the erection of his manyoleum, the Gulabbari, and the planting of the magnificent tamarind a ones along the Lucknew road which leads westwards from the Chank between cantonments and the civil station. Shuja-ud-daula was

the first of his race to be buried in Oudh, the remains of his predecessors having been carried away to Dehli. The tomb was
built by himself during his life-time; it had served also as a
temporary resting-place for his father's remains. It has always
been maintained by the Government of the time, but not
always in good repair; and some of its -urroundings have been
considerably altered. It is now a striking building of fine proportions, standing in a well-kept garden surrounded by a wall,
along which passes the road to Ajodhya. It is approached
'nrough two large outer gateways, and a third leading to the
inner enclosure in which stands the great mansoleum, a structure
of plastered brick, in the basement of which is the touch of the
Nawab with his sword and cap of state. The whole has a very
grand appearance, and the place and its surroundings form a
hright spot in the eastern portion of the city.

Shuja-nd-daula's wife was the woll-known Bahu Begam, shoes full name was Ammat-uz-zuhra. Sho was married to he Nawab in 1743, and remained in Fyzabad for many years after his death in 1775. Her residence was the Mott Mahal, a palsee within a walled garden to the north-case of the Chank, the building is now in a dilapidated condition, but a few good sing remain. Close by is the Begani's mosque fromets a courtvaid containing a garden and surrounded by rooms which are now let out as houses. Boyond the mosque to the south is the Imambara build by Jawahir Ali Khan, one of he canache; it stands maide a courty and winch also contains a small mosque and mes or small houses. These three buildings form part of the tyzabad wasika, menuoned in Chapter IV. The confidential a viser of the Begam was Darab Ali Khan, whose large anden house, rendered he beneal in connection with the total of Warren lestings, stands in the north of cantonments, near the Cuptai i'ad. It is now used at the supply and transport flice were several other buildings bearing his name in the Minngary mails, but they were sold and the name has new disappeared. To the north-east of cantonments, between the fort and the opinm godown, stands the tomb of Bane Khanane, wife of Najm-uddaula, the brother of the Bahu Begam. This was built by the elebrated Almas Ali Khan, originally one of her slaves, and is

now occupied by the Church Missionary Society. The mosque and tomb of Yaqut Ali Khan stand in the Atal Khan muhalla. This was a cunuch, and held the office of nazir with Safdar Jang and Shuja-ud-daula; and the buildings were constructed by his agent, Yusuf Ali, who took possession of his master's catate. They are now in a very dilapidated condition, but formerly contained some fine specimens of stone fretwork, which was sold by one of Yusuf Ali's descendants.

The Begam herself was builed, after her death in 1816, in the grand man-olcum which stands in the Jawahir Bagh, to the south of the city and on the east side of the Allahabad road. It is considered the finest building of its kind in Oudh and is richly endowed, the income being a wasika, as mentioned above. The Begam left three lakhs for the election of the tomb by Darsh Ali Khan, who died in 1518 after laying the foundations and building the plinth The work was carried on by Panah Ali, her vakil, and then by Mirza Haidar, the son of her adopted daughter. They completed the brickwork, but then the money ran out and the beautiful edifice remained unfinished till annexa-The simplus of the wasika funds, amounting to some Rs. 35,000, had been directed to be spont on the work in 1853 and Captain A. P. Orr was deputed to undertake the task; but at the outlieak of the muting the unexpended money was plundered. After the reoccupation of Oudh the tomb was completed by Government, but the plastering of the walls and the flooring of the gateways was not effected till 1901.

Asaf-ud-daula did not long remain in Fyrabad. He quarreiled with his mother, the Begam, and then removed his capital to Lucknow. Fyzabad had usen to a height of unparableled prosperity under Snuja-ud-daula and almost rivalled Dehli in magnificence; it was full of merchants from Persia, China and Europe, and money flowed like water, the population has increased enormously and had spread beyond the fortifications many of the nobles residing as far off as Raunahi on the worl With the departure of Asaf-ud-daula the city fell into rapid decay, which became more pronounced after the death of the Bahu Begam. The latter administered Fyzabad and the lands in its immediate neighbourhood, and she was succeeded by a

governor; but his position after the retirement of Darab Ali Khan was of small importance. At annexation the place had greatly declined and many of the royal and other buildings were in a state of dilapidation. A great improvement was effected after the mutiny; the main approaches to the city from Lucknow and Sultanpur were considerably altered, the streets widened and the houses rebuilt with some regard for uniformity; and steps were taken at an early date to put some of the best remaining buildings into repair—a policy which has been constantly mainained to the present day.

A fine view of Fyzabad is obtainable from the top of the Regam's tomb. The city is full of trees, grove- and gardens, which gives it a picture-que appearance. The place covers a large area and is long and straggling. To the cast is the native quarter including the royal dwellings and bazars. To the west, between the railway and cantonments, is the civil station, contaming the district courts and offices the residential bungalows and several shops as well as the courts of the Commissioner and Judge, the mucum and public library, the boarding-house of the high whool, the dak bangalow and a hotel. To the north of the Lucknow road lies the cantonments, extending from the city on the cast to the Guptar Park on the west and reaching as far north on the Ghagra, above which rise the carthweaks of four Calcutta. The cantonments contain the European infantry and artillery parracks as well as the lines of the native cavalry and infantry, the race-course, parado and pole-grounds, St. Indren "Church and the cometery. The river is crossed by the Mirringhat ferry. be world which the road leads to Nawabganj in Gen la. The Guptar Park, which derives its name trong the Couptahari temple, the spot where Rama left this earth, is beautifully laid out, at forms sait of the extensive augul property in Fyralad, under the charge the deputy commissioner.

The city itself contains 19 mubillas, named for the most part after prominent residents of the place, a clse from the castes inhabiting them. The remaining public buildings of Fyzabad teclade the sadr dispensary, the high school, the new middle shool and bearding-house in the east of the city, the tabsili, kerwali, the district fail between the railway and the police lines,

the post and telegraph offices and the Victoria Hall or municipal office.

Fyzabad was constituted a municipality in 1869 and is united for this purpose with Ajodhya. Within municipal limits are the two towns, the civil stations, and portions of several villages such as Janaura, Deokali, Ranupali and others. The municipal board consists of 18 members, of whom fou teen are elected and four nominated, the chairman is non-official. The income is chiefly derived from the actroi, but considerable sums are realized from the rents of lands and houses, conservancy and the contracts for the collection of dues at the Ajodhya fairs. The sanitation of the place is good, and the city is generally licalthy. A drainage scheme for the city has lately been taken in hand. The chief items of income and expenditure since 1891 will befound in the appendix.

The educational anstitutions of Fyzabad comprise the high school, with its branch in the Mianganj muhalfa; the middle vernacular school; the Forbes' solved, a large middle vernacular institution, managed by a committee and aided from municipal funds; and the anglo-vernacular school for girls. The last is the property of the Wesleyan Mission, which has been established in Fyzahad since 1867, and owns in addition a mission house, church and a primary girls' school in the Anguri Bagh muhalla. The other primary schools are those managed by the district board in Sahils gang and Harnn Katra and a similar relegal for girls in the chark; the Islamia school maintained by the wasika in the Bahu Begam's mosque; three private Arabic schools in the Chank Sami, Hasnu Katra and the Qandabari Pazar; five Hindi private schools is Fatchgang, Hardarganj, Kotha Raicha and Sahibganj, and a Saukrit putshala in the last-mentioned nuchalla. The Church Mis-i ary Nocicty, which had a branch in Fyzabad, formerly maintained one or more schools in the city, but these have all been closed.

## FYZABAD Tahsil

The headquarters taked forms the north-western soldies of the description of companies the three purgames of Mangales the west, Haveli Oudh in the centur, and Amsin on the each of which has been separately described. The anti-

bounded on the north throughout by the river Ghagra, which separates it from the districts of Gonda and Basti. To the south the boundary is formed by the Marha river, beyond which are the Khandansa, Pachhimsath and Majhaura parganas. To the west in the Rudauli pargana of Bara Banki, and to the east the Tanda taksil. The total area is 238,661 acres or 373 square miles. It contains 496 villages divided at the present time into 1.712 mahals.

The statistics of revenue and agriculture will be found in the overal pargana articles. In its physical characteristics the tausil is evided into two main tracts, separated by the high bank of the Ghagra. Below this is the allavial manifor in which the villages are mainly held on a short-term settlement, and above a the level aplands, the surface of which is only broken by the valley of the Marka and its small tributaries. There are no forests in the such it, and the only jungle consists of a few scattered patches of that cross in the southern portion of Mangalsi, the centre of Haveli Oudh, and the south and east of Amsin.

The tah-il is administered as a subdivision in the charge of a fell-powered officer on the district staff, while at Evzabad there is also a contoument magistrate who cordinary jurisdiction extends to the cantonment of Fyzabad, but who also helps in the disposal is the criminal work of the rural area. The tab-ildu is assisted by two naib-tahsildars, one of the latter being in the charge of the large nazul property in the cay. There are a present four supervisor ganuages and 154 patwares. For the purpose of police a ministration the tabil contains seven moleculations of which two, the Kotwali and Ajodhya thanas, are within municipal vats, while the circle of the cantonment station covers a very shall area. The others are Raunchi on the west Amona and l'ora Qalandar in the worth, and Maharajeanj . May: in the tot. The south-eastern corner of Amsin 'Il authin the juristicle n of the Abrauli thana in tabsil Akbarpur Only a small portion of the Amona circle his within the tabed boundaries and Sout me-third of the Maharniganj circle is second levelet as made 'a Bikapur. Here, there have a strong our in the brinds, the notice of circles have been constituted with at my regard to wenue boundaries an arrangement which care masider-· le administrative inconvenience. Outside manicipal limits are

three Act XX towns, Goshainganj, Bhadarsa and Darshannagar with a watch and ward of their own, and until 1900, Raunah was also administered under the operations of this Act. The remainder of the towns and villages of the tahsil are watched by village chankidars, who are now regular Government servants, receiving their salary from the rural police fund.

The subdivision is admirably supplied with means of communication. The present loop line of the Oudh and Rohilkhand Railway traverses the tabil from end to end, with stations at Baragaon, Sohwal, Fyzabad, Ajodhya, Darshaunagar, Bilharghat, Tandauli and Goshainganj. A branch line from Fyzabad lead-to the Ajodhya ghat station, close to which is a bridge of boats across the Ghagra giving access to the Lakarmandi ghat station on the Bengal and North-Western Railway in Goada Besides this, there is the new railway from Fyzabad to Allahabad running due south from the district headquarters, with a station at Bhadarsa under the name of Bharatkund.

In addition to the many miles of metalled roads within the cantonment and municipal limits of Fyzahad and Ajodhya, there are also the two main roads leading from Fyzabad to Lucknow and Allahabad. The former runs west, paralicl with the railway. past Raunthi, where there is an encamping-ground and an inspection bungalow, and Barai, where there is a second bungalow Between these two roads is the second class road to Roi Baren, which is metalled for the first eight miles of its length; from this one branch leads south to Shahganj and Haringtonganj, and another run- north-was to Raunahi past Solwal station, whence a road leads to Amaniganj East of Fyzabad runs the main road to Akharpur and Jaunpur, which is metalled for six unles only It keeps parallel to the railway on its north side as far as Tandsub where it crosses the line and continues on the south side for in rest of its course through this tabell. The police-station of Maharajganj contains a room in the upper storey, which can be used for the purpose of an inspection bungalow, and on the sure road at Dharupar is a small bungalow belonging to the Khap radih estate. From Maharajganj a branch road leads to Tania on the east, and from the same point a small road runs south to Bhiti in the Majhaura pargana. The minor roads will be scon

in the list given in the appendix and in the map attached to this volume. The crossing over the Ghagra at Ajodhya is leaved by the (revernment to the Bengal and North-Western Railway for Rs. 6,500 annually. This rent is received by the district board. The railway company owns the bridge material and the ferry tenmer that plies in the rains. Besides this there are several ferries wer the river, which are worked from the opposite side, with the exception of the Miranghat forry at Fyzabad and the Tihura ier's east of Durshannagar. The Marha is crossed by a good non girder bridge on the Rai Bareli road; by an old masonry bridge on the road leading to Shahganj; by a narrow bridge, also of masonry, on the Allahabad road, and by temporary bridges at other places. A new bridge near Go-hamganj is much needed and in at present under consideration. The river is fordable in many places, and in the western portion of its course the bed is generally dry from January till the rains.

Besides Evzabad and Ajodhya, separate articles will also be found on the pargana capitals the police and radway station; the town of Bhadarsa and the larger villages such as Kuncarkha, Derakot and others in Mangalsi. The list of post-offices, schools, forces, markets and fairs will be found in the appendix

The population of the talkil was first enumerated at the Oath census of 1869. It ther contained 292,874 valubitants. In 1881 a slight decrease was observed the total being 290 942, but the following course of 1891 it had risen to 316,580 per-At the last census a further increase and decreed as the talkil possessed 334.327 inhabitants. The figure-arc, howcor subject to correction, as they included 26.728 persons m meraned at the A jedhyu sair, of whom "O, 107 lel acced to other dit icte, while 6,321 came from various parts it F, abail. Courting the fair population, the total was 307,539 of vion 1 2/405 were males and 152,194 temples: the whole representing a somewhat marked decrease stree 1891. Classified according v religious, there were 263,975 Hindus, 41 459 Musalmans and 2.166 others. The last included 1.418 Christians, 572 Sikhs, choffy native troops, 126 Aryas, 41 Jains, eight Buddhists, five Tarris and five Jows. Of the Hindus, Brahmans form the most Aumerous caste, followed closely by Ahirs and Changers, each of whom had over 20,000 representatives. Next come Rajputa Pasis, Kurmis, Koria, Banias and Muraos with over 10,000 apie.e and after them Kowats, Kahars, and Kayasths. The Rajput belong to many clans, but the majority are of the Bais, Surajbansi Bisen, Chauhan and Raikwar subdivisions. Among the Musalmans, Shaikha predominate; next come Julahas, Pathans, converted Rajputs and Bohnas, but apart from these no other cask contains 2,000 members.

The tabil is mainly agricultural in character, although by reason of the presence of the large towns of Fyzalad and Ajodhya the various trades and industries are more strongly represented than in other parts of the district. Fyzalad is not a manufacturing town and its industries present no remarkable features. It is, however, a commercial centre of some importance for the north and east of the province.

### GOSHAINGANJ, Pargana Ansin, Takeil FYEABAD.

A small town in latitude 26° 39' north and longitude 82' 25' east, on the road from Fyzabad to Akbarpur, at a distance of 22 miles south-east from the district headquarters. To the end of the road runs the Oudh and Robilkhand loop line, on which the ve a station here. Other roads lead to Dilasiganj and Sarwa on the Ghagra, to Maharua in Majhauta and to Jaisiman on the row from Haidarganj to Fyzabad. The town hes within the home of the revenue village of Ankaripur, which derives its name it . Ankari Rai, a former chaeltain of the Amsia Barwars. bezar of Go-haingan i proper was built by one Inchha, a Braham another market on the east called Katra was founded by the will of Madho Singh, a Burwar taluqdar; and a third in Bumunga Misrauli to the nest as known as Partabganj. The laid . Ankaripur is now held by the Rajkemar Raja of Deta in the tanpur, whose ancestor acquired the Barwars' estate are held twice a week in Goshainganj, and there is a " to the able export trade in grain, hides and other articles. The placet contains a town-police chanki a large upper primary whom; a post-office and a number of rankway bungalows, if well ? one is held on rent as an inspection bungalow. The Juda or swinging fair is colobrated here in the month of Sawah,

and is attended by some 15,000 persons from the neighbourhood.

The area included in the three bazars has been administered under Act XX of 1856 since the 1st of March 1883. In 1869 the place contained 2,966 inhabitants. This rose to 3,339 in 1881, but st the following census it fell to 3,274. At the last enumeration of 1901 the population was 3,241, of whom 1,873 were Hindus, 1,356 Musalmans and 12 of other religions. The Musalmans are chiefly Julahas who still carry on their ancestral trade of weaving. In 1904 the town contained 790 houses, of which 576 were assessed to taxation; the income from the house tax was R · 947, which gave an increase of Re. 1-10-3 per assessed hou claud Re. 0-4-8 per head of population. The total receipts amounted to Rs. 1,039 and the expenditure to Rs. 1,034. The latter was chiefly devoted to the maintenance of the town police, at a cost of Rs. 400; conservancy, Rs. 263; and small local improvements, Rs. 141

### HATDARGANJ, Pargung Pachhimrath, Tales Bikapul.

This village has in the south-cast of the pargana, in latitude 25° 27' north and longitude 82° 14' east, at the junction of everal small roads leading to Bhiti, Darshat nagar, Kumobar in Schanpur, and other places; one of these runs stieght westwards to join the Allahabad-Fyzabad read, just south of the beidge over the Birni. The distance from the tab-il headquarte - is oleven miles by read, and from Fyzahad 24 mates. The place is chiefly dishving of mention as giving its name to a police-station and " cathe-pound, which really he on the Bhiti read - is distance is the oast; but is has also a dispensiry, a post-office, and are appear princry rehoot. Markets are held here twice a week. The per always at the last census numbered 501 souls, of when 823 " te Hindus and 41 Musalmans. The great naparty of the thenitants are Benius. The village lands are very small, having un area of 95 scres, and are assessed at R .. 250 The proprietor "hal urain Sri Ram Kunwar of Khapra tile.

HAJIPUR, Fargana Mandaist, Tahad Fazaran.
This is one of the large villages in the west of Mangalsi,
lying in latitude 26° 47' north and longitude S1° 22' east, some

15 miles west of Fyzabad and a mile north of the Lucknew road. It is made up of two or three main lites and a number of scattered hamlets. The population at the last census numbered 3,265 souls, the principal inhabitants being Chautans, related to the families of Maholi and Dhaurahra Tio villag land, which extend from the railway on the south to the Ghagra on the north cover 2,638 acres and are assessed at Rs. 2,000. The present proprietor is the Maharaja of Ajodhya. There is a small school in the village, but nothing else of any importance. Close to the road is a hamlet known as Begamganj, which derives its name from the Bahu Begam, who intended to establish a bazar there, Two entrance gateways were begun, but never completed, and and are now in a ruinous condition. In Hajipur it off there is a large mosque with a tomb adjoining, known as that of Per Khwaja Hasan, who is said to have belonged to the army of Salyid Salar. The village was formerly owned by the Chauhans, one of whom named Dal Singh, amas-ed a large fortune in the distiller at Mocrut, and after building a fine house in his native village for the place with his family. The Chauhans lost their proprietaright as long ago as the time of Darshan Singh; now they do no even retain the occupancy right- which long remained to them and their very houses have been sold.

## HAVELI OUDH Pargana, Tuhsil FYZABAD.

This pargana occupies the central portion of the Fyzelac's tabsil, lying between Mangalsi on the west and Amsin on the east. To the north the boundary is formed by the Ghagra, which separates the pargana from the Gorda and Basti districts and me the south by the Marha, which divides Haveli Oudh from Pachkimrath. A large proportion of the north of the parganalies within the municipal limits of Fyzanad and Ajodhya, and considerable area in the neighbourhood of the Ghagra considerable area in the neighbourhood of the parganale except. The joble to tempora a flooding in abnormally wet seasons. The joble to tempora a flooding in abnormally wet seasons. The joble are not sept numerous or of any great extent; the largest are those at Mag. Para, Arwawan, Atraura and Gangauli. The soil of the pargana

is a sandy loam with occasional patches of blur; but in the south-west it inclines to clay, both in appearance and texture. In the neighbourhood of the cities of Fyzabad and Ajodhya the land is exceptionally fine, and is devoted to the growth of vegetables and tobacco. There are also some excellent villages in the south allow the Marha river.

The total area of the pargans in 1901 was 90,321 acres or 1 (1 square miles; the amount is liable to considerable fluctuations wag to the action of the river. At the first regular settlement it was only 81,200 acres, while at the last assessment it was no less than 90.719 acres. The preportion under oulti asion is naturally lower than in other parts of the district, by reason of he large area taken up by roads and buildings. In 1861 in amounted to 55 per cent, of the whole, and thirty years later the proportion was exactly the same, although the actual area had cost lerably merensed. Since the last settlement, there has been some forther development, and in 1904 the land under the ple igh amounted to 51,903 acres or 57-1 per cent while 21 051 acres was a double grop, the increase in this direction having been very marked. Of the remaining area, 19,136 acres were cut sed as the role, including 4,517 mores under groves and a large amount a poor and precations land; and 19,285 acres as barren, of which m . than half was inder we or and the bulk of the receiveder the actually areultually lites and roads, the actually arcultual delived being rely 2,826 acres. The pargana is generally well supplied with as a set ring sion, both from the numerous will-and the said-said Tells. Two or three villages have a deficient water supply but to a rule in gation is practicable when required. The chief ware staple me nee, juar and moize, while a consil rable " and of he d is under sugarcane. In the sele, given and peas the hac, being generally sown in succession to the and after come me what and banky, while the more valuable crops such as and a and tobacco are extensively grown

The characteristing classes, in numerical order are Branmans Rajputs, Musal nans, Kurmus, Ahurs, Muraos and Chamars. The high cases element is very strong, their average rent-rate at the rast settlement being only Ra. 3-59 per agree as against Rs. 5-6 baid by low caste tenants; the difference was thus 35-96 per cent.,

a much higher figure than in any other pargana of the district. A somewhat low proportion was held by ordinary cash-paying tenants, who cultivated 55-38 per cent. of the whole; while 22-66 per cent. was in the hands of under-proprietors, 5.12 per cent. was held by occupancy tenants, and 6-61 per cent. was rent-free or leased at nominal rates. Proprietors cultivated 6.97 per cent, as sir or khudkasht-a very low proportion, and only 26 per cent. was held on grain rents, the area being smaller than in any other part of the district. The revenue at the summary settlement amounted to Rs. 74,673, and this was raised at the regular assessment to Rs. 97,505, the subsequent revision giving a reduction in Rs. 4,934. At the last settlement a large enhancement of ever 32 per cent, was taken, but much of this was imposed nominally on non-assessable lands, the increase in the case of the revenuepaying area being only 18.9 per cent. The net final demand was Rs. 91,297, exclusive of the revenue of the alluvial mahals, which were last assessed in 1903-04 at Rs. 12,084. The latter are 73 in number, but many of them have no cultivation or are nominally assessed; one or two, however, such as Januthara and Tibura in the immediate neighbourhood of Fyzabad, are valuable properties The initial incidence of the revenue was Rs 2:32 per acre of cult vation—a higher figure than in most pargamas of the district, and due to the unusually high rents prevailing in the suburban area

The population of the pargana at the first Outh census of 1869 numbered 131,337 persons. This rose to 139,610 in 1881 and to 153,271 in 1891. At the last census the population was unduly swelled by the inclusion of the pilgrims at the Ajolian fair, the total being 176,307 persons. Excluding the municipality the number of inhabitants was 101,222, of whom 93,187 for Hindus, 7,973 Musalmans and 62 Christians and others. Beside the two cities, the only places of any importance are Bhadana-Darshanuagar and Jalahuldinnagar, which have been separate mentioned, as also have Amona and Pura Qalandar, at height which police-stations are established. The schools, buzzer and fairs of the pargana are shown in the appendix.

Means of communication are excellent. The pargametraversed by the loop line of the Oudh and Rohilkhand Railway with stations at Fyzabad, Ajodhya, Darshannagar and Bilharghat

From this a branch line runs to Ajdhya ghat taking off at Ragupali. From the Fyzabad station the new line runs south to Sultanpur and Allahabad with a station called Bharutkend near Bhadarsa. The chief roads, in addition to those within municipal limits, are the provincial roads from Fyzabad to Lucknow and Allahabad, and those to Rai Barch and Akharpur, both of which are metalled for a short distance. Others lead from Darshamagar to Bhadarsa and Haidarganj, the latter being connected by a branch road with Jalahaddinnagar.

The pargana derives its name from Ondh or Awadh, a corruption of Ajodhya, the old headquarters of the province. The g vernor used to reside in the fort near Lackhmanghat in Yodhya until the days of Safdar Jung, who built his palace at Fezziad. As elsewhere, the Bhars are said to have been the early owners of the soil. They were overthrown by the Musalman and Rapput avaders and have now entirely disappeared. There place was taken by a number of different tamahes. Among the carliest testlers were the Bushisht Brahmans who claim descent from the old Hindu inhabitants of Af allaya and state that their ancestors nturned thisher from Krehmir in the day of Vikramaditva and dat they retained their processions during the supermacy of the Bhars. At all events they were the chief amounts of the purama in the days of Akbar, but they seem to ease riven way believ the Surajbansi Rajpats, and the Branmar costs hold only moordinate rights in a few villages. The story of the Smajbarais is given in the account of Jalahaddinnagur. Lat p Stagh, the founder the family, acquired possession of 97 villages and no descendants still hold rights in 51 villages. In 21 of the sthey are sadependent proprietors, in 13 they we are smoothnate in to the hap if Dem, and in 16 others to the Miderary of Aj days. From the same family came the Rajas of Amorha and Maholi in Bacti, whose posse sieus were confiscated after the mutuer, the Raja of Mahson in the same district, and the Raja of Harnha in Ba.n Banks

Another family was that of the Gregban s, who also claim to have been settled here from a very early date, and to have equired the four estates of Kusmuha Halwara, Sarethi and Firospur, consisting of ten villages. These they still held till

1816, when their lands were absorbed into the Mahdauna taluqa, and they now only hold under-proprietary rights in three of their original villages, Halwara having been entirely lost. Others of this clan founded the large taluque of Khapradih and Sihipur, The Bais of this pargana state that they came from Baiswara and displaced the Bhars in the possession of 37 villages; but like the other Bai- of this district their origin is very doubtful. They still hold the village of Ashrafpur, but most of then possessions were absorbed into the talugas of Ajodhya and Mau Jadubanspur while others are in the hands of independent proprietors. The Upaddhya Brahman, who settled here some 350 years ago also acquired 12 villages, and these, too, passed into the hands or the Sakaldipis of Muhdauna at the beginning of the ninetcerth contury; but some of the family still hold the Usru mahal in subsettlement, and have subordinate rights in three other villages Mention has been made in the article on Bhadarsa of the Saivid family of that place, who own nineteen villages a venue-fra-

The Kurmi taluqa of Man Jadubanspur was founded at one Darshan, who came with his father from pargana Birhar to Lucknow and there enlisted in the service of Saadat Alı Klan. He ultimately succeeded to the command of a regiment and attended a Raja. He died in 1851 at the age of So, after undergoing many vici-situdes of fortune. His son, Raja Jai Lal Singh succeeded to a fine estate made up of Man Jadubanspur, Palm Shabbadi, Janaura, Ranupali and Deokali, amounting in all to 64 villages. For the part taken by him in the relicition his posperty was confisented and bestewed on Raja Rostam Sah of Dors

The pargama which has remained unchanged since and existence are contains 187 villages, divided into 546 mahabs. Of these fit including 170 subsettled, are held by taluquars, 132 by zamindar three of which are subsettled, 54 in pattidars, and five in blass chara tenure; while two are the property of Government and 42 are revenue-free. The nazut land, which covers 15,784 across chiefly in Fyzabad and its immediate neighbourhood. The revenue-free area, 5,362 across in all, is mostly held by the Bhase area Saiyids, while of the remainder, at the time of the last central ment, 54,548 across were held by taluquars, 1,986 across by single zamindars, and 13,109 across by coparcenary bodies. Over 13 per

cent. of the whole pargana is held in subsettlement, nearly two-thirds by Rajputs, and the bulk of the remainder by Brahmans.

The chief taluqdar of the pargana is the Maharaja of A jodhya, whose property consists of 68 villages and 14 patts, known as the Bacetha estate. The Rajkumar Raja of Dera holds 24 villages and 15 patts; the taluqdar of Bhiti owns the Narainpur estate of six villages and two patts; the taluqdars of Khajurahat hold the Bhadekhar property of four villages and two patts and the Chakurain of Khapradih owns the single small village of Sakranli, The other propertors are chiefly Brahmans, Rajputs of various class, Musalmans, Khattris, Bannas and Kalwars.

#### ILTIFATGANJ, Parguna and Takot Tanda.

This place formerly gave its name to a pargana which was analgamated with Tunda b fore 1869. It stands on the lanks t the Ghagra in Satistick 26° 36' north and longe ide 32° 53' ast, on the road from Fyzal ad to Landa, at a listage of eight nakes from the latter and 20 miles from the district academarters. A branch roud here takes off to the south and leads to Alabaipur. The pargana was originally known as Naque, but in the days of widu Jang it was held in jugar by Khwaja It itat Ale Khan, · well-known member of the cond, who established the bayar in Victatigabad to which he gay, his own name; and is the revenue whethous were made at this place, the name was extra led to the sugant as well. It is now a considerable village with a populanot 2,075 persons at the last cin-us. Of this, 91 have Masal-Dars, many of them saing Julahas who still pursuath acades to d Supation of weaving. After lands, this is the most ampor the here in the purgoes. The place of time ad strict per testile and brguapper primary school. Adjoining Indiagram street alage Alampire the home of a large family of Maghal-who f emerly old the greater part of the pargana. They were dipresed of most of their lands by the taluquars of Preprie, but in 1826 a tirge which was restored and was successfully adamed all armovators.

<sup>4</sup>ALALPUR, Pargum Sumum un, Tahel & GAPPUR.

A flourishing town situated on the right bank of the Tous, in takitude 26° 18' north and longitude 82° 44' cast, at a distance of

14 miles south-east of Akbarpur and 50 miles from Fyzabad. It is connected by a metalled road with Malipur station on the railway. while numetalled roads run in all directions and lead to Akbarpur. Surhurpur, Mittupur, Inghra, Ramnagar and Baskhari. The Tons. is crossed by a temporary bridge which is replaced by a ferry during There is a large traffic and a permanent bridge is much The river here about has a very winding channel and flower between high and precipitous banks, in many places clothed with jungle. In the out-kirts of the town are occasional clusters of palm trees which give the place a picture-que appearance. Julalpur contains a police station and a post-office standing outside the town , large moddle vernaeular school with a boarding-house at a little distance, and a cattle-pound. There are two masonry mosques and nine Hundu temples in the place. The market days are Tuesday and Saturday in each week. The Muhammadan festival of the Muharram is celebrated here by a large number of persons, th. attendance averaging about 4,000, while a somewhat larger H misfair known as the Bijai Dasmi takes place in the month of Kuar

Jalalpur is said to be called after the emperor Jalal-ad de Akbar, in whose days at was built, and stands on the lands of the old village of Nahvi Alipur. The latter gave its name a former days to a tappa of pargana Akbarpur which formed part of the jagar hold by liftakhar-ad-daula, a brother of the Baha Begam. The grant was a model by Saadat Ali Khan in 1805 and since that time the old fort has been in 1916s. The place is now the property of the talaqdars of Samanpur.

At the first Outh consess of 1869, Jalalpur contained to 275 inhabitants. The total rose to 7,226 in 1881, and at the following consess to 8,375. Since then it has somewhat declined in 1976 as in 1901 the population was 7,265, of whom 3,847 were Mosal mans. The town is administered under Act XX of 1856, the operations of which were extended to the place in August 1864 In 1904 the town contained 1,316 houses, of which 688 were assessed to taxation, yielding Rs. 1,650, which represented an incidence in Rs. 2-6-2 per assessed house and Re. 0-3-8 per head of population. The total income was Rs. 2,192, and the expenditure Rs. 2,664. Of the latter, Rs. 850 were devoted to the upkeep of the town police, Rs. 394 to conservancy, and Rs. 750 to local improvements.

# JALALUDDINNAGAR, Pargana HAVELI OUDH, Tahsil FYZABAD.

This is a large village standing in latitude 26° 12' north and longitude 82° 16' east, on the high bank of the Ghagra and on the cast side of the road from Fyzahad to Akharpur and Tanda, at a distance of ten miles from the district hadquarters. The place is said to derive its name from the Emp for Alber, but nothing else is known of the connection between that monards and the village. It is composed of two sites lying close together. on the west is the bazar called Pura, and on the cast the agricultural village of Jalaluddinnagar. The old name was Pere Marna. and some 400 years ago it is said to have been held by one Banda Sah, a merchant. This man excavated a large tank to the north of the village which still bears his name. The stay your that on one occasion the merchant found one Shah Bhikka of Bilabii, a hermit of great repute, washing his coth actio edge of the tank, and admonished him for so doing. The foly man become surreced at this and cursed the tank; wherefore water a but rarely to be found in it. Banda Sah seems to have been cared as well, for be died childless, and his property passed iter the hands of his areast, one Lalii Singh, a Serapar i who had the with his three sons from Kali Kumann and settled in the subarb of I sabad, which is row known as Saltar per. From I dji Singh cone the Suraybans: zaminda's of the piccina. The after part of Pura is still hold by 20 members of this claim, whole a significa-I their kinsmen hold a portion of he village in succeettlement ruder the Maharaja of Ajodhy & The total area is 187 ares. and the revenue Rs. 1,550. B sides the bazar, which is a busy and flourishing trade o atro, the place contains the resuppor pumary school and a cattle-paind. The partie in a st last "our numbered 2,747 souls of whom 2450 to by Hann's and 287 Musalmans About a mile distant to the south is the ralway · are n of Billiaughat, which is separa el in interned

KATAHRI, Pargana Mathauri, Palsa Arriver R
This place gives its name to a station on the top line of the findh and Rehilkhand Railway, between G shanganj and Akbarpur, lying in latitude 26° 39' north and longitude 82° 27'

east. The station has been but recently constructed, as formerly it was located at Kamirpur, some two miles to the north-east Katahri is a hamlet of Partabpur Chamarkha, a village on the road from Fyzabad to Akbarpur, some eight miles north-west of the tahsil headquarters. It had a population at the last census of 355 persons. The lands of Partabpur with its numerous hamlets, including Katahri, cover 2,985 acres and are assessed to a revenue of Rs. 1,982. They are divided into three mahals of which one is owned by Paudit Bisheshwar Nath, a Kashmur Brahman, one by Babu Abul Qasim Khan, a Musalman Rajpur of the Me pur Baragaon house, and the third by a Saiyid. There is nothing of any interest in the village except a small iron found; belonging to Pandit Bisheshwar Nath, and a primary school.

## KHANDANSA, Pargana Khandansa, Tahsil Bikapur.

The place which gives its name to the pargana is a village. lying in latitude 26° 36' north and longitude 81° 47' east on in cast side of the road leading from Rudauli and Amaniganj I Haliapur in the Saltanpur district, at a distance of about five naise east of the Gumti and the same distance suth of Amanigan bazar. The place is of your little importance and contains to features of interest. At the last census it contained a population of 1,094 persons, the majority of them being Brahmans. The village lands cover 1,162 acres and are assessed to a revenue of Rs. 1,470 The proprietors are Bisen Rajputs and the village is divided into a large number of mahals, no less than 38 persons being recorted as sharers in 1904. There is a small bazor to which markets at held twice a week, a large upper primary school, and a cattle pound Khandan-a is said, according to the local tradition, ? have been founded by one Khande, a Bhar, some 600 years agbut nothing else is known of its history. In Aklar's day, i gave its name to a tappa of pargana Rudauli and the separapargana of Khandansa was not tormed till within recent times.

# KHANDANSA Pargana, Taksil Bikapur.

This pargana forms the western and smaller portion of the tability and occupies the south-western corner of the district To the east lies Pachhimrath, on the south and south-west the

Sultanpur district, on the west and north-west the Mawai and Rudauli pargunas of Bara Banki, and on the north Mangalsi. separated from Khandansa by the Marka For a short distance the couth-western boundary is formed by the Gundi which is fed by a small stream running southwards along the western border. The Macha in this pargana is little more than a string of pools, except in the rainy season. It only drains the extreme north of the pargana, while the Counti also serves but a funited as a in the south west. In the upper part of the central tract there is a block f land in which the drainage is somewhat defective, and as the water finds no proper outlet considerable damage is done in vents of heavy psinfall. This tract contains a large number of shils, the chief of which are these at Galling, John an, Tal Dholi, Kanji, Sirsir, Parsawan, and Dib Girdba. The dramage from the first works its way to the south-east in the direction of the Gian, but the warer escapes with difficulty. The soil of the pagana is chiefly loam inclinant to clay in the north-east and min-cast. In the south west it wards the Guinti and along its small tributary, the ground is out up by the ray we and the soil deteriorates into bluer. The centre is generally poor, ewing to the : amber of swamps.

The total area of the pargana i 44.784 acres to 117 square niles. The proportion entriested at the first regular atthement he "to per cont, but since that sine there has been a persulciable top ovement, although the pargana suffered he will in 1971, 1878. and other years. In 1894 the cultivated new via. 13 296 acres. Tor r 57 per cents, and since that time the manager is been more and. In 1904 as much as 45,590 acres or nearly of percentar were under the planch, and 21,610 acres have a double con-Of in remaining area, 19,409 aeres were closed is commissive nebrding \$ 162 neres under grove-on unus tally hega pracortion. "I clarge amount of informa waste that has never because facing; 1759 acres were returned as barren, but of the all says 1.145 " s has either under wat r or occupied by 19 s and reads. The larger dages is large, amounting in reducity years to ever 45 Present of the cultivation. Most of this is obtained from the "out constants and jhils, but the pargana has a fair supply of wells and in most places more can be made when required. The

kharif is the principal harvest, owing to the great extent of rice land. This also accounts for the large defacti area, as the rice fields are generally covered with gram and peas during the cold weather. Other staples are wheat, barley, juar and maize, whilthere is also a small amount of tobacco and sugarcane. The cultivation of indigo has entirely disappeared.

The agriculture of the pargana is generally of a high standard. Low caste tenants largely predominate, the most numerous being Ahirs, Muraos, Pasis, Lodhs and Chamars. At the last settlement the average low caste rent-rate for the pargana was Rs. 6-07 per acre, while the higher castes paid Rs. 4-51, the difference being 25-91 per cent. No more than 51-81 per cast of the cultivated area was held by ordinary cash-paying tenants, a lower proportion than in any other part of the district, although a very similar state of things provails in Pachhimrath. This is due to the fact that 22-52 per cent, is cultivated by the proprieters themselves as are or khudkasht, and 21-73 per cent by under-proprietors. Of the rest, 3-10 per cent, was rent-more held at favoured rates, -18 per cent, was in the hands of open pancy tenants, and -45 per cent, was grain-rented.

The revenue of the pargana at the summary settlement was Rs. 50,785. The demand at the regular settlement was originally fixed at Rs 86,138, which gave an enhancement of 70 per centerat dissatisfaction was expressed with this settlement, and for a long time the zamindars refused to engage. In the subsequent revision a reduction of 681 per cent, was made, the ultimate demand being Rs. 80,549. At the last assessment the orthancement amanted to 16:17 per cent, the net final revenue being Rs. 92,764, giving an initial incidence of Rs. 246 per sectional collision—a very high rate.

In 1869 Khandanea contained 68,738 inhabitants, but it area was subject to several subsequent alterations, the population of the pargana in its present form being 70,905. At the nex census of 1881 the total was 67,712, and this rose in 1891 at 72,340. The last enumeration gave a total of 74,165 person of whom 68,494 were Hindus, Musalmans being comparatively scarce in this part of the district. The only place of any size in this pargana is Muhammadpur or Amaniganj, which, with

A CHICA SECTION AND A CONTRACT OF

Khandansa itself, has been separately described. The bazars, schools, post-offices and fairs are shown in the appendix. The only fairs of any size are those of Bawan and Deogam. The latter is held in the month of Pus in honour of Sundar Shah, a Musalman, and Niddhi Chand, a Nanakshahi faqir. There is a largah here with a small grant of rest-free land. A small amount of trade is carried on, chiefly in metal vessels. The Bawan fair is held in the month of Bhadon in honour of Bandeo flikh, whose shrine was discovered about tifty years ago by Indra Dal, the priest of the old zamindars, who found a left rence to the place in the Ajodhya Mahatma.

The pargana is somewhat poorly supplied with means of communication, as it contains mather realway nor metalled read. Through the south-east corner cans the read from Evzshad to Rai Barch, from which a branch takes off at Hahapur in Sultanpur and passes through Khandansa and Amanigan to Rudauli. From Amanigan one read bads to Mrikapur. Havingtongan and Khajurahat, and another to Schwal station. I braced from the latter taking off at Guddopur and beading to Kilchera.

It is said that in early days the tract are divided into four appas, known v. Khundansa, Urwa, Bhakle ale and Din Girdhar This arrangement continued till the Loss of Akta when Khandansa was constituted a pregana and included in the ilaga of Ridaill. At the s coul summary settle era Khartaust wis toward as a separate parging consisting f 113 subject, aid was included in the Bara Banki district. In \$300 this tract segular with nine v Hages of Rudagle and Vehace of pro-ware orken from the Bara Banki district, as well as 25 or lages of parman lagdispur which lay to the sorth of the Curit, and waronsterred to Fyzahad. Subsequent afterni ne las Klandon a with 153 villages, and a first or change was made or 1800, when 'e pargana was transferred from the old blur legal. Bikupur, and at the same time a for allages year offed in the 5 th from Mangalsic. Like the other page or to district the trait is said to have been originally hitself the Bhars, in of hom named Khande was the reputed bunder of K in buse. The Tours of the Bhord villages are still to the ser at Phakhault. Saranda and elsewhere. The Bhars were west rown by one

Doo Rai, a Bisen of Majhanli in Gorakhpur, whose descendants made themselves masters of the tappas of Khandansa and Urws They have retained their and adjacent villages in Mangalsi. proprietary right and still own 87 villages of the pargana. thirty villages are held by the Chauhans, a branch of the great Pachhimrath family. They have fared better here than their brothren to the east, as they have managed to retain their estate. for 26 generations. Some Musulman converts from this fandly are called Khanzadas and occupy Sarsanda. The Bhale Sultans properly belong to the Sultanpur district, but they hold cleven villages in this pargana, ten of those being uncluded in the Deogaon taluga, an account of which has been already given in Chapter III. At one time a family of Pathans acquired a small estate from the Bisens and had their headquarters at Bhawannagar. where the remains of their fort are still to be seen. Their property is now, however, reduced to the single village of Allahpur. Key asths hold a small portion of the parguna, but apparently they at one time occupied a position of some importance. In the village of Dholi Askaran are the ruins of an enormous fort said to have because built by one Mata Gur Bakhsh, a Kayasth chakladar, about 200 years ago. Nothing is known of the history of this family sa . that they sold the village of Zafara gar to the Musalman muchdars of Saidkhanpur, whose ancestor Shah Ahmad Zaman, obtain it half the latter village as a revenue-free grant from Asaf-ad-dade for the support of the dargah of Makhdun Shah Abdul Hay.

At the present time the pargana contains 125 villages, divided into the unusual number of 1575 mahals. Of the latter, 56 are taluquari, 743 zamindari, 773 pattidari, one obaiyachara and to revenue-free. The subscittled area is comparatively small only 18 taluquari and 7 zamindari mahala being held on this tenue. Over two-thirds of the pargana is held by Rajputs, 21 per cent. I Musalmans, and 11 per cent. by Brahmans. Other castes, as Burier Bairagis. Kayasths and Kalwars, hold minute properties. Tales, dars own but one-fifth of the whole area, a smaller proportion ring in any other pargana of the district. Hesides the Khanzada owner of Deogaon, the Shaikhs of Barai in Bara Banki own four villages and four pattis known as the Aghiari estate, purchased by Chaudhri Ghulam Farid of Rudauli; and the Maharaja of Ajodhya has the

Paikauli estate of seven villages acquired by Maharaja Sir Man Singh.

KICHHAUCHHA, Pargana BIRHAR, Tahsil TANDA.

This place, which is also known as Achinfpur, is a small town standing in latitude 26° 25' north and longitude 32° 6' cast, on the banks of the Taumi river, at the junction of the roads running from Jalahur to Baskhari, and from Akbaspur and Bariawan to Tendua, at a distance of 14 miles from Akharpus and 50 miles by road from the district headquarters. Baskhari lies two miles to the north, and adjoining it and Kichhauchha is Rasulpur Dargah. The town is a poor place, ill-situated on low ground and sugrounded by streams and tanks. The place contains a large upper primary school and a masoney mosque, but nothing else of any interest or importance. It has not more and in size of Proceedings. At the first Ondh consus of 1869 it contained 2,350 whalitants, and this rose to 3 5 13 in 1551 and to 1 036 in 1891, but both those figures were probably every round owing At the last census the population was only 2,025 of allom 998 ver Muselmans. The inhabitants has by agriculture or by preving on the pilgrims who stay in or pass through the place on a their way to the shrift of Makhdum Ashraf et Re alpue

The history of the town is closely connected with the celebated Makhdum Ashraf whose story I told in the article on Beauthur. Fruith in descent from him car Shah Jutar, who 6 we out the Bhars from Kichhanchha and to it per some of it, r his pronger prother, Shah Muhammad founded the a tadet which supplies though west, and gave it the name of Asara pro- Then descendants obtained many revenue tree grants in an the Dolla sor reign; but these were for the most pair resumed by Saidat Ali Khan, and at the first regular settlement the caryal i de and in Kichanchha, Baskhari and Rusulyur. The lands of Richbauchha cover 777 acres, and a c assessed at Rs 1,332 of them is held by the Saivid taluqdars of Purpur and part by those of bunnapur, whose ancesto, sacquired a portion of the estates of the old Sais id family during the first half of the nineteenth century. The rost still belongs to the Saiyide, excepting two small pattus held by the Palwar taluqdars of Haswar and Makrahi.

Kichhauchha has been administered under Act XX of 1856 since 1884, and its operations have been extended to an area of 74 acres. In 1904 the town contained 518 houses, of which 187 were assessed to taxation; the house tax yielded Rs. 380, falling with an incidence of Re. 1-13-6 per assessed house and Re. 0-2-4 per head of population. The total receipts from all sources were 434, including the balance from the preceding year. The expenditure was chiefly devoted to the maintenance of the town police, at a cost of Rs. 220; while Rs. 90 went to conservancy and Rs. 64 to small local improvements.

# KUNDARKHA KHURD, Pargana Mangalsi, Tahsil Fyzabad.

This is a large village in the south of the pargans, lying in latitude 26° 43' north and longitude 81° 54' cast, on the read from Sohwal station to Amanigani, at a distance of 14 miles from Fyzabad. The southern boundary of the village is formed by the Marha river. The place is often known by the name of one of the hamlets. Deothi Hindu Singh, so called on account of its being the residence of Hindu Singh, a Bison chieftain of whi celebraty. The bazar is known as "Deothi" and markets are h here twice a week. There is a large upper primary school in we village, an unded girle cohool and a prest-office. The popula tion at the last consus amounted to 2,562 persons, of whom 2,350 were Hindus and 232 Musalmans. The village has a total and of 1,700 seres and is assessed at Rs. 1,125; the present propriet is the Maharaja of Ajodhya. The place is said to have been founded by one Klundar Singh, a Bisen, some 550 year agmany of he de-cendants still reside here, though their propert was absorbed, together with that of their kinsmen in Pachhuan by Raja Par-han Singh and his successors. One of times. Bar. was Hindu Singh, who entered the service of Shuja-ad-dada as private soldier. He rapidly rose to the rank of subahda we soon distinguished himself by reducing the fort of Bir jaulis trai Bangarmau in Unao. This exploit was achieved in dehauc " the orders of his superior officer, Ajab Singh. On the receipt of the news, the Nawab replaced the latter by Hindu Singh and afterwards gave him the command of seven regiments with the

rank of general. His brother, Barjai Singh, was promoted to the summand of his own old regiment, and from that time forth he was present in almost every action in which the forces of the Nawab were engaged, including the Bobilla war of 1774. For his services he obtained Kapari and Lakhauri, two of the richest villages in the pargana, in revenue-free tenure. He remained high in the esteom of Asaf-ud-daula, and in reward for the fest of killing a tiger with his sword during a hunting expedition in Nepal, he obtained the Nawab's elephant as a gift and the grant of the village of Uchitpur. Hindu Singh was succeeded by his son, Raja Madho Singh, who held a large estate, but in 1843 this was absorbed in the great taluqa of Bakhtawar Singh of Mahdauna. Maharaja Man Singh held Kapasi and Uchitpur free of revenue till the first regular settlement, while Lakhauri remained unassessed during his lifetime.

## LORPUR, Pargara and Tahail AKBARPI'R.

A large village lying in latitude 26° 23' with and longitude 32° 38' cast, a short distance to the west of the man, bad from Fyzabad to Jaunpur and three miles south-cast of the tab-il headquarters. It contained at the last census a p pulation of 3,085 persons, of whom 1,712 were Hindu-, 1,307 Massimans, and 66 Jains and others. The inhabitant an to the most part agriculturists; but among the Muhammadans are many Julaias who carry on a considerable business in wanting basar here in which markets are hold twice a week, and a large toper primary school. The Ramlila and Munarian festivals are annually celebrated here and attract a number of present from the neighbourhood. The lands of I orpur cover 1,391 at es and are a seased at Rs. 1,150; the proprietors are the taluquars ... Samuelpur, while several Shaikhs hold under-proprietary tights. A orpur ' the parent village of the Samuspur taluqu, and adjoining it on the south is Pirpur, which gives its more to another page estate

To the north of the village is a large tank, to the centre of which is a mound connected with one side by a causeway. On the mound is the tomb of Saiyid Taj, who is said to have come from Arabia and settled here in the days of the Cheri Sultans. The tomb, which is overshadowed by a fine old tamarind tree,

consists of eight stone pillars supporting a stone architrave with a broken domed roof of brick. The foundations are of block kanker and under each pillar is a slab of red stone about two feet square. The pillars, which are about 4 feet 6 inches high, are octagonal in the centre and circular in the upper portion. They are lightly carved but in many places have suffered from exposure to the element. On the inside of the architrave on the west is an inscription, most of which still remains. This is to the effect that the building was erected in 772 Hijri, within the limits of Sinjhauli and that lands and groves were given for the support of the tomb, the Quran readers, servants and other expenses. The date shows the building to have been constructed during the reign of Firox Tughleq, who founded the city of Jaunpur in 1359 A.D. The ground in the and outside the building was dug up many years ago by there in search of treasure, and the tomb itself has been disturbed.

#### MAHARAJGANJ, Pargana Amsin, Tahsil Fyzarad

This is the name of a small bazar situated on the borders of the villages of Maya and Kanakpur, in latitude 26° 38' north and longitude 81° 26' east, on the southern side of the road leading from Fyzabad to Jaunpur, at a distance of 16 miles from the district hoadquarters. Close to the bazar a road branches off to Tanda running towards Dilasigani on the panks of the Ghagra. From h came point a third read runs south to Bhiti. The place is more deserving of mention as possessing a police station, which standin the angle between the two main roads. Besides the thans, the village contains a cartle-pound, a pret-office and a small side. school. Markets are held in the bazar twice a week. The population of Maya at the last consus numbered 613 persons, of whom it majority are Chauhan Rajputs. In former day-these people wit the proprietors of the village, but in the first half of the nineteen century the place was acquired by the Gargbansis of Khaprad h and it is now held by Thakurain Sii Ram Kunwar The area : the village of Maya is 426 acres and the revenue R., 550.

MAJHAURA, Pargana MAJHAURA, Tahail ARRAPPUR
The capital of the pargana is a mere vellage, lying in latitude
26° 28' north and longitude 82° 24' east, about half a mile distan'

from the right bank of the Marha river. Through the village runs the road from Bhadarsa to Tiwaripur, at the latter place irining the main road from Fyzabad to Akbarpur; this crosses the Marha by a temporary bridge in the dry season and by a ferry in the rains, close to Majhaura. Half a note to the west runs a cross and from Maharua to Goshainganj. The place 19 -aid to have been founded more than 500 year ago by one Saryid Manihe. but nothing is known of its history. It gave its name to a pargana in the days of Akbar, and formerly contained a mud fort which lay to she south-west of the main site. The population at the last census numbered 1,146 persons of where 771 were Musalmans. The village has a total area of 595 veros, but only a small partion is assessed, the revenue lemand being Rs. 155. The owners are the Khattris of Shahzalpur Мар'анна ровчества a protenffice and an upper primary school

### MAJHAURA Paryana, Taked AKBARP, R.

This paragam forms the western portion of the tabel, cut ading westwards from Akbarpur to the borders of Lacheimrath. To the north he Amsir and Tanda, and to the south the Sulcarcar district, the boundary being formed by the Metholetiver Part of the northern boundary in constitute the et a Marine which llows call twards in a forthouse miss as fall a Golfs count, there it bads southwards and passes the eigh the pargure to join the bisin to the castern norders at Karacipia. The Lisa dows through the centre of the paroana and for one ad a form the eastern boundary before its junction with the Mail a. This we rivers with the Majhor are the main devote chemicle for h whol tract, with the exception of the netter a cru corn t, the dramage of this passes not the Thirty This count is full " " want is, ne neoably those at Darwan, Haring that " halpen and National in set years they overflow their links and sometimes man considerable demage. There are one is ever other that he that soul it chief being those at Banga n and I va. This portion I generally well drained, but in abase outly we was many of b village along the rivers are habe ( constain one damage from looks. The soil in the porch and south mennes to clay but the centre is a good sandy loam with occasional patches of clay and bhur. South of the Bisui there are frequent stretches of dhak jungle.

The total area of the pargana is 82,774 scres or 129 square miles. At the first regular settlement 58 per cent. was under cultivation, but since that time there has been a marked improvement. At the last assessment the cultivated area had increased to 52,855 acres or 63.88 per cent.—a figure which has been considerable surpassed in recent years; as in 1904 it amounted to 54,281 acraor 65.5 per cent. of the whole. Of the remainder, 16,751 acres. including 3,333 acres under groves, were classed as culturable. being for the most part land that had never been reclaimed, and 11,742 acres as barren; the last comprising 6,250 acres under water and 3,438 acres occupied by sites and roads Means of irrigation at generally abundant, and in ordinary years nearly two-thirds of the cultivated land is irrigated; the jhils and tanks are yere largely used, while the pargana also possesses an ample supply of wells. The kharif covers a larger area than the rabi, and in 1914 as much as 23,940 acres bore a double crop, the increase in the direction of recent years being very marked. The chief stapks are rice, sugarcane and juar in the kharif, and gram, peas sad wheat in the rabi. There is still a small amount of indige, but poppy and tohacco are quite insignificant.

The chief cultivating castes are Brahmans, Rajputs, Kurms Ahirs and Muraos. Little more than half the pargana, or 55 of per cent., was at the last settlement held by ordinary cash-paying tenants. Proprietors cultivated 1903 per cent. as sur or khudkasht; under-proprietors held 17:66 per cent., and occupant tenants 249 per cent. The more precarious lands are, as usual grain-rented, and 2:09 per cent. was so held; the remaining 3 if per cent, being either rent-free or in the hands of favored tenants. The high caste tenants paid on an average Rs. 4-71 p. sere, as against Rs. 6-62 paid by the lower castes. The ment " of the former is very large and the average rate for A whole parguna was no more than Rs. 552; the caste priviles , being as much as 31-42 per cent. The revenue at the summary settlement amounted to Ra. 70,749, and this rose to Rs. 97,913 14 the regular assessment. It was reduced at the subsequent revision to Rs. 89,136. At the last settlement an enhancement of

somewhat over 27 per cent, was taken, the initial demand being Rs. 1,08,895, and the net final revenue Rs. 1,11,850; the latter represented 43 per cent. of the assets and gave an incidence of Ro. 2.14 per acre of cultivation

The population of Majhaura at the first census of 1869 numbered 45,202 souls, but the tract was then very different from the present pargana. In 1881 the total was 72,555, and this rose on 81,270 at the following consus. At the last enumeration of 1901 a considerable increase was observed, the number of inhabitaan's being 85,203, which gave an average density of 660 to the square mile. Classified according to religious, there were 79,973 Hudus and 5,230 Musalmans. There are no towns in the par-Majhaura is a fair-sized village, as also are Bhite and Partubour Chamarkha; the last has a population of close on 5,000, but it consists morely of scattered hamilts. The schools and markets of the pargana will be found in the appendix. There are no fairs of any rise except that at the confluence of the Bisqu and Murha on the last day of Aghan. Another fair deserving mention is that at Dilawarpur, near the their ordered of the Bhis taluqdar, where considerable gatherings occur in Chait and hour and some trade in aboth and brass vessels is as rad on

Means of communication are fair. The northern portion is in versed by the railway, on which there is a station in Katahri in the fillage of Partabpur Chamarkha, while those in Goshainganj and Tandauh lie close to the northern border. Paradel to the milway runs the road from Frenhal to Janupur, with a branch bading past Majhaura to Maharua on the road from Akbarpur as Saltanpor. Through Majhaura, too, passes the road from Bisdarsa to Tiwarpur, while other, lead from Bhot to Maharua, tool singanj and Maharajganj. The north-cast conterns have sed by the road from Akbarpur to Amsin and Gaabanan.

The parguna did not assume its present snape the fire fires a gular settlement, and formerly comprise I a tan smaller area. The greater part of the land to the south of the Bism was tren necluded in Baraunea and Akharpur, while all but a small position of the land north of the Marha belonged eather to Abkarpur or Americ. The old tract was originally divided into four tappas known as Haveli, Asgawan, Mustafabad and Sikandarpur. It formerly

一年 西南

belonged to the Bhars, who are now almost extinct here, though traces of their villages are to be seen in the brick-strewn mounds of Asgawau, Majhaura and other places. The Bhars are said locally to have been suppressed by one Saiyid Manjhe, who founded Majhaura; but the lands seem to have been subsequently divided between Tiwari Brahmans, who hold Sikandarpur and Haveli, and Rajputs of the Rautar clan.

The Tiwaris are said to spring from one Rudau, a native of Gorakhpur, who founded the village of Rudaupur and afterwards by the favour of the Musalmans acquired a large property. He had six sons, from four of whom come the present families of Tiwaris. Their oldest records date from 1790, when the family had eight mahals consisting of 60½ villages. Since that time they have lost power and their possessions have been absorbed into other taluques. In 1854 they had only one mahal of three villages and even this was taken from them and added to the Meopur Dinaurua estate in the following year. They still retain subords nate rights in a few villages.

The Rautars are spurious Rajputs said to be descended from one Deopal Singh, whose father was a Brahman and his mother an Abirin. He held 15 villages in Pachhimrath close to be Majhaura border, and his two sens, Jairaj Rai and Ubha Rai, extended their possessions, till in 1792 their descendants held 20 villages, paying over Rs. 31,000 in revenue. They still possess a considerable portion of the pargama, though their estates have been much reduced by the action of the taluquans. Their property every minutely subdivided. The name is derived from Rawai, a title commonly used by Ahra er Rajputs of doubtful desc. at but they are so far considered Chhatiris that their daughters are accepted in marriage by the orthodox Rajput families.

The pargana of the present time contains 266 village, divided into 1,404 mahals; an unusually large number of the latter, 677, are owned by taluquars, 256 by zamindars, 293 of pattidari, and 17 by bhaiyachara communities, while 170 as subsettled excluding 40 taluquari mahals so held, and one is neglectled excluding 40 taluquari mahals so held, and one is neglectled to rest being mainly owned by the Rautars, Khattris and Branchars. Over 29 per cent. is subsettled, mainly with Rajputs and

Musalmans. The taluqdari villages belong to a large number of estates, chiefly owned by members of the Bachgoti clan, and all of them reside elsewhere except the taluquar of Bhiti, who holds 27 villages and 47 pattis The Raja of Kuiwar owns the Morapara estate of 14 villages and seven pattis; the Bache tis of Khajurahat hold the Kharagpin property of three villages and four pattie; the Rajkumar Raja of Ders, the Ramnagar-Dera and Mange-patti estates of four villages and 56 pattis; the Rajkawars of Meopur Dhamua 13 village- and 21 patti-, known as the Chissipatti estate; the taluquars of Nanomau has the Narharpur property of 13 villages and three pattis; and the Khanzada Bachgoti of Gangeo three villages. The talugday of Khaptadih owns the Pharia and Bangaon estates of 27 villages and nine patter. The Maharaja of Ajodhya owns three villages and two pattis known as the Khemwar and Pakri estates. Of the Musulman falugdars, Sayid Abu Jaim of Pirpa helds the Basantpar, Jaitupur and Klozadpur properties of 25 villages and 28 pattis, Mr. Rahat Husain has two small villages in Ba-autpur; and the talugdars of Samanpus own the Fatchpur property of four . illage-

## MALIPUR, Pargram west Taken Agranger in

This small village gives its name man airway station of school importance on the loop line of the Oad's and R I likeland Railway. Likes in the south-case of the pargane, in latitude 2.0 17' north and longitude 82° 36' case, at a distance of enclosion to some sat of Akharpur. The station is cornected by a matalled road with Julalpur and by an unmodified road with Postpur in the disaper district. The termer is encised about a mile east of 'e tation by the read from Akharpur to Junaper. There is a wy goods traffic to and from Mahput, and Alarge experitado in grain and sugar is carried in. The village result is of no raperance, and at the last consust contained only 779 persons, rost of whom are Alars. The area is 777 acres at dis assisted a Rs. 1 050; The proprietors are the Rajkumer talugulars of Memon Dimerua. . The towar adjoins the station and within its him. sas a small aided which. The place also preserves a post and telegraph office. The Kamilla festival is celebrated here annually in Kuar and is attended by some 5,000 persons from the neighbouring villages.

# MANGALSI, Parguna Mangalsi, Tahoil Fyzabad.

This place, which gives its name to the pargana, is a large village on the high bank of the Ghagra, in latitude 26° 47' north and longitude 82° 1' cast, at a distance of two miles east of It stands high and the ground is much broken by ravines. One of these runs mland as far as the main road in Lucknow and is crossed by a bridge built by Turah Ah, the . Hiwan of the Buhu Begam. Mangalsi at the last consus had a population of 2,118 persons, of whom 545 were Muselmans chiefly Shaikhs. Among the Hindus are many Pasis. There is r small bazar Loro, known as Mabaragganj, and a lower primare school. The lands of Mangalsi cover 3,290 acres and pay a revenue of Rs. 2,710, a considerable area is revenue-free, being assigned to the support of the old Imambara. The place is owned by a body of Slaikhs in poor circumstances. These people claim to belong to the oldest family in the pargana and state that their ancestors expelled the Bhars from Mangalsi, which derived its name from Mangal Sen, who, according to another tradition, was a Gautam Rajput. Mr. Woodburn in his assessment roport on the first regular settlement stated that the Sharkhs showed him a doed beging the date 760 Hijn or 1359 A.D. with the seal f Firez Tughlaq, appointing one Mahammad Alunad to the office of Khatib in Mangals: Another formers of the next year conferred the office of Qazi on Imam Fakhr-ud-din. A third, dated 989 Hijm or 1581 A.D. and bearing the seal of Akbar, assigned 100 bighas of land in pargana Mangalsi to one Shaikh Yusat, three farmense of Shahjahan also gave revenue-free grants is members of the same family.\*

## MANGALSI Pargana, Tahed FYZABAD.

This pargana occupies the north-western corner of the district being bounded on the north by the river Ghagra, which separates it from Gondi, and on the west by the Rudauli pargana of Bars Banki. To the east her Hayeli Oudh and to the south Kuandaus and Pachhimiath, the boundary on this side being formed, except for one village, by the Marka river. The pargana is a terrile populous and a highly-cultivated tract, well wooded and possessing

a smaller proportion of inferior land than any other portion of the district. The drainage is carried off by the two rivers, aided by artificial channels; one of these is an old cut known as the Tilai, which runs through the centre of the eastern half, and the other a drain leading from a large jbil in the middle of the pargana sets the Ghagra. This swamp at Kola, known as the Sanda jbil, as the only considerable expanse of water; but there are several shore at Katch, Diwai, Ibrahimpur and el-ewhere, mainly in the south. There is a soil is generally a sandy loam with occasional parches of The whole in the south-west it inclines to clay. There is a small area of dhak jungle, and user is seldom tound.

nom ca of the pargana in 1904 was 78,908 acres or 123 quare min norm is amount is hable to variation from year to year western Bin of the Ghagra. At the first regular settlement forward, nequil acres, while thirty years later it had rise to or Pilkbawa ortion of enitivated land has always been high, the Pilkbawa ortion of enitivated land has always been high, the eastern Bu 4 was ever 62 per cent. In 1904 the area under 6d and nequire 314 across or 604 per cent, it emparems decreased by Raja Duranted. The death of amount actually sultivated us and acquired ttended. The double-cropped area was 20,528 The chaef Bise a lugher ligure than that formerly recorded. Of the 14 villa, area 18,276 acros were classed as culturable, including 4, who is of groves; most of this consists if poor land cen brought under the plough The burion area was 13,013 acres, being in most part under water or occupied by ""s and roads, the actually unculturable portion being very mall. Irrigation is chiefly provided by the numerous tanks, and sigh the well-irrigated area has greatly mereased of late rears: unprotected wells can be dug almost everywhere, as was shown in the famine year of 1897. The principal crops are gram and peas, wheat and barley in the rabi, while in the kharic rice largely predominates, followed by muze, just and signicano. There is a considerable amount of garden cultivation.

The standard of husbandry is generally high and round the large village sites is exceptionally so. The chief cultivating testes are Kurmis, Muraos, Brahmans, Rajputs, Abirs and Musalmans. The high caste cultivators are for the most part to be found

in the taluqdar village; at the last settlement they paid on su average Rs. 4-25 per acre, as against Rs. 5-65 paid by low case tenants; their advantage thus amount- to 24-69 per cent., which closely proximates to the general average of the district. Of the whole cultivated mes 60.26 per cent, was in the hands of ordinary tenants at each rates; 12 67 per cent, was cultivated by underproprietors; 69 per cent. by occupancy tenants, and 458 per cent. was rent-free or held at favoured rates. Proprietors cula vated 14.81 per cent as sir or khudkusht Thogas Amented as a is very small, amounting to 78 per cent; the lasis, so held is precerious and of a very inferior quality. The lowering at the summary settlement was Rs. 87,831. This wares alsed at the regular assessment to Rs. 1,05 692, but was subsumerably reduced to Rs. 94,470. At the list settlement an cubar place i of 1864 per cents was taken, the initial grass demand less people chart and the net final revenue Rs, 1,06,321 The led state that the w alluvial mahals, which were assessed in 1904 thich derived to period of five years. These mahals are 12 more tradition most of them are lither uncultivated or very smissment report ? Maniba Kalan, Hajipur and Maholt arkha showed h

The population of the pargana in 1869, with the seal of souls, but in that year e-grain changes were mad to the office. In 1881 the total was 91,964, and this rose at the next over 200 to 96,086. The last enumeration in 1904 sho. Are asside take decline, the number of inhabitants being \$4,330 Ab whom 11.586 were Musalmans. There is no rowns in the pargana, with the exception of Rannani, but there is an unusual number of bags villages, such as Dhamahia, Happan, Baragaon, Deorakot, Pilkle wan and Kutelarkha Khurd, better known is Deorai Hinto Single. The markots, schools and pest-offices of the pargans will be found in the appendix

Mangalsi is well supplied with means of communication. It is traversed from east to west by the loop line of the Ondhole Robilkhand Railway, with stations at Sohwal and Barazu Parallel to this on the north part of main road from Fyrabalia Lucknow with a metalled brunch from Sohwal station to Ramahi and Dhamua ferry and an unmetalled approach from Baragaen station. From Sohwal an other road runs to Amaniganj on the

本面の日本が

couth-west, and joins the Rai Bareli road near Amona on the south-

Little is known of the early history of the pargana. Accordput to one account, Mangalsi was founded by Mangal Sen, a Gastam: while another story states that the aboriginal Bars were expelled by the Bais, who have long hold this portion of the arstrict. One of the oldest families is that of the Shaikhs of Mangaler, whose history is told in the article on that village. They, tax, allege that then ancestor obtained their lands from the Bours the remains of whose villages are to be seen at Kotdih, Pilkhawan Ibrahampur, Deorakot und elsewhere. In later days almost the whole pargana was held by the Bais and Bisons fermer are divided into two mun families, the crision and western, between whom there were incessant fends. Both churn descent from the Bais of Baiswara, but in both cases the claim is doubtful, The western Bass who sattled in Pilkhawan, Sarangapur and Chakware, acquired a large property of 36 villages, but only there of Principum have returned their estates. The headquarters of the eastern Bars was Raipur Jahlpur, who c their ancestors settled and acquired 52 villages, most of which were afterwards thad by Raja Darshan Singh. Some of the Bail became Musalwates and acquired an independent estate which they still hold.

The chief Bescu proporties are in Pachtimenth but they for but leld the village of Kundurkha, which I come tamous through Hada Siegh whose his one is given in the account of that place. To the north-west shore are several Chauban families, their read-partors being Dhamahra

A detailed account of the pargama was written by Mr. We odform, when settlement officer, and has been preserved in the report of the first regular settlement.\* Owing to the neighborhood of Figures and the presence of executed and Muhammadan colonies has outgains contains a number of Musalman romals and buildings, Some of these are of considerable antiquity, while others were halt more recently as the time when the population of Fyzabad Overflowed the boundaries of the city and many of Shuja-ud-daula's holdes took up their residence in Raurahi. These buildings are to be seen all along the Lacknew road, which follows the course of the old Nawahi road between the two capitals. Like the old road from Lucknow to Cawapore, its course is marked by numerous mosques, bazars, sarais and an astonishing number of wells, man of which are now in a dilapidated condition.

The pargana has undergone but little change in area since approximation. In 1869 the only alteration made was the transfer to Khandansa of a few villages in the south-west, beyond the Mark At the present time the pargana contains 115 villages divided into 657 mainles. Of the latter 332, including 171 subsettled, are leid in talaqdari tenure; 313 (of which two are subsettled) by zamindare. three by coparcenary communities, two by Government, and seven are revenue-free. The only taluqdar is the Maharaja of Ajodhya, who owns the Raipur estate of 62 villages; but this covers 49 bits acres of 62 per cent, of the whole pargana. Almost all the rest is neld by zamindari or coparconary bodies of Brahmans with 9,667 acres, Musalmans with 8,694 acres, Rajputs with 7,046, and Kayasths with 3.144 ucres. There are 408 acres of nazzel land and the restirled by Khattris, Tolis, Banias and others. About 22 per cent. of the whole pargana is subsettled, almost all of this being in the Ajodhya taluqa, chiefly with Rajputs, Brahmar, Kayastha and Musalmans.

# MILKIPUR, Pargana PACHHIMRATH, Tahsil BIKAPUR

A small village in latitude 26° 36' north and longitude \$1° 50' east, on the road from Fyzahad to Rai Bareli, at a distance of 20 miles south-west of the district headquarters. The road is law crossed by that from Amanganj to Khajurahat on the railway Millrips r contains a police-station, a cattle pound, a post-officion small road bungalou and a military encamping-ground. Market are held here twice a week, but the bazar is small and of purely local importance. In 1901 the village had a population of only 466 inhabitants; of these 49 were Musalmans, while Brahmans form the prevailing Hindu caste. The village, which has a total and of 476 acres and is assessed to Rs. 350, forms part of the Khapradi Sihipur estate and the taluqdar has a collecting station here.

MUBARAKPUR, Pargana and Tahail TANDA.

A small town standing on the banks of the Ghagra, in latitude

26° 32' north and longitude 82° 42' east, at a distance of two miles east of Tanda, north of the road leading from that place to Rampagar and Azamgarh. It lies within the limits of the revenue villages of Rasulpur and for administrative purposes is included in the municipality of Tanda. Muharakpur was founded by Mubarak Khan, the Khanzada taluqdar of Ha-anpur in the Sullanpur district. Rasulpur, on the other hand, is a much older place and gave its name to the estate held by a family of Shaikhs, the chief of whom was Muhammad Hayat of Tanda. In 1794 he son, Ghazanfar Ali, obtained the lease of Rusulpur, which then consisted of 54 villages, and in 1321 he left this to his son-in law, Abbas Ali, who held the estate till the mutany, after which it was confiscated for his persistent rebellion. Mubanakpan is a place of little importance; it contains two masonly mosques and three limda temples, a bazar in which markets are held (wice a week. and a lower primary school.

# MUHAMMADPUR, vide AMANIGAMI.

MUSTAFABAD, Parguna Mangaisi, Takad Fyzabad.

This village has in the extreme north-cast of the district, edjoining the Bara Banki border, in latitude 20° 43′ north and bugutude 81° 51' east, between the Oudh and Robilkhand loop live and the main read from Fy salud to Incknow ill way station here which is called Breagann, this being the name of the nearest inhabited site in the village. A road connects the Tailway station with the main road and thence continues northaurds to Beganganj on the old road to Darvabad in Baca Banki, The distance from Fyrabad is 19 miles. Must afalad is a thriving place, with a large population of weavers who sell their cloth at Rudauli and it the neighbouring basar of Muhammadpur, where there are several dyers. The population at the last census numoved 2,416 persons, the majority of them being Jula' as are hald twice a week in the bazar of Mastafabad, and a considerthe trade is carried on. The place also e n'ains a post-office and a large upper primary school. The village lands lover 984 acres and are assessed at Rs. 2,349. The proprietorship is varied; part belongs to the Maharaja of Ajodhya; small shares are held by

Upaddhya Brahmans, Baqqals and Bajputs; but the bulk of the village is at present held by a body of 31 Saiyid zamindars. These last claim descent from one Saiyid Mustafa, the founder of the place. He built the ancient mosque, which stands to the south of the village, and his descendants still resort thither twice a year on the occasion of the Id festivals. Their customary place of prayers, however, is another mosque, built by Saiyid Didar Jahan about the middle of the ninetoenth century. There is a third mosque over a hundred years old, which is supported by the weavers. The most noteworthy inhabitant of the place was one Baqar Ali, who rose to the position of darogha of the king's palace in Lucknow, holding that position from 1830 to 1840. He then returned with a large fortune and became the foremost Musulman of the pargana.

#### NAGPUR, Pargana Subhurpur, Tahsil Arbarpub.

A small town in the control of the pargana, well situated on the high right bank of the Ton-, in latitude 26° 17' north and Imputade 82° 40' east, at a distance of two miles south-east from Jalalpur, with which it is connected by an unretailed road. The distance by road from Akbarpur is 16 miles, and from the district headquarters 52 miles. The town is made up of several detached clusters of houses, reparated by ravines running down to the river. It is said to have been founded by one Saiyid Naqu some 300 years ago; but the name probably is of Hindu origin, and little is known of its past history. The place contains a basar, in which markets are held twice a week, and a lower primary school. The population at the first Oudh census of 1869 numbered 2 672 persons; since that time at has increased largely, the total rising to 3,903 in 1881 and to 4,083 at the following census. In 1901, bowever a marked decline was observed, the place containing 3,459 inhabitants, of whom 2001 were Hindus and 1,465 Musalmass. The latter are mainly of the Julaha caste and still carry on their ancestral trade of weaving, many of them going far afield to the mills of Bombay, Cawapore and Calcutta, Adjoining Nagpor on the north is the village of Dandwa, and here is a large Imambara built over 100 years ago by one Yar Muhammad, a weaver of Nagpur. He collected from the fraternity a sum of Rs. 4,000 for the purpose, each man setting aside towards the common

object the fourth of a pice from the price of every piece of cloth woven. When the king of Oudh heard of their liberality and piety he passed high encomiums upon both and ordered them to continue the subscription, but with this difference that the proceeds were to be paid to himself as a perpetual tribute. A large gathering takes place here at the Muharram and a similar assemblage, attended by some 4,000 persons and known as the Terahan fair, is hold on the 13th of Rajab. There is another large Imambara and Karbala in Nagpur, begun in 1880 and finished six years later, as is testified by one of the many Arabic inscriptions on its wells

Nagpur is administered under Act XX of 1856, which was introduced here in August 1885. The operations of the Act extend to a portion of the total area, the cultivated lands being for the most part excluded. In 1901 the town contained 52 houses, of which 393 were assessed to taxation. The income from the house tax was Rs 750, falling with an incidence of Rc. 1-15-4 per assessed house and Ro. 0-3-5 per head of population; and the total receipts were Rs. 1,002, including a considered to balance from the proceeding year. The expenditure was Rs 1,031, of which Rs. 440 were absorbed by the maintenance A. in town police force and Rs 180 by conservancy; of the rest, Rs. 360 were devoted to minor local improvements.

# PACHHIMRATH Paryuna, Jahail Bike Pur.

This, the largest pargana of the district forces the eastern and greater portion of the tabul extending cases ands from Khandansa to Majhaura of tabul Akbarpus. The northern boundary, except that of one village, is formed throughout as the Merha, which coparates the pargana from Mangalar. Herein Outh and Amsin; to the south is the Baltanpur deniet the translary for a considerable distance being formed by the Majtoi tower. After the Marha the most important draining channel is the Bism, which enters the pargana near the south west extreme and at or flowing in a winding course through he south-eastern portem enters Majhaura near Bhiti. These the streams drain almost the whole of the pargana, generally by nameal channels, though in the south-west some artificial entrings were excavated many years upon the middle of the western half there is a number of jhils, which

sometimes damage the villages in their neighbourhood, particularly those on their eastern borders, as the tendency of the water is to find its way towards the Bisui. There is another tract of lowlying ground in the south-cast, particularly along the Sultaupur border. The principal jbils of the pargana are those at Intgaon, Hardoia, Malethu and Rajaura, and those near Sibipur. The soil of the pargana is of average fertility, being in general a stiff loam with a tendency to clay in the depressions, and the pargana is interspersed with occasional patches of usar and dhak jungle.

The total area of the parguna is 224,316 acres or 350.5 square miles. The proportion cultivated is large, amounting to 56 per cont. at the first regular settlement, and rising to 59 per con. thirty years later. During the ton years that have elapsed sinc the last assessment there has been a considerable further increase as 138,164 acres or 61 5 per cent, were under the plough in 1904. Nearly half of this hore a double crop, the area of dofasts rice land being very large. Of the remainder 58,482 acres including 13,101 acros under greves were classed as culturable, and consisted for the most part of old fallow and waste which had never been brought under cultivation and would probably not repay tillage, the barret area was 27,700 acres, of which all but 2,224 acres of actually unculturable land was oither covered with water or occupied by Means of irrigation are generally ample, and sites and roads about half the cultivated area is watered in ordinary years. Wells which have greatly increased in number during recent you form the chief source of supply, but the numerous tanks are extensively used when the season permits. The khard is the chief barvest and the most important staple is not, which covers some 45 per cent, of the whole area sown. Its place is taken in the ram by gram and peas. The other chief crops are wheat, sugarcana just and maize. There is also a fair amount of opium and toba on but very little indigo.

The standard of agriculture is generally high. The chart-cultivating casto, are Brahmans, Rajputs, Musalmans, Musalmans,

by ordinary tenants at cash rates. No less than 24-33 per cent. was in the hands of under-proprietors, 5-84 per cent. was held by occupancy tenants, 7-33 per cent. was rent-free or leased at favoured rates, and 9-91 per cent. cultivated by the proprietors as ser or khudkasht. The remaining 39 per cent. was grain-rented, such land being as usual of a very inferior quality.

The revenue demand at the summary settlement was Rd. 1,96,997. At the regular settlement made by Mr. Carnegy and Captain Erskine this was enhanced to Rs. 2,62,201; but subsequently as the resent of numerous politions reductions were made, leaving the revenue at Rs. 2,42,408. At the last settlement an enhancement of nearly 15 per cent, was taken, the first demand being Rs. 2,79,040. This includes the nominal exemue, the actual amount payable being Rs. 2,69,548. The initial incidence was Rs. 2.1 per aero of cultivation.

The population of the parguna at the first Outh census of 1869 numbered 173,459 persons. This rose in 1881 to 198,303, and in 1891 to 216,550. The last enumeration showed a still further increase, the number of inhabitants being 922,411, giving a density of 635 persons to the squire mile. Classified according to religious, there were 208,747 Hindus 13,805 M estimates and 50 others, 84kbs, Jains and Christians. There are no towns in the pargana and but few villages of any size or importance, the largest is Shahganj, the readquarters of the Ajodhyao case. Other places which have been separately mentioned are Bikupus, where the tabil is located. Milkipus and Haelagarij which contain policestations. The schools, markets, fairs and post-succeed the pargain will be found in the appendix.

The pargana is traversed from north to scula by the Estabed-Allahabad Railway, with a station at Kinjarahat. This curs parallel to the metalled road from Estated to Surfaceput and Allahabad. The western half is traversed by the road from Eyzabad to Milkipur and Rai Bareli, and its branch leading through Shahganj and Palia Lohani to Isauli. In the cust there is a road running from Darshannagan to Haidenganj. One cross-read rins from Amaniganj through Kuchers and Shahganj to join the Allahabad road at Jalahpur, a short distance north of B kapur, whence it continues east to Majhaura and Akbarpur; another from Milkipur

to Palia Lohani and Khajurahat. Soveral roads radiate from Haidarganj, leading to Bikapur, Chaura Bazur, Bhiti and three points in the Sultanpur district.

The earliest known inhabitants of the pargana were the Bhars, whose headquarters are said to have been at Rath, now known as Rahot. This was afterwards called Pachhimeath, to distinguish a from Purabrath, another Bhar village; although it is more probable that Pachhimeath refers merely to the western portion of the trace lying between the Ghagra and Gumti rivers. The pargana is will to have been divided into cloven tappas, but these subdivisions have disappeared. During the Nawahi there were 856 villages, which were reduced to 407 after annexation. Of these, 104 were trace ferred to Amsin and Mangalsi, while 52 were added from Haveli Oudh, Majbaura and the Sultanpur district.

The Bhars, remains of whose villages are to be seen at Integron, Rabet, Tardsh, Gandhaur and elsewhere, are said to have been first disposessed by the Chaubans of Ahran, who elem descent from one Rai Bhan Rai, who migrated to this params some 450 years ago and gained possession of a large tract of country in Pachlimrath, Khandansa and Sultanpur. His assons, Jalo Rai and Dunia Rai, divided the property; but the estate of the former was swallowed up by the Bhale Sultans some two centuries ago. The rest was retained by the Chaubans till annext tion, when they lost the Integron estate. They now hold 12 villages in this paryana and eleven in Khandansa

There are many families of Bass in the parçana. All of these state that their ancestors came from Baiswara; but the story of probably devoid of foundation in every case. It has been suggested that all these Bais were originally Bhars, and the theory is supported by the fact that they are discovated by the Tibol chandi families. One of the oldest Bais colmists is that of limits said to have been founded by Jagat Rai, who had two some Rudra Sah and Modui Shah. The former established the Biory estate of 27 villages, and the latter the Mahdauna property of equal extent; both have become absorbed in the Ajodhya talutand the Bais are now reduced to the position of under-properties or mere tenants. Another family is that of Uchhapali tounded by one Newad Sah. His descendants acquired some 20 villages.

but now enjoy under-proprietary rights in portions of Uchhapali akme.

The Bais of Malothu state that their ancestor, Jamoibhan Singh, some 250 years ago acquired 84 Bhar villages in this pargana and in Baraunsa of Sultanpur. The 42 villages in Pachhimrath are now demarcated as ten, and are still held by the Bais as underproprietors. Another family is that of Gandhaur; but this, too, has been reduced to a position of insignificance. In Bais of Rampur Bhagan and Tikri have been more fortunate. Their ancestor was Bhagan Rai, whose sons, Motak Rai and Chhatak Rai obtained a farman for 101 villages from Jahangir. For many years they held the office of chaudha in tape a Rahet, but this was lost long before annovation. The descendants of Chhotak Rai are still to be found in Rampur Bhagan and Tikri, and hold Al villages in proprietary right. Those spring from Motak Rai have four villages in subsettlement.

At a later date the Bachgoti of Kurwar in Saltunpur extended their possessions in this direction and founded the taluque of Bhiti and Khajuralan, of which an account has been given in Chapter III. Soon aftervaids the targbans is established the taluque of Khajuralin and Sihipur, and listly came the Sakuluque of Mahdama, now represented by the Mahama of Ajodhya.

The pargana now contains 5(8) villages divided into 1,141 mahula. Of the latter, 553, including 241 stars it'd, are sweed by taluquary, 198 by samindais, 263 by particular codies, and two are bharyachara; 71 are subsettled, as closes of the contribuquar estates, and 53 are revenue-free. The last cover 5,621 coss, held chiefly by the sons of Naw ib Shafa-ud-darda of Pyzahad and the Saryius of Lhadars. Of the rest, somewhan ver 76 per cent sheld by taluquars, 11 per cent by coparecentry todies, and seven per cent, by single zamindars. Nearly tolt the pargane is in the hands of Rajputs and about one-third is the property of Brahmans; the rest is chiefly owned by Musalmans, Kayasths and Bairagis.

The chef taluquar is the Maintraja of Ajodhva, who owns 150 villages and 26 pattis. The Thakurain of Khapradh Simpur bolds 66 villages and 59 pattis; the Barigons of Khajurahat have 34 villages and 21 pattis, and their kinsmen of Bhui hold the Beni Gaddopur estate of 18 villages and 14 pattis. Another Bachgoti,

the Thakurain of Samrathpur, owns the Reona estate of eleven villages and one patti; two villages and one patti, known as Palia Partab belong to the Khanzada Raja of Hasanpur; and the Paroma estate of three villages and one patti is held by the Khanzadas of Maniarpur.

The only change in the area of Pachhimrath made at the redistribution of the parganas in 1569 was the addition of almost all the portion lying south of the Bisui, which had been formerly included in pargana Baraunea of Sultanpur. The other boundaries were left practically unaltered.

# PILKIIAWAN, Pargana Mangalsi, Taksil Fyzabad.

A large and scattered village in the west of the pargona situated in latitude 26° 45' north and longitude 81° 54' vas, between the railway and the metalled road from Fyzabad to Lucknow, at a distance of 15 nules west of the former. The man site fies close to she line; but the village lands, which cover 2,142 acres, extend for some distance beyond the read to the north. It. only claim to notice is the size of its population, which at the best census numbered 3,154 inhabitants, of whom 279 were Muschus e., there is a large Pasi element among the Hindus. The village is said to have been founded by one of the Bais Rajputs, who are centuries held the greater part of the pargana. Their colony was established by one Dalan Sah, one of whose sons was Bharat Surgi the traditional builder of Pilkhawan The place still commune many of the Bais, but their proprietary right has passed to the Maharija of Ajadhya, whose uncestor. Raja Darshan Singh, samealmost all the Bars possessions in these parts. The revenue of the village is R 3,686.

The large bizar of Muharakganj, with a flourishing unpoprimary school, lies in the northern part of the village, upon the Nawahi road between Fyzabad and Lucknow.

# PURA QALANDAR, Paryana Haveli Oudh. Tahan. FYZABAD.

This small v.llage is only descring of mention as possession a police-station. It lies in latitude 26° 42′ north and longicade 82° 9′ cast, on the cast side of the main read from Fyzabad m

Bikapur and Sultanpur, at a distance of six miles south of the district headquarters and four miles north of Bharatkund radway station. Para Qalandar is morely a hamlot of Muinuddinpur, and contains but three or four bouses. In addition to the thana, there is a entitle-pound and a small aided school. The village torms part of the estate of the Maharaja of Ajodhya. On either side if the road the land is depressed and in sousces of bears there it to road is liable to submersion for a distance of a nuiter, more south of the police-station. The railway ombankment which has a shore way out of the west was broken by floods in two places in 1965.

## RAMNAGAR, Pargana BIRITAR, Tabsil "ANDA.

A small village non the border of the A magach district, situated in latitude 26° 26′ north and longitude 82° 54′ out at the junction of the roads building from Tanda to Bahampar, Akharpur to Kambrun, and Julabjur to Chalora on the Glagga. The place is only of importance as possessing a polices at the careful of which includes the eastern port on of the laterative group at the also contains a post-office, a carde-pland at a lateraturp expensive school. Markets are field here where a took har to trade is small. The population at the last centers mantened 934 persons, including 109. Musalmans and printy Karaca, the values is also have an area of 931 acres and are also adacted 1°00. They are divided for a two malads field for the 2°00 acres and Maketah.

# RASULPUP DARGAIL Pargune Portar, Julied Canna

A small village with a population of an a Servard living between Baskhari and Kie'd anchin. It is not be deserving of mention as being a noted place of Musalman volor candle mail ing the temb of the celebrated same, Mak' the Ashari Cosoniv goes that the man was the son of Thrama Servard to keep at Espainan. At the death of his father he succeeded him on one the note the parly ago of fifteen, but after reignory the ventures transfer at he favour of his compet brother. Muhammat Shah, and being determined to devote the remaind of the layer of religion he assumed the pilgrim's gueb of the travelled through Mindostan. Here he became a pupil of Shar Ma-m-Haq of Pandua

in Bengal at the beginning of the fourteenth century, from whom he received the title of Jahangir. He then wandered from town to town in Upper India in search of a spot which had been indicated to him as his resting-place. In the course of time he reached Jaunpur, which was then under the sway of Ibrahim Sharqi. The monarch received him favourably and tried to induce him to remain there, but he proceeded onwards to Rasulpur, whic', was then the seat of a famous Pandit, named Darpan Natla. After protracted struggle between the exponents of the opposing creats the Musalman was victorious, and the Brahman adopted Islam under the name of Kamal-ud-din. Makhdum Ashraf then settled in this place, which he called Ruhabad, and here he ended had an at the age of 120. He was succeeded by his nophew, Abd-ut-Razzaq, whom he had brought from Persia and who had married the daughter of Ala-ul-Haq. Abd-ul-Razzaq changed the name of the village to Re-ulpur; he left five sons, of whom the eldest dies. childless; the second, Hadi Ahmad, settled in Jais of Rai Barch, the third, Fand-ud-din, went to Daryabad; while the other two Shah Hasan and Shah Husem, temained in Rasulpur. This descendants built Kichhauchha and Baskhari and enlarged der possessions by means of cont-free grants from various rulers. These of them still hold a portion of Rasulpur, while the rest forms part of the property of the Palwar talue days of Haswar and Makut . The total area of the village is 537 acres and the revenue Rs. 13 s.

The shrine of Makhdum Ashart is built on rising ground which is nearly surrounded by water. It is regarded with great veneration by the people of the neighbourhood, and is much resorted to from all parts of the Musalman would by persons who desire its service for easting out devils. The subjects of the operations, from whom devils are east one, are almost invariably women not only Musalmans, but Brahmans and other Hindus undergoted treatment, and a case has been known where a family of Jowe carrefor the purpose from distant Adon. The season when the palgrant age is undertaken by large numbers is between the full most of Kartik and Aghan. Those is no particularly exceed (12) people coming and going for a day or two and then returning to their homes. The estimated average attendance is 60,000, but more than 5,000 are seldom present at a time. Merchandise of ever)

description is brought here from Lucknow, Benarcs and other distant places, and a brisk trade is carried on during the gathering. Another large assemblage occurs at the end of the Muharram festival, when the Sajjada Nashin, the spiritual successor of the saint, puts on the sacred cloak known as the kharka.

#### RAUNAIII, Pargena MANGALEL Tahsu FYZABAD.

This is the largest place in the pargana and has long surpassed Mangalsi in importance. It has in latitude 26° 167 with and longitude 81° 50, east, on the high bank of the Ghagra, at a distance of eleven nules west from Fyzabad, and two nules north of Sohwal railway station. From the latter a necoled breach runs to the provincial road and continues not twards to Dhemaa ghat on the Chagra near the fown. Rauna'n contains a policitation, a post-office, a ca'tle-pound and an upper primary school. On the road to the south is a military elecurous-ground and an inspection bungalow. The thans is located in in old for, the piace having been t'e bendquarters of an and and a sation for troops in Nawahi days. There is a massiar saiat also duting from Nawabi times, and a number of old buildage. These arclude cloven massing mosques, two adjahs, and three library comples. Near the town are the timbs of two mortyrs, named Aulia Shahid and Makan S' ahid, who are said to have belonged to the aimy of Sayid Sain. To 1 - southers of the town is a Jam temple darrog from about 1800% for concled within high walls with an outer walled guidon. The ice, le is till custad style, out is raised upon a high planta with tour flegues of supp leading into it. It contains an image of Pa aso ith in black some and several smaller figures. In the middle of the southern wall if the tempte sucks are is a shrine with trass doors and deeps to and murble thor and walls, contaming the relation of Relati Dec, the founder of the sect, with seven other similar figures of diminishing size. The summers and to have been creeted by the Jains of Calcutta and Lucknow.

Ramahi is a poor town with it, industries. The Lazar is of the importance and the place propably twee its present size to its situation on the old Lucknew road. In 1881 the population numbered 5,210 souls, but since that time there has been a considerable

decrease. At the last census there were 4,206 inhabitants, of whom 1,643 were Musulman; and 2,563 Hindus, including a large proportion of Telis. Raunahi is said to have been originally held by Bhars, who were ejected by Savyid colonists from Sibar in the west of the pargana. One-third of the village belongs to the Kayasth tannly of qanungos, who claim to be descended in the fifteenth generation from Ru Gobardhun Das, who purchased a share from the Saiyuds. A small portion is held by a family of Khattris who have settled here for twelve generatioes. At the present time the lands of Raunahi are bold partly by the Malaraja of Ajodhya and partly by Sayide, Khuttris and Kayasthe, while small shares are also owned by Sharkhs, who claim relations up with the Mangals family, and by a Pathan connected with the colony of Salebour. The total area is 1,009 acros and the revenue Rs. 2,093. There are tour small revenue-free plots granted to fagirs and servants of the Nawabs in the days when Fyzubac was the capital.

Raunah was for some years administered under Acc XX \*\* 1856, but the operation of the Act was withdrawn in 1900

## SHAHGANJ, Parguna Pachhimbath, Tahsil Bikai Ur.

Shabganj is the name given to the bazar of the village of Palarpin or Magimpur, which he in Latitude 26° 38' north and longitude 82° 3' east, at a distance of swelve miles south-west i Fyzabad, on the road leading to Haringtonganj and Isaali a Sultanpur. This is crossed to the north of the village by the read from Amanigan; to Bladarsa. The place is notewortly as contait ing the residence and fort of the Maharaje of Ajo liva and his predecessors. Nothing is known at the toundation of the birth, and it only assumed prominence when seized by Raja Dar and Single, It was here that Maharaja Man Singh received the Fyzabad fugitives during the mutmy, and his fort was afterward besieged by the robels in the summer of 1853 till relieved to shi Hope Grant. At that time the fort was regarded as impregnable by native troops. It was defended by massive mud walls of which were mounted 14 gaus. The walls still exist, and there is an inner defence of a masonry wall also. The village is of considerable size, having an area of 2,100 acres, assessed to a revenue of Rs. 2,282, paid by the Maharaja as proprietor. The population at the last census numbered 2,993 persons, including 556 Musalmans and a large number of Ahirs. In the village are a mo-que and six Hindu temples. The bazar is of a fair size and markets are held here twice a week. Shahganj also possesses a dispensary, an upper primary school and a branch post-office.

#### SHAHZADPUR, Parguna and Tales t Akbarpur

This town, which for the purposes of its administration under Act XX of 1856 : incorporated with Akharpur, lies in Laitude 26° 25' north and longitude 82° 33' east, on the eight or southern bank of the Tons, and on the main road from Fyzabar to Jampia, at a distance of a mile south-cast from Akhrepur Other roads lead from the place to Jalalpur, Desipur and Sultanpur The lands of Shahzadpur cover but 70 acres, and are as essed at Rs. Ct. They are owned by a body of Khattris, who also hold Majbaura and other villages, which they have recently acquired. They are new men and me not connected with the King of family mentioned by M: Carnegy as having formed, doubled here, and obtained a cont-free grant of the band free Akout Shahordour on the south is the village of Singhault, stach prior to the foundation of Akharpur was it e headquarte of the pargana. The name is said to be a corruption or Saglawalgace, the fort of Sajhawal, a Bhar cincitain inghach now be east of the fairid saturdars of Prepare Shahzadpur uselt is a previosque place, but contains lattle of interest. Mulkets are cold note, who a week, and there is a small from fundry to decrease. The place is the centre of the cane-null business and the tade in gritte and hides for the east or the distinct. Large garderings occur in the common of the Ramilla and Managerm feet vils, and also at the Gar Charawan fair in Bladen. Other laws he need to Karrik and Isaisakh, but the attendance is magn framt

SOHWAL, Parguea MANGAUSI, Toked PAZAPAD.

A village lying in latitude 26° tot nor h and longitude 31° 59' cast, on the loop line of the Oadh and Rohlkhand railway, ome ten miles west of Fyzalad. There is a varion here, from which a metalled approach road runs north to the provincial road

and thence to Dhemua ghat near Raunabi on the Ghagra. Other roads lead south-west to Amaniganj and south-cast to Daulatpur on the Rai Bareli road. Just south of the railway-station is the thriving bazar of Suchitaganj, from which a considerable export trade in grain and other articles is carried on. The bazar lies actually within the limits of the large village of Khirauni, and contains an upper primary school. Sohwal itself is a very small place and its only claim to mention as the fact that it gives in name to the railway-station. At the last consus it contained but 330 persons. The village is the property of the Maharaja of Ajodhya, but the old Bais zamindars have under-proprietary rights. Suchaganj, on the other hand, is a well-populated place and contains about 2,500 inhabitants. The market days are Monday and Thursday in each week

## SULTANPUR, Pargana BIRHAB, Tahsil TANDA.

A large village in the extreme castern corner of the district, lying near the Strju Nadi, in latitude 26° 17' north and longitude 83° 5' cast, on the read from Tanda and Rammagar to Azamgurk, at a distance of 32 miles from Tanda and 70 miles from Fyzal 20. A short branch road leads north to the Kambaria terry on the Ghagin. The place is chiefly neticeable as being one of the beadquarters of the Palwar taluques, of which an account has been given in Chapter III. The original name of the village was Baltampur and it is said to have been founded by Bali Ram, the ancestor of the Birber Polyars. At a later date the bases was established by Raghunath Singh, who gave is the name of Sultaupur. At present the revenue mauza is known as Sultanpur and the batar as Baltampur. The place was at one time administered as a tors under Act XX of 1856, but the operations of the Act were with drawn in 1901. Besides the bazar, in which markets are held twice a week, Sultanpur contains a district pest-office and vernacular middle school. The population in 1881 numbered 2,325 persons and at the following census had rison to 2,389 souls. In 1901 the total was 2,147, the place having somewhat declined ? recent years. Musalmans form over one-fourth of the number of inhabitants; most of them are Julahas, who are engaged in their ancestral occupation of weaving. In former days the practice w

sati appears to have been very prevalent in this part of the district, for not away from the town there is a perfect gravoyard of sati monuments. The old Palwar fort has been deshoved. At the time of the mutiny it was regarded as one of the parameter, in the district, though inferior to that of Makrihi.

#### SURHURPUR, Pargana Surityepur, Taksil Akbarpur.

The place which gives its name to the parganars a village of no great size, lying in latitude 26° 15' north and longitude 80° 40' east, on the pouthern boundary of the district. The place is built on the banks of the Mail or river, and through it runs the mad from Fyzabad to Jaunpur, winch is joined a shore distance to the north of the village by that leading from Tanda. and runs north-east to Jalalpur, a distance of five miles. Three miles to the north-west is the Malipur radway station. The read crosses the Maibe, by a fine masonry budge, which is said to date from the time of Albar. Surhurper is a voca ancienc village and contains the runs of an old fort which local tribution assigns to the Bhars. The story goes that this place was the secondhold of a Bhar chief, named Schandal, from whom the name of the pargana is traditionally derived. It is also said that it was once held by a Jogs, named Subha Nath, who attracted the attention of Saivid Salar. The invader proceeded against him and put him to ceath, together with many of the Bhars, who resisted his attack. There are also two old shrines of Muhammadan saints; one of the east known as the dargab of Surwar Pic, who came lither from Streak and lived and died in he village. Small gatherings take place at his temb on Thursdays. The other is the daugah of Shah Nur, who care, from Arabia and settled he e, building for horself a tomb on the model of that of Makhalum Ashrat at Rondyne. The place remained for a long time in the hands of Suyad camind as, many of whom obtained posts under the native government. It was subsequently absorbed into the talagrof Samarque. At the last ceasus Surburpur contribed 1,421 inhabitants, of whom 152 were Musalmans; Brahmans are the most numerous Hindu caste. There is a bazar here of some small importance and markets are beld twice a week. The place also contains a large upper primary school.

#### SURHURPUR Pargana, Tahsil AKBARPUR.

This pargana now forms the eastern portion of the Akbarpur tabsil, but until 1904 was included in Tanda. It lies in the southeastern corner of the district, marching on the south and east with Azamgarh and touching the Aldemau pargana of Sultanpur on the south-east corner. To the west lies Akbarpur, and to the north Birbar and Tanda. Some detached villages lie within the limits of Azamgarh entirely out off from this district; these include Deodih on the east, and Mobiaddinpur, Oril, Ramopur and anumber of small chake on the south. The pargana is drained by three rivers. In the north is the Taunri, which takes its rise in a sories of swamps beyond the north-west corner and follows the boundary till it reaches the Azamgaih district; it is a sluggish stream and in years of heavy rainfall is apt to flood the villages on its banks, The central portion is drained by the Tous, which for a shut distance forms the western boundary of the pargapa and then term to flow through the centre; after a sinuous course it leaves Suthurpur in the extreme south-east corner and flows into the Azangael. district. The third stream is the Majhoi, which forms part of the southern boundary and joins the Tons in Azamgach. The pargain is thus generally well drained; but occasionally, as in 1871 and 1894, the Tons and Majhor rise in flood together and swamp the south-eastern portion. The Tons has in most cases a fairly does and wide bed, and only a few villages on its banks are liable to mundation. In the north-east corner along the Birhar boundary there is a number of thils and the land suffers much in seasons. " excessive rain.

The soil of the pargana inclines generally to clay, except in the neighbourhood of Jalahur, where there are some excellent villages with a fair amount of garden cultivation. The barrent part is in the east, which contains a large area of user and i covered with patches of dhak jungle. Between the Tons and the Majhoi the soil is generally good, clay being less prevalent there as is also the case in a few villages in the north-west of the pagans.

The total area is 92,370 acres or 144 square miles. At the first regular settlement 54 per cent. of this was cultivated and since that time the development has been rapid. At the last

assessment as much as 60,046 acres or 65 per cent. were cultivated. and this area has been maintained in subsequent years. In 1904 there were 60,353 acres under the plough and 21,321 acres bore a double crop. The proportion of the latter is somewise lower than in other parts of the district, largely owing to the fact that in the lowlying lands near the rivers the soil is too sail as a rule to admit of cultivation in the rabi, and only ree is grown. culturable area amounted in 1, 195 arcs or 29 p. cont. included 2,630 acres under groves and 3,655 reres of land that had never been tilled, much of it being probably to pure to repay cultivation. The barren area was 14,513 acres in 24 per cent., and of this all save 5,471 arres, consisting chiefly of user, was other under water or occupied by roads and builded. Me us of irrigation are abundant and practically all the land that to pure water 's angated, while unprotected wells can be dur wattout difficulty. when required. A noteworthy feature in the bistory of the parruna is the extent to which the tanks and judshave been supplinted by wells for the purpose of irrigation since the flest regular settlement. The two largests are appropriately equal in area; in the kharif ries very largely prodoming established by sugmeane, which is extensively grown, in the rain back what take we lord, a life giam, peas and wheat occupy the halk of the r meaning area. There is very little poppy cultivation but a to south incluse is still grown to some extern.

The cultivation of the pargano is generally good, but very variable in quality. The chief cultivation easies are B almons, Alms, Chanars, Rajputs, Massimans and Pasie. Lawrer 'e terants largely predominate, folding about two-third of the state are and at the law assessment they pard an average record Rs. 7-65 per and as against Rs. 1-59 paid by the provideged lighters, redding fors, the advantage of the latter being or an average 1 is than 19 are ont. As much as 70-85 per cent in the last are reliably ordinary tenants at each rates; 15% one corn was cultivated by ordinary tenants at each rates; 15% one corn was cultivated by the proprietors as sur or khardkasht; 6-2% one of the last of the respective, and 36 per cent, by occupancy tenants. Of the res., 2-75% per cent, was rent free or hold at involved rates, and 1% per cent grain-rented, the last being as usual of a very poor description. The revenue of the pargana at the summary settlement was Rs. 66,492,

and this was raised in 1865 by Mr. Carnegy to Rs. 98,940, the subsequent revision resulting in a reduction to Rs. 94,330. The pargana suffered greatly from the heavy rains of 1894, but has shown a great development since the first regular settlement. At the last revision the initial demand was Rs. 1,18,900, giving an enhancement of 25.9 per cent. and the net final demand, Rs. 1,29,205 or 37 per cent. in excess of the old revenue. In spite of this great addition, only 42.9 per cent. of the accepted assets was taken, while the average incidence was Rs. 2.17 per acro of cultivation.

The population of the pargana at the first Oudh census numbered 82,927 souls. This rose to 92,037 at the following census of 1881, and to 196,904 in 1891. The last onumeration showed a decrease, the total being 100,930, of whom 90,524 were Hindus, 10,935 Musalmans, and eleven Jains. The pargana contains the two Act XX towns of Jalahp ir and Nagpur, which have fairly large bazars and a considerable amount of export trade. There are few other places or any size of importance, and only Surher pur itself has been separately mentioned. The markets, fairs, schools and post-offices in the pargana are shown in the appendix A small Musalman fair is held at the village of Bhiaon or Maganapur in honour of one Saiyid Masand, who is said to have come from Arabia at a very early date.

The pargana is somewhat poorly supplied with means of conmunication. Through the extreme south-west passes the read here Akbarpur to Jaunpur passing through the village of Surhupur close to which it is joined by the road from Tanda. From Mahpur station a metalled read leads to Jalabour, where it meets in road from Akhaijar to Ahraula in Azamgarh Other roads (" from Jalaupur to Baskhari on the north, Ramnagar or the north cast, Mittupur on the south, and Surhurpur on the eath-west A short road also connects Jalalpur with Nagpur; but beyond the Tons in the eastern portion of the pargana there are pruemeally b roads. There are no permanent bridges over the Tone, ait 109 4 one is much needed at Julahur. It is crossed by ferries a latter place, Nagpur, and several other villages. The river - novigable for the greater part of the year, and a considerable walke " still carried on by means of boats in hides, grain and dried fish between Jalalpur and the markets lower down.

The pargapa derives its name from the village of Surburpur. which is said to have been called after Schandal, a Bhar chieftain. Remains of the old Bhar villages are to be found at Surhurpur. Masora, Deodih and Bhujgi, while large numbers of B'ars still reside in this pargana. The Bhars seem to have been displaced by the Palwars and several Muhammadan colonists. Surhurpur gave its mame to a mahal in the days of Akbar, but the present pargana is the result of many changes. The boundary was defined anew in 1801 when Sandat Ali Khan made over the search districts to the British; by this transfer Surhurpur lost the tappe of Pakarpur and portions of seven others, comprising 199 villages now form d into the Mahul pargana of Azamgarh. Those villeg , all formed part of a single estate owned by the Saiyuls of Mahal, a property founded by Shor Jahan and Shanshe. Jahan to the middle of the eighteenth century. The property was transferred to the British Government without reference to its situation—a step which was the cause of the existence of the detacked islands belonging to the pargana which lie within the Azangarh territory. The property was retained by the Snivids till the day - & Raja fradas Jahan, who proctained himselt Nazim of Jaunpas in the muliny and was hanged for rebollion. His daughter tearlied Malik Hidayat Husain of Samannur,

The chief landing kindholders are the Bantaria Calwara, an account of whom has already been given in Chapter III. These Palwars were the first to offer a successful re-istance to the aggresssions of the Raylumers of Bultanpur. There was a lone period of warfare which terminated in 1775 after the build conductive the village of Masora, when Mad'ie Sing's of Pera and 300 Rajkuman lost their lives. There are now few Ma a man families of importance. One, founded by Smukiis Arzam and Nizam-ad-din Who are said to have come from Ghazni, or of to a side to the Village of Bongaon where then descendant, Stark Globalan Yacia batic the fort of Yasıngarh. This person rose to be naily smoal to of Jauupur and Ghazipur and acquired great power and influence; be took proprietary possession of much of the surrounding country. but the property was soon lost by his descendants, who now subsist on 80 bighas of rent-free land which they hold from the taluquars of Samanpur.

At the present time the pargana contains 245 villages divided into 1,278 mahals. Of the latter 423 are held by talugdars, but 57 of these are subsottled; 218 by zamindars, 428 by pattiders communities, and nine are bhaiyachara. In addition to these, 195 other than talugdari, are subsettled, the superior proprietors being zamindars or coparcenary bodies; three are revenue-free, one nazul, and one Government property. Altegether about 63 per cent, of the pargana is held by taluquars. The largest property is that of Ashrafpur and Jalalpur owned by the talugdars of Samanpar: it consists of 32 villages and four pattis. Jafar of Pirpur owns the Ismailpur estate of 18 villages and 12 pattis, and Mir Rahat Husain of the same family three villages au ! 11 pattis. One village also belongs to the Saiyid taluqdar or Kataria. Of the Rojkumaus the Raja of Dera owns nine villages and 38 pattis, known as the Birma estate; and the taluquare of Meopin Dhaurua hold the Bhasman property of two villages and four pattis. There are two taluques held by the Bantaria Palwars as well as a number of smaller estates belonging to the members of the same clan. The taluquar of Tighta owns 14 villages and 17 pattis, and his kin-man of Mundehra 15 villages and seven patter The Bihar Palwars also own number of villages forming the Babura estate This is divided between the four houses of Haswa Makrahi, Lakhanpur and Sultanpur. Lastly, two villages knove as the Fakharpur estate belong to the taluquar of Khapradih Silvpur. The remaining proprietors are of little importance, the chest landholding castes being Rajputs, Brahmans, Khattris and About one-touth of the whole area is held in sub-Kavastha settlement.

Prior to 1869, the area of the pargana was very different from that now comprised in Surincepur. The northern boundary was formed partly by the Tons and partly by a line running due east from Jalalpur, on the west it included a large portion of the modern Akbarpur, and on the south the pargana extended into the present pargana of Aldemau in Sultanpor.

TANDA, Pargana and Takeil TANDA.

The capital of the pargana is a large town, lying in latitude 26° 33' north and longitude 82° 40' east, on the read from Fysshed

to Azamgarh, at a distance of 37 miles east of the former and 12 miles from Akbarpur, with which it is connected by a metalled road. Another road runs eastwards through Haswar and Ramnagar to Sultanpur, and from it a branch takes off at Mubarakpur and runs south to Surharpur and Jaunpur. To the north of the town at a distance of about a mile flows the rivir Chagra, which is crossed by a terry. The town lies on the lands of several villages besides Tinda proper; one of them is Sakerwa', which has a large site to the south. Another is Asopur, which formedly gave its name to a large estate.

The word Tanda means a carryan, and denotes that the price was an encamping-ground for Banjaras who canned their goods across the Ghagra by the ferry here. In process of time the camp expanded into a town, and this was granted by Farruch Sayar to Muhammad Hayas, the representative of the Rasulpen family of Shaikhs. Since that time, the place has floreshed greatly rapidly became populated by all classes, but in ore especially by Julahas and Hindu spinners, who soon toquired a widespread reputation for the excellence of their york that Ali Khau was much interested in the prosperty of he place. A Eulopean trader, named Mr. John Sott, settled here, and note a bis influence the cotton trade was developed largely. He cold be again of the entire pargana and collected the axes of the away which then consisted of customs, expise, have thuck a use our house and near rage dues. He hold the jag, raill 17th, and a ston, weed into the hands of Ghazanfar Ali of Rasuly is and if say theat Aspier son and nephew of Mulammad Hayar; bu short arrewards the place was taken under direct management and the caxe, wer collected by the government of other with the line is vonce. 1800 the former were leased to one Qadii Baklan, I to or becaut of his unpopularity his place was taken on a guerram at datograin whose time two new taxes were introduced, see if 21 per cut on transfers of property and the other of ten per tent, on a cutgages. Building sites were sold by the estate to intending perchasers, each of whom had to pay a fee to de former jugirdar. These sources of revenue were discontinued u. the time of Sandat An Khan, and thereafter the proceeds of the groves, the loom tax and the marriage tax were farmed out at Re. 326 per annum and

continued to be thus treated till annexation. An account of the manufactures of Tanda and their history has already been given in Chapter II. The weavers still carry on their trude to a large extent, but the manufacture of the fine jandani cloth is insignificant in comparison with the amount produced fifty years ago.

Besides the tabsil, Tanda contains a police-station, a post and telegraph office, a cattle-pound and a dispensary. There is a middle vernacular school here; the hearding-house which stands some distance away was the gift of Mir Abu Jafar, the talugder of Pirpur. There is also a small municipal school in Tanda itself and a lower primary school in Mubarakpur. There are about 5.(90) houses in the town, but only a few of these are built of brick. The market is still of considerable importance, the chief bazar days being Mondays and Thursdays. About a mile to the west of the town in Asopur is the tomb of one Shaikh Harun, a hely man who came to these parts about five centuries ago and who was put to death by the pagans. A considerable fair is held at his tember. the first Sunday of Bhadon, when about 10,000 persons assemble from the neighbourhood. A mile further west is the Imambara of Husain Ali, and here the tazias are buried at the Muharram, which is also largely attended. ('lose by is a masoury platform envise) by the M isalmans of the place, and here Saiyid Salar is annuall commemorated on the first of Jeta, and a large number of people of both creeds assemble to do honour to the saint. In Tand. itself considerable Hindu fairs occur at the Rumlila, and also at Ramnaumi and the full moon of Kartik, when some 12,000 personassemble for bathing in the Ghagra. The population of Tamia including that of Muharakpur, with which it is united for murcipal purposes, amounted to 13,543 at the first Oudh senses . 1869. The total rese to 19,954 in 1881, but fell again to 1972! at the following census. Since that time it has remained almost stationary, and in 1901 the town contained 19,853 inhab units . whom 9,605 were males and 10,248 females. Of the popul h p at the last census 8.946 were Hindus, 10,838 Musalmans, 20 Jan. 14 Christians, and 35 Aryas and others. In point of size it is time sixth town in Oudh.

Tanda was constituted a municipality from the 1st of April 1870. The board consists of 13 members, of whom ten are elected,

the remainder being the deputy commissioner as chairman, the tabelldar as vice-chairman, and an assistant commissioner. The chief source of income is a tax on circumstances and property, assessed annually by a sub-committee of the board. Other heads are receipts from rent of nazul lands and houses, bazar dues, the sale proceeds of manure, pounds, and license toes for hackney carriages. The expenditure is chiefly devoted to conservancy and the maintenance of the town police force, which numbers 29 men of all grades. The details of income and expenditure since 1891 will be found in the appendix.\* The town is fully equipped with good metalled roads, conservancy building and plant, and a mulcipal office, and is well able to maintain its property in good order.

### TANDA Parguna, Taked TANDA

This pargana forms the western por not of the talent and consiste of a carrow strip of country, from 15 to 20 miles long and from five to seven miles wide, I, mg along the right built of the Ghagra, which separates as from the Basted street. To the west lies pargana Amsin, to the east Birhar, and to the south the Akbar-A portion of the southern boundary - formed by the Thirwe -tream, which takes its rise in the Ansia pargana and flows east for about half the I very of the sea here lateler of Tanda and ther turns somewhat abrup by manific fallace the Chagra te Time two evers fram it greater posthe east of Tanda town tion of the pargues; but in the say sense oregons acceleration of thils in which the Taunri has its regin. Detail there the whole pargana are nomerous juds, many of which because the Tochof are those of Feedut, Masra, Ballus-Jogdi put, Fetti put and The Purdur that is the east to emercial we're the Pidrwa by a deep cutting about a nil in long , who is practically the only artificial drainage channel in the who pargonal In several cases, and particularly at Madrips, one and by the neighbourhood of the Wils is hable to be numbered in yer's cf heavy rainfall.

Along the Chagra below the top he bent to a marrow stray of allovial soil in which the villages are told on a short-term scalement. Above the high bank the soil is a sandy loan; but sand

<sup>•</sup> Appendix, Table XV.

predominates only in the north-west corner and in a few villages along the Thirwa. The interior portion is mainly loam, but there is a large amount of clay in the depressions, this being especially the case in the south-west.

The total area of the pargana in 1904 was 86,652 acres or 135 square miles. The amount is liable to variation owing to changes in the course of the Ghagra, and the present figure represents an accretion of over 7,000 acres since the first regular settlement. At that time the cultivated area amounted to 59 per cent. of the whole, but the subsequent morease has been large, as at the last assessment is less than 54,401 acres or 67 per cent, were under the plough. This figure has been well maintained in recent years. and in 1904 the total was 55,258 acres or 65% per cent., while 22,767 acres bore a double crop, the development in the latter direction having been extremely rapid. Of the remainder, 12,821 scres were classed as culturable, but this included 3,993 nerounder grove-a figure which has of late years shown a tendency to decline; there is a fair amount of old fallow, but only a small area remains which has never been brought under the plough The barren area amounted to 18,575 acres, but of this nextly three-fourths were under water and of the rest all save 1,177 acres of actually unculturable waste was occupied by sates, roads and In a wet year means of in igation are generalis sufficient and only a few villages suffor from an inadequate supply, the general complaint is then of too much water rather than of too little; but there is not adequate protection by wells, which are few in number and difficult to make. In ordinary years sour what over 45 per cent. of the cultivated land is imigated, meet of this being watered from the tanks and streams, although the wellirrigated area has increased of late years. The system of agriculture presents no special features. The kharif area is very much larger than that shown in the rabi. Much of the light soils will on grow rain crops that need no it rigation, and there is a large proper tion of heavy clay soil in which rice alone can be grown. I'e chief kharif staples are rice, arbar, and kodon, while sugarouse of extensively cultivated and a small amount of indigo is produced In the rabi, wheat, peas, gram and barley make up the bulk "! the cultivation, the last having been supplanted to a considerable

extent by wheat during the past thirty years. There is very little opium cultivation, but a fair amount of tobacco is raised in the better lands.

At the last settlement as much as 72.67 per cent, of the land was held by ordinary tenants at cash rates; 11.91 per cout. was cultivated by proprietors as sir or Lhudkasht; 3 37 per cent. by nuder-proprietors; and 6.95 per cont., the largest proportion in any pargana of the district, was held on green rents, but well land is as a rule of a very inferior description. For the rest, 131 per cont, was rent-free or hold at favoured rates and 73 per cent. by occunancy tomants. The average cash rate was Rs. 5 27 per acre, rape log from Rs. 4.65 in the case of the higher castes to P = 5 (3) rid by low caste tenants. The advantage obtained by the fermer is only 13:89 per cent., or less than in any other pargana. The classificaltivating classes are Brahmans, Rajput-, Musalmans, Kurmis and Ahirs. The two last are cultivators of a superior stance, but the hest are the Murans, who are, however, not very numer me. The revenue of the pargana at the summery settlement are counted to Rs. 60,344. At the regular assessment this was raised to Rs. \$4,633; but the demand was subsequently reduced to Rs. 81,986 The present final demand steads v. Rs. 1,08,125, including Rs. 210 nominally assessed in revenue-tipe lands. The enhancement is large, amounting to nearly 35 per cent,, but the incidence is still fairly low owing in part to do andy instance of the soil and the large number of programms variges. The total evolutes the sum of Rs. 3,032 at present as a cit or the adaptid mahals. Those number 15 in all; they were demarkated and as eased at the time of the settlement for a period of the years only, except in the case of Mahripm, in which the settlement was made conditionally for the full term at a revenue of R. 40. The others came up for revision in 1993.\*

The population of the pargana was the comment of at the Oudn census of 1869. It then uncounted to 03,529 scale. This cose to 84,890 in 1881, and ten years later to 99,452. At the last excess a slight decrease was observed the tetal number of inhabitants being 96,037, which gives an average leasity of 768 to the square mile. Classified according to religious, there were 75,212

<sup>•</sup> Appendix, Table IX.

Hindus, 20,638 Musalmans, and 187 Christians, Jains and others. The principal town is Tanda, with which the history of the pargana is closely connected. Other large villages are Iltifatganj, Mubarakpur and Khaspur. The bazars, fairs and schools of the pargana are shown in the appendix.

Means of communication are fair. In addition to the metalled reads lying within the Tanda numicipality, a similar read runs' south-west from Tanda to Akbarpur, giving communication with the railway; along this is a line of telegraph. The second-class read from Fyzabad enters the pargana in the north-west corner, and after passing through Hiffatganj and Tanda crosses the Thirwa he an iron bridge and then branches into the reads leading to Azamgarh vid Baskhari and to Ramnagar and Bahampur. Other reads are these running from Hitfatganj to Akbarpur, from Mubarakpur to Surhurpur, from Phulpur on the Chagra to the Azamgarh read and from Akbarpur to Baskhari, which traverses the south-eastern corner. There are several ferries over the Chagra, all of which are managed from the Basti side.

The pargana in its present form dates only from 1869, when it was constituted by the amalgamation of the two old parganas of Khaspur-Tanda and Iltifatganj, the latter being in early day known as Naipur. This was a small pargana consisting of only 33 villages, and when the change was made 16 villages of it were transferred to Akharpur. Khaspur Tanda, too, was originally a small pargana, extending eastwards only as far as the Thirwa, the land beyond that river as far as the Birhar boundary being a part of Akharpur. In early days the tract is said to have been held by the Bhars, remains of whose buildings are still to be seen in the villages of Madarpur, Umeda and elsewises. They were displaced by various colonists, the most important of whom were Musalmans. The only Hindu settlers were the Kayastos of Saidpur, Daipur and elsewhere.

One of the oldest families is that of the Maliks of Khaspar said to have been founded by one Malik Khas Zaludi of Baghdad who settled in these parts and took up his readence at Khaspur, to which he gave his name. His descendants subsequently migrated to Sakrawal and Punthar, but one widow of the old stock remained with her daughter in Khaspur. This girl was

subsequently married to Saiyid Hamid of Iran, who sottled in Khaspur, and from him are descended the proprietors of Muhammadpur, the old Khaspur taluqa of 53 villages having been conficuted after the mutiny on account of the persistent rebellion of latazzul Husain, who took an active part in supporting the rebel maxim of Gorakhpur.

The Shaikhs of Rasulpur and Asopur are descended from one Khalil-m Rahman, a native of Turan, who, about three centuries ago, was appointed quai of the pargana and took up in residence near the present town of Tanda. He acquired an estate of twelve villages, which was subsequently divided into two por many one of these soon disappeared, but the other passed by mannage to Savid Abd-ul-Baqi, whose descendant, Mulanumad Havet, obtained the pargana in jager and was practically the tounder of the own of Tanda. After his death the jayer was resumed, but his sons retained the estate till 1790, when it was taken under direct management. In 1794 Mr. John Scott, a mere and or funda, farmed the entire pargana of Khaspur and subleased it in two portions, the Rasulpur estate of 51 virage, being taken by Ghasanfar Ali, son of Muhammad Hayat, and the Asoper property of 26 village, by Husain Ali, nephew of Gha act a Ar. Mr. Scot.'s farm ceased in 1796, but there two mer, centier a to hold their leases till 1820. Chazan'ar Ah was succeeded on a son-un-law, Abbas Alt, who held Rusnipa, all its confiscation after the mutiny. Husain Ah was also succeeded by his on in-law, Ah Hasan, whose property was in 1819 incorporated ato the taken of Samanpur and his representatives now hold only substituted tights.

The small pargana of littfatganj was ream hold by the Mughals of Alanpur, a tannely tounded in the day of bloomer one Mir Alan of Deldi. His descendance obtained to the villages, and in 1795 increased their property by the addition of seven others. In 1809 these were all included in the Purpar trioque; but in 1821 Subhan Bog, whose brother was in the British service, managed to recover the 19 villages and the twelve other which had been added by the Purpar taluques. The representatives are still in possession of this estate. The property includes six villages formerly held by the so-called Pathans of Dealman, who were

descended from one Rai Dholi, a Gautam; they lost their estate as early as 1809. The Pande Brahmans of Phulpur at one time held 36 villages, but these were sold or mortgaged to various taluquars, and in 1850 all that remained passed into the hands of the Bachgotis of Bhiti and Khajurahat.

At the present time the pargana contains 285 village. divided into 584 mahals. Of the latter, 253, including 153 held in subsettlement, are owned by taluqdars; 212, of which 82 are subsettled, by zamiudare; 82 by pattidari bodies, while one is nazul, two are the property of Government, and two revenue-free, Of the various taluqdars holding land in the pargana Saivid Abu Jafar of Prepur owns eight villages and portions of four others, and his kinsman, Mir Rahat Hu-ain, has fourteen villages and twelve pattis; the taluquars of Samanpur hold 24 villages and two pattis; the Kayasth taluqdar of Rasulpur owns nine villages and four pattis, which were bestowed on his grandfather after the mutiny; the taluquar of Bhiti holds three villages and three pattis, and his relative of Khajurahat five villages and six pattis. The Rejkumars of Meopur Dhamua are in possession of 1! villages and 13 patti-, and the Raja of Dera of four villages. One village and part- of five others is hold by the Saivid talugdar of Kataria, while the Palwais of Raswar and Makrahi own three and four pateis respectively. The remainder of the parganis chiefly in the hands of Musalmans, Brahmans, Kayasths and Rajputs of various clan-. The subsettlement-holders, who are :: possession of about 18 per cent. of the whole area, are generally in poor circumstance-

#### TANDA Tahsil.

This tabail forms the north-eastern sub-division of the district, lying on the right bank of the Chagra, which separates it from the Basti and Gorakhpur districts on the north. To the south he Akbarpur and the Atraulia pargana of Azemgarh, while to fine east is part of the Sagri tabail of that district. The western boundary is formed by pargana Amsin of tabail Fyzabad. The total area is 230,765 acres on 360-57 square miles. There are in all 806 villages, divided at the last settlement into 1,905 mahals. The tabail consists of the two parganes of Tanda and Birhar, of

which the latter occupies the eastern, and the former the western, portion. Up to 1904 the tahsil also included Surhurpur, but this was then transferred to Akbarpur.

In its physical characteristics the cahall is divided into two well-defined areas, besides the few alluvial mahals in the bed of the Ghagra. Bordering that river is a narrow strip of good upland villages, mostly well cultivated, but much better in the eastern than at the western cud. South of this is a lowlynny tract which in wet years becomes waterlogged. The western part of this draws into the Ghagra by the Thirwa stream, but the stretch of country in the neighbourhood of Ballia-Jagdispur, Deol at, Pria Parsa, Bamani, Baskhari, Kichhauchha, Bhidund, Bakia and Garha is very imperfectly drained by the Tuatri and Pikta streams. In consequence, the variations of season are more felt in this part than obswhore. The eastern and of this tract is an usar plain, but the most barron part of it has round the sources of the Pikia. There are no icrest- in the tabal, of dhah jungle and user land there is but little in pargara Tanda, but in Birhar from Baskhari eastwards there are many chick patches of Black.

The Gliagra forms the northern boundary the some 16 or 17 miles. The Thirwa, tising in pargain Am in down out and forms the boundary with Akburpur; it doen bear nottoward, and fells into the Glagen close to the town of Tanda the stream holding a good deal of water even in the cold weather in a arrmal your. The Taunri originates in the swamp by Declat and sort; pa-t Baskhari and Kichhaudha to the border between Bullar and Suburput. It follows the line of the tabil boundary and crio gethto Azamgerh. The small stream known is the Barja forms the southern border of the extreme eastern ead of the (al. 3), where It is a spoliou stream it falls into the old had of the Grassia and close not last long into the cold weather. The Fokia 1888 from the same swamps as the Taners, being an alternative of thet of their everflow. It forms the southern boundary of Bulan for ome distance between the Tauari and Sucja, but ultimately crosses the eastern extremity of the tabult and tall- into the same ald channel as the Sarju, but higher up stream; for mest of its course it has a deep and well-defined bed.

The taheil is administered as a sub-division in the charge of a full-nowered magi-trate on the district staff. The tabsildar, who resides at Tanda, is assisted by a naib-talkildar and the usual establishment. There are four supervisor quaunges and 153 patwaris. For police purposes there are stations at Rammagar. Baskhari and Tanda. The circles have purely conventional boundaries and their lack of agreement with the rovenue areas ia source of some incorvenience. Parts of the tabell are extremely romote from any thana, and the subdivision is the most remote from the district headquasters. A small portion of the Tands pargana lies within the juri-diction of Ahrauli in Majhaura. Tapda and Maharakpur have a force of municipal police, while the Act XX towns of Kichhauchha and Baskhari maintain their own watch and ward. The rest of the district is guarded by village watchmen, who are paid from the rural police out Tanda is not a criminal town, and there is no village in the subdivision with a bad name for babitual law-breaking.

Statistics regarding agriculture and irrigation will be found in the several pargana articles. The annual revenue demand at the present scalement is Rs. 3,07,883; acarly two-thirds of this is due from the Palwar taluqdars of pargage Birhar, who all perwith much difficulty and have had to sell some of their village since the southment. In Tanda the talagdan area is small and the owners are better managers, but some meanyoutence is can of by the large pattidar mahals. In the Palwar estates of Birber the talandar right in each sub-ettled village is, as a rule, held by one owner, thanks to the work of Mr. Woodburn in 1878 of thereabouts; but many of the kham villages are divided field ... field, and till recently each owner had his own patwari, so that there were three or fear patwaris in one village, each recording the same field as belonging to his particular mahal-a system ward produced continual uscless suits in the rent and revenue contain Though the marrangement of patwari circles has had aren effect, no real improvement can result till the kham villages of also divided by agreement of the owners like the subsettled ones These peculiarities render the work of this tabil very difficult

The tabail is well supplied with means of communication. although it lies off the railway. The road system divides itself

into two classes. The first comprises those roads which pass through the tahsil giving communication to the places beyond its limits; and the second consisting of those which have been constructed for purely local convenience. Of the former the chief is the main road from Fyzabad to Tanda and Azamgarh, which runs through Baskhari and leaves the tabil near Neori, a secondclass road, bridged and raised throughout. Through Baskhari and Ramnagar runs the road from Akbarpur to, Kanbaria ghat and Gorakhpur. The portion between Ramuagar and Jahangirganj also belongs to a road leading from Tanda through Haswar to Balramour. Another second-class road leads southwards from Tanda to join the Fyzalad-Jaunpur road at Surhurpur in the Akharpar tahsil. The only metalled read, excepting a few miles within the limits of Tanda municipality, is that from Tanda to Akharpur, although the road from the latter place to Kamharia is now being unproved for metalling. The purely local roads are numerous and their position may be seen in the map.

There are several ferries over the Ghagra connecting the tabail with the Basti district, and one at Kambasia crossing to Gorakhpur. Most of them are maneged by the Basti district board, the only exceptions being those at Kambasia and Chandipur. The Thirwa stream is crossed on the roads from Akbarpur to Iltifatganj and Tamba by iron girder beidges and a similar bridge crosses the same stream latween Tanda and Muhatakpur. The smaller rivers are crossed by temporary buidges in the dry remon, the only masurev structures being those on the road from Chahora to Jalalpur. The want of proper courings over unfordable streams is greatly felt in this tabail. There is a road bungalow at Tanda, while others are being built at Paskhuri and Jahanginganj.

At the first Oudh census of 1800 the tabil contained a population of 182118 persons. The next enumeration of 1881 showed a very marked increase, the total being 282 731, while on years later it increased to 263,687. The last censurement that of 1901, when the tabil contained 119 392 inhabitance, dowing a considerable decline, but still giving a density of 694 persons to the square mile. Classified according to religious, there were 210,925 Hindus, 38,209 Musalmans and 188 others, Jains, Aryas and

Christians. These figures now given in each case refer to the tabsil as it now stands, whereas the census statistics include those is Surhurpur.\* The population of the tabsil is mostly agricultural in character, but a considerable proportion is engaged in trade and especially in the weaving industry, which still flourishes at Tanda Iltifatganj and other places.

#### TANDAULI, Pargana Amsin, Tahou FYZABAD.

A small village in the south of the pargana, lying in latitude 26° 37′ north and longitude 82° 21′ cast, on the main read from Fyzabad to Jaunpur, at a distance of 16 miles from the district headquarters. The read here crosses the loop line of the Oadb and Rohilkhand Railway, and at the crossing is the station, from which a branch read runs north-east to Dilasignaj on the Chagra Tandauli is but an insignificant place, containing nothing interest save an upper primary school. The population at the last census numbered 843 souls, the majority of whom are Brahmans The total area of the village is 368 acres and the revenue Rs. 700 It formerly belonged to the Raikwars of pargana Amsin, but the possessions were soized by Raja Darshan Singh, and the village has since been included in the taluque of the Maharaja of Ajedhan
